The Koshland & Italie Co., manufacturing and wholesale jewelers, 7th and Chestnut Sts., have applied for articles of incorporation under the Pennsylvania State laws. The application is to be granted June 18. The incorporators are: Charles Koshland, Bernard Italie and George E. Donaldson, all of whom have been in the firm of Koshland & Italie and were previously with the old firm, Wm. Morris & Co., which they succeeded.

A large party of members of the Jewelers' Club participated in the opening recently of the "Ours Club" at Atlantic City, which is regarded as an auxiliary of the Jewelers' Club. Among those who went to the seashore to join in the festivities were: J. Warner Hutchins, Jacob Bender, Jr., John Brandt, Fritz Bloch, Joseph Cadwallader, A. J. Le Jambre, Jacob Alburger, L. Whitehead, J. Clifford Wilson, Charles Eisenlohr and about a score of others, all well known to the trade.

The plate glass window of M. D. Sanders' jewelry store, 713 South St., was smashed last week by a thief, and alarm clocks, spoons and other articles were stolen. The thief was captured before proceeding far and the goods recovered. He was identified as William McElroy, an old-time thief, and promptly sent to jail. While being taken out of the van he made a futile dash for liberty. The incarceration of McElroy, familiarly known to the police as "Old Dock," is a relief to jewelers, whom he almost invariably makes his victims.

L. P. White removed last week from 7th and Chestnut Sts. to the Burd building at 9th and Chestnut Sts. Mr. White now occupies the entire front portion of the second floor of the building, comprising three large airy rooms. In the old location the increasing volume of business crowded the establishment. In the new quarters Mr. White has the advantage of elevator service, a modern lighting and heating system and room for a larger stock which is to be handled, especially in clocks and watches. Three large new safes have been added.

Bigalke & Eckert Co.
IMPORTERS OF WATCHES,
 No. 1 MAIDEN LANE, NEW YORK.

Single and Split Second Timers in Nickel and Gun Metal Cases.

Complete Assortment of Chronographs, Split Seconds and Minute Repeaters.

699 Broadway.

**ATTLEBORO
MASS.**

Pacific Coast Notes.

F. A. Marcher, of Los Angeles, Cal., has been visiting the trade in New Mexico. John Hood, a jeweler of Santa Rosa, Cal., has moved his store into new apartments in the Mailer building in that city. J. H. Holcombe, formerly with Paul V. Martin, of Haywards, Cal., has left for Argentine Republic, where he expects to remain for a year.

J. R. Hicks, a jeweler of Silver City, N. M., has secured quarters in the new All Block, which will be ready for occupancy during the coming week. Mr. Hicks expects to be fully installed in the new store by the middle of June.

The Hoffman Jewelry Co., Columbus, Ohio, have secured a controlling interest in several gem mines near Pala, San Diego County, Cal., including the Tourmaline Queen, Tourmaline King, Homestake and of whit Gem. O. S. Hoffman and R. N. Whitford, president and vice-president of the company, have been in San Diego County in the interests of the company. Mr. Whitford is now on his way back to Columbus, but Mr. Hoffman will remain permanently at San Diego.

The safe taken to Napa, Cal., from San Francisco, by Mr. Fairbrother, a few days ago, has been opened. It contained about \$300 worth of gold and silver watches, emeralds and gold rings, sets of cutlery, and other jewelry, all in the trays in the safe; also about \$65 in coin, several insurance policies and a "greenback." Mr. Fairbrother drilled holes in the outer doors of the safe and succeeded in opening it Saturday. The watches, chains, rings, etc., were somewhat damaged by the extreme heat, the smoke and steam.

Rochester.

The following judgments were taken in Municipal Court recently by default: Don Danks vs. Jacob Athenuse, \$42.55; Don Danks vs. John Poloski, \$8; Durward Danks vs. Herman Gohn, \$22, and Malcolm I. Danks vs. Elmer Warren, \$10.80. Fire breaking out in the cigar store adjoining the store of E. E. Bausch & Son and the E. S. Ettenheimer & Co., last week, caused some uneasiness to these concerns for some time. The firemen got the flames under control in short order, however, and did only damage the two adjoining stores offered was through the smoke which penetrated into both establishments.

Gloves, purses, watches, scarf pins, rings, shirt studs, brooches and many other articles of jewelry disappeared mysteriously from this city on Decoration Day during the celebration. One of the heaviest losers to the light fingered gentry was Charles Scheid, of the jewelry firm of Merkle & Scheid, on W. Main St., whose pocket was picked of a purse containing \$85 while he was watching the parade from a point in the vicinity of his store. How the theft was committed only the thief knows.

The Henry Oemish Co. is preparing to make some extensive alterations in its store at the corner of East Ave. and Main St., E. Arrangements have been practically completed whereby Mr. Oemish secures the use of the store adjoining on Main St., East and East Ave. The interior will be

completely rearranged, there will be new and modern fixtures installed, the entrances will be changed and the store remodeled so that it will, it is said, be one of the most modern and handsome in the city. Work will probably be started within a month or so.

Baltimore.

William P. Jacobi, of Jacobi & Jenkins, has moved into his new country home, recently built near Lauraville.

Charles C. Stieff and Joseph Tate were appointed co-receivers with David Ambach for the J. W. Putts Co. last week by Judge Morris. Each gave a bond in \$50,000.

A. Wallenhorst has taken possession of his new store at 11 and 13 S. Gay St. The building stands on the site on which his store stood before the great fire of 1904.

Among the numerous packages of unclaimed freight at the claim warehouse of the Baltimore & Ohio Railroad, at Locust Point, was one containing 100 nickel watches. A few days ago a thief broke into the box and stole 18 of the watches. Hugo Reese has since been arrested.

The bronze trophy offered by the New York Clothing House as the prize for a marksmanship contest on the State Rifle Range in the week of Aug. 13, was ordered from the Hennegen, Bates Co. The bronze figure, called "Post Pugnam," is 35 inches high and represents a warrior sheathing his sword. It rests upon a mahogany base on which is a silver plate suitably inscribed.

Jacobi & Jenkins, silversmiths, 216 N. Charles St., are having their entire building remodeled. The salesroom on the first floor will be extended back to twice the size it occupies at present, and a newly designed store front will be introduced. The factory which formerly occupied the rear of the first floor has been moved upstairs to allow more room. All the old partitions are to be removed, so as to make the salesroom the more spacious, and to allow an abundant display. The offices will be in the rear on the left side. The stairway leading to the second floor will be reversed so the ascent will begin from the back instead of the middle of the room. New floorings are to be laid, both up and down stairs.

The official and souvenir badge of the National Credit Men's Association, whose convention will be held in Baltimore, June 13, 14 and 15, was made by the Hyatt Mfg. Co. The design is a unique and tasteful creation, and is of sterling silver. Beginning at the top it suggests the famous products of Maryland—the canvas-back ducks, terrapin, oysters and crabs—arranged in a clever manner surrounding the shield of Maryland which is also encircled by the name of the Association. Below this group is a sphere upheld by a female figure, symbolical of credit. Baltimore is prominently brought out on the map in raised letters. This female figure rests above a phoenix, indicating the new Baltimore rising from the ashes. The seal of the State is in colored enamel.

Thieves recently broke into the store of D. Girson & Co., 20 E. Park St., Butte, Mont., through a rear window, and stole seven watches and eight rings.

Providence.

After a long sojourn at 109 Friendship St., the George B. Darling Lapidary Co. has now removed to 212 Union St.

The directors of the Chas. E. Hancock Co. held their annual meeting last week and L. H. Carpenter, the New York representative, was elected vice-president of the concern.

Among the buyers in town last week were J. D. Jacobs, of D. Jacobs & Co., Cincinnati; A. C. Becken, Chicago; Jesse Levy, Philadelphia; Mr. Rothchild, Chicago; Miss Mulcahey, Chicago.

The stock of the T. F. Greenwood Co. has been disposed of to Paul and Rinaldo Castiglioni and Joseph Capaldi. The new owners are president, treasurer and secretary, in the order given.

Councilman Parks, one of the local manufacturers, who occupies a responsible committee position in the Common Council, is taking an active part in the agitation now going on relative to city finances and the park problem.

A permit was issued last week to the Gorham Mfg. Co. for the erection of a two-story brick building to be used as a smelting shop. The structure will be 32.9 feet in height and will have a floor of reinforced concrete.

The Aldrich Battery, of which E. Merle Bixby, in charge of the silverware department at the Shepard Co.'s store, is Captain, is planning to have a reunion and dinner. This was an organization formed during the campaign a year ago.

A draft for a trifle over \$3,100 has been forwarded to the Jewelers' and Silversmiths' Relief Association of San Francisco by Treasurer Holmes, of the New England Manufacturing Jewelers' and Silversmiths' Association. Shreve & Co. will see that the money is turned over to the proper parties.

The spoon and die departments of the Gorham Mfg. Co. held their annual Summer outing at the Warwick Club, Saturday. About 100 participated, and a most enjoyable time was had. There was a series of sports, and this was followed by a ball game which proved one of the features of the occasion. A Rhode Island clam dinner was served.

It is probable that on the date of the annual outing of the New England Manufacturing Jewelers and Silversmiths' Association, June 22 there will be an innovation in the form of a baseball game between nines representing the Attleboro and this city. Some of the jewelers are by no means strangers to the ball field, and many of those who do not play themselves are active "fans." Invitations for the contest have already been issued.

In the District Court last week Alfred Alexander, said to hail from Boston, entered a plea of not guilty to a charge of William O. Clark, a manufacturing jeweler, that the prisoner had stolen \$300. Mr. Clark claimed that while riding in a hack between Warwick Road and Lenox in company with Alexander and others three \$100 bills had disappeared from his clothes, and he accused the prisoner for taking them. Alexander was held in \$1,000 bail.

FOR FALL TRADE

June furnishes the first opportunity for “looking backward” on the year’s progress and planning the Fall Campaign. The progressive Retailer realizing the value of **HB** rings will not hesitate when making his selection for the new season.

Our Fall line is more complete than ever before and the beauty and variety of designs combine to make an attractive and salable product.

Memorandum selection sent to responsible concerns

BRITISH PATENTS.

BRITISH PATENTS, 1905, FROM *The Illustrated Official Journal.*

ISSUE OF MAY 16, 1906

33. NECKTIE, ETC., FASTENINGS. A. SCHWABER, Hanover, Germany. Jan. 16. *Necktie-Retainers, Sleeve-Links, Flower Pins, Buttonhole, Jewelry Fastenings.*—Relates a stud with a gripping-device in the head for

purpose of retaining neckties, etc., and for holding such objects as flowers, orders, etc. The head is formed in one piece with an axial hole throughout its length leading into a hollow in the stem. In the stem is placed the loop *b*, the free ends of which are formed into claws *e* normally held in a recess in the head by the spring *c*. By pressing the false base-plate *f*, the claws can be made to protrude and grip the necktie, etc., which on releasing the plate *f*, drawn into the head of the stud. In a modification, no spring action is applied, the claws normally projecting somewhat beyond the head to enable them to be pulled out

38. FOUNTAIN PENS. R. A. HAMILTON, W. IRVINE and J. P. LEIN, all of New York, U. S. Jan. 16.

In a self-filling reservoir pen, the compressible reservoir 5, of rubber or other suitable material, secured to the contracted portion 4 of the body portion 1, which has a duct 3 leading to the nib 2.

The reservoir is adapted to be compressed for filling by a bar 9, of curved cross-section to avoid impinging the reservoir, extending nearly the whole length of the reservoir. A spring 8, preferably of flat form and attached to, or formed in one with, the protecting tube 7, is attached at the other end approximately the middle of the bar 9, so that, when the compressing force exerted by the operator's finger through the elliptical opening 13 is withdrawn, the spring 8 withdraws the bar 9, and allows the tube 5 to expand freely and take in ink. The end-tube fits over the tube 7 to prevent accidental compression of the reservoirs, slits 11 being formed in the tube 7 to allow it to expand and contract and engage the end-tube.

94. SLEEVE-LINKS OR STUDS. H. HODGETTS, Weston-super-Mare, Somersetshire. Jan. 17. In one form the stud is made with a base plate

a rigidly connected to a stem *b*. The end of the stem is formed as shown in Fig. 2, and carries a head *c* jointed at *c* to the stem. The head *c* carries

a knuckle which is held in position by means of a coiled spring *h*. In a modification, heads *c* are pivoted to both ends of the stem.

925. PINCENEZ. A. OEHLSCHLAGER, Ruppinerstrasse, Rathenow, Prussia. Jan. 17. (Date applied for under Patents Act, 1901, Feb. 16, 1904.)

The frames of so-called cylindrical eyeglasses are constructed so that each of the two relatively displaceable parts of the bridge forms one piece with

the corresponding eyeglass frame, being set back by means of a cranked portion or "break" at *c*. Fig. 2 is a plan of such a piece, previous to its being bent into the closed ring form shown in Fig. 3. A groove *d* for holding the glass is made in the part *b*, without interruption to the break *c*, and is made wider or deeper at the part *x*, Fig. 2, in order that the free end of the frame portion when it is bent round may be secured in it by soldering.

932. TELESCOPES. J. AITCHISON, London, Jan. 17.

The bodies of prismatic and other binoculars and telescopes are constructed of two parts, which are made from tubes of suitable cross-sections cut into lengths and fitted one within the other with their axes at right-angles to one another. Fig. 2 shows an inner part which is cut from a tube of the form shown in Fig. 1, and is then cut away at

the corners to fit into an outer part *f* cut from a tube of the form shown in Fig. 3. The two parts are held together by vulcanite or other outer plates; the prism systems are mounted on supports which may be attached to the slides *d*, as described in Specification No. 20,164, A.D. 1904, and the plates *b*, *c* are formed with openings to accommodate the eye-pieces and object glasses.

940. SAFETY-PINS. R. P. BROWN, Philadelphia, Pa., U. S. Jan. 17.

To prevent sideways movement, a projection *b*⁵ on the shield is bent over between the two side

wings *b*⁴, *b*⁵, to form a V-shaped seat for the pin. A triangular guide tongue *b*⁶ projects from the base of the shield and also serves to prevent the pin from slipping out of position.

1,121. CLOCKS AND WATCHES. W. McMILLAN, Milnegavie, Scotland. Jan. 20.

Escapements.—In the lever escapement, especially when used in stop-watches for timing pigeon

rates, etc., the lever *a* is provided with passing springs, *b*, so that, if it is shaken away from the

banking-pins *e*, the impulse pin *d* will not encounter it on the wrong side of the notch.

(Reference has been directed under Patents Act, 1902, to Specification No. 1249, A.D. 1874.)

Complete specifications accepted May 9, 1906.

4,366. BINOCULARS. AITCHISON.

19,650. CALENDAR-CLOCK. SATTLER.

1906.

1,810. HANDS FOR CLOCKS. BERTHOUD-HUGONOT.

7,593. MATCH BOX. GRAHAM.

Applications filed April 30 to May 5, 1906.

10,141. ASH TRAY. FREDERICK MELTON, London.

10,169. BROOCH. JOHN BRITCHER, Hastings.

10,174. FOUNTAIN PEN. JOHN NAPLETON, London. Complete specification.

10,190. HOSE-SUPPORTER. G. H. PHEIPS, London. Complete specification.

10,256. EYEGLASSES. F. H. WHEWAY, Birmingham.

10,267. PENCIL CASE. S. H. DONALDSON, London.

10,283. CIRCUIT-CLOSER FOR CLOCKS AND WATCHES. CARL SCHWAN, Berlin, Germany. Complete specification.

10,351 and 10,352. BRUSHES, MIRRORS, ETC. K. J. HINDE, Edghaston, Birmingham.

10,468. CARD CASE. W. T. CONNOR, Birmingham. Complete specification.

10,473. HAIR-PIN. M. E. A. WALLIS, Ashford, Middlesex.

10,557. FOUNTAIN PEN. THOMAS BATTY, Colchester.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued May 28, 1889.

403,943. SAFETY ATTACHMENT FOR WATCHES. C. G. KREBAUM, Havana, Ill.

403,999. GRAVITY CLOCK-ESCAPEMENT. FERDINAND GUNDORPH, Portland, Ore.

404,003. SAFETY-PIN. G. W. HERBERT, Birmingham, and SAMUEL GUINERY, Epsom, England.

404,027. PENHOLDER. G. W. BALDWIN, Schaghticoke, N. Y., assignor of one-half to G. H. Stevenson, same place.

404,039. UMBRELLA. C. W. HARRIS, Hartford, Conn.

404,092, 404,093 and 404,094. ORNAMENTAL RING FOR JEWELRY. G. H. KNIGHT, Providence, R. I., assignor to W. R. Lane & Co., same place.

404,099. WATCHMAKER'S LATHE. STEPHEN MESSERER, Newark, N. J., assignor of one-half to Jean Tack, same place.

404,102. CATCH-PIN. E. H. NASH, Westport, Conn., assignor to Lloyd Nash and E. N. Sipperley, same place.

404,127 and 404,128. CURLING-IRONS. G. L. THOMPSON, Chicago.

404,129. COMBINED COMB AND CURLING-IRON. G. L. THOMPSON, Chicago.

404,323. BUCKLE. G. M. TYRRELL, New Haven, Conn.

Designs issued May 30, 1899, for 7 years.

30,874. SPOON HANDLE. G. W. SHIEBLER, New York.

30,918. GARMENT-SUPPORTER. E. N. LA VEINE, Kansas City, Mo.

*Owing to a delay at the Patent Office the United States patents issued May 29 were not received in time to be used in this issue. They will be published next week.

OPTICAL DEPARTMENT

Fourth Annual Meeting of the OHIO OPTICAL ASSOCIATION

Association now known as the Ohio State Optical Association

COLUMBUS, O., May 30.—The Ohio Optical Association yesterday closed its fourth annual meeting. The sessions Monday and yesterday were well attended, and some important business matters were disposed of. The name of the association was changed, a new constitution and by-laws and a code of ethics were adopted, a section of optometrists was provided for and the organization decided that its members shall all be members of the American Association of Opticians.

The word "State" was added to the name of the association, making it "The Ohio State Optical Association."

The convention was called to order in the convention room of the Great Southern

order for Tuesday at noon. This committee was composed of F. P. Barr, Lancaster; A. L. Thoma, Dayton, and E. L. Jones, Sandusky. The report of Treasurer White was heard and received, showing the society to be in satisfactory financial condition. The treasurer was tendered a vote of thanks for good work during the year.

J. B. WHITE, TREASURER.

Hotel, Monday afternoon, at 1:30 o'clock, the morning having been spent in registration and hand shaking. After the reading and approval of the minutes, the members immediately got to work. The question of a minimum price list came up under the head of unfinished business, and on motion, action was deferred until the next annual meeting. The report of the Committee on Constitution and By-laws was received, and its consideration made a special

F. P. BARR, PRESIDENT.

After a discussion on the general topic of the good of the order, a motion was made by J. C. Eberhardt, Dayton, and carried, to the effect that a committee be appointed on ways and means to advance the interests of the association.

Next on the program was the president's annual address, delivered by F. W. Wallis, Columbus. Mr. Wallis reviewed the work done during the year. While the growth of the organization had not been remarkable, it was steady and healthy and satisfactory to the officers. He drew interesting comparisons between the Ohio association and other State associations of the country, and dwelt at length on the educational work inaugurated at the last annual meeting. He very strongly advocated advanced study for all members of the association.

The first lecture was by Prof. George A.

Rogers, Chicago, who was introduced by Mr. Eberhardt, his topic being "Diagnosis of Optical Defects and Verification of Findings."

The annual banquet was held at 6 o'clock in the evening in the hotel. The president had previously designated Mr. Eberhardt as toastmaster. There were several short talks and some story telling by Frederick King, Cleveland; George Spencer, Cincinnati; Prof. Rogers, and others, "Shop talk" being conspicuous by absence. The menu was as follows:

Russian Caviar with Egg.
Puree of Tomato aux Cratons.
Radishes. Pimolas.
Broiled Chicken Halibut, Maître d'Hotel.
Cucumbers. Potatoes. Croquettes.
Fried Soft Shell Crabs, Tartar Sauce.
Braised Calves' Sweetbread, Financiere.
Roast Short Ribs of Beef, Essence.
Peas in Cream. Browned New Potatoes.
New Buttered Beets.
Chicken Salad.
Lemon Ice Cream. Assorted Cake.
Cheese, Roquefort. Wafers.
Coffee.
Cigars.

An evening session was held immediately

E. L. JONES, SECRETARY.

following the banquet, at which there was another lecture by Prof. Rogers and a paper by F. P. Barr, Lancaster, vice-president of the association, he having chosen for his topic "Get the Habit."

The president appointed the new Committee on Ways and Means to advance the organization as follows: F. P. Barr, Lancaster; Fred A. Clough, Mt. Vernon; J. C. Eberhardt, Dayton; A. L. Thoma, Dayton; and C. D. Brooke, Chillicothe. A Com-

Optical Department.

on Nominations was also appointed, its members being: G. G. Boehm, Middletown; C. A. Bauer, Lancaster; G. A. Cornwell, Guster; G. S. Dietrich, Kinton, and B. J. Covert, Athens.

TUESDAY'S SESSION.

When the morning session opened yesterday a congratulatory telegram was read from President Scholler, of the Michigan Society of Optometrists, and on motion the Association voted thanks to him for his good wishes. Mr. Eberhardt spoke extemporaneously on "Ocular Nerve Economics," comprising in this talk extracts of the papers on the same subject which he recently contributed to THE CIRCULAR-WEEKLY.

Mr. Eberhardt prefaced his talk by giving some of his personal experiences in the city of Dayton as showing the need for the eyes of school children. He hoped to some day see a fund started where school children whose parents were inigent or partially indigent circumstances could be supplied with glasses. He has been a member of the Board of Education in Dayton, and has unusual opportunities of observation in this line.

The speaker advised against furnishing glasses for nothing in these cases. In order to get away from the charity idea, which is unpleasant to many who can ill afford to pay the regular price, he said he wishes the needed glasses at a nominal price; cost and a very small profit. Mr. Eberhardt was rather dubious as to how he could be received in the Board of Education, as five of its members were physicians. He had been warmly welcomed, however, and the physicians were his good friends, were deeply interested in optical work and often

referred cases to him. He was certain that all reputable physicians were interested in the advancement of the science of optometry and advancement of members of the profession through optical societies.

Mr. Eberhardt read a letter which had been sent out to oculists throughout the State by Dr. Stevenson, member of the State Oculists' Association and also of the American Medical Association, in which the latter called attention to the fact that the opticians had a State organization which was doing much good and held annual meetings which were largely attended. The fact was used to urge oculists to attend the State meeting of their own society. This Mr. Eberhardt looked upon as a very encouraging sign of the times and an indication of the good that comes through organization. The value of State meetings could not be measured in dollars, he said.

In regard to education, Mr. Eberhardt took the opposite of the old saw, "Beware of the man who knows one book." He advised members to know one book, and to know it thoroughly. He knew personally opticians who had read 20 or 25 books, and who knew this, that and the other, supposedly, but who "fell down" wonderfully when asked the simplest question. He advised a thorough knowledge of one book in preference to wide reading without absorption.

The balance of his talk was more technical, being a resumé, as stated previously, of articles by him which have appeared in THE CIRCULAR-WEEKLY.

The report of the Committee on Constitution and By-laws was then taken up and adopted section by section. The objects of the association, as stated in the new constitution, are as follows:

1. The encouragement of the science of

optics and the attainment of a higher practical and scientific knowledge by its members. (2) To discourage the indiscriminate sale of spectacles by irresponsible and incompetent persons. (3) The protection of its members from legislation harmful to the optical profession. (4) To promote good fellowship by holding annual meetings for the interchange of thoughts and experience, for mutual improvement and education.

Active and honorary members are provided for. The officers are president, vice-president, secretary, treasurer, executive committee of three and a membership committee of three. The secretary's salary was increased from \$25 to \$50 a year, and the treasurer was made exempt from dues in return for his services and placed under a \$100 bond.

There was considerable discussion regarding the duties of the Executive Committee. These were limited under the old constitution to practically nothing except attending to business matters requiring attention between annual meetings. The new constitution provides they shall elect the place of meeting, arrange the program and have charge of all "legislation and ordinary business not requiring a special vote." Mr. Eberhardt objected to this provision, saying it took from the president his most important duties. Mr. Thoma insisted the committee should have something to do so it would not be an almost entirely useless body. Mr. Thoma finally suggested the compromise arrangement that the president, vice-president and secretary should comprise the committee, and this was adopted. The Membership Committee, after some discussion, was given power to elect members.

There was a minority report in regard to the annual dues. The majority report pro-

A GROUP OF OPTICIANS WHO ATTENDED THE FOURTH ANNUAL CONVENTION OF THE OHIO ASSOCIATION AT COLUMBUS.

Optical Department.

vided that the annual dues should also include dues in the American association, and that all members of the State association should be members of the National body. The minority report provided merely for State dues. The majority report was adopted, after some discussion, Mr. Eberhardt speaking in its favor.

The Optometrical section was established without dissent. Requisites of membership are: Good standing in the Ohio State association, and evidence of qualification to be determined by a board of examiners.

The following code of ethics was adopted:

CODE OF ETHICS.

ARTICLE 1.—LOYALTY.

Section 1. Every member of this society shall feel it a duty to further the interests of the society, not only by attendance at meetings and payment of dues, but by supporting the work proposed by it.

Section 2. An optician can best show his loyalty by his personal conduct and the character of his professional work.

Section 3. An optician should avoid unkind criticism of others as being unprofessional.

ARTICLE 2.—DUTIES TO A PATRON.

The confidence shown in an optician by a patient placing his case in his care, should under no circumstances be abused. No exaggeration of a patron's visual imperfection should be made to influence a sale. The welfare of a patron's eyes should be above the desire to make a sale, and if glasses are not necessary the patient should be frankly told so.

ARTICLE 3.—DUTIES TO PHYSICIANS.

Cases that in any way indicate the need of medical treatment should be referred to a competent specialist or the family physician, and it is deemed unwise to suggest any kind of drug or eye lotion, but advise all such patients to consult medical authority.

ARTICLE 4.—DUTIES TO THE PUBLIC.

An optician should be diligent in enlightening the public regarding the care of the eyes and the causes and danger of defective vision and eyestrain. He should constantly endeavor to raise the standard of competency among opticians, and do all in his power to secure legislative recognition of the practice of optometry, and afterwards be vigilant to keep it effective and beneficial.

The joint question whether the word "optician" should be used in the code instead of "optometrist" and whether "patron" or "patient" was preferable evoked some debate. It was finally decided to use "optician" instead of "optometrist," thus holding out invitation to all interested in the optical business to become members. It was deemed best to take in all the opticians and make optometrists of them later. Nor was it deemed wise to "borrow titles or phrases, or pretend to be something which we are not," so the word patient was stricken out and patron inserted.

Adjournment was had for lunch, and at the afternoon session the Committee on Nominations reported the following: F. P. Barr, Lancaster, president; A. L. Thoma, Dayton, vice-president; E. L. Jones, Sandusky, secretary; J. B. White, Columbus, treasurer. The secretary was instructed to cast the vote of the body for this ticket. The new Membership Committee is: F. A. Stengel, Marion; C. A. McDonald, Columbus, and Josephine Nixon, Marietta. The Examining Board is composed of: J. C. Eberhardt, Dayton; F. W. Williams, Portsmouth; C. S. Hartman, Wapakoneta.

Last year's Executive Committee, composed of W. E. Harris, Columbus; E. Klein, Cincinnati, and F. A. Stengel, Marion, which acted as an Auditing Committee, re-

ported the books of the treasurer in good condition.

Letters were read from B. B. Clark, president of the American Association of Opticians, and F. Nelson Wyngate, Plymouth, England, extending best wishes to the Ohio association. A letter was received from the Cedar Point Pleasure Co. inviting the association to meet at Cedar Point, a Summer resort on Lake Erie, in 1907.

On motion, "Physiology of Vision," five volumes, were purchased for the use of members of the association.

The Membership Committee reported on 19 applications.

Prof. Rogers' third lecture was delivered at the afternoon session.

There were exhibits by the Julius King Optical Co., in charge of Frederick King and R. J. Sime; the White-Haines Optical Co., in charge of F. T. Prosser; the Columbus Pharmacal Co., in charge of H. E. White; the Eye-Fix Remedy Co., represented by Dr. Frank T. Leys; the Zonola Remedy Co., represented by V. D. Reese, and an exhibit of books of interest to the trade, by L. S. Wells. The Eye-Fix Co. presented the association with its badges—a gilt bar with the word "Member," from which was suspended by a small silk American flag a circular celluloid piece with the inscription: "Ohio Optical Association, May 28, 29, 1906, Columbus."

"Get the Habit"

(Address of F. P. BARR, Lancaster, O., before the Ohio State Opticians' Association, Columbus, O., May 28, 1906.)

THIS subject is to be a nucleus from which I will endeavor to evolve some new principles for the advancement of the optical profession, as well as a stimulus for new energy in good old principles. We must accomplish more in the next two years than we did in the last. We must move onward and upward or stagnation will throttle our future. In giving utterance to these words I am simply speaking the sentiments of the present as dictated by the spirit of progress. We must assume new attitudes in keeping with our gradually rising, influential and universally recognized profession.

The time has come when we must labor harder and make less noise; when we must be diligent in study and pay higher respect to ethics; when we must learn to recognize the sensitive ground over which we are traveling and be able to bridge the pitfalls accordingly.

Time and opportunity are ours; a network of knowledge, practical ability, justice and honor should be interwoven under such uniting circumstances until we are entrenched in the confidence of the people and the laws of our State, as the leaders of the most scientific profession and the noblest calling (outside the ministry) in the world to-day. Suffering humanity in various forms and conditions that have their origin in eye troubles, is making an appeal to us and we must heed the cry or in a few years to come we must bear the stamp of indifference and neglect.

We are maintaining State associations for the benefit of every soul within the State as well as for ourselves individually. But we,

as optometrists, are supposed to get the essence of learning and practical ideas and principles by our intermingling, so that when we return to our homes we may disseminate these truths, orally or through the chief medium—glasses—in such a way as to gain for us the deserving sympathy and praises of our fellowmen.

Much of the world is discouraged and many are despairing. Many are living with but one end in view—to satisfy the material wants of the day. Few rise to a bread and butter ambition. We must learn to have higher aspirations and ambitions, for we have difficult, exact and perplexing questions that call for inspiration not manifest in past years—clear, broad and comprehensive not heart as big as your body, and an optimism enthusiasm larger than both, will fit you in a following. Such a principle is your motto if you are going to be in the front ranks of the optometric profession, in which Ohio must and will win. "Get the habit" of being conservative, your convictions, be practical and abreast of the current of modern thought; above all, learn to exercise good common sense. Learn to think. "Get the habit."

Along these lines and for your consideration I present the following thoughts:

First—Leave it optional with the member individually of our State Association whether or no they affiliate with the national body.

Second—Have no member of our State association as president, vice-president or secretary unless he or she has affiliated with the national association and is in good standing at the time of seeking office.

Third—Make your president the delegate to the national body.

Fourth—In case it is absolutely impossible for the president to attend the national convention, the vice-president becomes the State delegate.

Fifth—Railroad fare for said delegate be paid out of our treasury.

Sixth—All other expenses to be paid said delegate, unless otherwise ordered, a two-thirds vote of attending members.

Leaving it optional with members of the State association as to whether or not they will become members of the national body.

We have members who do not care to affiliate with the American Association of Opticians, for it is of little interest to them personally and they never expect to attend these meetings. They would much rather contribute to the State association the amount required of them for the national body, thereby making the local organization stronger, which in turn gives, and creates great strength to the national association.

For the strength of a chain depends on the individual strength of its links, every State organization is a link in the great national chain.

Again, we have some strong ones who hesitate to connect with us because they do not care, nor feel able, to support the local association and American Association at the same time.

Under my plan if a man has any desire to advance, he will get so interested in optical matters by the time he has worked his way through the chairs in his local org-

Optical Department.

Anatomy of the Nervous System.

(Lecture recently delivered before the Rochester Optical Society by DR. RALPH H. WILLIAMS.)
(Continued from issue of May 9.)

LIGHT AND THE EYE.

NOW let us consider the conditions between light and the eye itself. There is no more vascular organ in the body than the eye. Outside of its crystal coats, it is a veritable network of arteries and veins. The iris is supplied with blood far in excess of the needs of its tissues and the ciliary process comes well forward beneath the iris for no other reason than to receive the action of light. You are all familiar with the appearance of the retina, a network of blood vessels.

But one says, "What has this to do with our business?" We are only interested in the manufacture and proper fitting of spectacle lenses. This probably is true, and yet you must guide your footsteps carefully and see to it that you deprive the tissues of none of the forces nature has intended for their health and growth, not alone because of the responsibility you assume towards your fellow when you presume to meddle with the care of the most priceless gem in this casket of life, the delicate, sensitive eye, but commercially, because the medical men have been looking for many years for some good reason to wipe the optometrist from the face of the earth, and it will be well for you to keep abreast of the times.

The most delicate of all tissues, those of the eye, feed, grow and live mainly upon the health ray light. We know that the normal healthy eye absorbs the health rays. We know that the lenses of regular stock prevent the health rays almost wholly from reaching the eye. We know that the vitalizing energy of light imparted to the normal, unspectacled eye is largely obliterated by the regular lenses. Finally, we know that the health-ray lenses transmit these health rays and do not interfere with the conditions above referred to. In short, we know that a health-ray lens brings back a deficient eye to the nearest possible condition of a healthy and normal eye, but if we take away those health rays the blood vessel would wither and the tissues starve, as is the case in cave animals; and though we may have corrected a serious visual trouble, stopped an enormous amount of headache, and done, from an optical standpoint, a really marvelous thing, yet in most cases the cure may be worse than the disease. The continued use of our present lens material by successive generations will cause hereditary deficient eyesight and eye weaknesses of allied nature.

HYPEROPIA.

Let us take a few cases, for example. First, hyperopia. At birth nearly all eyes are hyperopic, developing gradually until the age of 12 to 16, when they are by most authorities considered full grown. Great writers claim that the majority of cases of hyperopia are an under development of the eyeball from front to back. We say the eyeball is too short. Now, if a child of 10 be hyperopic three diopters we prescribe a plus spherical lens, which, as is well known, corrects the eye strain. But in so doing our material used absorbs the health rays and produces the evil changes in tissue and blood before referred to.

This result is not confined to the eyeball and its parts alone, but it extends particularly to that third of the brain which is a part and parcel of the visual apparatus. Though we are not blind like the cave fish or salamander, it cannot be denied that the tendency is in that direction, and sufferers are compelled to wear lenses through life, or suffer severe "eye strain" and accompanying disadvantages.

MYOPIA.

In myopia, the condition is no better. It is caused in most cases as is hyperopia in the adult, by the failure of the blood to carry the proper food to the tissues, or by a failure of the tissues to use the blood after receiving it. This malnutrition produces a weakening of the sclerotic coat. The weakened tissue, unable to endure the pressure of the eye muscles, gives way sufficient to increase the depth of the eyeball from front to back.

For the cure of this condition the eye must take on the proper elements to stay this disease and restore strength to the enveloping coats. Lenses should be used that will cause the blood to perform its function, in addition to correcting refraction.

When we put glasses in front of the eye which absorb the health rays, though we may have corrected the error of refraction, we have added fuel to the fire so far as the curing of the trouble is concerned.

CATARACT.

Again, the cataract, though a different disease, is a condition caused by faulty nutrition. The use of glasses which absorb the health rays will accomplish the same irreparable injury, as pointed out above, while glasses which permit the passage of health rays will be a handmaiden to Nature by giving the tissues food and growth.

OTHER EXAMPLES.

Examples multiply, but these three will suffice. What is true of hyperopia, myopia and cataract is true of every neural disease of the eye not resulting from external injury or systematic derangement. They rest in part upon insufficient or faulty nutrition, and the health rays must, therefore, be utilized.

(To be continued.)

The *Globe News* is the title given to a trade paper published on the 15th of each month by the Globe Optical Co., Boston, Mass. Its pages, of which there are 12, are 6 in. by 9 in. in size. Its motto is: "For Your Interests and Our Own." The first issue contains a description of a number of the Globe Optical Co.'s departments; an essay on "The Man Who Sells Things"; an article on "Competition" and one entitled "Who Are the Fortunate Ones?" Some of its principal features are the departments called "Idea Exchange," "Globe News" and "Classified Advertisements." In the first readers may air their views; in the second are described the latest goods placed on the market, and the third contains "wanted" and "for sale" ads. One full page is devoted to a novel scheme. Here, each issue, will be found the notice of a special bargain, some instrument, tool or fixture, that will be sold at an especially low price during the current month. An offer is also made to pay 25 per cent. of the cost of individual electric car advertising of a number of articles specified by name.

z on that he will forever be a standard
brer in the affairs of the national organi-
zation.

No man appreciates the magnitude of the
merican Association of Opticians until he
h attended several meetings, and becomes
familiar with its workings. It is the great
entral head to which before long we must
e for advanced and general directions.
s being true, it will surely be considered
te an honor for any man to become the
sident of our local organizations, thus
orming his attendance at the national con-
ention as a representative from this pro-
ressive body of optometrists.

Get the habit" of being progressive along
servative lines and you can win laurels
will bear the stamp of the highest hon-
possible to be achieved.

making our president the delegate to
national convention, it does away with
ting a delegate each year and at the
e time gives our organization a repre-
sative who is up in optical matters and
man who has at heart the principles of
iversal good. This condition must exist
the welfare of both societies. In the
ment of railroad fare we have another
ntative to promotion.

Who would not naturally strive to secure
osition that would in itself not only be
an honor, but also carry with it a profitable
a pleasant trip? Every member within
ound of my voice I think will agree
me in saying that this feature will add
erentially to the efforts to secure so honor-
a position as president of the Ohio As-
sation of Opticians.

could carry this subject much further,
time will not permit. Therefore, let me
conclusion impress once again upon your
nities that no honorable and profitable
achievement is attained unless produced by
labor. "Get the habit." In our battle of
as in every other field there are con-
sistently presented new phases, and he only
expect to be victorious who is ready to
sw a new front as often as the situation
sows a new peril. Be vigilant, diligent,
or to win, pursue but one course, that of
r chosen profession. No nobler profes-
sional calling exists.

Remember—

*The man who seeks one thing in life, and
but one,*

lays hope to achieve it before life is done,

*the who seeks all things wherever he
goes,*

*only reaps from the hopes which around
him he sows*

harvest of barren regrets.

There were 19 different styles of auto-
mobile spectacles and goggles on one tray
in an optician's window, an interesting
proof of the benefit of motoring to this
title, says a writer in the *New York Sun*.
The opticians are quick to cater to the pat-
rons in every sport and some of the auto-
mobile spectacles seemed the first cousins
of sorts first offered to bicyclists. They
s, too, glasses with a special clip for
golfers, warranted not to fall off when
giving a shot, besides special spectacles
for rifle shots, field gunners, fishermen, etc.

THE HOROLOGICAL REVIEW.

How Father Knickerbocker Marks *the* Hours

Prominent Clocks That Give the Time to New Yorkers in Manhattan, Brooklyn and the Bronx.

(Continued from issue of May 23.)

MANHATTAN'S CHURCH CLOCKS AND CHIMES.

REARING their tapering spires high skyward, fingers pointing to heaven, the church steeples of an antiquity reaching beyond the age of written history stimulate the worshipper to lofty aspiration and ethereal contemplation of a Creator's wonders. The bulbous synagogue's apex, the minaretted temples of the Mohammedan and the Gothic bristling needles of the Christian's sacred edifice, all alike point to the blue expansive canopy, admonishing their congregations mutely of

er life beyond this short mundane existence.

The priest of ancient Egypt conceived the rising sign on similar lines (though he ordered the apex of his angle less acute) when he, for a monument to his departed ones, depositing the remains, their smouldering partially checked of the mighty rulers gigantic tombs of stone. He massed the great stone edifices, shaped so that for many ages around their vast cumulation should be seen into the centuries pointing toward the heavenly dome.

The elementary expression of religious faith in future existence in both ancient and modern times we find to be ever presented as an index pointing to the starry worlds above.

For the origin whence we derive the church bells that from their steeples proclaim the passing hours, we must look back

to pagan and idolatrous times. Adopted by Europeans first as messengers of terrible import to the surrounding country folk, warning by their far reaching clanging tones of the approach of the dreaded Saracen

ST. MARK'S CHURCH.

hordes, calling to arms to protect home and family from devastation and death at the hands of the blood-thirsty eastern fanatic army, the bells were placed in the highest buildings—the churches.

The tocsin bell became later converted into the pacific use of calling the country farmer and the villager from their labors to attend religious devotions.

With rapt attention do we harken to the joyous peals of the chimes, those "wedding bells" that acclaim the happy event; that pact of dual unity for a mutual participation of life's pleasures and sorrow alike. The solemn tolling of the sad message of bereavement; that prolonged, harsh parting which but for religion's faith would hold forth no hope of future reunion. From birth to death the church belfry preaches in sonorous accents of earthly time and human event.

And what of time's passage the belfry tells to our ear; the hands on the dial in the steeple corroborate to the eye each minute of their course 'round their diurnal orbit. On account of their relative value as well as their numerical importance the

THE CLOCKS IN ST. GEORGE'S TOWERS.

church clocks are well worthy a chapter by themselves.

The ancient land-marks of lower New York, such as Holy Trinity and St. Paul's, have already had their merits discussed in an earlier division of this series. But one of our ancient churches, the venerable Protestant Episcopal St. John's, on Varick St., contains one of this country's most aged public servitors within its spire. With its seven-and-a-half-foot pendulum so

An Argument for the ELGIN Dealer

The records of the Weather Bureau show a difference of 181 degrees between the extremes of heat and cold in the United States. A watch to be adapted to the use of the traveler must be able to maintain its accuracy under widely varying conditions of temperature. One reason why the

ELGIN Watch

is pre-eminently the traveler's watch is found in the fact that all Elgin Watches are tested by oven heat and by refrigeration before leaving the factory. Their wonderful timekeeping qualities are undisturbed by extremes of temperature, damp or drought, jar or jolt, or by varying positions.

LOWEST
UNITED STATES
TEMPERATURE
63° BELOW

HIGHEST

SAN FRANCISCO OFFICE, 206 Kearny St.

er that each swing causes the whole mechanism to shake and every tooth in the escapement wheel, one time or another, torn or broken, decrepitude is fast bringing the massive works to their well-earned end. The movement is of such heavy construction that the possible dangers attending activity have brought forward several times the proposition to replace it with a newer mechanism, and each time the decision becomes more serious. But the wheels still roll by and the hours are ticked off with such a wonderful regularity that the passing crowd little know of the ponderous defects in its internal arrangement. Useful to the toiling East Side population are a few church dials sparsely scattered in more or less squalid surroundings.

OLD DUTCH CHURCH.

clocks in the two towers of this brownstone building the Rev. Stephen H. Tyng wrote in 1868: "A S. Hotchkiss was the engineer and contractor of the first tower clock de-

BRICK CHURCH CLOCK.

troyed by fire in the church in November, 1865. Upon rebuilding the church one of the A. S. Hotchkiss tower clocks, manufactured by the Seth Thomas Clock Co., was obtained."

An historical incident in horology occurred in the installation of this twin clock, for the

CHURCH OF THE HEAVENLY REST.

Seth Thomas Clock Co. established a precedent when, in spite of the generally expressed expert opinions that such a condition was impracticable, they started two

clocks widely separated from one another, in different towers, from one movement. This movement, located between the dual towers, controls the works for the six outdoor dials as well as a clock inside the church. A peculiar feature of these dials is that they are part and parcel of the brownstone towers, the hour numerals being attached to the walls. St. George's time was for many years the city's standard, and at the present day it is said to rarely gain or lose appreciably in the course of a week.

But the space at disposal enforces our hurrying next to Fifth Ave. and 29th St., where we find the Old Dutch Reform Church, with its ancient clock, copied after the one in St. John's, whose cumbersome proportions have been described. The ancient origin of the "Old Dutch" dates back

FIFTH AVE. PRESBYTERIAN CHURCH.

to the early part of the last century, and the clock movement was constructed by Stokell, who, in his day, was a manufacturer of wide renown and whose timepieces were of the best in this country. It was installed very shortly after the erection of the building itself.

A little further uptown brings one to the old Fifth Ave. Brick Presbyterian Church, with its dials, and another few steps in the same direction show one the clock in the facade of the Protestant Episcopal Church of Heavenly Rest, on Fifth Ave., near 45th St. The latter is a timepiece of the E. Howard Clock Co., with a six-foot dial and having Westminster chimes struck on four bells. At 55th St., opposite the Hotel Gotham, the clock on the Fifth Ave. Presbyterian Church gives time to the crowds that constantly promenade that thoroughfare.

But this has brought the reader beyond a very familiar timepiece on Ninth Ave., near 31st St., in the North Presbyterian Church.

Traveling ever northward brings one at

St. Teresa's Roman Catholic house of worship on the corner of Rutgers and Henry St. from its dials in the brownstone tower, the four 40-inch dials in St. Nicholas (Manhattan's patron saint, by the bye) on 2d St., near Avenue A, a church of the same religious denomination, are both useful factors to a mass of workaday humanity. And yet another Roman Catholic Church, whose peculiar spire is adorned with a timepiece in this part of the city, is that of The Most Holy Redeemer, on 3d St. near Avenue B, showing how well the priests of that ancient faith watch temporality as well as spiritually over the congested masses of their flocks with these three closely neighboring places of worship.

Working one's way northward on Second Ave., at 10th St., St. Mark's and its members of those days when this section was the center of New York's wealthiest representatives, come before us. Within that aged edifice's walls A. T. Stewart, as the merchant prince, paid obeisance to his Maker, and the clock in that steeple looked down on the body-snatching act when the remains of that knight of industry vanished from the vault.

A few steps further north stands St. George's Episcopal Church, on Second Ave., corner of 16th St. Concerning the

a to Harlem with its recent marvelous transformation from goat pastures to busy streets and mills.

and the homeseeker from the more scholarly sections carries his religion with him, as is amply exemplified in the many beautiful churches already erected in this part of the city. Of clocks within the temple and the church tower also there is no lack, though space is not sufficient within these columns to mention more than a few.

On 127th St. and Fifth Ave. stands St. Andrew's Protestant Episcopal Church with its useful dial conspicuous alike by its position and dimensions. Washington Heights Presbyterian Church, on 155th St. and Amsterdam Ave., also by its timepiece attracts the gratitude of a passing public.

Before bidding good-bye and best wishes to these benefactors of humanity, just another word as to the adversities that beset them.

A good inkling of the difficulties with which a faithful tower clock has to contend in climatic changes, etc., was told the

ST. ANDREW'S P. E. CHURCH.

editor in discussing the subject. A slight exactitude during several days was noted one very stormy Winter in the time indication of one of our steeple clocks. The editor sent up to investigate reported that snow had gathered on the pendulum, then melted and then frozen into masses of ice which had grown to an accumulation that made the pendulum beat thunderous strokes similar accumulations of ice on the side of the tower. The arc of the swing had come so shortened the wonder was that it kept any old time at all.

Watch Repairing.

By H. REINECKE.

(Continued from issue of May 16.)

A FURTHER discussion of points appertaining to the mainspring will appear with the subject of examining, repairing and cleaning of watches. A watch repairer in the course of his every-day business has to use the lathe and the file. At the present time the younger members of the profession are using the American lathe almost exclusively, while some of the older ones, who have been brought up to use the old-fashioned turns, still cling to its use. As the old styles of clocks and watches have been made with its assistance and with a view of being repaired by its use, and as the nearer acquaintance with this tool may increase our mechanical knowledge, it may not be amiss to introduce some of the younger members of the horological fraternity to this venerable tool.

The turns is a small dead center lathe, in which watchmakers turn and pivot staffs,

THE TURNS.

arbors, etc. The work is centered in the turns and has a ferrule attached to it, so that it may be rotated either with a bow or by a cord connected with a wheel, to which motion is given by the hand or foot. These turns are principally manufactured in Switzerland or in the older countries of Europe. They are made of several sizes and somewhat different in style. Small ones are made for the exclusive use of watch work and larger ones for musical movements, clock work, and other horological devices. While it is claimed that the American watchmaker's lathe has superseded the small turns entirely, the latter has still its uses in repairing old styles of watches and making certain small parts of modern ones, as for instance, the fitting of a new escape wheel pinion of cylinder watches of small sizes and other parts. The large turns still remain a very handy tool in making repairs to hall clocks and doing other odd jobs.

The illustration is the form of the turns generally met with.

Steel and brass runners are used with those turns for turning and polishing pivots, etc. Ivory runners ridged for polishing pivots of clocks are often used. The runners shown herewith are the larger size used in the larger tools, but serve as patterns for forming smaller ones. Such runners are generally made of pieces of rods of bright polished steel wire, which fit the holes or bearings of the heads or tail stocks of the turns without any turning down. A short description of the runners here shown is now in order: A is pierced to a short distance on both ends for the insertion of small male or female centers, which are intended to serve for turning and polishing

small objects, such as the large pivot of center wheel pinions, pierced center pinions, canon pinions, which cannot be readily placed upon arbors; b is intended for similar use; it is fitted with a ferrule and a carrier on one end for the turning or polishing of pinion pivots, when wheels are riveted upon such pinions, and also for tuning up brass wheels; c has on its left

RUNNERS.

end a number of graduated holes beveled on the back for filing centers of thin pieces of steel wire or pinion wire. On the other end is a reduced projection with a number of graduated countersinks for turning small pinions and balance staff pivots; this end of the runner has a mate in the opposite hole of either the head or the tail stock of the turns, with a small male or female center to support the back center of the work operated upon. This mode of turning pivots is stubbornly adhered to, being preferred to the American lathe for the purpose by some of the old watchmakers, who claim that this is the only correct mode of turning out balance staffs, where both pivots of a staff are perfectly true and in line; d has on the right a disk with graduated conical holes, where cylinders, pinions, etc., may project through and have their centers trued up. The necessity of other runners of steel, brass or ivory will present itself from time to time, and other attachments are placed in the tool rest, such as a drilling fixture, for replacing broken points and many other more important and most ingenious devices, according to the inventive genius of the different workmen. In all fairness it would be rash indeed to condemn the old-fashioned turns in a summary manner and without an exhaustive investigation, for the most experienced mechanics will be astonished at times how our former horologists have accomplished so much with this tool and the assistance of a wonderful manual dexterity.

(To be continued.)

This illustration shows our main factory exactly as it exists, where 3,000 complete watches are made daily.

LANGENDORF WATCH CO.

THIS IS HOW IT HAPPENED.

Some few years ago we determined that first of all we were going to make the best Cuckoo Clocks that brains and skilled craftsmanship could put together; then we were going to sell them for as little as we could.

The expected happened. Quality won out as it always does. We have a country-wide reputation for making the best Cuckoo Clocks that have ever been produced, and with that reputation has come the largest Cuckoo Clock business in the world.

Better write for our new Catalogue.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Systematizing Stenographic Work.

HOW many business men know the average cost of letters typewritten in their offices? asks a writer in *Ad Sense*.

How many business men have introduced a system in their typewriting departments so as to secure the record of cost?

Which is the best method of conducting a typewriting department, a central and general force, or special stenographers for different departments?

These questions are of importance to all who desire to stop the small leaks and at the same time secure maximum results from the typewriting departments.

Before records of stenographic work can be fairly kept provision must be made for the introduction of a system which will keep the entire force constantly supplied with copy. A "copy box" will do this. This box may be an ordinary transfer file case, with the index removed, and should be placed as is most convenient to the majority of the stenographers. This box is filled with set or delayed work. The contents may include follow-up letters, personal letters to old customers, circular letters to special lists, special tabulated work; in fact, everything which can wait and is in no special rush.

When the stenographers or typewriters are out of regular work, and after they have notified the proper person, they go to the copy box and take therefrom the first copy on top.

The copy box proves a source of much time saving and profit, by saving stenographers loss of time in chasing about for work, and keeps the office force busy at profitable work. The device teaches the value of time.

The box acts also as a thermometer, indicating when it is necessary to increase or decrease the force. If the copy in the box has not been touched for a week it shows that the stenographers have been busy with their regular work, and the force may be increased temporarily; if, on the other hand, the proportion of set work completed during the week was unusually large, the number of stenographers may be decreased.

The copy box aids systematic record of the work done in the department by placing all the stenographers on an equal basis, and any record of letters written will be fair. A simple way to keep a record of letters written is to have each typewriter number her letters consecutively, and have the

reader at night quickly transcribe the number from the last letter of each on blanks provided for that purpose. At the end of the week it is an easy matter to figure the average cost of each letter.

Economically, the central or general method for the stenographic department is the best. The stenographers are placed under the direct supervision of a head stenographer, and as the services of typewriters are required by the different departments they are assigned by the person in charge of the department. As soon as the dictation is completed the stenographers return to the department to write their letters. Thus every available hour of the day is utilized, and there is an absence of novel reading by stenographers waiting for work.

With a special stenographer for each department, work is delayed when the stenographer is sick, or perhaps the stenographer takes advantage of the weaknesses of the department head and reports late in the morning if he is customarily late. There is also danger of favoritism being shown by this method, causing jealousy and discontent among the stenographers less favored.

It is the small leaks which consume the profits and prevent dividends, yet how easily these small leaks can be stopped. A system in the stenographic department will prevent friction, and if the stenographers are shown that the system is beneficial to those who do their best and make every moment count, they, too, will approve of it. The records will show the industrious and careful stenographer, and by these records reward or censure may be dealt out. Thus is established an incentive for better work.

Living Within One's Income.

MOST spendthrifts have to keep even by schemes which savor more or less of chicanery. Young fellows behind the counter are apt to regard the ability to live partly by one's wits as rather clever and smart.

Dishonesty is certainly dishonesty, though, and calling it cleverness does not alter its disastrous effects. There is something wrong with the man who cannot live on his income. When he pleads that as an excuse for debts of dishonesty, he is talking tommyrot. "Cannot live on his income" means will not.

There is only one road for the man traveling above his class and that leads to the bankruptcy court.

Business Courtesy.

IT is astonishing how unbusinesslike some men are in regard to the details of their business. There is, for instance, the matter of correspondence in which there are great many sinners. It is all very well to say that you dislike correspondence, but if you are in business you are bound by business laws and one of the first and most important of these is to promptly take care of your correspondence. There is nothing that will injure a concern so much in the eyes of those who do business with it as neglect or carelessness in replying to communications. If you have not time to look after your business get more help. Inattention to those who call upon you is another unpardonable sin.

There are some manufacturers and wholesalers, as well as retailers, who are the veriest bores in this respect. A gentleman called some time ago at a certain large establishment where the proprietor was busy at something in the office, and the clerks were so oblivious to everything but the work that he stood there 10 minutes without any one asking what he wanted. He walked out and took a good sized order with him to another concern where, as he said, they knew enough to look up when any one came in.—*Canadian Shoe and Leather Journal*.

Ideas and Schemes.

VERY interesting is the little dog who sits in the show window of W. H. Gorman's store, 76 Seneca St., Buffalo, N. Y., and looks out upon the street and people with spectacles over his eyes. The dog is trained to sit quietly for hours. It changes attitudes at a signal from Mr. Gorman, and, best of all, he seems to thoroughly enjoy the part he takes in the duties of this store. When not in the window with the spectacles, he occasionally marches up and down the aisle on his hind legs to the enjoyment of the customers. Through all these antics he wears glasses, which have been properly fitted an optician.

An unusually attractive display was made in the retail jewelry store of S. W. Tashman, Danbury, Conn., recently. The store was attractively decorated in morning glories and violets and signalized the opening of a sporting goods department. Neat souvenirs were distributed to purchasers.

Storekeeping Department.

Good Rules to Follow.

DON'T worry—worry kills work.
 Don't overeat—a sluggish stomach
 makes a dull brain.
 Don't smoke too much—tobacco kills am-
 mation.
 Sleep eight hours—more if you can.
 Rest up occasionally—a good razor cuts
 better for it.
 Get out medicine—fresh air and exercise
 are the best doctors.
 Wear light weight underclothing all year
 round—give your skin a chance to breathe.
 Your territory “goes dry,” as you think,
 always remember that there are one or two
 boys laying for the chance to work
 it maybe you have a well full of water and
 your pump—smoke up—pump harder.
 Are you falling behind? Get started an-
 hour earlier—work an hour later. You'll
 catch your buyer at both ends.
 The price of good looks is right living,
 and the reward of right living is health.
 There is an intimate, an indissoluble re-
 lationship between personal attractiveness
 and success. Health and correct dress make
 attractiveness. For salesmen these qual-
 ities are essential.
 Getting orders means work—the greater
 your number of calls, the more business you
 will have to your credit.
 “Living up to a rule” is bad business in
 approaching buyers. The only “rule” that
 is valuable is that one made to fit each
 particular call and customer.
 Sin has many tools, but a lie is the
 handle that fits them all.” Salesmen who
 lie for the firm to the customer, for the
 customer to the firm and for themselves to
 the firm, stack up as pretty fair handles.
 This is a bit complicated—study it over.
 Is any man worth a hundred thousand
 dollars a year? The answer is, “yes,” if he
 can get it. Also, he can get it by earn-
 ing it.
 Daniel Webster once said in a famous
 legal battle, “Here are the goods—look at
 them.” Right then he won the fight. An
 ounce of sample case is worth a ton of
 reasons—why-on-paper-salesmanship.
 An authority says that 94 per cent. of
 merchandising is done through the retailer
 and only six per cent. by advertising. That
 puts it up to you pretty strongly, Mr. Sales-
 man.
 As a rule a prospective buyer should
 never be shown samples until he has been
 talked to sufficiently long about the propo-
 sition to become interested. When he is in-
 terested samples can be shown very effect-
 ually, and when properly shown the result is
 an order in nine cases out of 10, but if im-
 properly shown the result is a failure in
 about the same proportion. Therefore, the
 great importance of showing samples right.
 To do this one must know what he is show-
 ing them for. Samples are not shown to
 give the merchant prices of which he knows
 nothing and does not appreciate; they are
 not shown to display styles of which he is
 equally ignorant, nor to show him quality, for
 a large number of buyers know absolutely
 nothing about goods shown and consequent-
 ly could not be interested in that. For

proper treatment in regard to these things
 the merchant relies on the integrity of the
 house from which he is buying.

Mr. New Man, remember that you have
 many things to learn and if this business
 does not come as you think it should the
 first few days, do not let it discourage you.
 You cannot fail if you apply your instruc-
 tions intelligently and execute the work
 vigorously.—*E. r.*

A Model Retail Jewelry Establishment of Germany.

THE jewelers of this country, who for
 some years have taken pride in the
 fact that they were ahead of the Old World
 merchants in their ideas as to store decor-
 ation and more up-to-date in the methods of
 displaying goods, will have to “look to their
 laurels” if the movement manifest among
 the German jewelers is to continue.

There is no doubt that jewelers of Ger-
 many have given great attention to the sub-
 ject of store appearance, and of recent years
 many of them have remodelled their estab-
 lishments in a way that would do credit to
 merchants in artistic lines in any part of the
 world.

An idea of an up-to-date German jew-

 bought out the business of F. Kaiser.

elry store may be had from the illustration
 on this page, which shows the front and
 show window of the store of Jean Koch,
 Koln. It is artistic in every detail. A no-
 ticeable feature is the absolute adherence
 to the secessionist style which has had such
 a hold on German jewelers and their prod-
 ucts in the last few years, manifest not only
 in general effect, but in every detail of the
 metal work, and even in the lettering.

For the illustration we are indebted to
 the *Deutsche Goldschmiede-Zeitung*.

A Stranger.

This world is full of strange surprises,
 You cannot fix or 'range her,
 But the man who never advertises
 Seems even more the *stranger*.

Louis S. Lowenthal, doing business under
 the name of Mrs. Pauline L. Lowenthal,
 Bradford, Pa., last week filed a voluntary
 petition in bankruptcy.

Sweet Bros., Monticello, N. Y., are mak-
 ing extensive improvements in the interior
 and exterior of their store. New show
 cases of quartered oak have been added, and
 the old plate glass front is to be removed
 and replaced by a larger one.

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1575.—Rusty Screws in Watch Plate.—How can I loosen a rusty broken screw in a watch plate? H. A.

ANSWER:—The easiest way is to heat the metal, when the expansion will often be sufficient to loosen the threads. If this will not do it, a strong solution of alum and water will dissolve sufficient of the steel if left in the solution for about 12 hours, so that it can be removed with ease. Pure nitric acid will become fluid if placed in a warm place, and this will accomplish the work more speedily. Neither the alum nor the nitric acid will injure the brass or the steel, if the latter is not too slight.

QUESTION No. 1576.—Wood and Grain Alcohol.—Is there any difference between ethyl (wood alcohol) and grain alcohol in the application to such uses as occur in watch repairing business? R. L.

ANSWER:—Wood alcohol is seldom obtained in daily commerce as a pure article, and for this reason it is not safe to use it indiscriminately. In such a state as it is obtainable it is highly poisonous, and is bad for dipping parts of watches in it. Although it is much cheaper than grain alcohol, it cannot even be recommended for burning in lamps for blueing parts of watches made of hardened and polished steel. From an economical standpoint it is neither better recommended, as it does not give out as much heat when burned as grain alcohol.

QUESTION No. 1577.—Rose Gold Finish.—How can I produce a rose gold finish on jewelry and novelties? R. G. F.

ANSWER:—The current is the best regulator for producing the rose gold. In many cases where the current available is strong enough the gilding is simply burned on and then scratched off in such a manner as to produce the graded shade desired. The rose finish can, however, be brought out better by adding one-half an ounce of carbonate of copper to the gallon to the regular gold solution. The solution should also be used very hot, which materially assists in producing the finish.

QUESTION No. 1578.—Mahogany Finish on Metals.—How can I produce a mahogany finish on metals by the plating process? M. F. M.

ANSWER:—The metal pieces should first be plated in the regular acid copper solution, depositing the pieces from five to 10 minutes. After rinsing and washing, dip them into a solution composed of 1 gal. of water and ¼ oz. of sulphuret of potash, stirring the solution slightly. Now scratch the surface with a little water in which has been added a little sal soda; lacquer when dry.

QUESTION No. 1579.—Stop Off Varnish.—Please give me a formula for making

a good stop-off varnish that I can use for a warm gold solution. S. O. V.

ANSWER:—When necessary to use the solution warm then the solution should be in the very best condition, so that the gilding may be done rapidly, before the cyanide has had any effect on the varnish. Common air drying Japan, thinned down with benzole, painted on the articles to be treated and left to dry in a warm place, will answer as well as any stop-off varnish that can be prepared.

QUESTION No. 1580.—Reducing Chloride of Silver to Metal.—We have a lot of chloride of silver that we want to reduce to a metallic state. How can we do this? C. & CO.

ANSWER:—Take about four times its weight of the chloride of carbonate of soda and half its weight of pulverized charcoal and mix all into a paste; let dry and place in a crucible and reduce by heat. The silver will run to the bottom in the shape of a button.

QUESTION No. 1581.—Silver Cleansing Soap.—What is the best kind of soap for cleaning silver or plated ware, and which will not cause the metal to tarnish when dried in sawdust? B. J.

ANSWER:—Such soap ought to be used on all occasions, as very often soaps contain ingredients which do tarnish silver or silvered surfaces. The following is a good composition: Paris white, 5 lbs.; castile soap, ½ oz.; sweet oil, ½ oz.; liquid ammonia, 1 oz.; grain alcohol, pure, 2 ozs. The castile soap should be fine. Dissolve it in one quart of hot water, mix all the other ingredients, keeping the water very hot, and when properly mixed put in tin boxes and allow to cool.

QUESTION No. 1582.—Antique Nile Green on Brass.—I want to produce what is known as Nile green, and the metal to be treated is brass. Please inform me how I can do this? A. C. G.

ANSWER:—The brass is polished and a dead brush finish is produced; after washing, the pieces are immersed in a hot solution of water, 1 gal.; sulphate of copper, 5 ozs.; sulphate of iron, 5 ozs. The article should be kept in motion until the green color appears, and after washing and drying the piece should be well lacquered.

QUESTION No. 1583.—Green Gold Coloring.—Would you kindly tell me how to make a solution to obtain the green gold color, which at times is put on Roman gold jewelry? W. J. B.

ANSWER:—One way of producing the different colors on jewelry and lockets is to rub over with a little powder from a dust bag. It is afterwards heated in an iron pan to about 480° F. A solution for fancy coloring is made in the following manner:

Dissolve 4 ozs. of the hyposulphate of soda in 1½ pints of water, and then add a solution of 1 oz. of acetate of lead in the same quantity of water. Articles to be colored are placed in the mixture, which is then heated to a boiling point. The effect of this solution is to give different colors. It becomes successively yellow, red, scarlet, deep blue, light blue, bluish white and finally white, with a tinge of rose. By replacing the acetate of lead in the solution of sulphate of copper, brass becomes first of a fine rosy tint, then green and finally of an iridescent brown color. The following alloys which produce green gold will be useful in coloring articles of jewelry decorated with leaves, flowers, etc.: Fine gold, 1 oz.; silver, 160 grains; or, fine gold, 1 oz.; silver, 100 grains. Articles of gold may also be covered with a green gold color by the electrical process, by adding to a solution of double cyanide of gold and potassium a small proportion of cyanide of silver solution, until the desired tint is obtained. The solution should be worked cold or nearly so.

To Improve the Snap of a Watchcase.

(Translated expressly for THE JEWELERS' CIRCULAR—WEEKLY from *La France Horlogère*.)

It is generally known that watchmakers often employ ineffective methods to restore the snap for making the back of a watch case close, as it ought to, and it will be useful, therefore, to publish a mode of

MODE OF STRENGTHENING THE SNAP OF A WATCHCASE.

restoring the snap of a watch case when it has become a little worn.

Provide yourself with a flat, oval burnisher and place the back of the watch case opened flat on some soft substance, such as a chamois skin. It is necessary to maintain the flat position of the back of the case. Charging the burnisher lightly with a little beeswax, rub the inner edge of the rim of the case, near the two sides of the joint, holding the burnisher almost horizontal, as shown in the illustration. Be careful not to touch the flat bottom of the case back.

Among the concerns which will be represented by floats in the industrial parade, to be held this month in Chattanooga, Tenn., is the Geo. W. Meyer Jewelry Co., of that place.

The History of Majolica.

In the February and March issues of the *Keramische Monatshefte* appears an interesting article on majolica. The subject matter leads up to the beautiful and pictorial fine art ware produced in the last years from the factory of R. M. Krause in Schweidnitz, Silesia (Germany). Numerous illustrations of this lovely ware accompany the reading matter.

"Majolica ware is really," says the *Keramische Monatshefte*, "the ceramic art of the Middle Ages. At that time the art was naturalized on European soil. Toward the end of the Middle Ages it reached a perfection that brought forth some of the finest gems that ceramics and art can give."

The zenith of perfection in production of majolica lasted over 100 years, and produced costly creations. Princes vied with each other in advancing this art and numerous celebrated art masters wedded themselves to it, and from them we receive the perfect works of art so greatly admired, even to this day.

The manufacture of majolica is a legacy from the Orient, whose people during their long territorial conquest planted the art on European soil. It is a true child of the Orient, loving Orientals. And the art fits so well with the time when the Moors ruled in the Spanish cities those handsome mosaics in honor of their God and appreciation of their great prophet.

But the technique of the manufacture of majolica of this people was limited. This knowledge advanced when the secret of its manufacture reached Italian soil. Here, under the ever-blue skies and the favoring breeze, breathed on by the pervading spirit of Christianity, the technique was enabled to spread and the art to expand. Here was art brought into being that could display the God of the Christian in all His might and glory. It was adapted to the representation of the Saviour and Redeemer in His life and work, His wanderings and His gospel.

Continuing, the article declares that Italy, toward the end of the Middle Ages, held the entire European trade with the Orient and the wealth that was derived from this commerce was largely used in the arts and sciences. Hence the lovely majolica creations from that land during those days.

But the discovery of America and other lands famed Italian commerce, and art in that country declined. Thus the commencement of the second half of the 16th century witnessed the paralyzation of work in majolica. And no other country has shown so flourishing art in this line. The man-

ufacture of majolica since that time did not die out altogether, but had a miserable existence for hundreds of years in small workshops.

"At last, during the second half of last century," says the author, "some attention was paid to this art and since that time factories have risen which have brought out prominent productions. It is no longer Italy, however, where this art finds its home, but to every land of culture in Europe it has spread. Among others there are several factories in Germany which lay themselves out to create artistic examples. Among these latter is the majolica factory of R. M. Krause, in Schweidnitz, Silesia, started in 1883."

For the painting of landscapes majolica is both adapted and practical, as it permits the reproduction of the color tones as present in Nature, even in detail, and heightened loveliness, says this contemporary. And the majolica colors make possible the production of a picture of unlimited permanence, where other color arts blench and fade.

Reappraisements of China, Etc.

REAPPRAISEMENTS of decorated china and earthen ware were announced last week by the Board of United States General Appraisers, New York, as follows:

Decorated china from Haviland & Co., Limoges, exported Sept. 28, 1905, to Feb. 5, 1906, entered at New York (File Nos. 36955, 37822, 38601, 38526, 39050); findings of Hay, G. A.: Plates, 8½, Feston, decorated, A., entered at 5.15 francs per dozen; teas, 1st, do., entered at 5 francs per dozen; covered dish, do., entered at 2.60 francs each; plates, 8½, plain decorated, E., entered at 4.80 francs per dozen; ramikins and plates, Etoile, 18318, decorated, A., entered at 3.12 francs per dozen; pres tasses choc, Panson, 18318, entered at 4.55 francs per dozen; tea pots, 125, do., entered at 1.58 francs each; do., 75, entered at 1.06 francs each; net prices; plates, 8½, Etoile, 18318, decorated, A., entered at 5.15 francs per dozen; do., 6½, entered at 3.40 francs per dozen; do., coupe, entered at 3.40 francs per dozen; plats, ovale, 10 anses det or, do., entered at 90 francs each; do., 14, entered at 1.90 francs each. Add 5 per cent. And similar goods. Add cases and packing. All advanced 5 per cent.

Decorated earthen ware from Erico Orifici, Naples, exported Feb. 20, 1906, entered at New York (File No. 39231); findings of Board No. 2: Appliques Rose, Dapaveri, Tulipani and Crisantemi, invoiced at 65, advanced to 1 lire each. Add cases. Discount, 3 per cent. Previously published under reappraisement No. 6995, May 8, 1906.

Fahler & Landis, Allentown, Pa., recently displayed in their show window a bronze memorial tablet which will be erected in Lancaster, Pa., in memory of Wm. Koehler. The deceased was a member of the senior class of the local Theological Seminary.

Dresden China.

THE term Dresden china has become almost synonymous with wares delicate and fanciful, for the porcelain we know best under this heading is distinguished, above all, for these qualities. The first manufactory was established at Meissen, near Dresden, its discoverer being John Bottger, protégé of the elector of Saxony, Augustus, "king of china maniacs."

Bottger's first productions were of red stone ware, specimens of which are very valuable. These were superseded in 1711 by the discovery of kaolin, which was necessary for the manufacture of fine, white porcelain. The greatest precautions were taken against the revelation of the composition of this porcelain, and for a while it was not introduced outside of Saxony, but later on imitations sprang up in France. Bottger died in 1719 and was succeeded in the management of the Meissen factory by Haroldt, and to this period belong the services decorated with Chinese figures and landscapes now so much sought after. This was indeed the golden age of the Dresden factory. Artists of eminence, such as Kandler, superintended and showed much delicacy in the execution of wreaths and flowers, birds and insects.

The factory suffered during the times of war, for in 1745 Frederick the Great entered Dresden, and several of the pieces were seized, the same thing happening again in 1759. When peace was restored Dietrich became director, but the factory and its product had deteriorated and made heavy demands upon the King's purse. He himself undertook the directorship about this time, and the period is known as the "King's period"—1778. Then followed the Marcolini period, one of red ornamentation, where we got the admired deep blue as a frequent ground floor.

Meissen porcelain, in the pure white, undecorated, was highly esteemed, and was used by the King for the purpose of presentation to those whom he delighted to honor; but specimens sometimes left the factory in white and were decorated outside. A Baron Busch is one of these decorators whose name has survived, for he was the possessor of the secret for engraving porcelain with the diamond and then rubbing in black coloring, so as to give the effect of an etching.

Much of the present Dresden china is modeled on the old styles, but both color and glaze are often too exaggerated to please the connoisseur.

The Charlesworth Optical Co. has just issued a new optical catalogue.

LIBBEY

CUT GLASS

THE WORLD'S BEST.

"A Name to Conjure With"

The salesman's work is almost ended when he shows a piece of cut glass to the customer and says:

"This is LIBBEY'S"

All other makes are and must be judged by Libbey—no matter how much or how little you pay you can only buy Libbey perfection under the Libbey trade mark.

Customers from Maine to California know and understand this—that is why the Libbey dealer makes his sales with so little trouble.

A Suit of Importance to Importers.

IMPORTERS in various lines are likely to be affected by a recent decision of the United States Supreme Court in the *Cokerhoff, Roffioer & Co.*'s case subjecting the firm to a penalty of double the value of a quantity of merchandise imported. It appeared from the testimony that merchandise had been taken from the company's store and distributed before the sample packages had been examined by the raisers. The decision of the court is based on a law which authorizes the government officials to call for the return of merchandise at any time within 10 days after the return of the invoice by the appraiser of the port to the collector. In the case the collector made a demand for return of a package after it had left the possession of the importing company, which was, therefore, unable to comply with the order, and as a consequence was liable to the penalty.

V. Wickham Smith, the customs lawyer, says that the decision of the court is of a most far reaching consequence. He says, "The statute governing this case was enacted long ago when commerce was conducted along quite different lines than it is pursued to-day."

Mr. Smith points out that an enormous quantity of imported goods is sold now before they arrive. Contracts are often over before the goods reach port, and under such circumstances it is important for merchants to ship from the port of arrival to purchasers in various parts of the country without any delay. The attorney makes several suggestions in order to relieve the present situation. One is that the collector and other executive officers exercise caution in the demand of the return of packages after they are delivered. The government, he urges, should increase its force at the larger ports in order to expedite the elimination of packages in the public warehouses. It is further suggested that the Secretary of the Treasury has power to lessen somewhat the present restrictions. While conditions may thus be ameliorated, he believes, that merchants, in order to obtain entirely satisfactory results should advocate remedial legislation by the present Congress.

Chain Styles, Past and Present.

WHAT has become of the old fashioned watch chain?" repeated the jeweler, smiling reminiscently. "I don't believe you could find one this side of the Red Lands, though a few of them may have been tucked away in strong boxes as curiosities. I've no idea what disposition has been made of them; I'm only sure I haven't seen any on one or sold one for years. Yet I can remember, as you can, when the real importance and financial standing of a man was supposed to be measured by the style of his watch chain, and he took good care that he wasn't under-estimated. We used to handle chains that would slip an ocean liner into her dock without straining a link, and the sag of them held waistcoats all out of shape. Huge sets filled with hair or photographs were worn to the proper caper. It was the same way with the watches, too. Some of them were

as big as alarm clocks and weighed three or four pounds.

"But all that's changed. The latest thing in pocket timepieces is as thin as a wafer cracker, and very light, modest chains are worn encompassing the stomach. Very 'dressy' gentlemen wear no chains. They want to create the impression that if they lose their watches they have plenty more at home or can afford to buy others."—*Providence Telegram.*

Coloring of Gems by Radium Rays.

GLASS is colored brown or violet by radium rays. A. Miethe studied the action of these rays on a large number of gems, and found that many of them are influenced by the rays. No general principles can be indicated, except that the more transparent gems show a greater tendency toward coloration than the opaque or highly colored ones.

Mr. Miethe used a preparation of 60 mgm. of radium bromide. A colorless diamond from Borneo was colored a light yellow after eight days and a decided lemon yellow after another eight days. On heating the diamond to 250° the yellow color was diminished, but it could not be entirely got rid of, even at a red heat. A colorless Brazil diamond showed no coloration.

A peculiar behavior was shown by a blue sapphire from Ceylon. After only two hours' exposure to radium bromide it showed coloration—green at first, then light yellow, and after a few more hours reddish yellow. After a fortnight it was dark yellow approaching chestnut. The color could be got rid of by heating, but the light yellow color always returned on cooling.

Rubies show no change, and tinted tourmalines very little. Brazil tourmalines slightly colored green and pink, respectively, at one end acquired the same color at the colorless ends on exposure to radium. This coloration took a day or two to appear.

Time For the Tied.

BISHOP OLMSTED, of Colorado, was talking at a dinner party in Denver, about June weddings.

"June is a lovely month," he said, "and that it should be the month of all months for weddings is a fact easily understood."

"I was amused by the remark a jeweler made the other day."

"The jeweler said that at this season it is a very common thing to see a well-dressed, handsome, intelligent looking young man come into his shop, and say, in a painfully nervous way:

"'Um, ah, er—er—ah, er—ha, um—'

"In this contingency the jeweler simply calls to his clerk:

"'Get out that tray of engagement rings, Jackson.'"—*Chicago Inter-Ocean.*

Merton S. Gurney, of Gurney Bros., Brockton, Mass, in his capacity as junior warden, took a prominent part recently in the celebration of its 50th anniversary by the Masonic lodge at Brockton, Mass.

George F. Ruppe, Waterbury, Conn., who was a former employee of the William L. Gilbert Clock Co., Winsted, has been appointed to a government position at Colon, on the Panama Canal.

BOHEMIAN glass in unusual richness of coloring and variety of designs is now being shown in the ware-rooms of Bawo & Dotter, 30 Barclay St., New York. The iridescent, blue, silver and straw colors are prominent, but other tints are also utilized in this collection. In the molding some clever embossed effects are produced, and these are supplemented by the work of the brush. Sea grass and other marine effects are favored. The shapes are as varied as the colors. A number of the vases are in the form of large sea shells, and there are various fantastic forms. A line of cut glass, recently received, differs from anything else now in the market, the company having taken the entire output of the factory. The designs include leaves, sheaves, an eagle and various free hand effects which are engraved on stone with a fineness almost like that seen in rock crystal. In this collection there are salad bowls, water pitchers, nappies, cheese dishes and other articles:

NEW SAMPLES OF GLASS COMING.

AT the New York office of the J. D. Bergen Co., 38 Murray St., new samples will make their appearance about the middle of this month, and buyers will find from that time on an increasing number of cut glass patterns for the coming season's trade. The catalogue will be ready about July 1, at which time the salesmen will start on the road. The force of designers have been particularly busy for several months getting ready for the new season.

The figures recently sent to the Department of Commerce and Labor giving the comparative production of eight of the principal industries of Japan during the years 1891 and 1905 show how greatly the porcelain and pottery industries of that country have developed in the past 14 years. According to the table in the report the production of porcelain and pottery in 1891 was 1,759,190 yen, while the product in 1905 had increased nearly three and a half times that sum, or 5,342,344 yen.

THE RAMBLER.

S. F. Spear has purchased a half interest in the business heretofore conducted by his brother, W. L. Spear, in McMechan, W. Va.

Harry Miller was recently arraigned in the Circuit Court in Jackson, Mich., accused of passing a forged check at the store of G. G. Case, of that place. Miller pleaded not guilty.

Montauk Case

M 2280

There must be a reason why all the jewelers who stocked the Montauk Case in 1905 are buying it again in 1906, and will continue to do so. There is. It is because it is a case they know, a case they can rely upon, a case that has been upon the market for over twenty years and withstood all competition, it is a case that will outlive the present generation of jewelers and be handled with the same satisfaction by their successors.

JOSEPH FAHYS & CO.

THE BEST JUDGES

Are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

Stone-Setting.

We carry a most complete stock of Precious and Semi-Precious Stones for special work and replacing lost sets. We import them direct from the cutters in Europe, and furnish them to the trade in single stones at dozen and gross prices.

Have your stone-setting done in our shops and save from thirty-five to fifty per cent.

We employ first class setters, and turn out work very promptly.

No job too small to receive our careful attention.

Gold Chains Refilled, Renewed and Repaired.

Old Chains made over into new patterns, using same gold.

WADSWORTH PERMANENT

THE word "PERMANENT" naturally carries weight. Purchasers want *lasting quality*. This is as true of filled cases as of solid—maximum of wear is the final test.

"WORTHY. OF ITS NAME."

The above phrase is linked with the WADSWORTH "PERMANENT" WATCH CASE. To Durability is added Style; and to both, Inexpensiveness. Jewelers endorse these claims.

The Wadsworth Watch Case Co.

The Case that has won the Permanent Friendship
of all who have Made its Acquaintance.

Your Jobber can Introduce You.

The Wadsworth Watch Case Co.

CHICAGO
Columbus Building

SAN FRANCISCO
717 Market St.

NEW YORK
49 Maiden Lane

FACTORY, DAYTON, KY.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

SILVERWARE destined for the general service and adornment of the table should, in order to be wholly satisfying, possess not only a markedly decorative effect, but an opulent dignity and a well defined individuality of design.

¶ It is the belief of the Whiting Company that in their new Louis Quatorze pattern, which has been applied to every article suitable for table use, these essentials of success are very prominently displayed.

¶ With the confidence born of this belief, therefore, they beg to call attention to their novel and original treatment of one of the most popular, as it is one of the most effective, of historical styles.

WHITING MFG. CO., SILVERSMITHS
Broadway and 19th Street, New York.

Is There a Watch Trust ?

Is a Live Topic at the Present Time in Congress.

This Question Will be Fully and Able Elucidated

and every jeweler is urged to keep posted on this subject, as it will be not only instructive, but profitable to know of abuses that are of vital interest to all who sell Watches.

Why should the retail jeweler have to pay more for Watches than do department stores and mail order houses and scheme trades? is an old question.

And now comes another question of discrimination that is worthy of long discussion in the Congress of the United States.

The essence of the question is:

Why can American Watches be bought in other Countries for little more than half of what Americans at home have to pay for them ?

All who have the interest of the Watch business at heart can have copies of the speeches on this subject sent on application.

The W. J. JOHNSTON COMPANY,

Wholesale Agents for the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

The W. J. JOHNSTON COMPANY,

Wholesale Agents for the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

We present a list of Watch Companies that we are Wholesale Agents for, each and all of whom are **Free, Independent** and **Self-respecting**, who manage and mind their own business, and depend only on the merits of their goods to make sales for them.

Not one of these Companies is a member of any Watch Trust or allied to any Watch Combination, and in no manner requires Alliances to help, or force, the sale of its products.

The Dueber-Hampden Watch Co.

Illinois Watch Co. Hamilton Watch Co.

Trenton Watch Co. Seth Thomas Watch Co.

New England Watch Co.

Joseph Fahys & Co. Wadsworth Watch Case Co.

Dueber Watch Case Co.

The products of these Companies are made for The American Market and they recognize the right of Americans to get as much for their dollar as do the people of other countries.

NATURAL WEAR MACHINE

Devised for the purpose of testing the actual wearing quality of **COMMUNITY SILVER**, in comparison with other makes of plated ware.

ONEIDA COMMUNITY, LTD.
ONEIDA, N.Y.

Founded in 1848.

New York Salesroom: 395 Broadway

MILES OF WEAR

IT'S A ROUGH ROAD that Silverware often has to travel. Bang and rattle attend its cleaning at the hands of over-strenuous servants.

To withstand such wear, the especially heavy plate of

COMMUNITY SILVER

is a veritable coat of armor. This is demonstrated by the practical test shown in the illustration:

PLATED WARE OF VARIOUS MAKES SUSPENDED
ON A REVOLVING ARM, WAS DRAWN ROUGHLY
OVER VARIOUS OBJECTS, SUBJECTING IT TO THE
HARDEST WEAR IT WOULD BE LIKELY TO MEET
IN ACTUAL USE.

Before showing signs of wear **COMMUNITY SILVER** traveled a distance of nearly eighty miles—distancing the very best of its competitors. An unusual test of wearing quality, but an exact and practical one.

Remember that **COMMUNITY SILVER** gives best value to the consumer, and the most generous profit to the dealer.

ONEIDA COMMUNITY, LTD.

ONEIDA, N.Y.

Founded in 1848

New York Salesroom: 395 Broadway

THE continued and widespread demand for Simmons Armilla shows pretty conclusively that the fashion of bracelet wearing is still growing. Beyond peradventure, there's going to be a brisk business in bracelets this coming Fall, and you'll make no mistake in choosing your Fall line now.

Surely, you won't see a more varied or attractive selection than the various styles, patterns and finishes of Simmons Armilla which the jobbers are ready to show you.

The Armilla is made in gold-filled stock (Simmons quality) and in 10K. and 14K. solid gold—affording an ample range of price for all classes of trade.

R. F. SIMMONS COMPANY

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

Always in Red.

JOSH W. MAYER.

COLLARS.

ONE of the reasons why we are able to produce Diamond Jewelry of such high order is because our jewelers take more than a merely mechanical interest in their work. Every one possesses artistic skill in a high degree and is permitted an individual freedom in working, which gives every piece the stamp of individuality.

Take for instance our beautiful new Collars. We shall show the most complete transformation of designs that has ever been shown in this country. There is no special period in the designs thus produced.

In order to get an excellent insight of the remarkable character of these goods, it will require a visit to our exhibition which takes place in our offices from August 13th to 18th inclusive.

This exhibition, we believe, transcends all that have gone before. It is extraordinary in its power and scope. Created by conditions, unusual and beyond control, we invite your interest in this display with the assurance that it presents the most impressive collection of fine and inexpensive Diamond Jewelry which we have yet been in a position to offer. Much depends upon the purpose and the intent of an event such as this. That you may determine whether it reaches the level of your taste and needs, we would have you know the purpose and intent which guided the organization of our annual exhibitions.

Once a visit always a visit.

POWERS and MAYER,

Makers of Diamond Mounted Jewelry THAT SELLS.

258-260 Fifth Avenue,
NEW YORK.

We are always pleased to ship goods on memorandum when satisfactory references are given.

It's Time to Go Camping and Yachting

Every jeweler, to meet the demand, should have a supply of Sternau Chafing Dishes—especially the folding Chafing Dishes, which take up but a small space and are indispensable for camping and yachting parties—as warm luncheons can be prepared in them to suit the most fastidious. Made in Nickel-Plate and Silver-Plate.

Prices on request.

Tiffany & Co.'s Superintendent Pleads Guilty to Larceny and Is Released Under a Suspended Sentence.

Sentence was suspended last week in the case of John C. Brosseau, the former superintendent in the repair department of Tiffany & Co., New York, who pleaded guilty to three indictments, charging him with larceny by padding his employers' payrolls. The suspension of sentence was one of the indictments, the others being laid over his read.

Brosseau's arrest was reported in the issue of May 9. He pleaded guilty in court May 29 to the charges against him, and it was said that he had previously made a confession to the District-Attorney. The suspension of sentence was announced by Judge Foster in the Court of General Sessions. This was after A. B. Cunningham, defendant's counsel, had pleaded with the court for clemency to his client. It was said that Tiffany & Co. desired the court to act leniently and that District-Attorney Jerome offered no objection to this course.

In suspending sentence, Judge Foster said:

"You have been in prison for several weeks, long enough, at least, to reflect upon the disgrace which you brought upon yourself and family. Your imprisonment is a disgrace as keen as any the court can inflict. I am going to act upon but one of the indictments and suspend sentence and let the other two indictments over you in case you should ever do wrong again." In their report of the case some of the daily papers said that Brosseau's relatives had restored to the company the amount of speculations, the company accepting the restitution with the approval of the court. It was further said that Brosseau had made no disclosures in relation to others which was an additional cause for the consideration that was extended to him.

As to the exact reasons for the consideration treatment he received, however, little seems to be definitely known except among those directly concerned. From the day of the arrest it has been known that at least some members of the company, because of the long association of Brosseau with the house, did not wish a rigorous prosecution. A reporter of THE JEWELERS' CIRCULAR-WEEKLY who was quoted at Tiffany's & Co.'s as to facts was referred to Mr. Moore, who said that no information would be given out by the company.

The amount of money taken by Brosseau has been stated to be \$10,000. It has been given out also that the thefts extended back at least two years. He had been employed by the company for 35 years, and for a long time had been in charge of the repair department. The plan by which he robbed his employers was simple. He drew on the cashier for amounts in excess of the earnings of various employees, who were paid by the piece. No comparison of the various books, which might reveal dishonesty of this sort, has been made in several years, because of the implicit confidence placed in the superintendent. Some months ago members of the company, becoming convinced that there was a leakage somewhere, secured detectives and accountants at work, and this resulted in the arrest of Brosseau.

When he was placed in custody the papers intimated that he might have taken the three pear-shaped diamonds valued at \$35,000 which disappeared last year from his workrooms and have never been found. It is understood that the members of the company are convinced that there was no basis for this suspicion. He has said that he took nothing dishonestly except the money he got by padding the payrolls.

Preparations Being Made for the Convention of the American Association of Opticians at Rochester, N. Y., July 30—August 3.

ROCHESTER, N. Y., June 7.—Every effort is being made to signalize the next annual convention of the American Association of Opticians, which will be held in this city July 30 to Aug. 3, as the greatest optical convention ever held in the United States and the committees in charge are trying to arrange all details in advance not only of the convention itself but also those which relate to the accommodation and entertainment of the many members of the optical trade who are expected to attend. In connection with the work a circular has been sent out by President B. B. Clark, to all members of the trade, which reads as follows:

"As it is the desire of the committee in charge to make adequate arrangements for the accommodation and entertainment of all attending the convention of the American Association of Opticians, July 30 to Aug. 3, it will assist those in charge if you will mail a postal card of your intention to be present to the undersigned.

"The rates of the hotels, American plan, are as follows: Powers Hotel, \$3.00 to \$4.00; Whitcomb House, \$2.00 to \$2.50; New Osburn House, \$2.00 and \$2.50; Eggleston Hotel, for men only, rooms \$1.00 and up.

"The bureau of information will have a list of private houses near the convention hall where rooms, without meals, may be secured for about \$1.00 per day. Those desiring such should write the chairman of the committee, W. J. Morse, Chamber of Commerce building.

"Hotel reservations may be had by writing the hotels and should be attended to at an early date."

Jewelry, Clocks, Watches, Silverware and Kindred Lines Exported from New York.

WASHINGTON, D. C., June 6.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Southampton: 1 package watches, \$310.

Sydney: 10 packages plated ware, \$868; 1 package optical goods, \$113; 78 packages clocks, \$2,102; 3 packages stereoscopic goods, \$305; 12 packages plated ware, \$1,464; 1 package jewelry, \$100.

Vera Cruz: 5 packages plated ware, \$459; 45 packages clocks, \$550.

Vienna: 1 package clocks, \$100.

Yokohama: 200 packages clocks, \$2,756.

Rochester, N. Y., Opticians Cause Prosecution of Bogus Eye Specialist Who Pleads Guilty.

ROCHESTER, N. Y., June 6.—The opticians as well as the physicians of Monroe County have been deeply interested in the prosecution of "Dr." Horace B. Hyde, who has pleaded guilty to a charge of practicing medicine without having secured a physician's certificate, and are deeply gratified at the termination of the case, Hyde having been accused of tampering with the eyes of Frank Rabshaw, 19 Lisbon St.

Rabshaw, when he found that he was getting worse under the treatment of the prisoner, called on H. M. Bestor, president of the Rochester Optical Society, and Mr. Bestor, after examining the man and finding out what had been done to him, sent the case to Dr. Ozmun, an oculist, who succeeded in partially saving the vision of one of Rabshaw's eyes. Mr. Bestor also sent notices to the two local medical societies and furnished them with the facts and laid the matter before the Rochester Optical Society, which passed the following resolution:

"Whereas, Such incompetent and unscrupulous depredations of one who practices our profession casts a blight upon the integrity and ability of our members. Be it

Resolved, That it is the sense of this society that said H. B. Hyde should be prosecuted to the full extent of the law, and further we offer our moral and financial support to the two medical societies to accomplish this end, and it is further

Resolved, That these resolutions be enrolled upon the minutes of our society and a copy with a copy of our code of ethics be sent to the secretaries of the two societies mentioned.

Hyde was represented in court by Attorney G. H. Smith, who advised him to plead guilty and begged for leniency on the ground that he had always borne a good reputation and had been ill-advised in practicing as he did. On behalf of the men behind the prosecution it was stated that they simply wanted to see the law enforced and did not want to be severe on the prisoner. Judge Chadsey then suspended sentence on him.

A new tariff law went into effect in Peru, Jan. 27, which modifies the tariff in the department of Loreto. In this tariff gold and silver jewelry set with precious stones and unset precious stones pay 3 per cent.; gold and silver manufactures pay 10 per cent. All other merchandise pay 30 per cent.

ACTIVITY

The Keynote of Our Progress

A series of pictures showing various forms of active life.

THE INDOMITABLE TUG.

The puffing tug-boat typifies Strength, Energy and Perseverance, qualities which have helped build up our business to its present large proportions.

Our Strength is expressed in our lines of Rings, Locketts, Sleeve Buttons, Larter Shirt Studs and Larter Vest Buttons.

Our Energy is devoted to increasing these lines and widening our market.

Our Perseverance in applying high grade art work to gold jewelry of unquestioned quality and workmanship is being rewarded by a constantly increasing business.

An inspection of our goods will demonstrate these facts.

Belmont Stakes For 1906 Takes the Form of a Handsome Punch Bowl.

ONE of the most attractive racing trophies of the season was the sterling silver punch bowl and ladle, illustrated on the front cover of this issue, which was awarded the winner of the Belmont Stake contest that was run in Belmont Park, L. I. on Memorial Day. H. P. Whitney was the winner, carrying off the prize as a recognition of the gallant performance of his colt Burgomaster.

The punch bowl is ornamented with the attributes of racing—large horseshoes, racing bits, stirrups and trappings. Circumventing the top is a border in the form of a leather strap indicating control. Four large horseshoes, suggest by their size, the wide playing field occupies in this country. Smaller conventional horseshoes with laurel leaf border at the base represent the numerous occurrences of racing through the year. In the center of the bowl, within one of the horseshoes, are the words: "Belmont Stakes, 1906. Won by ———," with space for the winner's pedigree, etc.

The small racing bits in the ornamentation are sustained in position by sprays of laurel symbolizing the simplicity and ease with which a thoroughbred, well-trained horse can be guided to victory.

The bowl measures 21 inches in diameter, stands 16 inches high, and together with ladle contains 447 ounces of sterling silver. The capacity of the bowl is 10 pints. A handsome oak chest is supplied to hold the trophy.

The prize was made by Tiffany & Co. New York.

Will of the Late Reuben Harris, Wasington, D. C., Filed for Probate.

WASHINGTON, D. C., June 7.—The will of the late Reuben Harris, bearing date March 19, 1903, was filed for probate yesterday. Under its terms one-half of the entire real estate is left to his widow in simple. The sum of \$20,000 is to be held in trust by the executors and placed at interest the amount accruing to be used for the benefit of the widow for the remainder of her natural life. After her death the amount is to be divided, when certain conditions have been fulfilled, among the children of the deceased. The provisions respecting this legacy is that it shall furnish a dowry of \$5,000, to be paid to each of the daughters at the time of her marriage.

The residue of the estate is devised to trustees, in trust for the widow during the remainder of her life. After her death it is to be apportioned among the children.

The original will named Abraham Prutz as the testator's partner, and Alexander W. Prutz as executors, but by a codicil dated March 10, 1905, Mr. Harris provides that his widow, Hattie Harris, Abraham D. Prutz and his two sons-in-law, Leon H. Reizenstein and Philip King, shall act as executors in place of those first named. The executors are also to act as trustees of the trust fund provided for by the terms of the will.

J. W. Schmeltz will carry on the business formerly conducted by Newlin & Schmeltz, Indianapolis, Ind.

Preparations for Meeting at Pittsburg at Which Pennsylvania Retail Jewelers' Association Will be Organized.

PITTSBURG, Pa., June 8.—The retail jewelers of Pennsylvania are going to perfect organization in Pittsburg, at a meeting to be held at the Hotel Henry, Tuesday, July 10, which will have for its principal object the preventing of retailing by jobbers and wholesalers. The association will be known as the Pennsylvania Retail Jewelers' Association.

C. S. Wiley, who is in business at 3602 Forbes St., is the secretary of the proposed organization. Already he has received assurances from almost 100 jewelers in all parts of the State that they will unite in the movement. He says that there is a need of a thorough organization of the retail jewelers in Pennsylvania in order to combat the unfair competition of retail mail-order houses, the unjust practice of retailing by jobbers, the adverse conditions being due to the branding of gold and silver jewelry and numerous other evils which threaten the rights and prosperity of the retailer.

The association is being formed in order that the jewelers of the State may be represented at the annual convention of the National Association of Retail Jewelers, to be held in Rochester, N. Y., in August. At the meeting of the State jewelers, to be held in this city, officers will be elected and rules adopted. A number of prominent local jewelers have been spoken to, and most of them have agreed to take a part in the movement. Charles H. Hamer, of 2321-23 Frankford Ave., Philadelphia, has written to Mr. Wiley, stating that he is in sympathy with the movement. Mr. Hamer was secretary of a State retailers' association, which a number of years ago died a natural death. The association will be in session at one day.

New Members Elected by the Jewelers Security Alliance.

The regular monthly meeting of the Executive Committee of the Jewelers' Security Alliance was held on Friday, the following members being present: Chairman J. W. Akers, Knoxville, Tenn.; John S. Allen, Carl Bergquist & Co., Minneapolis, Minn.; Beneman & Alderfer, Altoona, Pa.; Chas. F. Ann, Buffalo, N. Y.; O. E. Day, Mohawk, N. Y.; W. E. Fellows, Flint, Mich.; A. Imig & Sons, Waukegan, Wis.; S. Jacobs & Co. and W. E. Ober, Minneapolis, Minn.; Chas. A. Loughman,addock, Pa.; Walter Mayer, Pittsburg, Pa.; Jas. Alton & Co. and S. Swanson, Minneapolis, Minn.; J. A. Vignes, Kingston, E. D., N. Y.; Ashfield Jewelry Co., St. Anthony, Idaho; L. M. Bates, Etna, Pa.; H. Birkenhauer & Co.; S. H. Busin & Co. and Meyer Cohen & Co., Minneapolis, Minn.; Walter J. Farrell, Montrose, Colo.; E. L. Bros., Jersey City, N. J.; Aaron E. Johnson, Jewelry Mfg. Co., Minneapolis, Minn.; Keynote Watch Case Co., Oakland, Cal.; Reed-Bentley Co., Minneapolis, Minn.; S. L. Rogers, Bangor, Me.; Mrs. H. Scherztinger, Slatington, Pa.; Seidensticker, Hamilton, O.; E. E. Spaulding, Minneapolis, Minn.; Staiger & Sons, Brooklyn, N. Y.; Sweet Bros., Monticello, N. Y.; A. U. Steel, Minneapolis, Minn.; Julia Azeez, Atlantic City, N. J.; the Barker Jewelry Co., Minneapolis, Minn.; M. W. Bassett, Hartford, Conn.; Leroy Cook, Findlay, O.; August Greer, Stillwater, Minn.; Gorman & Green, Spencer, N. C.; E. L.

Hunkins, Billings, Mont.; Johantgen & Kohl, Lindquist Bros. and Wm. A. Sorensen, Minneapolis, Minn.; F. A. Shaver, Dowagiac, Mich.; Lembrecht & Co., Davenport, Ia.; W. F. Van Arsdell, Aniston, Ala.; W. A. Sheaffer, Fort Madison, Ia.

Rewards of \$100 each were ordered paid to Sheriff W. S. Russell for the arrest and conviction of a burglar who broke into the store of L. F. Ely & Sons, Sherman, Tex., and was sentenced to two years in the penitentiary, besides losing his leg through being shot while resisting arrest; and to R. H. Matthies for the arrest and conviction of two burglars who broke the window of G. A. Hauserman, Paterson, N. J., and were fined \$25 each, it being their first offense and both pleading guilty.

Burglars Loot Atlantic City, N. J., Jewelry Store of Stock Worth More Than \$3,000.

ATLANTIC CITY, N. J., June 6.—The police of this city are anxious to find the man or men who on Sunday broke into one of the jewelry shops conducted by Mrs. Julia Azeez, who deals in precious stones and Oriental jewelry. The robbery occurred between 1 and 2 o'clock in the afternoon in her store at 731 Board Walk, the robbers looting the place of its most valuable articles and getting away with between \$3,000 and \$4,000 worth of stock.

Included among the goods stolen is a tray of very fine pearls, baroque and round, a large quantity of rare antique necklaces and bracelets, a large lot of 14 karat gold jewelry, including many pieces set with turquoise matrix, and a magnificent seed pearl set.

Mrs. Azeez believes that some of the jewelry may be offered by the thieves or their representatives to members of the trade, as the full value of the property can only be obtained from a dealer who understands the quality of the articles. Readers of THE CIRCULAR-WEEKLY are therefore requested to keep on the lookout, and should any such articles be offered them to immediately communicate with the Atlantic City police or directly with Mrs. Azeez.

Death of Bertram J. Harriott.

Boston, Mass., June 8.—Bertram J. Harriott, son of John Harriott, and associated with his father in the badge, medal and emblem manufacturing business at the corner of Washington and Winter Sts., in this city, died Monday, June 4, at the Boston City Hospital, to which he had gone for the purpose of having a surgical operation performed. His disease, cirrhosis of the liver, had made such progress that he was unable to submit to the ordeal, and he died a fortnight after he entered the hospital.

"Bert" Harriott, as he was familiarly known to a large circle of friends, was born in Birmingham, England, but came to this

THE LATE BERTRAM J. HARRIOTT.

country when quite young. He entered his father's employ as a youth, learned the business and became the manager of the establishment. He was widely known among the jewelers of Boston and vicinity, and also in the extended social circle with which he had become identified through his many club and society affiliations.

Mr. Harriott was not only master of his chosen calling as jeweler, engraver and designer, but had musical and dramatic talent of a high order. He was an excellent violinist, orchestral conductor and composer of songs and instrumental pieces, an entertainer in elocutionary readings and private theatricals and at one time president of the Boston Dramatic Club. His versatility brought him into membership in many organizations. He was a member of the Masons, Odd Fellows, United Workmen and Order of Red Men. For a number of years he was also treasurer of the Massachusetts Bicycle Club and editor of the *Fens*, official organ of the club.

Deceased was 44 years of age and leaves a widow. He resided at 228 Huntington Ave., this city. The funeral, which took place to-day, with services at the Chapel in Forest Hills Cemetery, was attended by a large number of friends in the trade and members of many organizations.

Santa Rosa's Great Loss.

Instruction of California Town Shown by Photographs—Assistance Given by Jewelers Board of Trade
Thankfully Acknowledged.

A series of excellent photographs showing the destruction wrought at Santa Rosa, Cal., by the earthquake have been received by the Jewelers Board of Trade, and are being shown to visitors, who invariably are impressed by the extent of the damage as revealed in the prints. The Board's committee on California relief funds sent some time ago outfits for a number of watchmakers, who lost everything in the earthquake and fire.

Frederick H. Larter of the committee received a letter from J. P. Overton, president in Santa Rosa, acknowledging the committee's generosity, and saying: "You have done a kind act, and one that will be much appreciated by the watchmakers and will greatly help them to get work again and to be self-supporting." The Mayor had the assistance of John Hood, who himself was not one of the beneficiaries, in the distribution of the sup-

left standing during the earthquake, doing business as usual at 523 College Ave."

"E. Noack, watchmaker and jeweler, Mendocino St., near 5th. See me for information regarding watches and jewelry left at Carter's for repairs."

"Saved from the ruins, Lewbot-Rinner Optical Co. saved most of their stock and machinery and are now located with Erwin Bros., grocers, Cor. 4th and D Sts. They duplicate any lens, whether you have the prescription or not. Prompt repairs, correct fitting glasses their specialty."

The watchmakers have sent the following acknowledgment to the committee of the receipt of the outfits and financial aid:

SANTA ROSA, CAL., May 25, 1906.
Jewelers Board of Trade, New York City, N. Y.:

Gentlemen—The undersigned watchmakers and jewelers of the city of Santa Rosa desire to express to your esteemed Board their profoundest gratitude and thanks for the thoughtfulness and kindness shown by you in presenting to each of them a watchmaker's and jeweler's outfit, and the substantial financial relief accompanying the same.

Words can but feebly express to the esteemed members of your honorable Board the feelings of profound gratitude entertained by us toward them, and our appreciation of the kind gift you have forwarded to us at a time when we stood most in need of the articles comprised in the same, and when it would have proved to be a matter of great

graphs, sent the following letter to Mr. Hood:

June 6, 1906.

John Hood, Esq., Santa Rosa, Cal.:

Dear Sir—Yours of May 24th received, also acknowledgment of Messrs. McGregor and others of the tools and assistance forwarded through you, and we desire to express to you our thanks for your courtesy in handling the matter as you have. We also desire to acknowledge receipt of the photographs made by Mr. McGregor which show the condition so horrible that we had no idea of extent of same. Again thanking you for your courtesy, we shall be obliged if you will keep in touch with us as to any later developments. Yours truly,

THE JEWELERS BOARD OF TRADE,

D. L. Safford, Secretary.

Death of Robert P. Cullen.

INDIANAPOLIS, Ind., June 6.—Robert P. Cullen, head of the Cullen Optical & Jewelry Co., died recently in the City Hospital after a brief illness. Dropsy was the cause of death.

Mr. Cullen came to this city last March and opened a store in the Traction Terminal building. In addition to the optical business, he carried a large stock of watches and jewelry. The deceased had no relatives in this city. Before he died, Mr. Cullen authorized the Citizens' Savings De-

MAIN BUSINESS PORTION OF 4TH ST., SANTA ROSA, CAL., LOOKING WEST FROM CORNER OF MENDOCINO ST. THE STAR INDICATES SPOT WHERE JOHN HOOD'S STORE WAS LOCATED. (FROM A PHOTOGRAPH SENT TO THE JEWELERS BOARD OF TRADE.)

ies. It was Mr. Hood who first called the committee's attention to the needs of the watchmakers in his town who had lost all their possessions.

Mr. Hood in a recent letter said that the pictures were sent by A. P. McGregor, one of the watchmakers. "So you will see I did not exaggerate the condition." All who have seen the pictures agree with me. Mr. Hood also sent a copy of the Press-Democrat of Santa Rosa, under date of May 24, in which is an acknowledgment of the receipt of the watchmakers' outfits and \$60 in cash accompanying each outfit.

The following advertising paragraphs indicate that the members of the trade are getting on their feet as fast as they can to do so:

"P. Van der Linden, only watchmaker

difficulty for us to procure new outfits to replace those we lost in the awful calamity which recently befell our unfortunate city.

With the aid of your most prized and welcome gift we will be able to again pursue our vocation and to meet the demands and needs of our customers; and whenever we shall have occasion to use these tools, we will gratefully recall the generous donors who presented them to us in our hour of trouble.

We thank you one and all from the bottom of our hearts for your generous gift, not merely for the intrinsic value of the same, nor its timeliness, but more especially because of the thoughtfulness and kindly spirit which prompted its sending, and never will the recipients of your kindness forget the helping hand you have extended to us.

With best wishes for the future success of your organization and of each of its members, we beg to remain, Sincerely and gratefully yours,

A. P. MCGREGOR, F. R. SAWYER, M. F. NOACK,
H. R. EKSTROM, E. F. HEATH, R. M. KEOC,
per E. F. H.

The Board, after receiving the photo-

posit Co. to look after his affairs. At his request he was taken to Greenville, Ind., for burial. The savings company will probably close out the stock.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 9, 1906.

Post Honors Paid to the Late Joseph Wineburgh at Utica, N. Y.

UTICA, June 6.—Joseph Wineburgh, for 7 years senior member of Joseph Wineburgh & Sons, jewelers, whose death was noted in THE CIRCULAR—WEEKLY last week, was laid at rest yesterday. The funeral was a very quiet one. Rev. Dr. Levine had charge of the services and the pallbearers were B. Abelson and Mr. Liberman, of Abelson & Liberman, wholesale jewelers; S. Heller, Simon Monsbach, M. Lewis and M. Workman, of Montreal. The interment was in the Jewett St. cemetery.

THE LATE JOSEPH WINEBURGH.

There were many beautiful floral tributes, including one from the local jewelers association.

Yellow Paint on Neighboring Building Hurts Jeweler's Trade in Diamonds.

NORTH ADAMS, Mass., June 9.—The jewelry trade of this section is watching with interest the developments in the controversy between L. M. Barnes, one of the leading jewelers of this section, whose store is at 51 Main St., with the owners of the Martin block, across the street from Mr. Barnes' store, as the dispute threatens to result in a lawsuit by the jeweler to compel the owners of the building to change the color with which it has been painted. Mr. Barnes has been in business here for 40 years, is highly respected as a merchant. It is believed that if he brings suit as he contemplates it will only be after careful deliberation and good legal advice.

Some time ago the owners of the Martin block painted the building a bright yellow, after which Mr. Barnes was horrified to find that the reflection from the building affected to a pronounced extent the color of the light which entered his store, and in so doing caused all his stock to have an odd appearance. While the yellow light made the silver look bad, its greatest harm lay in the color that it gave to the diamonds. In this light even the whitest of stones appeared off color, thereby not only annoying

the jeweler, but materially hurting his business in these gems. Mr. Barnes has demanded that the owner change the color of the building as he cannot do business in diamonds in his present store as long as the present color remains.

According to newspaper reports the jeweler claims he has not been able to sell a diamond for full price since the building was painted. There are no precedents generally known under which this suit could be decided, but it is believed in many quarters that the jeweler can obtain relief in a court of equity if he decides to bring an action.

Complaint Dismissed on First Prosecution Brought Under the New York Gold Law.

The case brought against J. Finkel, of Locketz & Finkel, jewelry manufacturers at 218 E. Houston St., New York, under the new Gold Law of New York, was dismissed last Friday in the 57th St. Court by Magistrate Finn. The charges were outlined in the issue of last week. It was claimed that the defendant had sold gold chain slides, marked 14 karat, and that they had assayed below 13 karat.

Maurice Blumen and J. Jacoves, of the Brooklyn Watch Chain Co., 275 Bowery, the complainants, were present when the adjourned hearing was called. They had substituted for their former lawyer Mr. Karasik, of Karasik & Kotzen. Mr. Finkel was present with his attorney, Sol. L. Youngentob.

Mr. Karasik asked for an adjournment in order that he should have time to become familiar with the case and to obtain the presence of the assayer from the United States Assay Office, who was desired as a witness. The assayer was present at the hearing the week before, but had not been sworn. Attorney Youngentob opposed the motion for an adjournment. He said that this was an adjourned hearing, and as his client was ready to go on it would be unfair to him to grant any further delay.

Mr. Karasik then said that as the complainants were not prepared to present their case in full, and as he deemed the case important, he wished to withdraw the present complaint. Mr. Youngentob again opposed the request. The lawyer said that he was present not to consent to a withdrawal of a complaint, but to demand its dismissal as a vindication of his clients. The court granted a dismissal.

The next day Mr. Youngentob began an action in the Municipal Court, Seventh District of Brooklyn, against the Brooklyn Watch Chain Co., to recover \$45, the purchase price of a quantity of chain slides. This action was brought in Brooklyn as the complainants are residents of that borough. Mr. Jacoves refused to pay for the slides on the ground that they did not assay up to the stamp. Mr. Youngentob says that if the action before Magistrate Finn was pressed he could introduce testimony to show affirmatively that the slides actually did assay 14 karat, fully up to the degree guaranteed. Mr. Youngentob also said that he is preparing papers in a suit which he will bring in behalf of his clients against Messrs. Blumen and Jacoves to recover damages for alleged malicious prosecution.

Ontario Silver Co.'s Manager to be Tried on Charge of Using Stamp "Sheffield."

NIAGARA FALLS, Ont., June 7.—The preliminary hearing of the charge brought by Chief of Police Mains, at the instigation of the Cutlers' Guild, of Sheffield, Eng., against George W. Clark, manager of the Ontario Silver Co., this place, of conspiracy to defraud the public by false marking of goods, was resumed yesterday before Police Magistrate Cruikshank. County Crown Attorney T. D. Cowper, of Welland, conducted the prosecution, assisted by E. T. Malone, Toronto, representing the Cutlers' Guild. J. W. Nesbitt, of Hamilton, appeared for the defense.

Chief Mains, of the Niagara Frontier police, was the only witness. He testified as to the seizure in the Ontario Silver Co.'s factory of a number of orders and letters, together with manufactured goods, dies, etc. These were produced in court. A large number of the orders were for goods marked "Sheffield." Samples of knives were stamped "Manufactured by Leonard & Lee, Sheffield." One knife produced was stamped "Sheffield Knife Co."

Correspondence was read between the company and the Meriden Britannia Co., of Hamilton, Ont. The letters from the Meriden Britannia Co. referred to a promise made by the Ontario Co. that they would cease using the Sheffield marks on their goods. The Ontario Silver Co. replied, explaining that it had ceased using these marks in manufacture, but was selling off the stock so marked already made up. Mr. Clark stated to Chief Mains that the use of several of the marks objected to had been discontinued and that others would be dropped shortly. These goods have been made and so marked for years. Evidence was also given as to the use of labels on boxes in which goods are put up to which the plaintiffs also object. In all, 35 dies were seized. On cross-examination Chief Mains admitted that Manager Clark had given him every facility and aid in his search of the factory and freely produced the correspondence and other articles seized.

County Crown Attorney Cowper asked that Manager Clark be committed for trial, and the counsel for the accused said he would offer no defense. Magistrate Cruikshank then committed Clark for trial at the next court of competent jurisdiction and fixed bail at a personal bond for \$1,000.

Since the institution of the proceedings the police have purchased silverware bearing the marks objected to as fraudulent from jobbers and dealers in various parts of Canada.

It is stated that in addition to the prosecution of Manager Clark civil proceedings will be taken against the Ontario Silver Co.

In announcing last week the fact that Frank Reeves had severed his connection with the Rockford Watch Co., for which he was formerly superintendent, and had joined the South Bend Watch Co., in the same capacity, mention should have been made of the fact that Mr. Reeves will act as one of the assistants to C. T. Higginbotham, the general superintendent of the concern, and Paul R. Higginbotham will remain assistant superintendent, as formerly.

Retail Jewelers of South Dakota Organize State Association at Aberdeen.

ABERDEEN, S. Dak., June 6.—An organization has been perfected among the retail jewelers of this state, a meeting having been held here June 4, at which the Retail Jewelers' Association of South Dakota was organized with an initial membership of 60. It is considered a very large proportion of the jewelers in the State, as the total said to number but 154, and every effort will be made within the next few weeks to gain as many of the others as is possible. Officers and members of the organization having decided to make an effort to obtain every jeweler within the borders of the Commonwealth.

Briefly stated, the objects of the new association are: To afford retail jewelers the opportunity of entering into advantageous and friendly intercourse with each other; unite for the mutual protection of the craft against the many trade abuses that exist; to quicken the interest and enlarge the views of the jeweler to the end that he may defend and encourage those who are honest in trade protection; to keep a watchful eye on the so-called illegal enterprises that are conducted to the detriment of legitimate trade, and to fight them when necessary; to carefully scrutinize the qualities and prices of goods offered by manufacturers, retailers, and, by assays and other means, commend honest makers and condemn dishonest ones; to take part in any public movement of business men for the purpose of elevating the craft.

The convention was enthusiastic on the question of a national organization as well as a state body, and elected D. G. Gallett a delegate to the convention to be held at Rochester next August; a second delegate to be selected. The following officers were elected: President, H. G. Nichols, Mitchell; vice-president, D. G. Gallett, Aberdeen; secretary, O. B. Tripp, Aberdeen; treasurer, J. A. Musch, Mellette; executive committee, three-year-term, A. W. Bedisch, Aberdeen; two-year-term, W. J. Le, Woonsocket; one-year-term, E. T. Einlaus, White.

It was decided to hold the next meeting at Mitchell some time in July, the date to be named later. Any jeweler in the State who desires to join and has not already done so should send his application for membership to O. B. Tripp, secretary, 404 Main St., Aberdeen.

Davis Bros., Galion, O., Make an Assignment Under State Laws.

GALION, Ohio, June 6.—The report last week that Davis Bros., jewelers, had made a general assignment under State laws was a surprise to the friends of both members of this firm, who have always borne excellent reputation as merchants, and sympathy has been expressed for them in their present difficulty. The house was composed of Henry S. Davis and Harold Davis, both young and energetic men.

Henry S. Davis, who was formerly with Gililand, Meiskey & Co., Lancaster, Pa., (now the H. A. Meiskey Co.), started in business for himself in 1904, with C. M. Davis, succeeding the late M. R. Pogh, at

Mount Gilead, O. Henry S. Davis was later joined by his brother Harold, and then closed out the business at Mount Gilead, the present firm beginning in Galion in October of last year, under the style of Davis Bros. They carried a stock of more than \$6,000 worth of merchandise, and until recently were believed to have assets amounting to nearly \$8,000. Their principal merchandise indebtedness is in Chicago, New York and Cincinnati.

General Appraisers Render Another Decision as to Hat, Shawl and Bonnet Pins.

A decision announced last week by the Board of General Appraisers at New York, sustained in part the protest of Dieckerhoff, Raffloer & Co. against the assessment of duty by the collector at New York on an importation of hat pins and other similar articles. It was held by the Board that hat, bonnet or shawl pins made entirely of metal in imitation of gold or silver with enameled or ornamental heads are commonly known as jewelry and are, therefore, dutiable at 60 per cent. ad valorem. Pins made of metal and set with imitations of precious stones, faceted, or set with pearl, ivory, paste, the mountings ornamented with metal bands, scroll work or other designs, are also dutiable as jewelry.

On the other hand pins made for the same purpose with black heads faceted or plain, or with plain wax, paste or glass heads of various colors, or with heads in imitation of pearls, are declared to be dutiable at 45 per cent. ad valorem as manufactures of glass or non-enumerated manufactures. In order that the latter classification may be obtained it is essential that the heads should not be adorned with metal work.

General Appraiser Sharretts in his opinion says: "These protests are lodged against the assessment of 60 per cent. ad valorem duty under Par. 431, on pins of various descriptions, including hat, bonnet, belt, shawl, and lace pins, all of which were classified by the collector as jewelry and are claimed by the importers to be dutiable at 45 per cent. ad valorem under Par. 112 or 193 of the tariff act of 1897.

"We find from the evidence taken in these cases that the merchandise marked D1 on the invoices is pins similar in all respects to those included in class 1 of G. A. 6139 (T. D. 26679), and those marked D2 are similar to those included in class 2 of said decision, which has recently been affirmed by the circuit court for the southern district of New York and acquiesced in by the Treasury Department. On the authority of the decisions cited we sustain the protests as to the goods marked D2 and affirm the Collector's decision with regard to those marked D1.

O. F. Rohwedder and J. C. MacManus have formed a partnership in the jewelry business at Sherburne, Minn.

J. P. Johnson, of Pine River, Minn., has bought a jewelry business in Aitkin, Minn., and has moved there.

Albert M. Thomas has reconstructed his store at Niagara Falls, N. Y., giving him much needed space and light.

Pearls Reported Scarce in Europe and Advancing in Value—Sale of a Noted Necklace.

Pearls of all kinds are advancing in value to a considerable extent, and are surprisingly scarce in the European markets, said Maurice Brower, 12 John St., New York, who returned two weeks ago on the *Kronprinz Wilhelm*, after spending several weeks in Paris and London. He said that necklace pearls in the larger size have gone up fully 35 per cent. since he was abroad a year before, and those of large size and fine grade are extremely difficult to get. The present bases of these round, white pearls, he says, varies from \$9 to \$15. Large colored pearls have also advanced in value. Pink pearls of fine quality and of desirable sizes are even higher in price than white gems, he says, but it is practically impossible to get such gems in sufficient quantities to make necklaces. Even small sized pearls are declared to be much higher than they were a year ago.

Mr. Brower said that he took with him a quantity of American pearls for which he found a ready market. The only difficulty, he says, as to American gems is that the yield this year is far below the demand.

While Mr. Brower was abroad he learned of the sale of an especially beautiful necklace. The sale was made by Cortier of the Rue de la Paix, for Citroen & Co., the wholesalers formerly of New York. The buyer was Mr. Leeds, a Pittsburgh man, who paid 1,000,000 francs (about \$400,000) for the necklace. It was a single strand containing 60 Oriental pearls ranging in size from 25 to 40 grains, the average being 32 grains. All the pearls were perfect white spheres.

This is the necklace, Mr. Brower said, to which reference has been made in the papers from time to time for some years as the most valuable necklace in the world's markets. He says that there is no doubt that it is the most costly necklace sold in years. There are more valuable necklaces in New York, he said, the original strands of which have been enlarged by the owners who keep adding desirable single pearls from time to time.

Recent acquisitions and loans at the Metropolitan Museum of Art, as mentioned in the monthly bulletin, just issued, include several pieces of plate. John E. Berwind has loaned a plateau of French origin, made early in the 17th century, and an enameled "nef," or ship, dating probably from the 16th century. John Cadwalader has sent some silver, and William L. Andrews a teapot made by Paul Revere, for his "Midnight Ride." Philip Schuyler has loaned a two-handled cup and cover which bears the inscription "Presented by Anne, Queen of England, to Col. Peter Schuyler of Albany, April 19th, 1710." The collection of watches loaned to the museum by Mrs. George A. Hearn in 1902 has just received an addition from Mr. Hearn of 24 specimens of English, French and Swiss workmanship of the 18th and 19th centuries. A collection of 39 clocks and watches has been lent by Maurice Sternberger.

C. W. Williams has succeeded to the jewelry business of C. W. Williams & Co., Higbee, Mo.

Morris & Joseph Klein Plead Guilty to Charge of Grand Larceny—Other Indictments Against Them.

Morris Klein and his brother Joseph, who were members of the Klein Bros. Co., formerly manufacturing jewelers at 51 Maiden Lane, New York, appeared before Judge Ralsky in the Court of General Sessions, Flay, and pleaded guilty to a charge of grand larceny in the second degree on one of the seven indictments that have been filed against them. This step was a surprise to some of the creditors interested in the indictments.

The plea of guilty was entered on an indictment accusing the Kleins of grand larceny by obtaining, on memorandum, and passing of diamonds to the value of \$560, property of H. A. Groen & Bro. There were other indictments growing out of memorandum transactions, charging the Kleins with obtaining diamonds valued at \$1,000 from Eduard Van Dam. These diamonds were a portion of those entrusted to the Kleins by Mr. Van Dam, according to the charges that he has made. The total value of the property so delivered was about \$12,000.

Abraham Levy and George M. Simpson represented the complainants in the memorandum cases. They were in court when the defendants pleaded guilty. The passing of sentence was postponed until to-day, and it is intimated that there will be a further postponement. Meanwhile the attorneys are endeavoring to trace the missing memorandum property. It is given out that diamonds and jewelry to the amount of \$24,000 was pawned at 40 per cent. of its value by Henry Levy, of Park Row, and that the defendants afterwards pawned the ticket to him for \$600. The property is not now in Mr. Levy's possession.

The attorneys for the complainants expect that the Kleins may now give some assistance in tracing the missing property, and it is further said that if they do so the court may take that fact into consideration in deciding the degree of punishment.

The assistant district attorney, who is in charge of the case, spoke in court as if it were his intention not to press any of the other indictments. The idea was that the court in passing sentence would take into account the fact that other indictments are pending.

A distinction has been pointed out, however, in the character of the indictments. Five of the presentments accuse the Kleins of obtaining merchandise by false representation in writing of their financial condition. It is argued that when various indictments are bunched together they are generally of the same class. Report has it so that the Kleins realized the grave character of the five indictments, based on their statement in writing, and proposed to make restitution in those cases. Charges of this kind, lawyers say, are not generally hard to prove as memorandum cases, which offer peculiar difficulties in obtaining conviction.

It is charged that by means of their statement in writing the Kleins obtained merchandise to the value of more than \$2,000 from D. C. Townsend & Co., and of more than \$4,000 from C. F. Wood & Co. Before sentence is passed Hastings &

Wileason, as attorneys for the Jewelers' Board of Trade, expect to be heard as to the disposition of the five indictments based on the alleged misrepresentations in writing. It is not unlikely that there will be further developments in the struggle to obtain the return of missing diamonds and jewelry. The efforts of the brothers to make restitution may also have some influence.

The petition in involuntary bankruptcy was filed against Klein Bros. Co., Inc., as related in the issue of Sept. 20, 1905. The following week the brothers were arrested on the charge of larceny made by Mr. Van Dam. The schedules in bankruptcy were filed in November, showing total liabilities of \$50,612. This did not include the memorandum transactions, which, of course, were not entered as debts. The assets, estimated at the time at more than \$9,000, have practically yielded nothing to the creditors.

Death of Emil L. Lembke.

Emil L. Lembke, a member of Gall & Lembke, opticians, at 21 Union Sq. and 1 W. 42d St., New York, died Friday of last week in the Hospital St. George, Brooklyn. Mr. Lembke was a native of New Jersey, and was born in Jersey City Dec. 7, 1864; two years later the family moved to Brooklyn.

The business with which he was connected was established in 1842 by his father, Charles Lembke, and Joseph Gall. Their first store was in Union Sq. In 1886 Mr. Gall died and Mr. Lembke purchased his interests, continuing alone until Jan. 1, 1896, when he admitted his two sons, the deceased, Emil L., and Charles, Jr., as partners. Charles Lembke, Sr., retired in February, 1901, and at that time J. A. Obrig was admitted as a member. In 1903 the branch store in W. 42d St. was opened.

Emil Lembke was a Mason and a member of the Crescent Club of Brooklyn. He is survived by one sister, Mrs. Emma Reichmann; one brother, Charles F. Lembke, and a widow, Meta. The funeral services were held at the home of his father-in-law, Ernest A. Obrig, 750 Lafayette Ave., Brooklyn, Sunday evening. Interment was in Greenwood Cemetery on Monday.

Death of Henry F. Vogel.

Henry F. Vogel, who for a long time was engaged in the manufacture of jewelry in the Maiden Lane district of New York, died Wednesday night of last week at a hospital in Brooklyn, where he had been for three weeks, having been taken there after an accident in which one of his legs were broken.

Mr. Vogel was 65 years of age. He was born in Germany, and came to this country when a young man. He was employed for a time in jewelry factories, and became a member of the firm of Vogel, Corby & Wesche, now at 17 Maiden Lane, when it was established in 1869. Ten years ago he retired. Walter V. Vogel, now a member of the firm, is a nephew of the deceased.

For 40 years deceased had been a resident of Brooklyn, his home being at 162 Garfield Pl. He was a member of a number of organizations, and was held in the highest esteem. Three sons and three daughters survive. The funeral took place Saturday, and the interment was in Greenwood Cemetery.

Career of the Late Frank Allsopp.

NEWARK, June 11.—Frank Allsopp, of Allsopp & Allsopp, whose death in an automobile accident was chronicled in last week's issue, was born at Birmingham, England, in 1875, and came to this country at the age of five years when his parents, Mr. and Mrs. George Allsopp settled in Providence, R. I. The family moved to this city six years later. Frank and his brothers entered the Newark public schools and he graduated from the Miller St. school. After leaving school he entered the jewelry factory of Riker Bros., and obtained a thorough knowledge of the mechanical part of the business. Five years ago he and three brothers established the firm of Allsopp & Allsopp, in which he had since continued.

Mr. Allsopp nine years ago married Miss Annie Spangler. He is survived by a widow, six brothers, George Allsopp, Jr., and

THE LATE FRANK ALLSOPP.

Henry Allsopp, composing the firm of Allsopp Bros., at Camp and Orchard Sts.; William I. Allsopp, manufacturing jeweler, at 475 Washington St., and Thomas Allsopp, Albert Allsopp and Edmund Allsopp, of the firm of Allsopp & Allsopp; by two sisters, Mrs. Charles Shirley, of Providence, R. I., and Mrs. George Sansome, of Morristown, and by his parents, Mr. and Mrs. George Allsopp.

A large circle of friends was greatly shocked by Mr. Allsopp's tragic death. He was an exceedingly popular young man, always companionable and of a pleasing personality. His fad of late had been automobiling. He had bought a large, powerful machine and greatly enjoyed speeding it.

Mrs. Allsopp, who is recovering from her especially severe injuries, has told friends that on the day of the accident she seemed to have a premonition that something would happen. Although she had always enjoyed going with Mr. Allsopp on his automobile trips, on this occasion she had tried to discourage him from going, and she says that she really was hoping until they started that the machine would get out of order or something would go wrong so that they would stay at home.

R. S. Voss, formerly of Conrad, Ia., is now at Waterloo, in the same State.

The Marking of Foreign Plate in England—New Marks Adopted.

LONDON, June 1.—The following is an epitome of the special report of the Order in Council relating to the hall-marking of foreign plate:

The Court at Buckingham Palace, the 11th May, 1906.

PRESENT.

King's Most Excellent Majesty in Council.

Whereas, By the Hall-Marking of Foreign Plate Act, 1904 (4 Edw. VII. c. 6), it is provided that:

(1) Where for the purpose of complying with the provisions of the Customs Act, 1842, or of the Revenue Act, 1883, any plate is to be assayed, stamped and marked, or where for any other purpose any plate or article imported from foreign parts is brought to an assay office in the United Kingdom to be assayed, stamped, and marked, the plate or article shall be marked in manner as His Majesty may determine by Order in Council so as readily to distinguish the plate or other article was wrought or made in England, Scotland, or Ireland, or was imported from foreign parts, and such mark or marks shall be deemed to be a compliance with the said

Any person, who, after a date fixed by His Majesty by Order in Council, brings or causes to be brought any plate or other article to be assayed, stamped and marked at an assay office, shall state in writing, in manner provided by His Majesty by Order in Council, whether the plate or article was wrought or made in England, Scotland, or Ireland, or was imported from foreign parts, but it shall not be necessary to make such statement in writing in any case in which any plate or other article is brought to an assay office in charge of an officer of customs, or in which the provisions of the Revenue Act, 1883,

for the purpose of being assayed, stamped, or marked as having been imported from foreign parts.

(3) Where any person, who, after the date fixed as aforesaid, brings or causes to be brought any plate or other article to be assayed, stamped, and marked at an assay office, does not know and is not able to state whether the plate or other article was wrought or made in England, Scotland, or Ireland, or was imported from foreign parts, such person shall make a statement in writing to that effect in the manner prescribed in this section, and the plate or other article referred to in the said statement shall be stamped and marked as if it were imported from foreign parts.

(4) If any person knowingly makes a false statement under this section he shall be liable, on summary conviction, under the Summary Jurisdiction Acts, to a fine not exceeding £5 for every article in respect of which the false statement is made.

(5) The Customs Act, 1842, shall apply as if a reference to the mode of marking required under this act were substituted for a reference to the mode of marking under that act.

(6) His Majesty may, by Order in Council, revoke, vary, or add to any Order in Council made under this act.

And whereas by Order in Council dated the 24th day of October, 1904, His Majesty did determine the mark or marks to be stamped or marked upon any plate or article imported from foreign parts brought to an assay office in the United Kingdom to be assayed, stamped, or marked at an assay office and did determine the form of the statement in writing to be made by any person other than an officer of customs bringing or causing to be brought any plate or article to be assayed, stamped, and marked at an assay office:

And whereas it has been found expedient (i) to vary the said Order in Council of the 24th day of October, 1904, by altering the particular marks

to be used by the assay authorities of London, Sheffield, Glasgow and Dublin, and (ii) to alter the form of the statement in writing set out in Part II. of the Schedule to the said Order and to effect these alterations it has been determined to revoke the said Order in Council of the 24th day of October, 1904:

Now, therefore, His Majesty, by and with the advice of His Privy Council and in exercise of the powers vested in him by the above recited provisions doth as from the dates hereinafter respectively specified revoke the said Order in Council of the 24th day of October, 1904, and doth determine that as from the said dates respectively:

(1) The mark or marks to be stamped or marked upon any plate or article imported from foreign parts brought to an assay office in the United Kingdom to be assayed, stamped or marked, shall be the mark or marks described in the first part of the schedule hereto and the following authorities, that is to say:

The Wardens and Commonalty of the Mystery of Goldsmiths of the City of London.

The Guardians of the Standard of Wrought Plate, Birmingham.

The Company of Goldsmiths of the City of Chester.

The Guardians of the Standard of Wrought Plate, Sheffield.

The Incorporation of Goldsmiths of the City of Edinburgh.

The Goldsmiths' Company of the City of Glasgow.

The Fraternity or Company of Goldsmiths of the City of Dublin.

Shall respectively cause to be stamped or marked upon any plate or article imported from foreign parts and brought to an assay office in the United Kingdom to be assayed, stamped or marked the

Concurs in Amendments.

House of Representatives Agrees to Senate's Changes in Gold and Silver Stamping Law.

WASHINGTON, D. C., June 8.—The Jewellers' Gold and Silver Stamping Bill, introduced by Representative Vreeland, is now to President Roosevelt for his signature, having been passed by both Houses of Congress, the House to-day having concurred in the two amendments which the Senate made to the measure when it was passed by that body.

This measure has made a record in both House and Senate, and the speed with which it has been acted on, both by committees and the bodies themselves, has caused universal surprise, but has been all the more clearly indicating the fact that the bill was conceded to afford a protection long desired by the public, and give to the jewellers an opportunity to purge itself of unfair competition through dishonest methods that have been open to illegitimate manufacturers for many years.

The bill which has been several times published in these columns was favorably received by the Committee of Interstate Commerce, of the House, within a very short time after it was introduced, and passed by the House without amendment. It was then sent to the Senate and favorably received by the Interstate Commerce Committee of that body, which reduced the penalty and increased the time in which the bill was to go into effect, from six months to one year, after its passage.

When it was first sent back to the House it is believed that Mr. Sherman, who was temporary chairman of the Interstate Commerce Committee, when the bill was reported, and who showed a deep interest in the measure, would oppose the amendment of the Senate, requiring the time to a year. Congressman Vreeland, who has worked strenuously in behalf of the measure, went home sick this week and left the bill in the hands of Mr. Sherman, who, after consideration, decided not to oppose the amendments and moved for adoption in the House. The bill was quickly passed, and now simply awaits President Roosevelt's signature before becoming a law.

Trans-Atlantic Voyagers.

Returning yesterday on the *Kaiser Wilhelm II*, were: M. B. Rosenback, of Wm. I. Rosenfeld, New York; George De Vries, of Eduard Van Dam, New York.

Henry Fera, of Fera & Kadison, New York, returned last week on the *Amerika*.

Heads of Departments of Gorham Mfg. Co. Hold Annual Outing.

PROVIDENCE, R. I., June 11.—The overseers and heads of departments of the Gorham Mfg. Co. held their annual outing at the Warwick Club, last Saturday, a large number being present to enjoy the yearly event. Special cars took the company to the pleasant resort, and then a series of field sports was begun. These included a baseball game under the management of J. Baker and R. Durfee; bowling, J. Straker and C. Rivard in charge; rifle shooting, A. Erichsen and E. Pick; quoits, G. Rhodes and A. Angilly; shot put, C. Weeks and N. McIntosh; long kicking contest, H. Reeves and G. Harley.

At the conclusion of the sports a fine Rhode Island clam dinner with all the "fixings" was served, and then came a season of music and mirth, the Gorham Orchestra furnishing music. E. F. Aldrich was toastmaster, and the remainder of the programme was as follows: Remarks, F. C. Lawton; remarks, J. F. P. Lawton; informal address, W. C. Codman; vocal selection, W. Hughes; address, F. A. Wing; sword contest, J. C. Butterworth, 3d, and Victor Castaldi.

The heads of the departments were as follows:

A. R. Peck, 1858; F. A. Jordan, 1860; J. Salt, 1862; A. F. Burgess, 1865; J. Baker, Jr., 1865; W. Hughes, 1865; J. E. Straker, 1865; F. A. Burt, 1866; D. W. Darling, 1868; L. K. Seagrave, 1869; A. J. Angilly, 1871; C. F. Phillips, 1871; C. Webster, 1871; C. Rees, 1872; G. Robinson, 1872; I. Thurber, 1872; W. F. Smith, 1873; C. Fulford, 1876; G. Wightman, 1877; E. W. Crocker, 1878; C. E. Weeks, 1879; W. Crook, 1880; W. A. Day, 1880; H. V. Gardiner, 1880; W. E. Westfield, 1881; C. W. Crawford, 1882; A. C. Brown, 1884; W. D. Hall, 1884; G. W. Rhodes, 1885; E. J. White, 1885; S. B. Allen, 1886; G. Boyle, 1886; J. H. Hart, 1886; N. McIntosh, 1886; J. E. Pender, 1886; L. P. Rittmann, 1886; G. A. Townsend, 1887; W. A. Clissold, 1888; E. A. Cordery, 1889; G. E. Harley, 1889; R. E. Peters, 1889; E. Sherwood, 1889; E. A. Enchsen, 1890; H. Jackson, 1890; C. N. Lawton, 1890; E. A. Truelove, 1890; C. W. Lee, 1890; W. S. Allebaugh, 1891; R. W. Higgins, 1891; W. W. Higgins, 1891; H. Reeves, 1891; C. A. Rivard, 1891; J. A. Shearman, 1891; V. E. Smith, 1891; J. J. Sullivan, 1891; G. Tickell, 1891; G. H. Wightman, 1891; W. S. Winslow, 1891; E. I. Peck, 1892; E. H. Dimond, 1893; W. E. Johnson, 1893; R. I. Blanchard, 1894; E. B. Turner, 1894; W. E. Belcher, 1895; J. S. Briggs, 1895; G. C. Richter, 1895; C. M. Sylvia, 1895; H. A. Spencer, 1896; R. Durfee, 1899; W. E. Gould, 1901; W. H. Achurch, 1902; J. J. Cosgrove, 1902; C. A. Gould, 1902; C. H. Keach, 1902; W. F. Kingman, 1902; F. W. Mason, 1902; J. J. Norman, 1902; F. B. Greeley, 1903; J. Mueller, 1903; E. W. Woodward, 1903; W. J. Bannon, 1904; H. E. Chapman, 1905; J. C. Gordon, 1905; G. E. Thomas, 1905; W. B. Jones, 1906.

The guests were: J. S. Holbrook, J. F. P. Lawton, H. A. Bliss, E. F. Aldrich, W. C. Codman, F. A. Wing, F. C. Lawton, W. H. Whipp and W. H. Browning.

The Moultrie Jewelry Co., Moultrie, Ga., recently purchased the Moultrie Book Store, of the same place.

Abraham Lipp, Whose Conviction Was Reversed on Appeal, Not to be Tried Again.

Abraham Lipp, who formerly had a jewelry store at 417 Bromfield St., Boston, Mass., is not to be tried again on the charges preferred against him by Sol. Lindenborn, New York. The information was obtained this week from Adolph H. Rosenfeld, who in February last argued Mr. Lipp's appeal in the Supreme Court, Appellate Division, First Department. The appeal was from a verdict of a jury in the Court of General Sessions, convicting the Boston man of grand larceny in the first degree. The higher court reversed the decision and ordered a new trial. Recently Mr. Lipp was discharged without bail, and his attorney says that there is no doubt that the case is ended.

Mr. Rosenfeld recently received a copy of the opinion handed down by the Appellate Division, reversing the decision of the lower court. The Appellate Court says that repeated and careful readings of the records justify the justices in holding that the conviction should not be allowed to stand.

The court then reviewed the facts. The defendant on July 29, 1904, bought jewelry from Mr. Lindenborn at his office, 170 Broadway, to the amount of \$2,700. Mr. Lindenborn was not present, but was represented in the transaction by his clerk, Cy. Price. Lipp gave in ostensible payment diamonds to the value of \$929.20, two checks—one for \$900, the other for \$955.20—and \$200 in cash. The \$900 check was paid on presentation, but the check for \$955.20 was dishonored. The complainant tried to show that Lipp on buying the jewelry claimed to have \$2,200 in cash in his bank in Boston. Lipp claimed that Price had agreed to hold the checks instead of forwarding them for immediate collection. Price was not called as a witness, being in St. Louis at the time of the trial.

The following paragraphs in the opinion indicates the view of the court on the law involved:

It is manifest to us that the good faith of the prosecution of this defendant is seriously impeached by the record. When the check for \$955.20 was returned to Price dishonored, he entered at once into negotiations with the defendant to secure its amount. From all that appears, Price made no claim of any felonious or fraudulent conduct on the part of the defendant in buying the merchandise. He went to Maine to negotiate with the defendant respecting a transfer of real estate, took a deed of that real estate to secure the indebtedness and did so after conference with a lawyer in Maine concerning it.

On Aug. 11, 1904, Price wrote to the defendant as follows: "Upon receipt from you of a settlement of your account, I will deed back to you the property which you have this day deeded to me, or if I have disposed of same I will give you credit on account for such amount as I receive for the equity." The whole matter was adjusted as an indebtedness before this indictment was found. It was treated by Price as a simple indebtedness and no suggestion that the transaction involved original responsibility was made.

The Massachusetts Retail Jewelers' Association will meet at 2 p. m. Thursday, June 21, at the American House, Boston. Several new members will be voted in and delegates to the national meeting in Rochester, N. Y., Aug. 3 and 4, will be elected. Plans will also be completed for the association's July meeting and fish dinner at Bass Point, Nahant.

P. Zane, Christiana, Pa., spent a few days in this city last week on his way home on a pleasure trip to Gettysburg, Baltimore and Washington.

E. Caldwell & Co. were awarded the contract last week for the prizes to be distributed at the polo tournament of the Philadelphia Country Club.

Warner Hutchins, 728 Sansom St., is in Chicago attending the Imperial Council of the Mystic Shrine, to which he is a delegate from the Lu Lu Temple, of this city.

Charges of stealing packages of jewelry consigned by manufacturers to local jewelers from the Adams Express Co. against G. A. Coleman and John Sutcliff were arrested and held in bail for trial.

After Korn's new jewelry store at 10th and Chestnut Sts. narrowly escaped being seriously damaged last week when two trolleys collided near it and one of them was forced on to the pavement up to the glass windows.

A recent note it was stated that W. B. Hens, 717 Sansom St., had moved with his family to Wildwood, N. J., for the Summer. Attention should have been made of the fact that Mr. Hens will remain in Philadelphia to continue his enameling business.

A report of interest to the trade has reached here from Atlantic City, to the effect that Sarah Bernhardt purchased \$40 worth of jewelry from Boardwalk merchants while in Atlantic City last week. The Sansom St. trade is speculating as to who were the fortunate merchants.

A list of town retailers in this city during the week included: E. J. Weider, Pennsylvania; G. A. Jacot, South Bethlehem, Pa.; Isaac Brademann, Reading; Gustave Lanz and his son, Norristown, Pa.; J. W. Parrish, Newark, Del.; D. H. Krause, North Wales, Pa., and S. Bell, of the Bell-Smith Jewelry Co., Atlantic City, N. J.

A gold brick weighing 57.49 ounces, and valued at \$1,001.25, was exhibited in the show window of the Bailey, Banks & Bidwell Co. last week, where it attracted attention from hundreds of people passing by. It was presented to the Denver Lodge of Elks by the Fifty Gold Mines Corporation of Black Hawk, Col., and will be given as first prize to the best band in uniform in the parade at the Denver reunion next month.

Since M. Sickles & Sons' baseball nine defeated the nine organized from the employees of H. O. Hurlburt & Sons last week it has been challenged by almost every other jewelry house of the city. This, the fifth game of the season, has stimulated interest in the games to be played, and M. Sickles & Sons, Bro. & Co., I. Bedichimer & Co., L. P. White, B. F. Williams Co., and some of the leading retail houses, are preparing

to wrest the baseball laurels from Sickles' team. It is proposed to play games every Saturday during the Summer.

Accused of having robbed her employer, W. H. Rexford, proprietor of a jewelry store on Market St., Retta McMullen, a young woman, was arrested, last week, and held in \$600 bail for trial by Magistrate Eisenbrow. For weeks past Rexford has been missing money and jewelry. Suspicion was finally directed toward the young woman, who was employed as cashier, and she was arrested on the specific charge of embezzling \$1.75, part of the receipts of a sale. Upon being questioned the police say she admitted that she had stolen property at home. A detective accompanied her to her house, and there recovered 40 rings.

The board of governors of the Jewelers' Club, at its meeting Tuesday of last week, decided to hold its annual outing this Summer in the nature of a baseball game and a vaudeville show, to be given June 26. The game is to be played between the New York and Philadelphia members of the club. Calls for volunteers have been sent out by those in charge of both teams, and the rivalry promises to be of the keenest but most good-natured sort, such as characterized the baseball rivalry of the club some years ago. The management of the Philadelphia National League team has permitted the jewelers to compete for baseball honors in their field. The wives and children of the members will be invited to witness the game. Afterward it is proposed to entertain the club guests at the headquarters, 13th and Chestnut Sts. This will be followed by a vaudeville entertainment at the Athletic Club, 11th and Catharine Sts. Tickets for the ball game are to be complimentary to all members and their friends. The entertainment at the Athletic Club is proposed to be of a high-class order. Samuel H. Kendall's band has been engaged to enliven the afternoon and evening.

Syracuse.

P. A. Coon, of the P. A. Coon Silver Mfg. Co., sailed last week on the *Friesland*, to be gone during the months of June and July.

A. Jacobson, who runs a pawn shop in E. Washington St., was recently robbed by a pickpocket of a pocketbook containing \$72 and some papers at the New York Central station, while waiting for the arrival of relatives from out of town. The police were notified.

The Jewelers' Association of Milwaukee, Wis., which was recently organized as told in the last issue of THE CIRCULAR-WEEKLY, held another meeting last week, after which it was announced that 38 of the 45 firms eligible to membership had been admitted. It was decided to admit concerns in lines allied to the jewelry trade, such as optometrists and engravers, as well as wholesale dealers. Besides the officers mentioned last week the following directors have been elected: William H. Upmeyer, Theo. Schelle and E. F. Rohn. Meetings will be held every month hereafter, and a dinner will be a part of the program of each session.

Newark.

Percy Burnett started yesterday on the road for Schultz, Leiss & Co., and will represent them in Pennsylvania, Ohio, Michigan and Indiana.

Cards were sent out to the trade last week calling attention to the dissolution of Schwarzkopf & Dorer, and also to the incorporation of the Schwarzkopf Mfg. Co., at 475 Washington St. The plant is being improved and the facilities will be considerably increased.

The Gibson-Krugler Co. is establishing at 306 Market St. a new factory for the production of fine jewelry. F. Gibson, of the new firm, is a traveler well known in the west, where for years he successfully represented the H. A. Kirby Co., the Wm. Kinscherf Co., and Champenois & Co.

William H. Jones, of the jewelry manufacturing firm of Jones & Woodland, closed up his home in Orange last week, and on Wednesday sailed for Europe on the *Amerika*. He is accompanied by Mrs. Jones and their daughter. He took with him his new Packard automobile, and the party will spend five months in touring through Germany, France, Austria, Italy, Switzerland and England.

President L. B. Hilborn, of the New Jersey State Optical Society, writes to THE CIRCULAR-WEEKLY a communication urging that all opticians in New Jersey who are not members of the society should at once make application for membership blanks. He has been informed that at the next session of the State legislature an effort will be made by physicians to have an amendment to the medical practice act adopted for the purpose of restricting the optometrists in prescribing lenses. It is stated that the provision to be offered is drawn broadly, so as to apply to all who fit, sell, manipulate or otherwise treat or care for by manual or mechanical means any apparatus or method for the relief of any bodily ill or defect. The society, Mr. Hilborn points out, intends to defend the rights of its members, and, therefore, all opticians who should get inside the lines of the organization.

William Jeckel, 46 years old, a silversmith, who had for several months been in the employ of Unger Bros., and who lived at 47 Morton St., lost his life on Sunday while making a heroic effort to save two children from being ground to pieces by a Central Railroad train at the Spring St. station in Elizabeth. He seized the children and threw them aside in time to save them from sustaining even a scratch. Witnesses of his bravery were so certain that he could not escape injury that they turned away as the tots landed on the station platform and Jeckel made a desperate effort to reach the same spot. A fraction of a second would have saved him, but as he took the last step that was necessary to land him on the platform the pilot of the engine struck him and hurled him aside with great force. It was not thought at first that he was seriously hurt, but when he was taken to a hospital it was found that his injuries were fatal. He died a short time afterward without having regained consciousness. His body was taken to Newark on Monday. He was unmarried.

aj. C. H. Case, Hartford, left Thurs-
day for a 10 days' trip to Rangeley Lakes,

Hirsch & Son, 1005 Main St., Hart-
ford, are about to sell out to M. W. Bas-

the City Hall clock, of Hartford, has
started going again after a short
period of inactivity.

Alexander Harper, manager of the Amer-
ican Silver Co.'s office in Chicago, is in
Hartford on a short trip.

The factory of the Bradley & Hubbard
Co., Meriden, closed June 9, and will
be in so during Centennial week.

Thomas I. Gwillim, accompanied by his
wife and daughter, has left for Standish,
Maine, where they will spend the Summer
months.

Emmel Stohr, a designer at Factory "E,"
International Silver Co., Meriden, sailed
last night on the *Amerika*, of the Hamburg-
American Line, for Europe. He will re-
turn home about July 19.

Edward B. Tileston has resigned his
position as foreman of the manufacturing
branch of the chandelier department of the
Bradley & Hubbard Mfg. Co., Meriden,
after having been associated with that com-
pany for about 36 years.

Charles Bradley, who for several years
has held a responsible position with the New
England Watch Co., Waterbury, died Wed-
nesday, at the Hartford Hospital, aged 45
years. Mr. Bradley's father was at one
time Mayor of Waterbury.

John M. Curtis, chairman of the Centen-
nial Committee, last week, received from
President Roosevelt a letter expressing his
regret owing to his inability to accept the
invitation of the people of Meriden to at-
tend the centennial celebration, June 10-16,

Arnold Evans, 15 years old, was killed
Saturday afternoon by an automobile owned
and driven by Edgar E. Vassick, manager
and secretary of the Burns Silver Co.,
Bridgeport. Medical Examiner Downs
examined the body and reported that death
was accidental.

Notices have been published in the dif-
ferent departments of the Seth Thomas
Clock Co.'s factory, Thomaston, notifying
employees that the annual Summer vaca-
tion will begin July 26 and continue until
August 13. During that interval extensive
movements will be made in the case

of Ephus B. Rogers, Meriden, has received
from Congressman N. D. Sperry a letter
stating that it will be impossible for Meri-
den to get the additional appropriation
asked for a new postoffice. Mr. Rogers is a
member of the committee appointed some
months ago to look after the extra appro-
priation.

William F. Winslow, superintendent of
the William L. Gilber Clock Co., Winsted,
has brought suit for \$2,000 damages against
the town of Winsted. His automobile went
over a steep bank on Cottage St. last fall
and was completely wrecked. Mr. Wins-
low alleges that the road was in bad condi-
tion there being no railing at the point.

In the case of Jos. Marchitto against the
Waterbury Clock Co., Waterbury, an ac-

tion to recover \$1,200 damages for injury
to the plaintiff's finger while working in
the defendant's factory. Judge Reed in the
Superior Court, Thursday, handed down
the judgment of the plaintiff to recover a
nominal damage amounting to \$25 and costs.

Carl G. Aldrich, formerly of Winsted,
has entered the wholesale jewelry business
in Boston, Mass. The business, which was
formerly conducted in Winsted by Mr.
Aldrich, has been absorbed by the Aldrich
Murphy Co., Inc. The officers of the new
concern are: President, Carl D. Aldrich;
secretary and treasurer, Louis G. Murphy.

The silver service for the battleship *Con-
necticut*, which has been made by the In-
ternational Silver Co., was inspected, June
7, by Gov. Roberts, Gen. Henry C. Dwight
and Francis B. Allen, of Hartford, mem-
bers of the State Commission appointed to
make the purchase. The service will be
exhibited during the Centennial week, in
Meriden.

Wm. C. Hawley, of Davis & Hawley
Co., Bridgeport, captured one of the two
men who stole a pin set with diamonds
and opals from the store one day last week,
just as the thief was about to leave town
on a train. When taken to police head-
quarters the prisoner gave his name as
John Rolling, and said he resided in New
York. Rolling's confederate escaped. The
pin, which is said to be valued at \$85, was
not recovered. It was subsequently learned
that the real name of the man captured by
Hawley is Haines, and that he is well
known to the Pinkerton Detective Agency.

Providence.

Councilman George W. Parks is being
mentioned as a possible candidate for Mayor
on the Republican ticket.

A. A. Remington and Horace Remington,
refiners, sailed last week on a trip to Eu-
rope, and expect to be gone several weeks.

Among the imports at the port of Provi-
dence last week were 14 packages of imita-
tion precious stones from Bremen, as well
as two packages of jewelry; one package of
imitation precious stones from Havre and
one of clock movements from Liverpool.

Among the buyers registered in town dur-
ing the past week were: Miss H. Graf, New
York; Sol. Prentke, Cleveland, O.; H.
Pichel, New York; C. H. Peterson, St.
Paul; B. Rothschild, Chicago; E. Cohn,
New York; Carl Rosenberg, New York.

Plans for the jewelers' outing are going
on rapidly, and the details are rapidly be-
ing brought into shape. The annual event
promises to be fully as successful as those
in the past have been, the committee leaving
no stone unturned if by losing it they can
add to the enjoyment of the occasion.

Capt. E. Merle Bixby, who has charge of
the silverware department at the Shepard
store, was last week re-elected captain of
the Machine Gun Battery of the State mil-
itia. A handsome wine cooler of Flemish
oak with sterling silver bands and orna-
mentation was given him as a token of ap-
preciation of the men for his services in
their behalf.

K. C. Naylor, San Diego, Cal., will con-
duct business hereafter under the firm style
of the Naylor Gem Co.

Cleveland.

The store of H. H. Moses, at Jefferson,
was destroyed by fire a few days ago, with
a loss of \$2,500. The insurance is partial,
it is said.

The store of Harry Goldberg, 248 Su-
perior St., was robbed early Wednesday
morning, and Mr. Goldberg says that
about \$1,763 worth of goods were taken.
The thieves entered through a transom.
The loss falls upon the burglary insurance
company with which Mr. Goldberg car-
ried a policy.

Stanley Touzinsky, a jeweler at 1105
Broadway, filed a petition in bankruptcy
last week. The liabilities are \$3,022.36,
while the stock is valued at \$1,000. In ad-
dition there are debts due the jeweler
amounting to \$1,122. The larger claims
are as follows: The Bowler & Burdick
Co., \$200; Wingate-Nusbaum Co., \$200;
Sigler Bros. Co., \$110; C. P. Coyne, \$225;
Calumet Watch Co., \$71; Charles Arns-
heimer, \$122; Joseph Brown Co., \$107; J.
Alberts, \$130; Dans & Co., \$50; J. F.
Schaffer & Co., \$527; J. R. Wood & Son,
\$500; Sabutz & Sons, \$130; Laundau
Bros., \$40.

Through the manipulation of two clever
crooks, Gottdiner & Wicht, 2084 W. 25th
St., lost 28 watches Wednesday. The
young men came into the store and one of
them engaged the clerk's attention by an
inquiry for eye glasses. He looked at a
number of styles and kept the clerk so busy
that he failed to keep the usual lookout.
While this was going on the other man
was sauntering about the store idly. Al-
though several other persons were in the
room, none of them saw him make a sus-
picious move. The man that wanted the
glasses finally decided that none of them
suited him and walked out with his com-
panion. It was not until several hours
later that the loss was discovered. Good
descriptions of the men were furnished the
police department, but so far they have not
been apprehended.

Savannah, Ga.

Geo. R. Youmans, Way Cross, Ga., is one
of the applicants for a charter for the Way-
cross Hotel Co.

R. M. Hull was appointed receiver for
Sternberg & Co., in the Superior Court,
at Savannah, on June 9. The appointment
was made by agreement in the case of E. A.
Cowan & Co. against the firm. The receiver
gave bond in the sum of \$5,000, and is au-
thorized to sell the stock on time or for
cash. Alexander & Edwards are attorneys
for Sternberg & Co. Geo. W. Owens rep-
resents E. A. Cowan & Co.

Diamonds Set Without Cost

Means a lot of money saved during the year. This you can do very easily if you have your settings done by a first-class setter. Your diamonds will improve in value more than three times the money you pay for setting them. At the same time your mountings improve greatly. Your customers are satisfied with all the orders you turn out. You can compete with all others who are slow in grasping the importance of these facts, by giving me all your settings. I am sure you will make no mistake as I will prove these facts.

I make a specialty of setting fine Platinum Mounting Watch Cases, Lockets and Gypsy Settings.

YOUR MEMO. ORDERS ARE SOLICITED

NEW YORK, 41 Maiden Lane

Attleboro.

Waldron Evans, a Boston jewelry salesman, was last week wedded to Miss Fannie Cordelia French, of Taunton.

Charles P. Keeler, of McRae & Keeler, admitted himself creditably Saturday in a competition shoot at Lexington, Mass.

Louis B. Jones, of C. A. Marsh & Co., returned from a trip through the west, and Amy W. Potter, salesman for J. M. Fisher & Co., is also back from a long trip.

Announcement was made a few days ago of the coming wedding of Miss Rena M. Goff, daughter of Major and Mrs. William Goff, to Frank Clifton Rounseville, son of V. H. Rounseville, of C. A. Marsh & Co., of the younger generation of ambitious jewelers.

A good start has been made on the foundation of the new shop for the D. F. Briggs. To accommodate the structure large changes are being made in the wire system, which supplies electric light and power to the jewelry factories in the group at the center of the town.

The manufacturing jewelers noted in last week's issue of THE CIRCULAR-WEEKLY the movement of the Chicago jobbers to organize and regain control of the trade. Several interviewed show no disposition to discuss the matter for publication until the movement develops further.

Charles M. Robbins, of the Chas. M. Robbins Co., was last week honored with election to office in the Ancient and Honorable Artillery Company of Boston. Mr. Robbins is having a new cottage erected at Greenwood Park, a new Summer resort, which adds to its growing popularity largely to his interest.

Renewed efforts have been lately made to organize the workers in the jewelry factories. Former President Herman Vollmer, of the Jewelry Workers' Union of America, made a vigorous but unsuccessful effort in the line two years ago, and the present move is being done quietly, but with some effect already apparent. No union is being formed in this town. The men are joining the Providence union.

North Attleboro.

George L. Paine is home from a western tour.

Frederick E. Sturdy has been elected a director of the Mt. Hope Cemetery Association.

The electric plant which J. F. Sturdy's sons have been busy installing in their Robinsonville factory for the past few months was placed in commission early last week.

Geo. L. Paine, Charles H. Clark and Charles Peckham have returned from the west. H. H. Pierce returned Thursday from an extended trip in the interests of the W. Smith Co.

Services in memoriam to the late James Eliason Lincoln were held at the Universalist Church, Sunday. A sermon was preached by the pastor, Rev. Ralph E. Connor, describing the many good qualities of the deceased jeweler.

The many friends in this town of William Clark, of Clark & Coombs, Providence, were grieved this week to hear that he was obliged to undergo a serious operation,

which, because of his advanced age, is considered dangerous. Previous to the big Stephen Richardson fire Mr. Clark's concern was located in North Attleboro.

The funeral of David Coddington, one of the pioneer jewelers of the town, was held on Wednesday afternoon, and the services were attended by a large circle of friends, which included a large number of manufacturers. The service was conducted by Rev. George E. Osgood, and burial was in the Mt. Hope Cemetery. The floral tributes were profuse and beautiful.

William H. Riley was seriously injured in an accident on Tuesday afternoon of last week. He was climbing into his carriage and the horse started up prematurely. Mr. Riley was caught in an awkward position and was obliged to cling to the wagon to avoid being run over. He was dragged 75 feet before the horse was stopped. Mr. Riley was badly shaken up and his left ankle was hurt.

Buffalo, N. Y.

Frank Johnson, diamond setter for Fred Dorn, 87 E. Genesee St., returned last Saturday from New York.

S. L. Levy, 483 Main St., has established an optical department, with L. Gottlieb in charge. Mr. Gottlieb came here from Philadelphia a few years ago.

Barthold Block, of Block Bros., returned last Saturday after a long absence on the road for his house, at 520 Main St. He reports good business in the eastern States.

An erroneous report that a man had robbed T. C. Ianke, Main and Eagle Sts., of his costliest watch last week was in circulation here. The daily newspapers ran the story without investigation. The report was absolutely untrue.

J. C. Sipe, Indianapolis, Ind., came to Buffalo a few days ago direct from New Mexico to visit his brother, A. E. Sipe, diamond importer, 8 Mooney building. A. E. Sipe is going to Indianapolis shortly to repay the visit of his brother.

Mrs. Paul Foerster, wife of the Seneca St. jeweler, whose health became greatly impaired following the robbery of \$3,000 worth of diamonds from her husband's store, three months ago, is rapidly recovering in the country, where she is sojourning.

Beginning July 1, and continuing through August, the jewelers of Genesee St. will close their stores at 6 o'clock every night in the week except on Monday and Saturday. This action is the result of a petition liberally signed. Jewelers of other sections of the city will probably take similar action.

Paul Friedlander, of R. L. & M. Friedlander, New York, was here several days of last week arranging for hotel accommodations for the New York delegation, 400 strong, who are attending the annual national convention of the Travelers' Protective Association. Mr. Friedlander secured handsome quarters at the Lafayette Hotel.

Fred A. Riefler, 420 Michigan St., has completed his 33 years in business here at the "same old stand." Mr. Riefler began as an optician in a small frame building. Later he added a stock of jewelry, and at

that time the rich people of Buffalo lived in the vicinity of his establishment. "I made money rapidly in those days," he said to a CIRCULAR-WEEKLY reporter, "and was soon able to abandon the frame building and erect the block which I now occupy."

Toledo, O.

Samuel Leshner, Bucyrus, O., is adding the art of architecture to his regular profession. He has completed plans for a residence for a Mrs. Holmes, of that city, and is at present engaged on a set of similar drawings for a residence he will build for himself.

John Prochaska, 109 Summit St., has purchased the property at 114 Summit St. from Miss Marie Hoag, New York, the purchase price being \$20,000. The property is leased by the Merchants' Truck & Delivery Co., and while the new owner purchased it as an investment, it is understood that he did it to be on the safe side, as the property he now occupies was sold a few days ago. Mr. Prochaska owns property in this city valued at over \$50,000.

Toledo is to have an entire modern business building devoted to the jewelry business, a thing which the city has never before enjoyed. J. J. Freeman & Co., Summit St., near Madison Ave., have just closed a deal whereby S. C. and C. L. Reynolds will erect for them a four-story building which is to be devoted entirely to jewelry business. The new site is located adjoining his present one and is at present occupied by a shoe store. This is to be torn away to make room for the new building, beginning July 15. Mr. Freeman, head of the firm, states that the very latest ideas are to be incorporated in finishing the new store, and from the plans which he has already made public, it will be one of the finest in the middle west. Entirely new mahogany, plate glass and marble wall cases and show cases are to be used in the first floor, which will be done throughout in marble. The first floor will be used for general jewelry purposes. The second will be given over to lamps, cut glass, pottery and china. The third floor will be used as a store room, while the fourth floor will be devoted to manufacturing and repairing purposes. Mr. Freeman made several unsuccessful efforts previously to secure a new location.

Denver

P. F. O'Neill, who moved recently to the Glenair building, on 15th St., has finished the fitting up of his new store, which is replete with every facility for conducting the optical business.

Henry Bohm, of the Bohm-Allen Jewelry Co., was the victim of a runaway accident last week, which cost him the loss of a handsome carriage and injury to a valuable horse. The accident was caused by the carelessness of Jim Lee, a Chinese laundryman, who left a heavy laundry wagon, to which was hitched a fast horse, in the alley between Champa and Stout Sts. The horse ran away, and, besides endangering the lives of many pedestrians, wrecked the carriage of Mr. Bohm, which was standing in front of his store, at 16th and Arapahoe Sts.

BLACKINTON

**“Think it over,
Mr. Retailer”**

Buy Blackinton vest and Dickens chains and save the aluminum coupon tags found on the swivels. Send these tags to our factory and we will redeem them in

“THERE'S MONEY IN IT”

W. & S. Blackinton Co.

New York, 14 Maiden Lane.
Factory, North Attleboro, Mass.

W. & S. B. ★

Boston.

Amuel D. McChesney, of the William B. Kerr Co., was a visitor to the Boston fair during the week.

Arthur C. Poor, who went to San Francisco several months ago to accept a position with Shreve & Co., has returned to Boston since the disaster.

C. Zinn, a leading jeweler, also a prominent financier and member of the government, Hastings, Nebr., is in Boston on a brief business and pleasure

Edward Gowdy, recently of San Francisco, for a number of years previously with Shreve, Crump & Low Co., has returned to this city, entering the repair department of the same concern.

M. Shepherd, of Shepherd & Bennett, Malden, has returned from a European tour trip, on which he was accompanied by his wife and daughter. They visited the principal Mediterranean cities abroad.

The New England Watchmakers' Club has been invited by the Waltham Watch Co. to a banquet at the American House, Boston, on the evening of June 19. The reception hour is 7 o'clock, and the dinner will be served at 7:30 o'clock.

The T. F. Tuttle Silver Co. recently moved from 21 Bromfield St. to 387 Washington St., where more spacious quarters have been obtained. A showroom has been added and the company will manufacture silverware for stock, selling to the trade.

Edward L. Wheeler, now with the Bohm & Bolz Co., San Francisco, but a score of years ago identified with the Boston trade, along with the house of Bigelow, Kennerly & Co., has been in town during the week calling on former acquaintances among the jewelers.

Royal Robbins, of the Waltham Watch Co., accompanied by his family, sailed last week from Boston on a trip to Europe. J. C. Barlow, of the Waltham Watch Co.'s factory, formerly at the Montreal selling agency, has returned from a trip to the latter city.

A consignment of several hundred damaged watches that went through the San Francisco fire in jewelers' vaults has been received at the factory of the Waltham Watch Co. for renovation. They will be thoroughly overhauled, and most of them will be put in good condition again, it is understood.

A. Simonds has been chosen a director of the Ripley-Howland Mfg. Co., succeeding the late president, J. C. Donnell; and H. B. Burnham, treasurer of the company, becomes president as well as treasurer. Mr. Simonds is the superintendent of the manufactory, and has been a stockholder for some time.

James S. Blake, of Kettell & Blake, is in Chicago attending the imperial council of the Mystic Shrine. Mr. Blake, who is one of the 33d degree Masons of Boston, is exceedingly popular with the fraternity as well as with his fellow-members of the jewelry trade, is a past illustrious sovereign of the Shrine.

Visitors in Boston during the week included: Sanford K. Gurney, Brockton; H. B. Locke, Amesbury; Mr. Cham-

berlain of B. M. Chamberlain & Son, Salem; S. G. Beers, Taunton; H. O. Barthelme, Marlboro; Mrs. L. P. Davis, Falmouth; C. W. Clough, Pawtucket, R. I.; George E. Camm, Johnstown, N. Y.; A. Gamache, Brunswick, Me.

The quarters that are to be occupied by Maynard & Potter, in the new building at the corner of Boylston and Berkeley Sts. are approaching completion. Mr. Maynard was formerly of the firm of A. Stowell & Co. It is expected that the new concern will be established by the close of the Summer vacation period, and ready for business in the location named.

The Summer outing of the Boston Jewelers' Club was held at the clubhouse of the Point Shirley Club, of which some of the jewelers are members. The party went by train yesterday afternoon, June 12, to Point Shirley, where an excellent shore dinner was provided, and enjoyed an informal gathering with the clubhouse accompaniments of bowling and other shore recreations.

Thomas W. Paine, head clerk and inside salesman during the past four years for C. W. Sweetland, of the Jewelers' building died at his home in Cambridge, Thursday night last, after a long illness from liver trouble and other complications. He was about 65 years of age. Mr. Paine's final sickness, necessitating his giving up his daily employment at the office, was of a fortnight's duration. He was a Grand Army veteran, and a member of several fraternal orders. He leaves a widow and two daughters.

Rochester.

Morris Meyers is selling at auction 8,000 pieces of cut glass. The sales are well attended.

The following opticians have signed the petition in favor of closing their stores on Saturday afternoon during July and August: E. E. Bausch & Son, the Genesee Optical Co., Rudolph Schmidt & Co., Empire Optical Co., Clark & Bowen.

E. J. Scheer & Co. made the loving cup which the Eighth Separate Company of this city put up as a prize to be competed for by the school boys' companies who took part in the Decoration Day parade. The cup was awarded to the best drilled company.

The business started by Solonsky Bros. a few months ago on Clinton St. was recently changed in name to "The Model" jewelry store. Not only has the proprietor changed the name of the store, but, as recently noted, has also changed his name from Solonsky to Sloan.

W. H. Glenn & Co. are now showing a light line of jewelry in the basement of the establishment. This firm has always handled silverware, clocks and such lines, but it is only recently that the firm put in a line of necklaces, brooches and other jewelry appealing to women.

The following jewelers have signed the petition in favor of closing the stores at 1 o'clock on Saturday afternoon during July and August: The L. Sunderlin Co., S. D. Burritt, J. R. White & Co., J. J. Ernisse, E. J. Scheer & Co., Humburch Bros., C. F. Vanderpool, W. H. Glenn & Co., Klee &

Kroh, Henry Oemisch Co., E. S. Ettenheimer & Co., Morris Rosenbloom & Co., C. F. Wolters, George Andrus, Philip Present.

The wires that operated an electric fan in the jewelry store of Joseph Klem, 82 Main St., W., became short circuited one day last week and set fire to woodwork of the fan. Employees of the store were unable to put out the flames, and the fire department was summoned by telephone. The firemen quickly arrived on the scene and extinguished the blaze. The fan was totally ruined and the damage was in the neighborhood of \$50.

Lancaster, Pa.

John S. Reitschy, a watchmaker for T. Wilson Dubbs, is at present on the sick list.

Beginning the first week in July the jewelers of Lancaster will observe a Friday half-holiday.

J. M. Kreider, Denver, Pa., has entered the Ezra F. Bowman Technical School as a student in engraving.

Ralph Herr, late with Louis Weber & Son, has gone to Morgantown, Pa., to take a position as watchmaker.

Percy J. Moench, a retired jeweler, who came from New York some years ago, died last Friday near Bainbridge.

Beginning Saturday, the employees of the Hamilton Watch Co.'s factory will have a Saturday half-holiday during the Summer.

Harry Lichtenstein, formerly a jeweler of Lebanon, Pa., has gone to Williamsport, Pa., where he expects to engage again in the trade.

Walter Landis, foreman of the H. S. Meiskey Co.'s factory, had his bicycle stolen from in front of the establishment last week. The family of F. A. Huber, a traveling salesman for this company, has gone to Pequea for the Summer.

Charles L. Evans, of this city, who learned his trade at the Ezra F. Bowman Technical School, has taken a position as watchmaker with A. C. Smith, general watch inspector of all railroads in Mexico. He will be located in Mexico City.

Among the out-of-town jewelers here recently were Jacob Fisher, Elizabethtown; S. H. Miller, Mt. Joy; David B. Plymmer, Groffs Store; H. L. Oberlin, of H. L. Oberlin & Bro., Columbia; J. H. Sensenig, New Holland; Samuel Jenkins, Harrisburg; H. F. Andrews, Strasburg.

Edwin L. Snyder, a well-known watchmaker and jeweler, died suddenly on June 8, after a brief illness of gastric indigestion. Deceased, who was in his 46th year, was born in Lancaster, and for many years worked at the big watch factories of the country. For the past 13 years he was with W. W. Appel, but it was his intention soon to open a jewelry store himself in Lancaster.

Phocion P. Thrasher, Mobile, Ala., has gone into bankruptcy.

H. S. Hewitt & Co., Brockton, Mass., have taken additional floor space for their main store on the principal street of the city, and have added an attractive basement department in which a line of clocks, cut glass and similar horological and art goods will be carried.

GORHAM SILVER

"Not Strength, but Art obtains the prize."—Pope.

¶ The average Committee entrusted with the task of choosing the Trophies or Prizes bestowed in summer sporting and athletic contests is composed of men of taste and discrimination, who insist that their choice shall possess not only intrinsic but also a marked artistic value.

¶ Thus, for the reason that art appeals to them and obtains the prize of their elective preference, each succeeding summer season witnesses the offering of an increasing number of Gorham Cups and Vases as prizes in connection with Yachting, Rowing, Golf, Lawn Tennis and Athletic events in general.

¶ The Gorham Mfg. Co., therefore, take particular pleasure in directing the attention of the Jewelry Trade to their special and other pieces designed with especial reference to the above purpose.

IN the news from Buffalo about the wholesale grocers' organization, it was stated last week that this body proposes to "down" the catalogue houses and abolish the trade evils which have grown out of this kind of business. How the Association was to conduct the fight was not disclosed, but should it succeed wholly or partially there is little doubt that in its work it would have the co-operation of many retail jewelers and members of other trades.

Novel Point May Come Up for Settlement.

ACCORDING to dispatches received last week a suit may be brought by a North Adams (Mass.) jeweler against the owners of the building opposite his store, which, if it comes before the court, will bring up a novel point of law as to the right of a man to paint his building any color that he pleases, when such color interferes with the business of a neighbor. According to the published accounts the jeweler in this case complains that the building across the street from him has been painted yellow, and that the reflection of the light therefrom affects the appearance of everything in his store, giving to the whitest of diamonds a slightly yellow tinge which materially hurts their value and sale. It will be readily understood by members of the trade how it can be almost impossible in selling gems under reflected yellow light to persuade customers that the "off color" is due to a building across the street and that the stones would be all right when the gems are taken away. The predicament of the jeweler therefore will be appreciated thoroughly by his brother members of the craft, who will wish him every success should he bring suit to abate what is to him a serious nuisance and one which deeply affects his business.

This is not the first time that such a question has arisen in the trade. Some years ago an old iron building at 5 and 7 Maiden Lane, New York, was painted a bright yellow, and immediately diamond dealers, jewelers and silverware firms on the south side of New York's jewelry thoroughfare discovered that their stocks had a decidedly yellow tinge. Legal proceedings were threatened at one time, but no suit was ever commenced, as a compromise was reached by which the building was repainted a neutral color, the jewelers paying a certain proportion of the cost.

While a suit such as contemplated by the North Adams jeweler may appear ridiculous on its face to a layman, and be considered a fit subject for the writer of humorous paragraphs, there is a serious question involved that can only be appreciated to its full extent by diamond dealers or jewelers. A settlement of the points at issue by the courts would interest the entire trade.

Jewelry Failures During May.

COMMERCIAL failures during May are reported to have numbered 899, with defaulted indebtedness of about \$13,000,000, as against 860 failures in the corresponding month of 1905, with liabilities of \$8,900,000. Deducting from the liabilities the indebtedness of a single insurance com-

pany, the figures remain about the same as a year ago. In the manufacturing lines there were but 179 failures, as against 209 in May last year, the liabilities in both being slightly over \$4,000,000; among trading firms there were 676 failures, as against 631 last year, with liabilities of \$4,800,000 and \$1,200,000, respectively.

According to a table showing failures by branches of business, compiled for *Dun's Review*, there were 19 failures among the jewelry and clock dealers last month, with liabilities which aggregated \$311,400, or an average of \$16,389, as against 16 failures in May last year, with liabilities of \$142,621, a marked improvement on the average. How the figures compare with previous years is shown by the same table, which gives 28 failures in May, 1904, with liabilities of \$143,135; 17 failures in May, 1903, with liabilities of \$214,701, and 16 failures in 1902, with liabilities of \$264,307.

Exhibition of Appliances to Safeguard Jewelers.

THE *Moniteur de la Bijouterie et de L'Horlogerie*, of Paris, has organized an exhibition of devices and methods which relate to the protection of jewelry shops against burglary, not only those which are meant to protect the store and safe, but appliances for protecting the windows and show cases as well. This exhibition is open to inventors of all nations, and proposals will be received and details furnished up to the first of July, after which the device will be on view in the rooms of the "Chambre Syndicale de la Bijouterie Joaillerie Orfevreirie, etc.," in Paris. There is no doubt that such an exhibition will be of deep benefit to the retail jewelry trade throughout the world, as it will not only bring to notice all those inventions and devices for the jewelers' protection now extant, but will also stir inventors to new work in this line. Our Parisian contemporary is entitled to the praise and gratitude of the jewelry trade for its work in inaugurating such an exhibition.

Jury Convicts Woman Who Swallowed Diamond Stolen from Omaha Jeweler.

OMAHA, Nebr., June 10.—After deliberating for more than 24 hours the jury today decided that Mae Thomas was guilty of "eating a diamond," but asked the court to be lenient with her because of her youth. Sentence will be passed to-morrow.

Mae Thomas is the girl who stole a diamond worth \$350 a month ago from T. L. Combs & Co., and in an attempt to evade discovery placed the stone in her mouth and swallowed it. The diamond was located by X-rays and every effort short of an operation was tried to recover it, but unsuccessfully.

The trial consumed almost a week and drew big crowds. The girl confessed early in the game, but withdrew this and pleaded not guilty at the trial. She acknowledged placing the gem in her mouth for the purpose of testing it, she said, but left it to the jury to say what became of the stone after that. She will probably get a three years' sentence.

Hesse & Sturges, Boise City, Idaho, have dissolved partnership, C. W. Hesse carrying on the business alone.

The Brazilian Diamond & Gold Diggers Co., Oil City, Pa., has been incorporated under the laws of that State to prospect for minerals and mine Brazilian diamonds, with a capital of \$100,000.

Last Friday evening the members of the Buffalo (N. Y.) Optical Society made a trip to Niagara Falls in a chartered trolley car. They were the guests of C. F. Cushing at the Falls, and were banqueted by him at "The Oaks" in a most elaborate fashion. It was the last meeting of the season, the next session taking place at the Lafayette Hotel, Buffalo, in September. Frank I. Tholomew, of Buffalo, was elected a member. The names of Willis E. Cushing, Niagara Falls; Philo T. Martin, Buffalo, and Alexander Naisel, Buffalo, were presented for membership. A committee consisting of Roger Williams, Herbert Wickins and Joseph Schmidt were appointed to work up a good Buffalo crowd to attend the convention of the American Association of Opticians, to be held in Rochester, July 30.

New York Notes.

Lachman, of the Acme Plating Works, 1 John St., has returned from his western trip.
Judgment for \$120 against Frank Orr and in favor of the Gorham Co. was filed June 4.

Henry Fera, of Fera & Kadison, returned Sunday on the *Amerika* after a three months' trip in Europe.

A fire at 194 Grand St. last Thursday night damage was caused in the jewelry stock of Joseph Vecchio.

Creditors of Bernhard Cohen, Trenton, N. J., held a meeting yesterday in the rooms of the Jewelers Board of Trade.

Sympathy of friends is extended to the members of Goodman Bros., 27 Maiden Lane, whose mother died Monday.

Wm. B. Rosenback, with Wm. I. Rosenfeld, 1 Maiden Lane, returned from Europe yesterday on the *Kaiser Wilhelm II.*

Judgment for \$43 was entered last Thursday in favor of Wm. Cardam & Son.

The directors of the International Silver Co. have declared the regular quarterly dividend of 1 per cent. on the preferred stock, payable July 2.

Vennaro Mazza, jeweler and broker, 141 N. Houston St., received a discharge in bankruptcy in the U. S. District Court, Monday. His liabilities were \$9,290.

Both members of Daniels & Brannen, Americus, Ga., are in the city, making headquarters at the Gorham Mfg. Co.'s downtown store, 21 Maiden Lane.

Max Seldowitz, who had been with Joseph Schwob, last week bought out the mail jewelry business of the Weinreb Co., N. Y., and will conduct it under his own name.

Among those sailing for Europe yesterday on the *Kaiser Wilhelm der Grosse* were Walter N. Walker, of Hodenpyl & Walker, James P. Harper and Mark Van Wezel, of L. Van Wezel, with his wife and son.

R. Brettner, diamond setter at 65 Nassau St., has moved from the ninth to the 10th floor in the same building, where he has more spacious quarters and is in a much better position to take care of his trade.

Louis Demmert, of the Gorham Mfg. Co., read a paper on "The Commercial Automobile in Practice" at the convention which the Team Owners' Association of America have been holding in the Hotel Cadillac during the last two days.

Eduard Van Dam sailed yesterday on the *Kaiser Wilhelm der Grosse*, intending to remain in Europe until September visiting jewelry factories in Antwerp and Amsterdam. George De Vries, of the same house, returned yesterday on the *Kaiser Wilhelm II.* D. Atlas, of Atlas & Fisher, Philadelphia, Pa., and family, were in New York several days last week. Saturday they sailed on the *Kroonland*, intending to pass six weeks in Antwerp, Amsterdam and Paris. Mr. Atlas expects to return in the latter part of July.

The Royal Jewelry Co. was incorporated last week with a capital of \$2,500 by Herbert Gray, 2973 Third Ave., Lucie Gray, at the same number, and Carolyn R. Spies, 1 E. 138th St. The new company will

take over the business now conducted at the same number by Mr. Gray as manager.

W. D. Burd and other pearl merchants from the west have been calling on the trade in New York during the past week. They agree that the yield of gems in the Wabash and other rivers thus far this season has been disappointing, but better results are expected a little when the waters go down.

George F. Miner, Albert E. H. Ovitt and Frank H. Edmunds, all of New York, are named as the incorporators of the Newman Clock Co., which, last Saturday, filed a certificate of incorporation at Albany. The company is authorized to manufacture clocks and to issue capital stock to the amount of \$100,000.

Isadore Brooks, 69 Broadway, Brooklyn, reported to the police of the Bedford Ave. station, Monday morning, that on Saturday night, after he closed his shop, thieves entered and got away with jewelry valued at \$300. He said the thieves entered from the rear. Brooks was robbed of several diamond rings two months ago. They were valued at \$100.

Forty years ago to-day Alfred E. La Vigne began his employment with the house now known as Mathey Bros., Mathez & Co., and the relation has continued, through the several changes in the firm style until now. For the last 30 years he has traveled for his house. This is a record, equaled by few, of which he may justly be proud.

George L. Barkentin, former war correspondent of the London *Illustrated News*, who died at Camden, O., Thursday night, was formerly connected with the jewelry trade. He was 65 years old, and as an artist received the gold medal award from the London Royal Academy for his sculptural design "Remorse." For many years after the war he served as a designer for a New York jewelry house.

This evening at 8 o'clock in the optical parlors of A. Martin, 17 W. 28th St., the Optical Society of the City of New York will hold its regular meeting. As there will be no sessions in July and August the meeting is regarded as of special importance and all the members are urged by the recording secretary to be present. They are reminded that the two year optometrical course is now well under way, and that those who are careless in attending sessions will not obtain the same advantage as those who pursue the course with diligence.

Charged with fraudulently misrepresenting on a sale, two watch charms, a man, giving the name of Simon Abrahams, 63 years old, of 220 E. 104th st., New York, was arrested last week at Flushing, L. I., on complaint of Charles Lioci, a restaurateur. The complainant said that when he bought the charms they were represented as being of 14 karat gold and afterwards the articles were tested by George Trotman, a jeweler of 95 Amity St., Flushing, who reported that the material was not gold. Abrahams was held for trial in \$200 bail.

One of the most attractive displays at the annual exhibition of art work conducted in the last week of May at the Pratt Institute, Brooklyn, was the work of the classes of jewelry and metal chasing. Many

beautiful and varied designs of exquisite workmanship were shown. The collection comprised necklaces of original designs with jewel settings; also bracelets, rings, brooches, watch charms and scarf pins. In the metal chasing and art metal department were shown bowls, plates, trays, vases, lamps, lamp shades and other articles fashioned from copper, brass and composite metals.

F. W. Blum, who had a small repair shop at Sixth Ave. and 26th St., and who lived at 221 E. 85th St., has been sought for some time by those who desire to serve papers in proceedings begun by Herman G. Jansen, a jeweler at 277 Eighth Ave. Mr. Jansen says that on May 2 Blum got two diamonds weighing 1 1/4 carats, and worth \$100, on memorandum. After Blum had possession of the stones for five days Mr. Jansen tried to find him for the purpose of demanding their return, but has been unable to learn of his whereabouts. It was said in the building where Mr. Blum had his shop that he had given up his quarters there and had gone away. No information was to be obtained at his home.

A petition in involuntary bankruptcy was filed Monday against Bernard Steinfeld, 504 Sixth Ave., New York, who sold jewelry on the road, and whose creditors recently held a meeting, as related in last week's issue. The petition was filed in behalf of the following creditors, the amount of their claims being given: Frank Walker, \$2,134; Isaac Levenson, \$385, and R. L. & M. Friedlander, \$756. All of these claims are evidenced by promissory notes and are not secured. The petitioners set forth that Mr. Steinfeld, at the creditors' meeting, admitted in writing his inability to pay his debts. Hastings & Gleason, attorneys for the Jewelers Board of Trade, represent the petitioners. Mr. Steinfeld at the creditors' meeting said that his insolvency was caused by the loss of jewelry valued at \$4,000, which was stolen from him in New Haven. He offered his creditors at that time a settlement of 30 per cent., but those present at the meeting did not seem inclined to accept. The result is the filing of the bankruptcy petition. His total liabilities are supposed to be about \$7,000. The indebtedness represented by the creditors at the meeting was \$4,600.

The Alexander Optical Co., Cleveland, O., which established a branch store at 252 Main St., Buffalo, N. Y., about three months ago, was the defendant in a local court recently in a suit for non-payment of rent. A judgment was given for \$327, in favor of W. T. Conners, owner of the store the firm occupies. The judgment had not been satisfied Saturday, and ejectment proceedings were expected. Louis F. Friedman, an assistant in the Detroit branch, came to Buffalo two weeks ago as manager, but resigned soon afterward. Dr. Koster, manager, resigned three weeks ago. Mr. Friedman says the firm sent him here to "settle up the affairs." His story is: "They gave me no money with which to 'settle up' and they sent me no funds when I telegraphed for them. I have been unable to get them to answer me either by long distance 'phone or by wire. It is all a mystery to me, so much so that I have sent in my resignation."

Our Traveling Representatives

The following traveling representatives were in the east: Pa., recently: Frank Kennedy, Paye & Mfg. Co.; C. B. Bliss, Scofield & De Winton; Walter S. Strauss, Jacob Strauss & Sons; Sam Lehmann, Ludwig Lehmann.

Among the traveling representatives recently in South Carolina, Ga., were: John W. Steele, C. G. Allen, Louis Berger, A. Wittmauer Co.; A. Stevens, Fnos Richardson & Co.; Jos. P. Fin-Whiting Mfg. Co.; W. J. McKenna, Kelly & Co.; J. R. Traylor, Krentz & Co.

Among the traveling representatives to visit New York, N. Y., last week, were: F. A. Jones, H. L. Judd Co.; Thos. D. Bailey, Robert Matter; Mr. Harkhorn, Krentz & Co.; L. E. Verman, L. E. Waterman Co.; A. L. Hancock, Sydney Smith & Co.; Isador Jaskow; Theo. L. Riker, Wightman & Hough Co.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: Robert L. Clark, Towle Mfg. Co.; Wm. G. Lewis, C. Sydney Smith; I. W. Friedman; N. Shanan, Shanan Bros. & Co.; James J. Doll, A. Zugsmith, Thos. E. Rogers, Riker Bros.; Leo G. Smith; A. E. Banger, Henry Polson Co.; Gus Price.

The following traveling representatives were in Ontario, Ont., last week: Geo. B. Kendrick, Reed & Barton; J. M. Wingard, R. Wallace & Sons Co.; Wm. Watts, T. G. Hawkes & Co.; James Pitts, Edward Jacot, Friedrich Speidel, Pforzheim, Germany; Jack Heller, L. Heller & Son; I. Stripp, S. & E. Trifuss, London, Eng.; I. L. L. Nussbaum, Goldsmith Bros.

Among the traveling representatives who called on the trade in St. Louis, Mo., last week, were: P. P. Cutler, Regnell, Bigney & Co.; John A. Le, Palmer & Capron; I. C. Nicholson, Excelsior Mfg. Co.; E. P. Tiffany, F. H. Sadler Co.; Wm. Henderson, Crane & Theurer; C. G. Fry, Ripley-Howland Mfg. Co.; C. L. Krugler, Medville, Carrow & Crane; Thomas E. Rogers, Riker Bros.; I. N. Fox, Fox Bros. & Co.; H. R. Lickman, Champenois & Co.; W. H. Gregory, Sobell & Crane.

Traveling representatives calling on the jeweler in Omaha, Nebr., last week, were: Mr. Breck-Edgell, Benj. Allen & Co.; Meyer Lehman, Ludwig Lehman; E. W. Travis, Geo. F. Brown; E. E. Selding, Bassett Jewelry Co.; Max Huss, S. & Borgzinner; Thos. H. Ryland, American Watch Co. Co.; Thos. E. Rogers, Riker Bros.; Oscar. S. Smith, Aikin, Lambert & Co.; L. A. Blackinton, A. S. Blackinton Co.; Donald Le Stage, H. D. Britt Co.; Mr. Fisher, Furbish, Swift & Fisher; George C. McCormick, R. L. Griffith & Son Co.; Newhouse, Weizenegger Bros.; T. W. Friedman, Friedman & Co.; B. Wille, M. Wille; Mr. Howard, Mason & Howard.

Traveling representatives who visited the Cincinnati, O., trade, during the past week, included: P. Price, Louis Strasburger's Son & Co.; Norbert Gutzburger, L. & M. Kahn & Co.; Leo Goldschmidt; Mr. Claflin, Claflin Jewelry Co.; Louis G. Berg, J. Sollinger & Co.; Theodore Lyons, Ins Gem Co.; Charles B. Burgess, Frank M. Aving & Co.; Edward E. Allsopp, Wordley, Allsopp & Bloemcke Co.; H. C. Rowbotham, Schraeffer & Wittstein Co.; Theodore Kuehl, Geo. Kuehl & Co.; T. S. Sturgis, Perley Bros.; L. H. Smith, L. H. Smith, Griscorn & Osborn; Louis Knobel, Louis Ringer & Sons; C. H. Anderson, Ross, Saltman & Anderson; J. Thompson, J. B. Bowden & Co.; K. Benton, Geo. W. Parks Co.; Daniel Price, William S. Hedges & Co.; Sam Jaskow, Boden-Edner & Jaskow; Percy Lucas, Frank W. Smith accompanied by his bride.

Among the traveling representatives calling on the trade at Pittsburgh, Pa., last week, were the following: Lewis L. Squire, F. H. Cutler & Co.; J. B. MacDonald, Wolcott Mfg. Co.; William Fulton, F. W. Weaver & Co.; Mr. Remington,

Carter, Qvarnstrom & Remington; Walter R. Shute, Kohn & Co.; Charles S. Untermyer, Chas. Keller & Co.; J. J. Kramer, John T. Mauran Mfg. Co.; O. G. Fehon, J. M. Fisher & Co.; W. D. Sinnock, Ehrlich & Sinnock; John S. Cunningham, E. L. Spencer Co.; Fred T. Barry, S. O. Bigney & Co.; E. A. Reed, Reed & Barton; F. J. Rider, Walter E. Hayward; George S. Melville, P. B. Rogers Silver Co.; J. Rosenberg, S. K. Grover Co.; H. A. Scofield, Scofield, Melcher & Scofield; J. H. Thompson, J. B. Bowden & Co.; John D. Dalzell, J. D. Dalzell & Co.; Walter S. Noon, Cary Bros. Co.; Ernest A. Rose, Weigle & Rose; C. A. Weidemann, Geo. Borgfeldt & Co.; C. B. Bartlett, Whiting Mfg. Co.; S. W. Abbey, E. Ira Richards & Co.; Mr. Day, Day, Clark & Co.

The trade at Pittsburgh, Pa., was, last week, visited by the following traveling representatives: R. H. Brown, Chapman & Barden; Chas. S. Peckham, J. H. Peckham & Co.; G. Cheever Hudson, G. C. Hudson & Co.; H. B. Bliss, Gorham Mfg. Co.; Wade W. Williams, Warren & Williams; C. H. Davidson, Coddling & Heilborn Co.; James O. Otis, Harvey & Otis; Walter R. Bristol, Wm. Rogers Mfg. Co.; Edward E. Allsopp, Wordley, Allsopp & Bloemcke Co.; S. W. Abbey, E. Ira Richards & Co.; F. W. Cullom, Sulzberger Bros.; J. T. Griffith, Jr., Carter, Howe & Co.; Lewis P. Cook, S. Sternau & Co.; W. H. Osborne, R. Wallace & Sons Mfg. Co.; R. H. Schley, Sloan & Co.; Benjamin Schloss, A. Wallach & Co.; Mr. Fisher, Furbish, Swift & Fisher; L. H. Smith, Bippart, Griscorn & Osborn; Walter R. Shute, Kohn & Co.; Jules F. Schuman, Jr., William Kinschiff Co.; Edwin F. Skinner, Roy Watch Case Co.; Frederick J. Foster, Unger Bros.; T. K. Benton, G. W. Parks Co.; G. A. Schaefer, Regnell, Bigney & Co.; Russell A. Talbot, Joseph Fahys & Co.; C. G. Perry, Ripley-Howland Mfg. Co.; George W. Beardsley, Allsopp & Allsopp; F. C. Winship, H. C. Fry Glass Co.; Mr. Ford, Ford & Carpenter.

Traveling salesmen visiting the Boston dealers during the week, included: William H. Sparks, Seth Thomas Clock Co.; John Mackay Parker Clock Co.; Mr. Spang, E. Ingraham Co.; Harry C. Larter and George W. Read, Larter & Sons; Matt Stratton and George Newman, Alling & Co.; Archie Rutherford, H. A. Kirby Co.; George W. Hutchison, Hutchison & Huestis; R. H. Schley, Sloan & Co.; Charles T. Dougherty, William L. Sexton & Co.; Mr. Davies, Mason & Davies; Joseph V. Mayer, H. Schonkein & Sons; Mr. Staudinger, Charles Weller & Co.; Robert B. Steele, David Kaiser & Co.; Mr. Henius, Bruhl Bros. & Henius Co.; Frank Locklin, Battin & Co.; Victor Burgessor, Krentz & Co.; Mr. Sternburger, Stern Bros. & Co.; George Osborn, Wm. Smith & Co.; Milton H. Wallenstein, Silbermann, Kohn & Wallenstein; Mr. Sansbury, Sansbury & Nellis; "Jack" Hollister, Chapin & Hollister Co.; Douglas Tompkins, Mabie, Todd & Bard; Mr. Hicks, W. S. Hicks' Sons; L. C. Martin, Martin, Copeland & Co.; Wallace Campbell, Day, Clark & Co.; Mr. Hill, Hill & Schmidt; C. E. Mott, J. B. Bowden & Co.; J. T. Scott, Adolphe Schwob; Charles Theurer, Crane & Theurer; Harry Lisauer, Jacobson Bros.; Henry H. Holbert, Kohn & Co.; Mr. Peck, Waite, Thresher Co.; E. H. Egfeldt, Egfeldt & Ackley; Mr. Curran, A. J. Hedges & Co.; Mr. Huger, William Huger & Co.; W. W. Hurd; John Lasell, Unger & Christl; Sumner Lawson; Mr. Luthy, Luthy & Hine; Mr. Perley, Perley Bros.; Mr. Young, White & Young; Louis Kurtz, G. W. Cheever & Co.; Ed. Bliss, Bliss Bros. Co.; John A. Abel, Abel Bros. & Co.; C. E. Hancock; Louis Barrows, H. F. Barrows Co.

Baltimore.

Welsh & Bro. Co. have moved from 323 N. Charles St. to their new home in the Professional building, 330 N. Charles St.

Most of the leading stores are practicing the early closing movement. Establishments are closed at 1 o'clock each Saturday, from June 1 to Sept. 15.

The Kann Bros. Silver Co., 303 W. Lexington St., is selling off its stock at auction preparatory to removing next door as soon as alterations are completed.

August Lemmert has succeeded in securing an absolute divorce from Barbara M. Lemmert, the case having lasted nearly two years. He alleged in his suit that his wife

abandoned him to become a follower of Dowie.

An order was signed, Thursday, by Judge Stockbridge, in the Circuit Court, requiring the Samuel Kirk & Son Co., silverware manufacturers, to show cause by June 21 why an injunction should not be issued prohibiting them from allowing any poisonous or noxious fumes, gases or vapors to escape from their premises, 106 and 108 E. Baltimore St., into the law offices of John J. Watson, 763 769 Calvert building. The bill of complaint filed by Mr. Watson, through Niles & Wolff, attorneys, states that the plaintiff's offices are in the rear of the Calvert building, which is separated from the Kirk building by Bank lane, a narrow thoroughfare. Whenever the wind comes from the south, southeast or southwest, it is alleged, corrosive and poisonous fumes, gases and vapors are carried from the Kirk factory into the open window of Mr. Watson's offices and render the offices uninhabitable.

Canada Notes.

J. A. Young, Stettler, Alberta, has sold out.

Amos Chatfield, Macleod, Alberta, has assigned to J. E. Rogers.

J. F. Grummett, Boissevain, Man., has sold out to Mr. Stevenson.

D. I. Collis, Fendon Falls, Ont., is offering to compromise with his creditors.

Henry Ratelle, Cornwall, Ont., has assigned to D. Davis. A meeting of creditors was called for June 9.

E. F. White, Sydney, N. S., who is in financial difficulties, offers to compromise with his creditors at 25 cents on the dollar.

Miss Lilian Welch, daughter of A. H. Welch, manufacturing jeweler, Toronto, Ont., was married June 7 to Alexander A. Robertson, son of the late James Robertson, of Montreal, at Parkdale Methodist Church. The newly married couple will spend some weeks in Muskoka before taking up their residence in Montreal.

A vigorous campaign is being made by Friedrich Speidel, of Pforzheim, Germany, to capture the Canadian market for rolled gold goods. The house is represented in Toronto at present by Edward Jacot. It is claimed that though handicapped by the Canadian surtax of 10 per cent., the German house can supply the market more cheaply than the American firms, especially in the line of chains.

The sterling silver cup presented by the Earl of Durlham to the Ontario Jockey Club, to be competed for by Canadian foaled horses at the fall race meeting here, is displayed in the window of Ryrie Bros., Toronto, Ont., and attracts much attention by its artistic design and exquisite finish. It is plated with gold and stands about 30 inches high. The bowl displays racing scenes, very elaborately worked out as to details, and is surmounted on either side by two horses in a rearing position. It is embossed with maple leaves, wheat and grain, and the whole surmounted by the national emblem of the beaver.

The retail jewelry store of L. C. Ingle, Sr., South Boston, Va., was recently destroyed by fire. The loss amounted to about \$10,000.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

The watch will win you his business and friendship for always.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

CHICAGO, WEDNESDAY, JUNE 13, 1906.

No. 19.

Chicago Notes.

Chas. J. Jacobs visited St. Louis last week. W. F. Mam, Iowa City, Ia., was here last week.

Herman Schultz has been succeeded by T. Austin.

Jacob Wolf recently gave a chattel mortgage for \$1,000.

E. C. Pike, Kankakee, Ill., has been seriously ill with pneumonia.

Hyman, Berg & Co. are making extensive improvements in their premises.

E. C. Lucas, representing A. H. Bliss & Co., is back from a western trip.

W. L. Mirrieles, with Manning, Bowman & Co., has returned from an eastern trip.

Jos. Brown has returned from a visit to the principal western and Pacific Coast cities.

D. A. Wilkins, with the Ostby & Barton Co., will return from the Pacific Coast about June 20.

T. F. A. Finn, of the diamond department of Loftis Bros. & Co., will visit New York next week.

The trustee in bankruptcy for the estate of T. D. Lande has declared a first dividend of 5 per cent.

A. A. Newman, of the Newman Clock Co., Masonic Temple, will sail for Europe June 12 on the *Moltke*.

Alfred Despres will go east to attend the marriage of Max Noel, which takes place in New York on June 27.

G. W. Bleecker, Chicago manager for Martin, Copeland & Co., is taking a vacation at East Orange, N. J.

The Chicago office of A. C. Messler & Co., with H. R. Herman in charge, has moved to room 1109 Heyworth building.

Mrs. Cecile Young Heyworth, daughter of Otto Young, secured a divorce from her husband, Lawrence Heyworth, last Saturday.

Alfred H. Bullion, jewelry manufacturers' agent, of San Francisco, was here last week. Mr. Bullion has a temporary office at 1517 Oguna St.

Mr. and Mrs. Lederer stopped over here last week while on their wedding trip. Mrs. Lederer is the daughter of Sigmund Stern, Stern Bros. & Co.

Carl Benzon was arrested here last week

for breaking into the store of Kunstatter Bros., 238 Adams St. Benzon said he had crawled into the place to sleep.

Mrs. Wm. Forman died here last week and was buried at Marengo, Ill. Before her marriage she was Miss Webb, employed for a long time by Lapp & Flershem.

A meeting of the Chicago Jobbers' Association took place at the rooms of the Chicago Jewelers' Association yesterday. The plan and scope of the organization will soon be made public.

William Juergens, formerly with the Keystone Watch Case Co.'s Chicago office, was run down by an automobile one day last week. His right hand was cut and his right side bruised.

Norman McGillivray, who has been with Strelitz Bros. for the past 10 years, was united in marriage Saturday at 4 o'clock P. M. to Miss Carl Leyenberger. The couple are spending their honeymoon at Saratoga, N. Y.

Among the out-of-town visitors here last week were L. E. Garnett, Chanute, Kans.; Herbert E. Kinnear, Marion, Ind.; Mr. Anderson, Port Arthur, Ont.; Messrs. Behner & Behner, Newton, Ia.; F. E. Potter, Corning, Ia.

Miss M. McIntyre, of the job department of Otto Young & Co., was taken to the Hahnemann Hospital, last week, to undergo a surgical operation. Miss McIntyre is doing well, and the hospital reports she will be discharged soon.

A syndicate has been formed to make a capital stock concern out of the mail order house of Sears, Roebuck & Co. The concern will be capitalized for \$40,000,000, of which \$30,000,000 will be common and \$10,000,000 preferred stock.

F. B. Tinker, representing the Quaker City Cut Glass Co., has on exhibition at his show rooms, 186 Fifth Ave., what is said to be the largest piece of cut glass of its kind in the world. This is a vase 5 feet, 7½ inches high and weighs 200 pounds.

Persistent rumors have been circulating here that Geo. B. Moore is no longer connected with Loftis Bros. & Co. To a CIRCULAR-WEEKLY reporter J. S. Loftis emphatically denied the report. He said that Mr. Moore was run down in health and was taking a vacation.

Herbert L. Joseph & Co., who recently

agreed to pay their creditors 30 per cent., are objecting to the payment of a number of claims aggregating about \$3,000. Objections are being made on the ground of difference in views regarding discounts. W. T. ApMadoc represents the creditors.

It was rumored here last week that A. C. Becken was negotiating to purchase the business of one of the most prominent tool and material houses here. As yet the deal has not been consummated. Mr. Becken has recently opened a material department, and with his customary energy is seeking to increase that branch of his business.

Chas. Moe, inventor of the diamond gauge, returned last week after an absence on the road for over four months. Mr. Moe visited all the principal cities of the west and southwest and made a trip to old Mexico. He left San Francisco before the earthquake, and stored some of his clothing and other personal property at the St. Nicholas Hotel. This property was totally destroyed. A box of jewelry stored by him in the vaults of the Pacific Coast Steamship Co., valued at \$5,000, escaped serious injury.

Pacific Coast Notes.

Juan Escribano, Madrid, Spain, has been visiting in Mexico.

A. Tschumi's store, at Watsonville, Cal., was flooded by the recent rains. The loss was nominal.

Wm. Murphy, foreman of the W. K. Vanderslice Co., San Francisco, visited the Riley ranch, at Crockett, Cal., recently.

C. H. Wright, Eureka, Cal., will soon let the contract for the construction of a modern eight room residence at 13th and H Sts.

C. H. Blake, for many years with the S. Conradi Co., Los Angeles, announces that he has taken a position with Brock & Feagans, 4th St. and Broadway, Los Angeles.

The manufacturing jewelers of Santa Rosa, Cal., met last week to formulate a vote of thanks to the Jewelers' Board of Trade of New York, which organization furnished the Santa Rosa jewelers with complete sets of tools after the earthquake and fire.

W. E. McGill, optician, Marysville, O., moved recently into larger quarters.

To the Jobbing Trade.

This may be a wrong way of remembering things, but it is certainly wise for you to jot it down in a convenient place, to see us when you wish to buy diamond mounted jewelry and mountings.

We are prepared to show our complete fall line and invite comparison. Diamond Bunch Rings a Specialty.

IMPORTERS

AMSTERDAM: 2 TULIP STRAAT.

MANUFACTURERS

St. Louis.

M. M. Shinderman has returned from successful trip in Missouri and Kansas to the L. Bauman Jewelry Co.

Max Bauman, of the Bauman-Mass Jewelry Co., was on jury service last week in the Court of Criminal Correction.

W. H. Werre was in St. Louis last week on his way to Jefferson City, Mo., where he enters the employ of T. G. Burkhart a watchmaker.

V. T. Ellis, a graduate of the St. Louis Watchmaking School, has gone to Hazleton, Ind., where he will visit his relatives for a short time. He will later locate somewhere in the south.

Henry J. Dirk, who has been for many years with George R. Stumpf, 610 Frank Ave., has been receiving the best wishes of his friends on the occasion of his recent marriage with Miss C. Weitz.

The Right Rev. Daniel S. Tuttle, Bishop of the Episcopal Church, Wednesday ordained to the priesthood Rev. L. R. Vance, formerly a salesman in the silverware department of the Mermod, Jaccard & K Jewelry Co.

Max Schmidt, of the material department of the Bauman-Mass Jewelry Co. is mourning the loss of his father, F. W. Schmidt, who died in Houston, Tex., at an advanced age. Mr. Schmidt is expected back in St. Louis next week.

Among the visiting jewelers here last week were the following: A. Gerber, Jeweler, Joliet, Ill.; A. S. Helber, Bonne Terre, Mo.; J. E. Doss, Carmi, Ill.; August Fischer, Whitehall, Ill.; A. R. Snodgrass, Troy, Ill.; Christ Keyler, Nashville, Tenn.; Fred Herold, Jerseyville, Ill.; M. E. Buc Paris, Mo.

Charles E. Pitcher, who is charged with the embezzlement of funds collected and jewelry belonging to J. F. Dailey & Co. 6th St. and Washington Ave., was arrested in Kansas City, Kans., according to advice received here by Ralph Wilson, manager of the Dailey store here. Officers have been sent for Pitcher.

Advices have been received here of sentencing in the United States Court at Springfield, Ill., Wednesday, of M. Skinner, Houston, Tex., president of the Keystone Commission Co., to pay a fine of \$250 and costs, upon a plea of guilty. J. Miller, an attorney of East St. Louis, was found guilty of complicity in connection with the same company and sentenced to serve 90 days in the workhouse at Peoria, Ill., where he was taken Thursday. The Keystone Commission Co. was engaged in the business of selling diamonds on a lottery plan. The plan of the company was to secure payments of \$1.25 a week on contracts, until \$110 had been paid, when the payee was to receive a \$200 diamond as soon as the contract was matured. Federal authorities have been after the company for more than a year.

Frederick S. Ayres recently opened a store in the quarters formerly occupied by the La France Jewelry Co., 100 W. Washington St., Elmira, N. Y.

Edward B. Leekey, Eagle Grove, Ia., sold out to Karl K. Keith, of that place, and will move to North Yakima, Wash., where he will succeed A. Schindeler.

Kansas City.

Southwestern Optical College graduated a class of 12 graduates last week.

J. S. Maulsby, of this city, has just entered as a pupil of the Kansas City Polytechnic Institute.

Edward Potts, representative of C. A. Kiger in Northern Missouri and Southern Kansas, was in this city last week.

Alfred Rowhedge, with the Edwards & Sloane Jewelry Co., has left on a vacation trip to Minneapolis and other Minneapolis points.

J. Potts and Harry Clark, both covering Kansas territories for C. A. Kiger, were in the city last week for a stay of a few days.

Ed Mutton, formerly with the Underhill Jewelry Co. and later with the Harwar Mfg. Co., has taken a position with C. A. Kiger.

W. J. Rankin, who has been with W. Whiteside, Liberty, Mo., has taken a position in the factory of the Barr-DeVault Jewelry Co.

W. Knaul, with the Woodstock-Walker Watch & Jewelry Co., has gone out of the territory again, after spending part of the week in the house.

W. Barr, of the Barr-DeVault Jewelry Co., is in the German Hospital suffering from nervous prostration. According to reports he is improving.

J. R. Mercer and wife were members of a party that left here last week for Shaw Springs, Mo., to open the new house of the Monegaw Club.

W. S. Murray, who travels in Oklahoma, Indian Territory and Northern Missouri territory for C. A. Kiger, was in the city for a couple of days last week.

J. M. Scott, of the Woodstock-Hoefler Watch & Jewelry Co., left the city last week on a vacation trip of about two or three weeks. He will visit New York and other Minneapolis points.

C. E. Pitcher, Jr., a salesman for J. F. May & Co., St. Louis, was arrested a few days ago, in Kansas City, Kans., on charges brought by his firm, and went back to St. Louis without a requisition.

I. G. Burg, a pupil of the Kansas City Polytechnic Institute, has finished his course and gone to Brunswick, Mo., where he will open a jewelry store at once. He has used his opening stock in this city.

W. H. Snow, who covers an Oklahoma and Kansas territory for the Woodstock-Walker Watch & Jewelry Co., has been in the city several days, and will take his vacation before again leaving for his territory.

I. Fluhrer, bookkeeper for the Edwards & Sloane Jewelry Co., left last week on a vacation trip. He went direct to Maryland, Mo., to pay a short visit to his mother. From that point he will go to Oklahoma, to visit other relatives.

W. Porter, head engraver for the Edwards & Sloane Jewelry Co., left for a vacation trip last week. He goes from the city to Detroit, then up to Toronto and on there down to Boston by rail. From Boston he will come back to New York by boat and then home.

The following out-of-town retailers vis-

ited the Kansas City jobbers last week: S. J. Huey, Excelsior Springs, Mo.; A. Y. Boswell, Tulsa, Ind. T.; L. S. Slocum, Cornsington, Kans.; H. E. Tucker, Higginsville, Mo.; Mr. Campbell, of Campbell Bros., Oskaloosa, Kans.; Leslie White, Lees Summit, Mo.; Otto Burkland, Osawatomie, Kans.; C. J. Benson, Lees Summit, Mo.

Omaha.

John Crabill, Plattsmouth, Nebr., was in the city buying stock last week.

George Gerner, manager for C. Jacquemin, Council Bluffs, Ia., has returned from a trip to Colorado.

L. H. Robinson, Glenwood, Ia., has added handsome new fixtures to his store.

Albert Edholm has just installed a large size safe in his store, and has had it painted mahogany, to correspond with the store fixtures.

Axel Holmberg, watchmaker for S. W. Lindsay, with his family, is spending his vacation in Chicago. His family will remain there three months.

F. C. Churchill, of the New England Watch Co., was in this city last week, placing the western agency for their watches with the A. F. Smith Co.

Two clever confidence men, Jack Jennings and Angus Martin, were arrested last week in this city for substituting a bogus diamond for a valuable one at the jewelry store of M. D. Franks, 319 N. 16th St. Mr. Franks gave chase to Jennings and both exchanged several pistol shots. The two men entered the store late in the afternoon and asked to see a mounted diamond, which they had noticed in the show window. Mr. Frank took the gem to the show case and offered the men a magnifying glass at their request. Their actions aroused Mr. Franks' suspicions, so he walked around to the outside of the counter immediately, to notice the men had exchanged a bogus diamond for the genuine. He grabbed both men and told them to stand still. Jennings escaped, but Martin was held by a clerk, while Franks ran next door, telling them to call the police. He secured a revolver and hurried after Jennings. After a long chase Jennings was found hiding in the cellar of an old house. The gem was recovered and the thieves were taken into custody.

Detroit.

The Wayne Optical Co. has opened a branch store at Bay City.

N. G. Hamburg, of Wright, Kay & Co., recently returned from a trip abroad.

A large percentage of jewelers in Michigan are opticians, and a joint meeting of the Michigan Retail Jewelers' Association and Society of Optometrists will be held here July 11, 12 and 13 at the Normandie Hotel.

Charles Walker, alias Harry Williams and William Kendle, charged with stealing about \$1,500 worth of jewelry and diamonds from E. D. Trebilcock, 324 Woodward Ave., have demanded a trial, Walker having gone back on his confession. The police say they have his signature under it.

Indianapolis.

J. C. Sipe and Mrs. Sipe, who have been in the southwest for seven months, have returned home. Mr. Sipe is improved in health.

David S. Gribben, of Gray, Gribben & Gray, and family are now in Naples. Mr. Gribben will spend the entire Summer abroad.

The Indianapolis Technical Institute will open a school for jewelers next Fall when the school year opens. Equipment is now being ordered.

The Alexander Optical Co., which opened a store recently at 22 N. Meridian St., has left the city. The company opened a handsome suite of rooms and advertised extensively.

Out-of-town jewelers who visited the local jobbers and manufacturers last week included: Aaron Pursel, Noblesville; D. S. Whittaker, Lebanon; B. Maier, Edinburg; H. Wheeler, Dana; J. A. Pickett, New Castle; C. E. Hodge and Ross J. Haseltine, Kokomo; J. F. Harding, Brownsburg; H. A. Pauley, Bloomington, and Mr. Raber, of Clark & Raber, Anderson.

Moysig Milton Groh, son of I. Groh, of I. Groh's Jewelry Co., committed suicide in Louisville, last week, by drinking cyanide of potassium. Young Mr. Groh was formerly employed in his father's store. Domestic troubles are said to have prompted him to take his life. Burial was in this city. Several weeks ago, a salesman for the firm committed suicide by the same means, when detectives appeared at his home to arrest him for stealing from his employers.

Minneapolis and St. Paul.

Charles Horwitz, 303½ Washington Ave. N., Minneapolis, has sold his store to Pinck & Co.

A. E. Madsen, with Rettig, Hess & Madsen, has gone to Clear Lake, Ia., for a vacation of two or three weeks, after which he expects to go on to Chicago.

Among the recent out-of-town visitors in the Twin Cities were: Julius Schleider, St. Peter, Minn.; G. B. Ellestad, Lanesboro, Minn.; Mr. Jorgenson, Little Falls, Minn.; C. O. Querna, Madison, Minn.

Hyman Fegelson, formerly in the retail business in St. Paul, has won a suit in the district court, being awarded \$1,440 by the court on his policy in the Traders' Fire Insurance Co. Mr. Fegelson had insurance with this and three other companies on the stock in his store, which burned in February, 1904. The company contested the claim.

Fred O. Fisk, for a number of years in business in Minneapolis, 19 Washington Ave. S., Nicollet House Block, died June 4, after an illness of some time, of paralysis and complications. The funeral was held Wednesday and the interment was at the deceased's old home, Omro, Wis. A widow survives him. He had been in business under the style of Fisk Bros., but his brother who was with him died several years ago. The business is to be continued for the present at least.

Cincinnati.

C. M. Fogg, of the Philadelphia Watch Case Co., was in this city last week.

K. Sato, Tokio, Japan, was among the recent visitors to the Sterling Glass Co.'s plant.

Lerd. Phillips, of Richter & Phillips, and family have returned from a sojourn at Mt. Clemens, Mich.

William Owen has just made his regular quarterly watch inspection trip on the Queen & Crescent Railroad.

S. Sneed has notified his Cincinnati friends of his removal from Georgetown, Ky., to Gulfport, Miss.

Joseph Phillips, manager of the Sterling Glass Co., and family have located at their Summer home at Tower Hill.

Walter Mayer and Albert Wallenstein, of the firm of Wallenstein, Mayer & Co., have left on their respective trips south.

John Reis, Vevay, Ind., was here last week with his young son for the purpose of having the latter operated upon for appendicitis.

W. W. Roberts, Nicholasville, Ky., bought fixtures here for his store, which he has just enlarged and remodeled on up-to-date lines.

Herman Smith, of G. E. Smith & Sons, Parkersburg, W. Va., with his bride, included a visit to Cincinnati in their honeymoon trip.

J. W. Jones, Mt. Sterling, Ky., has purchased fixtures here for his new store, which is located opposite the Mt. Sterling Court House.

William Schultz recently connected himself with Hahn & Oppenheimer as a traveling representative. He is now making a southern trip.

Lindenberg, Strauss & Co. have inaugurated a new department of imported brie-à-brac. This firm has also added to its office force Harry Jackson.

Wesley T. Harrison, Williamstown, Ky., is recovering from an operation. J. E. Davis, Midway, Ky., is at business again after an attack of illness.

The Gustave Fox Co. furnished the gold and silver medal fobs for the Cincinnati Turn Verein athletic meeting, to be held June 17, at the Zoological Garden.

Otto Mehmert, with Joseph Mehmert, and Miss Katherine Fisher, of Cincinnati, will be married June 21 at the home of the bride. After the ceremony a reception will be held in West Turner Hall.

The new Seth Thomas street clock just put up by George Newstedt, at the corner of 4th and Race Sts., is a great ornament as well as an improvement to that corner. It is box-shaped and mounted on a large bracket, which extends from the corner of the building. It has three transparent dials, illuminated by electricity. On the top of the clock stands a gilded lion about three feet high holding a cut glass ball in its forepaws. This and other ornamentations in iron relief work make the clock a most attractive and beautiful as well as useful ornament to the city.

Out-of-town jewelers who were here the past week buying stock included: F. G. Meyer, Dayton, O.; N. Sanning, Walton, Ky.; E. Mueller and L. Bentel, Hamilton, O.; Gallipoli Novelty Co.'s buyer, Galli-

polis, O.; A. J. Winters, Paris, Ky.; J. C. Fischer, Flemingsburg, Ky.; George Habermass, A. J. Jordan Cutlery Co.; Edw. McNulty, Indianapolis, Ind.; Fred Wittlinger and wife, Middletown, O.; William Lehne, Decatur, Ind.; Ashton & Baker, Middletown, O.; E. Israel, Harrison, O.; J. H. Sherwood, Brooksville, Ky.; W. H. Keller Co., Corydon, Ind.; C. F. Kappes, St. Paul, Ind.; Charles Sederberg, Milford, O.; G. H. Hansgen, Bethel, O.

San Francisco.

TRADE CONDITIONS.

Conditions in San Francisco are now rapidly improving and many lines of trade have fully resumed business. The banks have opened their doors, thus relieving the money stringency, and making it possible to get accounts in a measure straightened out. Events seem to show that the jewelry trade was affected more heavily by the disaster than almost any other. All the large stores were located in the burned district, and even should some retailers save a large portion of their stock, there is still a heavy loss, as these stores were as a rule fitted up in an expensive manner. Wholesalers are locating again, many of them in buildings fitted up near their old locations, while others have sought quarters near the present center of business on Fillmore St. During the confusion here the country trade has been largely diverted to Sacramento and Los Angeles and houses that have been established at Oakland. Trade is very heavy for this time of the year, for the State was never in a more prosperous condition, taking it as a whole. Many of the houses here are now issuing circulars to their customers, telling them that business has been resumed here and it will not be long before the country trade will be taken care of as before the fire.

J. Greenburg has opened a store at 1324 Buchanan St.

Albert Schohay & Son have opened an office at 1354 Ellis St.

F. R. Deremer & Co., whose store on Montgomery St. was destroyed by the fire, are now located at 217 Church St.

The Eagle Watch Repairing & Jewelry Co., of which J. Dick is manager, has opened an office at 1115 Golden Gate Ave.

The California Jewelry Co. is located in temporary quarters in rooms 70 and 71, Delger building, Broadway and 14th St., Oakland, Cal.

J. Johnson, who formerly had quarters at 1187 Market St., will soon occupy a store now being constructed for him at 1154 Golden Gate Ave.

A. Engelhardt, watchmaker and jeweler, formerly with Hammersmith & Field, has opened a shop with the Chinn-Berretta Optical Co., 1815 Fillmore St.

Ferdinand Heiduska, manufacturing jeweler, has located temporarily at 1970 Bush St., but is unable to do much yet, owing to the lack of tools and machinery.

Tuckey & Kline, jewelers and diamond setters, and Carrau & Green, wholesale jewelers, formerly located at 220 Sutter St., will soon locate in a handsome new store at 1512 Buchanan St.

T. Lundy, who had for years conducted a jewelry store on Market St., near Grant Ave., is now located at 817 Stanyon St. A temporary structure is being erected on the old Market St. site and as soon as it is finished Mr. Lundy will be back at the old stand, having secured a lease.

Mr. Alexander, jeweler and diamond dealer, formerly at 752 Market St., is now located at 1912 Fillmore St. for the time being. While the Market St. store may be

revived later, it is more than likely that a lease of three or four years will be secured on a store near the new business center.

J. B. Whitney, agent for the Holme & Edwards Silver Co., the E. Ingraham the Derby Silver Co. and the American Cuckoo Clock Co., has offices at 1251 Valard St., and the city business is transacted there. The country business attended to at the Oakland office, Broadway.

Shreve & Co., who are located at Johnson and Fillmore Sts., are at present decided as to just what course they pursue, except that as soon as the old store can be fitted up they will return to it. The location of the new factory has not yet been decided upon, but it will probably be south of Market St., in the vicinity of the old one.

The Baldwin Jewelry Co., whose magnificent store in the James S. Flood building had been open but a comparatively short time, and which also operated a store on 3d St., near Market St., is located at 1521 Sutter St. The manager states that the concern will likely go to the store in the James S. Flood building when it is put into shape again.

Hammersmith & Field are resolved to keep near the center of the most shopping district, and have secured a lease on the property at the corner of Ness Ave. and Eddy St., just across from Tait's new cafe. Van Ness Ave. is becoming the choice retail street. Emporium is already located there, and many other large firms are putting up buildings. Carpenters are now at work on the new store of Hammersmith & Field, and it will probably be open for business some time during the present month.

The W. K. Vanderslice Co. occupies offices at the corner of Post and Devisadero Sts., and has a watchmaker and jeweler employed there. Mr. Hazel, of this firm, states that no further plans have been made for the immediate future, and that his firm will make no move until the insurance matters, which are now hanging fire, are settled. He states, however, that it is the intention of the firm to get into the downtown district as soon as the latter builds up again. Owing to the small size of the establishment and the short time and few facilities for moving, practically nothing was saved.

Radke & Co., who formerly had stores at 65 Geary and 118 Sutter Sts., but are now located at 1813 Devisadero St., have finished the equipping of their factory there. A new store is now in course of construction for this firm at Van Ness Ave. and Bush St., and this will be ready for occupation within a few weeks. The present store on Devisadero St. will also be maintained and the factory for both stores will be there. This firm was very fortunate in securing a wagon on the morning of the earthquake, and much of its stock was saved from both stores. Many of the employees have been notified to return, and business will soon be running smoothly again.

J. J. Prentice has admitted a partner in his jewelry business in Brownwood, Tex., and the firm is now Prentice & Powell.

News Gleanings.

S. E. Hall has sold out his business in Hampton, Ia.

H. H. Moses, Jefferson, O., recently sustained a loss of \$500 by fire.

Warren Lashbrook has taken a position with H. L. Chase, of Waterloo, Ia.

J. Lott Losey, South Bend, Ind., has given a chattel mortgage for \$1,600.

Frank Anshutz, Shenandoah, Ia., recently celebrated his 20th anniversary in business.

Geo. D. Kendall is selling out his jewelry and optical business in Pueblo, Col. at auction.

P. K. Wiser, Mankato, Minn., recently celebrated his 40th anniversary in business in Mankato.

Michael Tracy was recently arrested in Manchester, N. H., for selling jewelry out a license.

Carson & Smith, Hagerstown, Md. recently erected a large street clock in front of their store.

M. A. Gaskell, Rochester, Minn., has added a new wall case and otherwise improved his store.

C. E. Sargent has completed arrangements to open optical parlors at 52 1/2 Columbia St., Albany, N. Y.

Rufus M. Dempsey & Co. is the firm of the business formerly conducted by Rufus M. Dempsey, Madisonville, Ky.

J. E. Judge, Ames, Ia., recently sold stock to C. Edwards, of Watertown, Dak. The new owner will take possession June 15.

H. L. Tucker, New London, Ia., recently sold out to Adolph Leach and Harry S. Huff. Mr. Tucker will give possession June 15.

L. Oreck, Duluth, Minn., has been succeeded by the Oreck Jewelry Co. Oreck is now in the souvenir and business.

A fire originated in the store of Cleis, South Bend, Ind., several days but was extinguished before doing any serious damage.

The retail jewelry store of A. Briggs, Cement, Okla. T., was recently robbed of 15 watches and \$25 in silver. Thus far no arrests have been made.

J. S. Baker has resigned his position as George H. Cook, Phoenix, Ariz., and taken a position as manager of the Crescent Jewelry Co., of the same place.

C. A. Vanderburg, Superior, Wis., announces a closing out sale, and will return to San Francisco, Cal., to engage in wholesale business.

Geo. W. Hickox, of the Hickox May Jewelry House, Albuquerque, N. Mex., has partially recovered his health, and left California, where he will remain for a time.

Nathan F. Stedman, formerly engaged in the retail jewelry business in Montpelier, Ind., is the defendant in a suit for divorce in Clinton County, brought by his wife, and requests the custody of the four children.

The first annual meeting of the Retail Jewelers' Association will be held in Des Moines, June 14 and 15. A large attendance is expected. The Iowa Optical Association meets June 12 and 13, thus making it possible to take in two conventions at the same time.

**FESTOON
NECKLACES**

The increasing demand for high grade Festoon Necklaces has compelled us to make up a larger and more varied line of them than ever before, set in combination with Diamonds, Baroque Pearls, Aquamarine, Topaz, Peridots, Amethysts, Turquoise, fancy Sapphires, etc., etc.

Popular Talks on Law.

(Copyrighted, 1906, by WILLIAM C. SPRAGUE.)

CONTRACTS.

(Continued from issue of May 9.)

3. WHAT MAKES A CONTRACT?

There are two elements that are always set in a contract, namely, an offer and acceptance. If either is lacking there is no contract. Not every offer and acceptance makes a contract for a breach of which an action will lie in the courts. If, for instance, I offer to entertain you at my house and I fail to appear at the time, this is an offer and an acceptance, but no contract. Therefore, we should understand that the offer, in order to lead to a contract, must be an offer of a contract, that is, something intended to change the legal relations of the parties; so, an offer in itself, if so understood, can not give rise to a contract.

As to how the offer must be made no law can be laid down. It may be made orally or in the form of writing, by signs, advertisement, and by any number of other ways. A mere wink of the eye or a nod of the head, as in the case of bidding at an auction, may constitute an offer.

Acceptance, too, may be made in many ways, there being no form required, unless in the case of a contract of contracts where the statute provides that a writing shall appear to the terms. Of these kinds of contracts we shall speak later.

In order to make a contract, the offer must be accepted in the terms of the offer. If there is any variation between the offer and the acceptance or any conditions attending the acceptance, a contract is not made. Contracts made by correspondence are peculiarly subject to fault in this particular. In correspondence does not show that the minds of the two parties have met upon the same proposition no contract is implied.

Offers are frequently made to be accepted at a certain time or at a certain place, in a certain manner. The acceptor in order to bind the one making the offer must agree in the terms of the offer to form a legal contract.

A difficulty sometimes arises in cases where the time wherein which an offer may be accepted is not stated. It may be said generally that an offer may be accepted while it continues open; but, where there is no definite time within which acceptance must be made, how long has the offeree within which to accept? The rule of law is that once made, is presumed to continue for a reasonable time unless it is sooner withdrawn. What is a reasonable time depends upon the circumstances of the case. It is a matter for a jury to decide in a case like this as to whether the acceptance was made within a reasonable time.

Of course, an offer, even although made for a definite time, may be withdrawn at any time. This is not true, of course, if the person to whom the offer has been made has said or has agreed to pay something for the offer left open.

This brings up the question of option. An option has no value within the law unless something has been paid, or is agreed to be paid for it. If I voluntarily offer to

sell my horse for \$100 and give you a week in which to buy, I may withdraw the offer within the week without being liable to damages for not keeping my promise; but, if you have given me something, no matter how slight, it being of some value, or if you have agreed to give me something or render me some service in exchange for the agreement to hold the offer open, I must do so or put myself in danger of a suit for damages. After a reasonable time has elapsed, the offer not being made for a definite time, it is not necessary for one making the offer to formally withdraw it, as the law will presume it to be withdrawn. If the one offering wishes to withdraw before a reasonable time has elapsed, he must communicate the withdrawal by word or act to the offeree.

There are some things that will terminate an offer other than the voluntary act of one offering, as, for instance, his death or his insanity.

Offers are sometimes made to the general public, no particular persons being specified, as when an offer of reward is made in a newspaper or by posters. In such cases any one may accept if he does so before the offer is withdrawn; and in order for it to be withdrawn the same means must be used as was used in making it public.

In our next we shall treat of the important subject, "Contracts by Mail and Telegraph."

(To be continued.)

Pittsburg.

P. C. Gillespie sails the first week in July for Europe on a diamond buying trip.

M. R. Hull, who has opened a store at Salem, O., was in Pittsburg last week, buying stock for his store.

R. E. Prosser, formerly in the optical business in 6th St., has opened parlors in the Empire building, Liberty Ave. and Fifth St.

Many local jewelers last Saturday closed their stores at 1 p. m., and will observe the early closing period on Saturdays until Sept. 1.

Henry Wilkins & Co. have bought out the establishment of Simpson & Co., at 440 Wood St. The latter firm opened the store about a year ago.

The Federal Loan Co. is the name of a new concern which recently opened for business at 121 Federal St., Allegheny. The store is at the corner of Robinson St.

The Adler Optical Co., which opened for business at 216 6th St., has erected an immense electric sign, the dimensions being five by 30 feet, and the illumination at night lights the street up for a block.

S. Davis & Co., who suffered a \$15,000 loss by fire two weeks ago, have been paid in full by the insurance companies, and the firm is now doing business as usual. Mr. Davis will remodel his establishment just as soon as he can have the work done.

Lipman & Lipman last week opened "The Palace," a jewelry and novelty store, at 235 Fifth Ave., next door to the new store which E. P. Roberts & Sons will open shortly. The Lipmans were formerly in partnership with May Bros., who now have a store in Cincinnati. The Lipman brothers

also have a St. Louis store. H. M. Lipman is managing the Pittsburg house.

Among the out-of-town buyers in Pittsburg last week were the following: Frank Worrel, Cannonsburg; William Hunt, Uniontown; C. H. Bauer, Blairsville; A. Katzenmeyer, Burgettstown; S. H. Schmidt, Manor; H. R. Brown, Donora; J. P. Rosendahl Irwin, J. E. Murphy, Dawson; Frank Bloser, New Kensington.

Within the next week or 10 days, a meeting of wholesale jewelers will be arranged, the purpose being to perfect plans for giving a banquet some time early in January. W. O. Harrison, of the George B. Barrett Co., has been circulating among the dealers securing expressions, and all appear to be in favor of it. It is proposed to organize a jewelers' social club in this city. The gathering together of the wholesalers is expected to promote a more kindly feeling. Some of the retailers probably will be invited to the banquet.

Huhn & Co., manufacturing jewelers, 224 Fifth Ave., last week caused the arrest of Walter Measkel, aged 14, who resides in Kirkpatrick St., on a charge of larceny. The lad confessed to Detective Aymer that he had given certain jewelry to James Boyle and George King. The police say he is charged with stealing four watches, a gold chain and a diamond from Huhn & Co., where he was employed. Measkel told the detective that the boys to whom he gave the articles agreed to sell them. Three watches and a chain were recovered from Boyle, both Boyle and King being charged with receiving stolen goods.

After a most successful five-day tour of Ohio, the members of the Merchants' & Manufacturers' Association who toured the northwestern part of the State Saturday returned to Pittsburg well satisfied with the trip. At Conneaut some of the members of the party, 100 in number, played a pleasant joke on Sam F. Sipe, by decorating his section in a Pullman car with black diamonds, the kind that are in the rough, as well as cobblestones and a few other street missiles. Mr. Sipe enjoyed it very much. He alone visited 140 jewelers during the tour. Another member of the party was Mr. Montgomery, representing M. A. Mead & Co. At Alliance, O., the merchants there met the train at the station with 54 automobiles. This was the sixth trade extension tour, the Pittsburgers everywhere being received with open arms. F. R. Babcock, president of the association, was presented with a silver loving cup at Erie last Friday night, where the journey ended.

Contracts Awarded to Supply Treasury Department With Clocks.

WASHINGTON, D. C., June 8.—The contract for furnishing United States public buildings under control of the Treasury Department, east of the Rocky Mountains, with clocks during the next fiscal year, has been awarded as follows: To the Seth Thomas Clock Co., 8-day pendulum clocks at \$10.10 each; to the American Clock Co., electric clocks at \$19.25 each.

A soda water fountain has been installed in the store of J. Robinson & Son, Springfield, Mass., by S. S. Sobotka, of Boston.

The Aristocrat of all 10K. Lines.

HOW often we hear the jewelers say something like this: "You certainly do know how to make your line look like fine 14K. goods. There has been room for just such a 10K. line for a long time."

UNITED STATES PATENTS.

ISSUE OF MAY 29, 1906.

822,649. EYEGLASSES. JOSEPH KOVACS, Newark, N. J. Filed Feb. 6, 1906. Serial No. 299,096.

The herein-described nose-clamps for eyeglasses, comprising a head member pro-

vided at one end with two separate fingers which extend therefrom and are curved outwardly and upwardly at an angle thereto, the end portions of the fingers being approximately parallel.

822,678. COLLAR-SUPPORTER. JOHN H. THERREATH, South Orange, N. J., assignor to Hippart, Griscom & Osborn, Newark, N. J. Filed July 28, 1905. Serial No. 271,593.

An extensible collar-supporter having members formed of skeleton frames, the outer member having side bars *a* with stud at one end, and at the other end the ties *g*, and having the notches *n*

in one of the side bars, and the inner member having side bars *b* fitted to slide within the ties *g* with transverse stud at the outer end, and a tooth carried by such inner member with means for engaging it detachably with the notches *n* within the outer member.

822,900. MACHINE FOR COVERING EYEGLASS-CASES. FRANK A. TIBBALS, Weymouth Center, Mass., assignor to Wilton E. Drake, Boston, Mass. Filed June 12, 1902. Serial No. 111,431.

A covering-machine, having, in combination, a rotatably-supported member for receiving the article to be covered, a member closely embracing

the article, a plunger adapted upon its descent to press the article and the receiving member downward below the surface of the embracing member to cause the embracing member to fold upon the edges of the covering material at the edges of the article, and means for actuating the plunger.

822,901. MACHINE FOR LINING EYEGLASS-CASES. FRANK A. TIBBALS, Weymouth Center, Mass., assignor to Wilton E. Drake, Boston, Mass. Filed June 12, 1902. Serial No. 111,432.

A machine for lining articles, having, in combination, a support for the article to be lined, a

plurality of pressing members for engaging different parts of the lining and pressing it into the

article, and means for actuating the pressing members independently during the pressing operation.

822,912. BLOTTER-HOLDER. ERNEST M. WHITTINGTON, Nashville, Tenn. Filed Aug. 23, 1905. Serial No. 275,419.

A blotter-holder comprising a metal plate having integral clips at each end, said clips being bent back upon the under side of the plate and adapted to hold a blotter, an upwardly-extending loop

punched from the plate adjacent one end, a finger punched from the plate adjacent the opposite end, a ring fastened upon the said loop, and an adjustable strap connected to said ring and carrying a ring at its opposite end adapted to engage said finger, all of said parts being arranged.

822,910. FOUNTAIN-PEN. JOHN HOLLAND, Cincinnati, O. Filed Feb. 17, 1906. Serial No. 301,551.

In combination with a fountain-pen having an opening in the side of its barrel, a sleeve sliding

on the barrel and having longitudinal notches in one end, said end being turned inward at the notched end, thus forming a contraction for gripping the barrel.

822,011. STUD OR BUTTON. ALFRED J. O'DONNELL, St. Louis, Mo. Filed Aug. 18, 1905. Serial No. 274,802.

A device of the class described comprising a base, a needle formed upon said base and provided with a recess formed at the rear of the point and extending around the entire periphery, a head

member having a perforation formed therein for the insertion of the needle, a pair of leaf-springs riveted within the head, the free ends curved to receive the needle to lodge within the recess and retain the same in locked position.

822,018. STEM-WINDING WATCH. HENRI ROSAT, Fils, Le Locle, Switzerland. Filed May 24, 1905. Serial No. 262,042.

A stem-winding mechanism for watches com-

prising a winding-pinion provided with a clutch member and a projecting spindle, a setting-pinion.

an intermediate shiftable member slidably and non-rotatively mounted on said spindle and adapted for engagement with said clutch member or setting-pinion, a spring-actuated rocking lever holding said intermediate member in engagement with said clutch member, a presser-rod slidably mounted in a bore formed in said spindle, a false stem engaging said rod, a rack engaged by said rod, and a spring-actuated sector meshing with said rack and having a spring of higher tension than the lever, said sector and lever having engaging portions.

822,029. TIME RELAY RECORDING-CLOCK AND SIGNAL MECHANISM. GUY P. THURBER, Pittsburg, Pa. Filed May 11, 1905. Serial No. 259,921.

In a time relay recording clock, the combination with an electrically-actuated air-brake system, and a shaft driven by a clock mechanism, of wheels mounted upon said shaft, brushes engaging two of said wheels, a dog engaging one of said wheels,

a relay operated by a track block-circuit and adapted to elevate said dog to permit of the movement of its respective wheel, the breaking of said circuit releasing said dog and stopping said wheel at a predetermined time, and breaking electrical circuit through said brushes to set said air-brakes.

822,137. PROTECTOR FOR SPECTACLES. CHARLES E. LINING, Peru, Ill. Filed June 8, 1905. Serial No. 264,323.

A protector-case for eyeglasses and spectacles made from a flat paper blank, said case consisting of guard-walls cut from the bottom of the blank,

scored and bent at right angles thereto, a tail-piece having three walls bent upwardly therefrom, and a ledge forming a stop for the cover, said tail-piece and walls being secured to the guard-walls.

822,200. COLLAR-BUTTON. CATHERINE C. FIGGATT, New York. Filed Feb. 9, 1905. Serial No. 244,952.

A button, consisting of a stem, a head, a base and a disk mounted between the base and the head, the said base and disk each being formed

with a semi-circular-shaped portion on one side of the stem and a semi-elliptical-shaped portion on the other side of the stem, the semi-circular portion of the disk being arranged on the opposite side of the stem from the semi-circular portion of the base, and all of the parts of the button being integral.

822,215. OPERA-GLASS. EMIL B. MEYROWITZ, New York, assignor to the Meyrowitz Mfg. Co. Filed Nov. 7, 1904. Serial No. 231,704.

A folding opera-glass comprising a hinged casing

having a support therein, a lens-frame within said casing and pivoted to said support, and link con-

1,178. SAFETY-PINS, ETC. R. L. ANTROBUS,
Birmingham. Jan. 21.

A fastening for safety-pins and brooches con-
sists of a hinged catch 13, which locks the pin

FIG. 2.

underneath a projecting part 12 formed on the
coil 10 at the end of the fixer member 7. The
catch has a circular part 13 which snaps into the
central aperture of the coil 10.

1,179. SAFETY-PINS, ETC. R. L. ANTROBUS
Birmingham. Jan. 21.

Fastenings for safety-pins and brooches consist
of a circular slide 12 having a projection 13 which

FIG. 4.

locks the pin in a recess 16. The slide is operated
by a spring contained in the circular tubular part
10 and by a finger-piece 17.

ISSUE OF MAY 23, 1906.

1,277. WATCHES. G. HAUSSLER, Hanover, Ger-
many. Jan. 23.

Bows and Pendants. Capsules *a* having flanges
b are provided for the tenons *d* of the bow *e*.
These capsules may be pierced to pass the screw-
pins *g*, or a single screw, and may screw into the
pendant, their interiors being made square to allow

the use of a male-key, or the flanges being made
angular to take a spanner. In a modification, the
capsule is fluted and is forced in.

1,264. PENDANTS, LOCKETS, ETC. E. W.
GOODE, Birmingham. Jan. 23.

A pendant intended to enclose a miniature or

the like, or to be used as a fastening for a brace-
let, necklace, or the like, etc., consists of two sym-
metrical parts which engage and are secured to-

FIG. 5.

FIG. 6.

FIG. 7.

FIG. 8.

FIG. 9.

gether by means of catches. The half parts are
shown separately as *a* and *b*, Figs. 5, 6, 7, 8. They
are provided with flanges shown in Figs. 7, 8,
which fit together when the parts are connected.
The attachment is made primarily by the stops
d, Figs. 5, 7, engaging in the slots *c*, *c*², Figs. 6,
8, a rotary motion being given to the parts, and
completed by the closing of the catch *a*³, *b*³, Fig.
9, which connects the rings *a*¹, *b*¹.

1,615. BRUSHES. S. SIMON, London, E. C.
Jan. 27.

Clothes Brushes.—The main body *A* of a com-
bination brush is formed with a recess *B*, which
extends through the greater part of the brush,
into which a second narrow brush *C* is arranged
to slide. The combination may be used as a whole,
or the narrow brush may be withdrawn for sep-

FIG. 2.

FIG. 3.

arate use. Strips *B*¹ are secured to the main body
A and correspond with slots in the brush *C* to
guide it and to retain it laterally. The brush
is secured endways by a catch *D*² pivoted on the
handle, which is integral with the narrow brush
C. The two parallel arms *D*³ engage slots in the
guide-strips *B*¹, and are normally held in en-
gagement by a spring *D*⁴. The back *A* may be
veneered, and a strip of velvet may be attached
to the back *C*. Instead of guide-strips *B*¹ being
provided, the recess *B* and brush *C* may be dove-
tailed.

1,279. CALLIPER GAUGES. E. STUBBS, Cov-
entry, Warwickshire. Jan. 23.

One contact of a calliper gauge is formed by a
movable nose, connected by multiplying levers with
a needle which indicates divergences of articles
measured from a standard size. In one form,
Fig. 5, the contact nose *D* forms part of a lever
*C*², pivoted on one of two heads *T*, *T*¹, which
slide on a graduated bar *S*. The lever *C*² is acted
on by a spring *G*¹, and its long arm engages the

slit arm of a pointer E¹ moving over a scale B. The callipers, the lever C² is replaced by a lever C¹ short to pass along the calliper leg, and having a short arm engaged by a spring plunger, which forms the contact nose. Fig. 3 is an end view of internal callipers inserted in a tube to be measured. Two contacts are formed by the ends of a cross-pin K fixed in one leg J, the third by a set arm M of a bell-crank lever M¹, pivoted to the other leg. The long arm of the bell-crank lever M¹ bears against an arm O, fixed to a spindle O¹ which passes along the calliper leg and

carries at its end a pointer (not shown) moving in front of a scale. By turning the pointer the contact M is depressed and permits of the insertion of the callipers in the tube. A spring acting on the arm O causes the contact M to be pressed towards again.

Further Information on Reducing and Raising Gold Alloys.

CHICAGO, ILL., May 30, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY—

Referring to the question of alloys, you published a rule by D. R. D., the very best ever. To reduce, multiply the weight by the difference between present quality and desired quality and divide this sum by the karat wanted. Example:—Reduce 24 kt. to 15 kt., say 100 dwt. $100 \times 9 = 900 \div 9 = 60$ dwts. of alloy; total, 160 dwts., 15 kt.

To raise: Multiply weight by difference in the karat, divide by difference between karat wanted and 24 kt. Example: Raise 100 dwts., 10 kt. to 18 kt. Difference $8 \times 100 = 800 \div 6$ (difference between karat wanted and 24 kt.) = 133.33 dwts. fine gold = 233½ dwts. 18 kt.

THE HOROLOGICAL REVIEW.

Ancient and Modern Time Measuring Devices.

A Lecture Delivered by C. T. HIGGINBOTHAM Before the American Horological Society, Chicago.

N that standard work of reference, "The Encyclopædia Britannica," may be found pages devoted to astronomy and several pages to the (so-called) science, astrology, the superstition with which astronomy has for so long a time encumbered—but you will look in vain for a single line on the subject of horology; yet horology has equal claims with astronomy both to antiquity and to importance. Astronomy and hor-

ology are twin sciences, the oldest in the world. They are co-eval with the advent of the human race. The cave dweller of the one age must necessarily have observed the passage of the great orb of day across the heavens. He must have taken note of the phases of the moon; its waxing and waning at regular intervals, the constantly changing obliquity of the sun and planets to the zenith. He must have observed the varying length and direction of shadows cast by the sun from rocks and trees, and the intelligence that enabled him to fashion a stone hatchet would prompt him by these natural phenomena to divide time into the equivalents of years, months, days and shorter periods, and to this extent, at least, he came both an astronomer and horologist. These two sciences have ever been connected as closely as Siamese twins, their very existence dependent one upon the other, together they have come up through the

ages contributing their wealth of benefit to the progress of the world. Horology has ever kept pace with advancing civilization in providing time measuring instruments to meet the requirements of the age, as these requirements became

the manner determines his exact position on the broad ocean by means of his chronometer and magnetic compass, and by them is enabled to direct the course of his vessel to the desired port.

A school boy asked by his teacher to explain what salt is, said: "It is the stuff that makes potatoes taste bad if you don't put any of it on them." Following out the same course of reasoning, he might have defined a watch as a thing that made railway accidents when it went wrong, or a chronometer as an affair that made ship wrecks when it stopped. Picture to yourself what a calamity it would be to the human race if every timepiece in the world should

FIG. 1.

FIG. 2.

FIG. 3.

ogy are twin sciences, the oldest in the world. They are co-eval with the advent of the human race. The cave dweller of the one age must necessarily have observed the passage of the great orb of day across the heavens. He must have taken note of the phases of the moon; its waxing and waning at regular intervals, the constantly changing obliquity of the sun and planets to the zenith. He must have observed the varying length and direction of shadows cast by the sun from rocks and trees, and the intelligence that enabled him to fashion a stone hatchet would prompt him by these natural phenomena to divide time into the equivalents of years, months, days and shorter periods, and to this extent, at least, he came both an astronomer and horologist. These two sciences have ever been connected as closely as Siamese twins, their very existence dependent one upon the other, together they have come up through the

more and more exacting. To-day timepieces are a household necessity and an indispensable adjunct to every industry, business, profession and science. The astronomer finds his astronomical clock necessary to aid him in determining the distance and size of the heavenly bodies and other phenomena of the universe; the chemist, to time his delicate experiments; the physician, watch in hand, counts the pulse beats of his patient; the banker, as he closes the ponderous doors of his vault at the close of the day's business, does so in perfect confidence that the faithful time clock within will release the bolts at the proper moment for the resumption of the following day's business; the locomotive engineer regulates the speed of his train with its precious burden of human freight;

suddenly be destroyed. Business and travel would be paralyzed; chaos would reign.

In following out the development of time measuring instruments I shall not attempt to place the numerous improvements and inventions in their chronological order; indeed, this would be impossible, as many of the landmarks have been lost and dates and authors of some of the most important discoveries are matters of dispute. I shall therefore mention the principal ones in their natural and probable sequence, using dates only where such dates have been indisputably established.

The first device used for the division of the day into shorter periods was undoubtedly the sundial. It is reasonable to assume that the shadows cast by the sun from natural objects would suggest the placing of a post in the ground or the erection of a

The Balance of Business

Indispensable to modern life, the Elgin Watch is ever in increasing demand—and the balance of business goes to the store that carries a full stock of Elgin Watches.

See Jobbers' list for prices or write the Company.

Every dealer is invited to send for the Elgin Art Booklet, "Timemakers and Timekeepers," illustrating the history and development of the watch.

New York Office, 11 John Street.
San Francisco Office, 206 Kearny St.

stone pillar, and in some manner, probably by marks on the adjacent ground, provide a means of noting the passage of time with sufficient accuracy to meet the simple requirements of that age. In ancient Britain the pillars were set up surrounded by flat stones placed at intervals in a circle, the shadow from the central pillar falling on the stones serving to mark divisions of time. The Egyptian obelisks are supposed to have been used for this purpose. These and many other ancient relics serve to bear out this view.

The earliest mention made of a sun dial is found in the Second Book of Kings. "And Isaiah, the prophet, cried unto the king, and he brought the shadow 10 degrees forward, by which it had gone down in the dial of Ahaz." There is no word in the Hebrew language to express dial; the word so translated meaning steps. It is

FIG. 4.

Therefore supposed that this sun dial was a series of steps possibly having a stone pillar placed in such a position that its shadow fell upon them.

The earliest definite description we have of a sun dial is that of Berossus, a famous Chaldean astronomer, who lived about 540 years before the Christian era. A representation of this dial is found in Fig. 1.

Sun dials were introduced in Rome about 800 years before Christ. Plautus, a famous comic dramatist of that time, refers to them in the following epigram:

When I was young, no timepiece Rome supplied,
Every fellow had his own, inside;
Rusty horologue, that rain or shine,
Never failed to warn him of the time to dine.
In sturdy Romans sauntered through the forum,
I hale, content; for trouble ne'er came o'er 'em.
Now these cursed dials show their faces
Over Rome, in streets and public places;
I men to know the hour, the cold stone question
It has no heart, no stomach, no digestion.
My watch the creeping shadows—daily thinner
Show themselves, impatient for your dinner.
Give me the good old timepiece if you please,
I found the villain who invented these.

Sun dials have been constructed in a great variety of forms, and are in use in some of the eastern countries even at the present day, but at best they can only be used when the sun shines. At night or in cloudy weather they are useless.

The earliest instrument of which we have any record for the measurement of time independent of the earth's motion, is the clep-

sydrae. The name is of Greek derivation and refers to the stealing away of water. In the simplest form it was a vessel having a small perforation in the bottom. This vessel was filled with water, which escaped, drop by drop, the lowering surface serving to indicate the passage of time. The Malay pirates used a very simple form, a cocoanut shell with a hole in it; this was set floating on a vessel of water, and as it filled and sank an attendant immediately set it afloat again, announcing the fact by striking a bell.

To overcome the irregularity caused by the decreasing speed of the discharge as the

FIG. 5.

water lowered, two vessels were used, one above the other. The upper vessel was kept full by a constant supply of water, the overflow being carried off by a waste-way. An aperture in the bottom of this vessel discharged the water, drop by drop, into the lower one, which was marked with graduations.

Then followed another improvement—a float bearing a figure pointing to a column was added (see Fig. 2). This column was provided with graduations encircling it; the graduations diverging from each other, the purpose being to provide a means of regulation. By turning this column the distances between the hours could be increased or diminished, as required. This was made necessary by the fact that the general practice was to divide the periods from sunrise to sunset and from sunset to sunrise, each into 12 equal parts.

This unwieldy method acted as a deterrent influence upon invention until the method of dividing into equinoctial hours, as at the present, gave a renewed stimulus to the art. Now the graduated column and the figure pointing to it were abandoned; a cord was attached to the float (see Fig. 3). This passed over a pulley, the free end of the cord being provided with a small weight. The arbor of this pulley carried a hand pointing to the hours on a circular dial. Then a means of automatically emptying the water vessel by the addition of a syphon, as shown, was added; the water rising to the top charged the syphon; the vessel quickly emptied itself, and the hand returned to the starting point. "There is nothing new under the sun" is a familiar saying. This is an exemplification. Here we have a self-winding clock; in fact, I am disposed to regard the clock more in the nature of an evolution than an invention.

The next important step was to substitute a straight toothed rack gearing into a wheel on the arbor for the cord and pulley. It now remained to replace the rising water by a descending weight and to provide a regulating device to control its motion to make the evolution of the clock complete. The first device of this kind was a wheel having pins set in its face, the pins acting on a pair of pallets, as in the verge escapement. The arbor carrying the pallets was provided with cross arms bearing small weights, the whole suspended by a cord which, twisting and untwisting, served to control its vibrations. By moving these weights to or from the center an approxi-

mation of uniformity of vibrations was secured.

The pendulum was the discovery of Galileo in 1582, but, strange to say, was not applied to clocks until half a century later. Now teeth were formed on the periphery of the escape wheel and pallets used to impart swing to the pendulum. The Graham dead-beat escapement in present use is the perfection of this device. Later, about 1700, Harrison invented the mercurial pendulum.

Portable timepieces were introduced about 400 years ago. The invention is attributed to Peter Henlein, of Nurnburg. The coiled spring as a motive power was applied and an attempt made to control its varying force by a device called the "Stack freed," a small cam, acted upon by a spring. These watches, however, were little better than mechanical toys, incapable of more than an

FIG. 6.

approximation to correct time. The fusee was invented in 1525. This greatly improved the time keeping quality of watches, but they were still sadly deficient in this respect, there being no better means known than a piece of catgut to control the motions of the balance. An incident related of King Charles V. is an illustration of this. After abdicating his throne he retired to the monastery of St. Juste, where he spent much of his time experimenting with watches. One day, while seated in his apartment with a number on his table, a careless monk entered and awkwardly overturned it, throwing them to the floor. The abashed cleric was aghast expecting a reprimand, but the monarch good naturedly put him at his ease by saying: "There, I have been trying for months to make all these watches go together, and now you did it in an instant."

The invention of the hairspring about 1675 was a great stride toward perfection, and now followed in rapid succession many valuable inventions: the fusee chain, dial work and minute hand, the maintaining power, the lever escapement, the chronometer escapement, the compensation balance and many others. One of the most remarkable achievements was the invention of John Harrison in 1692. The British Government offered a prize of £20,000 for a timepiece which, after a voyage to and from the West Indies, would enable longitude to be determined within half a

THE PUBLIC IS "MUCK RAKING"

Just at present the great American people are in the "Muck-Raking" mood.

They are pondering over the trusts—busy figuring out how and why they pay too much for things.

The public is thinking this about the cost of watches, Mr. Jeweler—and, as a matter of fact, many people are every day finding out that there *is* a point in the price of watches where real watch-service—real time-keeping quality ends.

Our jewelers' sales form a good criterion to this increasing public watch-wisdom, and they show enormous increases for the

New England

The Watch for the Great American People

We are helping this public awakening all we can—with *advertising*. We're talking to the public about watch-cost and real watch-service. This Fall we will tell the New England Watch story to one-third of the entire population of the United States.

Now, Mr. Jeweler, thousands of people are going to be convinced—are now convinced that they want a New England Watch. These people are writing us by thousands. But we don't sell to these people direct. These sales are made wholly through the nearest jeweler who sells our line.

Do you want your share of these sales? Some of your customers are writing us. Some of your competitors' customers are writing us. May we send them into *your* store to buy?

Then write us for details of our plan. Learn how we are planning, with an enormous advertising expenditure, to create Fall and Holiday business for you.

**THE JEWELER WHO HANDLES NEW ENGLAND WATCHES
IS GOING TO HAVE THE LEAD DURING THIS FALL AND
THIS CHRISTMAS SEASON. OUR NATIONAL PUBLICITY
WILL STIR UP THE TRADE.**

Let us be partners and co-operate with you. Write us now for details of how we are planning to work *with you and for you*.

WATERBURY, CONN.

egg. This means a variation not to exceed two minutes. Mr. Harrison took the time and when we consider that the common balance had not been invented at the same time, but that he had no better means of correcting errors than a compensation carrying the regulator pins, the pertinence of his instrument was truly remarkable.

We will now take up the watchmaking industry in America, on what is known as the interchangeable plan. This method is little more than half a century old. And as difficulties had to be overcome; it was achieved only after a long series of failures and disasters. No company engaged in this enterprise has been exempt from its seasons of adversity, its vicissitudes. The original stockholders rarely did anything from their investment; it was after reorganization, which often sold out the original stock, that dividends were paid. The road to success may be paved by many a bleaching skeleton of the business concerns that have succumbed.

Let us mention this fact because there is just a movement on foot to modify or reduce the tariff on watches. I say, without the successful contradiction, that any partial reduction of the protective tariff will bring inevitable disaster to an industry that has been of inestimable benefit to the country and would throw thousands of well-paid mechanics out of employment. In all our boasted automatic machinery and perfect system there is too wide a difference between the value of American labor and foreign labor to enable us to successfully compete with the latter.

Previous to the commencement of watch making on the interchangeable plan, a few attempts were made to manufacture by the dry method. Luther Goddard, of Northbury, Mass., commenced their manufacture in 1809. He imported what is known as the "roughs" from England; that is, the plates and trains; also the balances, and cases, devoting himself to finishing and assembling the parts. He continued the process for eight years, producing about 100 watches, when he failed from inability to compete with the imported article. The Curtis Bros., of Hartford, Conn., in 1836 commenced the manufacture of watches, using their own machinery for this purpose. The tools were very crude, as was the product. They used lantern pinions and roughly finished parts like a Yankee job. They made about 800 and then failed for the same reason that Goddard did.

In 1851 A. L. Dennison, a Boston watchmaker, conceived the idea of making watches on the interchangeable plan. He enlisted Edward Howard, a clock and alarm maker, in the enterprise, and together they went in search of moneyed men willing to engage in the venture. Addressing a number of capitalists, Mr. Dennison said: "I believe, gentlemen, the time will come when a single American factory will produce 50 watches a day." This was considered so far a flight of imagination that he was at first dubbed "The Boston lunatic." An instance is related of P. S. Bartlett, a German long identified with the watch industry. Mr. Bartlett came from a little town in New Hampshire, where he learned the trade. After he had entered the service

of the American Watch Co. he revisited his old employer, and the following conversation in substance took place:

"Well, Bartlett, what are you doing now?"

"Oh, I'm with the American Watch Co."

"What are they doing?"

"Making watches."

"You don't say so. How many are they making?"

"About eight a day."

"Eight a day? Good heavens, man, you'll flood the country."

Flood the country with eight watches a day! The industry has grown so far beyond the wildest dreams of its originators that the combined output of American factories is now 12,000 a day. A watch is turned out every three seconds.

Wonderful changes have taken place in the manner of manufacture and the cost to customers reduced to one-fifth. By the old method, when a new model was devised, the watchmaker made it laboriously by hand. After testing and perfecting it was taken to pieces and the parts sent to the machine shop, where the measurements were taken and the tools built to reproduce them. Then a few were assembled and tried. Errors were corrected and another small lot put together; so on until pronounced correct, when the manufacture in quantities was begun. All that is changed. The construction of a watch is now a matter of mathematical calculation. Everything is determined before hand; the distances of the wheels and pinions, their size, the forms of the teeth and leaves, the shape of the cutters and other small tools, in fact, the minutest details, even to the strength of the mainspring and weight of the balance. Drawings are made on a very much enlarged scale, and all measurements not only made accurately to scale, but the figures added; the most important parts being calculated to the ten-thousandths of an inch.

Forty years ago it cost to engrave the trade-mark, the number and the scrolling about 25 cents per watch; now it is done by stamps at a fraction of that amount, and the work is much superior for the reason that the highest skill obtainable is secured to make these stamps. The painting of the dials was all done by hand, one figure at a time. Now dials are printed as a card printer does cards. The labor cost of Breguet springing a watch used to be \$2. That process is now subdivided into not less than seven distinct operations, and so on through all stages.

In an American factory nearly every employe is a specialist, performing but a single operation, of which there is a great multiplicity. The term watchmaker is rarely used; we say, balance truer, spring truer, banker, finisher and so on, each term expressing a trade by itself. We have a class of operatives known as "all-round" men whose skill covers all branches of assembling. These operatives are used for "hospital work"; that is repairs. Adjusters are also required to be adepts in all branches.

A brief review of the assembling operations may be interesting. The watch comes into the finishing room with all the parts complete, ready to assemble, the trains and escapements jeweled and the plates finished. It first goes to the steel fitter, who

fits the mainspring and barrel arbor as well as some other parts located between the plates. Then it goes to the trainer, who assembles the train; then to the stem fitter, who fits the stem work; then to the banker, who adjusts the escapement. The balance is then taken out and sent to the balancer-truer, who cuts, trues and poises it. From there to the spring-truer, who trues the hairspring, which had previously been "Bregueted." The watch has in the meantime been to the dialer, who fits the dial and hands. It is now ready for the finisher, who centers, circles and levels the hairspring, seeing that the motion is up to standard. Finally it is sent to the timing room, where it is brought to time and run at least 18 hours. If it is an adjusted watch it goes to the adjuster. The first operation of adjusting is temperature—compensation.

It may not be generally understood that there is no such thing as perfect adjustment for all temperatures. The reason for this is that the weight carried by the rim does not approach or recede from the center in a radial direction, the deflection causing it to diverge more or less. As a consequence, adjustment can only be obtained for two temperatures. A reference to Fig. 5 illustrates this. The line indicates a range of temperature from 15 degrees to 115 degrees, the mean being 65. Now it is just as easy to adjust for the extremes 15 and 115 as any other temperatures, but if we do so the variation at the mean 65 will be greater than if we select two means between, 15, 65 and 115. It is obvious that these two means are 40 and 90. By adjusting to these the error is reduced at 65 or, rather, is divided between the mean and the extremes. After adjustment to temperature the balance is taken out and re-poised. The watch is then ready for position adjustment. This is the most difficult of all operations and requires the greatest skill and patience. It sometimes consumes months. No rules can be laid down for position adjustment; of course, it is understood that the isochronism of the balance and spring must be perfect. I say balance and spring advisedly, for if the balance and spring are not properly proportioned to the motive force delivered by the escapement, permanent isochronal vibrations cannot be secured. A very slight defect in the escapement may be fatal to position adjustment. The old method of making one error correct another is not permissible in these days. No permanent close rate can be secured in this manner.

There is a disturbing influence in position adjustment that is very much underrated—magnetism. This is a force that has been much studied and written of, and yet of which but little is known. We don't even know what it is. New conditions and effects are being brought to light constantly. It used to be the belief that a piece of magnetized steel had but two poles. As a matter of fact this is very far from being the case. For instance, a hairspring magnetized will have two poles in every coil. Fig. 4 will illustrate this. The north poles will ordinarily be located on a radial line from the inner to the outer coil, and the south poles opposite. This can be readily demonstrated. Wind up a mainspring in a

LONDON, ENGL.

bel or a wire ring, present its outer edge to a strong magnet; on straightening it out and passing it before a magnetic compass the needle will be alternately attracted and repelled for every coil that it formed when magnetized. It is a well-known fact that a piece of steel once magnetized is ever after more susceptible to that force. Demagnetizing by any other known means than heating it to a red heat will not remove this susceptibility.

The magnetism that causes the most trouble is not permanent magnetism, but temporary magnetism inherent in all steel. Every piece of steel, particularly if hard tempered highly, is a magnet in itself, exerting greater or less magnetic force, according to its position toward that huge magnet we inhabit—the earth. This can be readily demonstrated. Take a fairly large sized piece of tempered steel (a pair of slide tongs will answer), remove the slide and bring the legs as close together

Fig. 7.

possible, securing them with brass wire string; lay it on your bench east and west, pass a compass along its side, and if it has not been permanently magnetized no perceptible influence will be manifested. Now lay it pointing north and south, and the compass will be sensibly deflected as it approaches each end. Finally set it perpendicular to the bench, and you will find the compass strongly attracted, the south pole below, the north pole above. Reverse the position of the tongs and the tongs at the poles will be as before. The south pole below, the north above. This is exactly what takes place in a watch. Its most serious effect is manifested in the escapement and balance. (See Fig. 6.) If the watch is placed with the fork in a perpendicular position, as on the drawing, it becomes a temporary magnet; its north pole is in close proximity to the south pole of the roller. The effect of this on the vibration of the balance is precisely the same as friction—retardation. The effect it exercises on the rate of the watch will depend on the mass of the steel parts.

Before leaving the subject of magnetism I will explain how to make a very inexpensive and extremely delicate magnetic needle for detecting very slight magnetism in watches. Fig. 7 represents a small phial

about one inch long and one-fourth of an inch in diameter. Insert a brass wire through the cork, to the end attach the finest silk fiber you can obtain from floss silk, or a strand of spider web. It can be readily attached by shellac dissolved in alcohol. Let the fiber be long enough to nearly reach the bottom of the phial, and to this end attach at the middle a piece of hairspring about one-tenth of an inch long. Now magnetize it by bringing it in close proximity to a strong magnet, and you will have an extremely sensitive instrument. By holding the bottle over a balance in vibration a very slight amount of magnetism may be detected.

In concluding I desire to direct your attention for a few moments to a comparison of what has been accomplished towards the perfecting of pocket timepieces with the possibilities of the future. Let us suppose we have before us a railroad watch that has been rejected by an inspector. Let me tell you what 30 seconds a week means. It means that out of 20,160 vibrations of the balance, it has given just one more or one less than it should. A variation of 15 seconds a month—many watches keep a closer rate—means a variation of one in every 172,800 vibrations.

This is truly a marvelous triumph of mechanical skill, but we have not reached the limit. The requirement for accuracy is becoming more and more exacting every day. Who can foretell the future? A new vehicle for the transmission of energy has been discovered. Wireless telegraphy is its demonstration. There is but little known of this mysterious agent as yet. Able minds are at work on the problem. It is slowly but surely being developed. As the clepsydrae has been superseded by the watch, so the watch may be displaced by some instrument not wholly dependent upon mechanism. It is no idle dream to anticipate that electricity may accomplish results beyond the power of mere mechanism and that the watch will be relegated to the museum as its predecessor, the clepsydrae, has been, its place being taken by a device totally different in construction and infinitely more accurate in its indications. The time may be sent continuously through the air by electric vibrations and received on a little instrument carried in the pocket which, by pressing a button, shall record it unerringly to the fraction of a second at any moment of the day or night.

'The Market for Watches in Asia.

TWO-THIRDS of all watches sold in Turkey in Asia come from Germany, but are not proving entirely satisfactory. One American firm has an agency there which orders its stock direct from the United States, thus saving the middleman's profit at Constantinople. Watches intended for that market should have the open-faced case with Arabic numerals. Alarm clocks, with the round metal case, which can be sold at from \$1 to \$2 will also find a good market there.

A German firm has succeeded in disposing of a large number of clocks having a phonograph attachment, which at certain hours plays some of the stirring Turkish airs.

An Interesting Clock Factory at Sanbornton, N. H., Said to be the Oldest in the State.

A LITTLE clock factory, in Sanbornton, N. H., conducted by Robert S. Johnson, stands out as a curio in the modern horological world. The building is a one-story wooden structure which has not been favored with a coat of paint for more than a generation and nestles by the side of a brook among the high hills of Sanbornton. To a stranger in this village the clock manufactory resembles an abandoned stable, while to the residents of the town and to almost every man, woman and child for miles in either direction, the old factory is something to which they point with pride and declare that this is the oldest clock factory in the Granite State.

Besides a few clocks which he made for his neighbors and one for the Quincy market, Boston, and another for the Dartmouth College observatory at Hanover, Mass., Johnson did all his business with the wholesale trade. The best clock the little factory ever turned out is one that was made many years ago and is still keeping accurate time in the office of the United States Clock Co., New York. This clock has 26 dials, each giving the time of the country which each one of the dials represents. The present annual output of this unique manufactory is about 50 grandfather clocks.

A few years ago the little stream which runs directly by the little shop, and which is known as Salmon Brook, was utilized and a small six-inch waterwheel, which is capable of supplying the plant with three horsepower, is connected with the shop's machinery, so that to-day a greater part of the work which was formerly done by hand is now done by machinery.

The shop comprises two rooms, 24 feet long and 18 feet wide. The building was formerly used as a dwelling house. It was in the room now used as a storeroom that the present owner, Robert Johnson, was born. 73 years ago.

At the recent meeting of the Astronomical Society, Toronto, Ont., R. Meldrum Stewart, M. A., read a paper on "The Time Service of the Dominion Observatory at Ottawa." The ultimate standard at the observatory is one made by Riefler, of Munich. It has a nickel-steel pendulum, is sealed up in a glass case fastened to a pillar on its own pier in a basement room, automatically regulating its temperature, and it winds itself up electrically every half minute. It keeps time with the stars, and is called a sidereal clock. The chief mean-time clock, which keeps ordinary time, was also made by Riefler, and is mounted like the other. Its time is checked daily by comparison with the sidereal clock. By electrical means this clock controls a clock in each of the Government buildings, and these again actuate dials placed in each of the rooms. Four insulated wires run from the observatory to the city for this purpose. At present there are 42 dials in the Parliament building, 60 in the West block and 48 in the Langevin block. These with a few others make up a total of 214 dials. Since the first part of December a timeball has been dropped every noon on Parliament Hill, controlled automatically from the observatory.

CONSISTENCY IN BUYING WATCHES

IT IS GOOD POLICY to buy systematically, avoiding fickleness in trade.

Find a house whose methods are in accord with your ideas and whose service is satisfactory, and then deal consistently with that house. Thus more thorough understanding is possible, mutual confidence built up, and foundation laid for ever-increasing satisfaction. Large sales of Watches are made here to Jewelers pursuing this policy.

Skiascopy.

read by A. F. THOMPSON, Adel, Ia., before the Nebraska State Optical Society.)

THE principle of skiascopy is the finding of the point of reversal, or, in other words, the far point of a myopic eye, and, if this, if the eye is not already sufficiently myopic, it will be necessary to place in the lenses as will bring the emergent rays to a focus at a certain definite point.

so enthusiastically full of zeal for skiascopy that you can do nothing but study to make it a part of your very being, think of it all the time. Practice skiascopy. Its advantages to you if you become proficient in it that your confreres cannot possibly cope with.

First, it offers a method so simple in its essential details, and so exact in its results when skilfully employed, as to be unusually very attractive to those desiring to obtain a high proficiency in their optical work. It is chiefly valuable because it is really an objective method, and to a skilful operator is perfectly successful. But it is a method that must be worked finely, if at all. One must depend altogether on its essential details and not neglect small details, for it must be remembered that those who work it carelessly will surely fail, and when they attempt to condemn skiascopy, such failure is essentially their own fault.

The essentials necessary to a successful skiascopist are: First, a dark room, one which is dark; second, a mirror, or retinoscope; third, a good lamp; fourth, a trial case; fifth, a comfortable chair for the patient; sixth, an adjustable stool for the operator; seventh, a table for trial case and prescription book.

Skiascopy is the objective method of determining the refraction of an eye by reflecting light into it and observing the character of reflected images thereby. It has been known from the remotest times that the pupils of certain animals (dogs, cats, etc.) can appear luminous. The phenomenon was thought to be analogous to the reflection of light by phosphorescence, but finally it is due to the existence of the tapetum, a part of the choroid, the retinal surface of which is strongly reflecting and has a metallic reflex. Its purpose is not well elucidated. As to the human eye, it has been known for a long time that it may, in very rare cases, appear luminous after the development of an anterior uveitis of the eye. Also Beer discovered the glow in certain cases of aniridia (absence of the iris).

1850 Cummings and Bruecke discov-

ered the method of making the pupil of the normal eye appear luminous, and in 1851 Helmholtz achieved the great invention of the ophthalmoscope, which has revolutionized ophthalmology. Like every other object, the fundus of the eye sends back light when it is illuminated; these emerging rays of light from the fundus are called the luminous cone. Generally the eye can send back light to a point which has sent light to it, and under ordinary conditions the pupil of the eye appears black. It is because the pupil of the observing eye, being black, cannot send light into the observed eye. In order that it may appear luminous, a luminous source must be placed in front of the observing eye. This is what we do by means of the retinoscope.

The skiascopist estimates a case of strong ametropia more easily than a slight error because the emerging rays from the eye soon diverge greatly, so that the skiascopist can more easily find a place in the luminous cone. If it were not for this luminous cone the skiascopist would have no field of usefulness. Therefore, in estimating errors of refraction, the skiascopist has but to catch the emergent rays in this luminous cone and in cases of astigmatism observe rapidity of motion in the different meridians, knowing that astigmatism exists in the meridian of slowest motion. Another characteristic appearance that will be almost always noticed in astigmatism is that the fundus illumination assumes a banded appearance, which is known to all skiascopists.

THE MIRROR.

I use the plain mirror for the following reasons: First, about 80 per cent. of your patients will have hypermetropia to a greater or less extent. And with a plain mirror, the motion in such cases is with the mirror, which seems to me to be a more natural condition than against. This, however, is not essential. The only thing to remember is that all conditions are reversed with other than a plain mirror.

To become proficient in the manipulation of the lenses, and make the changes quickly, to definitely select the kind of lens required and locate the axis of the cylinder approximately at first glance, requires patience and practice. It must be borne in mind that skiascopy is a method of ocular examination, is one that grows accurate and reliable only with experience. Practice alone makes perfect.

It should be the effort of the skiascopist to offer examinations to any who will put their time against yours, being particular and painstaking in such examinations, to try to correct any case of ametropia with that carefulness and exactness in the work as

though you know you are to sell a pair of glasses in each case. It is, and has been, my custom to invite any who accompany a patient, to the dark room, and induce them (always by moral suasion) to have their eyes examined, and in a great many instances I have been able to develop and show such an error of refraction that they knew nothing of, and ultimately to sell a pair of glasses thereby.

The practice of skiascopy is a method in which the skill of the operator counts for more than in any other method and I have known surprising results from such under the most unfavorable circumstances. But nevertheless there is no reason why the operator should not provide himself with every means necessary to make his work the most successful. While every facility will not make a good operator of one who does his work carelessly, a careful worker can do better work when surrounded by such conveniences.

The best sort of dark room is one, I should say, size 6 by 20 feet, absolutely dark, and provided with an adjustable lamp; one that can be raised and lowered, and capable of swinging around the entire circle. I have arranged such a lamp, and I use gasoline or gas, and an asbestos chimney provided with a diaphragm. All other sources of light are eliminated except such as come through the opening of said lamp flue, and regulated by the diaphragm, preferably raised a little higher than the operator's eyes and to his left, provided he uses the mirror in his right hand.

Now, with such a dark room, convenient chairs, trial case, table and stool, I seat the patient in the chair facing me at one meter distance and direct him to look at infinity or into the dark, with his left eye directed to the height of the operator's left eye, and flash the light with my right hand across the pupillary area and determine which kind of an error he possesses, knowing that if I am using a plain mirror and the motion is against the mirror, it is a minus, and if with the mirror, plus. And also judging at the same time approximately the amount of ametropia by the rapidity of motion. I then adjust the lens clip or frame, using the double cell open frame; that is, with all trial cases, and insert spheres, and stay on whichever meridian I am testing until I get a reversal of motion. I also note the amount. As quickly as I obtain such reversal I proceed to refract the opposite meridian in a like manner, and also note the result and make my subtraction and correct accordingly.

Before taking the first skiascopic view of either eye, I am particular to make my pa-

Optical Department.

tients feel, and be, perfectly at ease and comfortable, and if they are bundled up with a superfluous amount of wraps, I have them remove them and also their hats, knowing that such uncomfortable surroundings will materially hinder effective work. I often have a suggestion from my patient, offered as to conditions Dr. So and So found, but I invariably and very respectfully refuse such voluntary information, and politely but firmly impress upon his or her mind that I desire to gain my knowledge by my own methods and ways. Under a skiascopic examination of an eye, astigmatism reveals itself unmistakably. For motion follows the rule of its meridian, and is therefore different in different meridians, the same as an examination of two eyes having ametropia of different kinds or degrees shows the difference for the two eyes, an astigmatic eye giving you the resultant of the two motions.

The pupil of the observed eye is the practical field of the skiascopist, and is confined entirely to it. In that field appears, under different skiascopic conditions, a full and complete display, answering all questions that may be propounded relative to the observed eye's dioptric condition. The skiascopist has but to provide or note the conditions and read the results in the objective pupil. But all so-called visual objective appearances are not the projection of a subjective retinal display.

Skiascopy may be termed the method of estimating the refraction of an eye by reflecting into it rays of light from a plain or concave mirror, and observing the movement which the retinal illumination makes by rotating the mirror.

VALUE OF SKIASCOPY.

Those who would criticize skiascopy because "We see nothing and think nothing of the fundus," base their criticism apparently on a lack of knowledge rather than from any practical experience with the method. While admitting that the ophthalmoscope in front of a well trained eye can often make a close refractive estimate, yet only a few attain such proficiency, and even then there is that uncertainty which does not attach itself to the retinoscope in trained hands. The skiascopist who knows how to use the mirror accurately has the advantage of his opponents who are ignorant of the test. It gives him a position decidedly independent of his patient, and puts him above the common level of the "Great Doctor Eye" or the refracting optician, who are bound to the trial case and the patient's uncertain answers.

Furthermore, when it is remembered that from 50 to 80 per cent. of the errors of refraction presented to the optometrist are among the more difficult class and in many instances they will tell you how Dr. So and So attempted to correct their error and failed, it is well to be most capable in this important branch of the profession.

Skiascopy gives the following advantages: First, the character of refraction is quickly diagnosed; second, the exact refraction is obtained without questioning the patient; third, little time is required to make the test; fourth, no expensive apparatus is necessarily

required; fifth, its great value can never be overestimated in nystagmus, amblyopia, aphakia and, with children, illiterates and the feeble minded.

CYCLOPLEGIC NOT NECESSARY.

In the practice of skiascopy, the accommodation of the observed eye is the handicap to the observer, and a great many without experience will tell you a cycloplegic is necessary. But in my experience of six years I have failed to find a case I could not properly diagnose without such paralysis of accommodation. I find the dark room will produce mydriasis and by directing the patient's attention to infinity a temporary suspension of accommodation will be effected.

The ciliary muscle will not be as completely suspended as under the use of a drug, but corrections made under the action of the drug are only guesswork, for usually something is subtracted from the entire amount of revealed error, and the object of using the drug is thus discredited and discounted in advance.

If it is not used at all, it will not be necessary to discount your own diagnosis, which is not an act to inspire confidence in yourself. It is practically saying that the use of the drug gives lying results, and therefore you must discount its revelations on account of their unreliability. If any one present can accurately measure the strength of the ciliary muscles of an eye by any known methods, I should be glad indeed to learn their methods.

It will hardly be expected among a body of men possessing as much intelligence as your appearances suggest to me, that I could in each and every detail explain so explicitly that one could start at the conclusion of my paper and accurately correct ametropia by skiascopy. Yet I beg your indulgence in a few words with reference to the "shadow."

THE SHADOW.

First—The shadow is the non-illuminated area of the retina, and acts very much on the same principle as casting light into a well with a mirror. Your will find by so doing you will not be able to light up the bottom of the well equally by flashing the light across the top. You will always have a dark area or one side in which there is no light, but a shadow. Now, when light is cast into an eye through its dioptric media, it will focus, the emergent rays at some point anterior or posterior to the observer. At such focus in skiascopy it is called the area of reversal, and the distance from the observer's cornea and such area of reversal will govern the rapidity of motion. It is similar and acts very much the same in effect as passing one's hand across the field of vision.

It will be observed that the closer the hand is to the cornea the greater apparently will be the speed of the hand. In estimating a case or error of refraction, then, the skiascopist's purpose is to bring the area of reversal to his cornea, or to determine what lens would be, or is, necessary to produce that result.

When the area of reversal is at the cornea of the observer, there will be such a confusion that it will be impossible to tell or observe any motion at all, for there is no motion if there is no image. Real reversal

of motion appears only when the observed eye is far enough back of the area of reversal to obtain something like an image upon its retina.

In working out a case by skiascopy, whenever the skiascopist has succeeded in reaching the point of reversal by adding such lenses as will cause a reversal by motion in the different meridians, he has attained his point in view.

Is Hypermetropia Headache Dependent Upon Age?

It has been claimed that the symptoms of asthenopia appear when the age of the patient is equal to the degree of ametropia expressed in the old system. That a child having 3.00 dioptries of hypermetropia would complain of asthenopia when 3 years old. Under 13 his accommodation would mask the ametropia. Again, a patient 18 years old says that since he 16 he has suffered from headache when working upon near objects, we may see that he is suffering from 2.50 dioptries of hypermetropia.

The above claims are made by a correspondent in the *Dioptric Review* signing himself "K." He states further that of course he does not give this as a scientifically based law, but rather as a curiosity, and as an empirical rule, the application of which may be found useful in practice.

The latter modification, it is feared, is sadly needed, for we can conceive no reason for assuming that a table based on the above calculations would be in any sense correct. For instance, beginning at the lower amounts of error, a person having a quarter of a dioptre of hypermetropia would not complain of headache or suffer asthenopic effects until he was 144 years old. With half a dioptre no pain would be experienced until the 80th year; at a three-quarter dioptre error would make itself felt, and a one dioptre error would cause no annoyance until the 40th year. Further examples would be superfluous unless we note that with 10 dioptries of error headache should be experienced during the fourth year.

Going over the records of about 100 cases should afford a fair means of estimating the degree of certainty with which this rule might be applied, and a perusal of said cases show that in innumerable cases the patient with one dioptre or less of hypermetropia complained of headache long before the 40th year. In fact, if a patient with one dioptre of hypermetropia should not experience headache before the 40th year, the chances are that he never will experience headache from this cause, because by that time his accommodation will have become far less active, which reduces the liability of headache occurring.

Had this law been well grounded under Der's renowned rule would have been eclipsed, but even Donder's is only the nearest kind of an approximation, and based on scientific principles, whereas the above suggested rule is merely a haphazard guess which will do no more than lead a few careless workers into error.

A. L. Neuenchwander removed from Deepwater, Mo., to Woodburn, I.

RETAIL JEWELERS ADVERTISING

The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

The Optician as an Advertiser.*

WHEN the secretary notified me that I was not only urged but expected to prepare a paper for this meeting, I confessed before I had given it much consideration. Now the selection of a topic to read before an optical meeting is more complex than its looks, and after wrestling about two weeks with "The Spectral Radiation of Colors in An Inverted Rainbow" and "The Reflex Nervous Sympathy Incident to Hyperphoria," I came to the conclusion that you are all too well posted on questions of this nature and abandoned them both for one of which John Wana-maker says the public never tires—advertising.

"Who's the man who wins success?"

The man who early rises,
The man who springs surprises,
The man who advertises—
He's the man who wins success."

—Holton's Tips.

Give the author a topic—he can write a book. Give the song writer a title—he can write a song. Give the poet a theme—he can write a poem. Give the optician a suggestion and he should be capable of writing an advertisement that will bring in business. But there are a great many of us here to-day who fail to give this matter the attention that it deserves.

Some of us jeweler-opticians see our customers going to the oculist, or trade slipping away from us to a competitor who advertises optical goods, simply because we are neglecting the most interesting and profitable part of our business. When the optician has first hung up his test-type, placed his trial case in position, framed his diploma, joined the "Missouri-or-Kansas" Optical Society, there is but one more step between him and his customers, and that is to take the best newspaper space he can get and advertise.

There is no event of importance happening now but will be known to-morrow. The destruction of a city, the declaration of war, the birth of a nation, all matters of national importance, are heralded far and wide through mediums of publicity devised for the convenience of man. Not only as a medium for public events, but often the career of a man is born and made within the columns of a newspaper. Roosevelt is one of the greatest advertisers to-day—he does things. Edison is another—he accomplishes wonders and then lets the world know. Donders and Helmholtz, two of our great scientists, to whom we are indebted for the principles of some of our optical

instruments, were exponents of publicity. They let us know. Benjamin Franklin, who is sometimes styled our first optician, was also a successful newspaper man, and his inventive turn of mind was closely related to his trite sayings. In each he had a motive.

Some men fear to advertise lest their motive be misconstrued; others because they are modest. There is no sane reason why an optician should "place his own light under a half bushel" while the other fellows "stands out emblazoned like the Statue of Liberty."

If you have a theory, a system or an appliance, it is in justice to yourself and the public generally that the world become acquainted with its value. Do not quibble with small things, nor let your incentive "get the best of you." It is the man who can face adverse criticism and an approaching storm alike that meets success. There is some one always ready to criticize you, no matter what you do. As Josh Billings once said: "When you act the most sensible, you know how folks are liable to think you are a darn fool."

By an old-time custom the medical profession has held to a code of ethics that is generally observed by most doctors and surgeons, but the existence of this compact has never been comprehended by the people. There are some optometrists in cities who have adopted this same method of the profession. But we have never heard of them joining an optical society. I believe as a rule there is but little objection (and there should be none) to a campaign of optical advertising in which the public is informed as to the importance of caring for the eyes, of new optical features of manufacture, and of anything that will tend to elevate the optical profession.

The best advertisement which an optician can have to-day is a satisfied customer. That customer can do more real good, and sell more glasses for you than a page ad. in a country paper. And yet you cannot afford to leave the success of your business to the flattery of your friends any more than you could to your own personality. On the other hand the optician's name should be constantly before the people, that even this satisfied customer may know he is keeping pace with the strenuous times, ever alert for new ideas that suggest progressiveness.

An eccentric optician of the old school, who had never fitted a lens larger than a number one eye, or sold anything but a flat-rimmed spectacle, once made a serious impression on me by an amusing description of his customers. He said there are three kinds of customers—the invited, the blighted

and the slighted, and he described them in this manner: the invited had heard of his talent and came to be shown. The blighted customer was an ill-fitted one. The slighted customer had been unsuccessfully fitted by a rival optician.

And so it is that we can draw a similar comparison to our own customers. The invited, the blighted, the slighted—each one requiring a different mode of treatment, ever watchful of foibles and peculiarities that each may be made a permanent and satisfied customer. The same pains must be taken in our advertising. We must meet our customers in the newspapers as we do over our counters. Every line, every word must mean exactly as intended. The proper thing must be exploited at the right time; the ways and customs of a community be studied that an advertiser be familiar with the wants of his customers; for example, it would be as inappropriate to advertise automobile glasses in our town of Trenton as it would "scenery" glasses in Kansas City.

In conclusion I will say that the enthusiastic optician who is in love with his work and gives it the attention which it deserves, advertises for the business he gets—gets it; and then advertises to hold it; knows there is but one time to stop and that is when he is ready to quit business and enjoy the result of his labor.

What Some Jewelers Say.

HIGH grade watches. We can show you the finest timepieces in the entire world, both American and Swiss manufacture. The celebrated Vacheron & Constantine, Longines, and Agassiz have taken more world's first prizes for their accuracy than any other watch made. The greatest of all American watches—the Hamilton—known favorably by all railroad men. Elgin, Waltham, Hampden, Rockford, Illinois, Howard—we have them all. Our written guarantee goes with every watch we sell. Solid 14-k. gold watches for gentlemen, with fine 17-jewel or 21-jewel movements, from \$50 to \$250; for ladies, from \$25 to \$100. Gold filled watches, warranted to wear a lifetime, from \$20 to \$75. Gold filled watches, warranted to wear 20 years, with finest 15-jewel movements, our special bargain price, \$12. Of these we have only a few left. Our \$15 watch for ladies, warranted for 20 years—they are \$20 values—while they last we will sell them for \$15. We have the largest stock of first class watches in Duluth, and will be pleased to show them to you. Our reputation for square dealing has been well established in the past 10 years and you will get our personal attention if you come to inspect our stock. Our "special price sale" will continue only one more week. Harris & Esterly, Duluth, Minn.

Tempted.—Every person who sees the \$3 candle-stick we are selling for \$1.85 is strongly tempted to buy and they do not try to resist, either. Wouldn't a heavily silver plated candle-stick bearing our guarantee tempt you? Couldn't you find a place for it in your home, especially when it is made on a sterling pattern and well finished? They are not cheap sticks, but good ones cheap. Good enough for any home, and the price is only \$1.85. R. Ashby, Colorado Springs, Colo.

*Paper read by Claude E. Range, Trenton, Mo., before the recent meeting of the Missouri and Kansas opticians, in Kansas City, Mo.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with **THE JEWELERS' CIRCULAR-WEEKLY** regarding any advantageous device or plan which they are utilizing in connection with their business.

How the Fire-proof Safe Protects—Lessons from the Experiences of San Francisco Jewelers.

“ANY variety or make of safe is fire-proof as long as there is no fire, and when tested by fire none of them are fire-proof.” That is the way the head of one of the largest jewelry concerns in San Francisco summarized the safe question, and 99 jewelers out of 100 whose safes went through the late fire in that city feel the same way about the matter.

As a matter of fact, not a single jeweler's safe came through the fire with its contents entirely uninjured, except one or two small diamond safes. Most of the safes saved loose diamonds and loose pearls; a few of them saved gold almost uninjured, but none saved watch movements entirely, and almost none saved silver. A large number of safes preserved papers and books which had been closely packed, though loose paper was very generally reduced to carbon.

As a rule, the smaller safes seemed to stand the heat better than the larger safes, though this may be due to circumstances rather than to the quality of the safes. As a general rule, all the safes in any one building of whatever make or size came through in practically the same condition, showing that the difference shown in the saving power of the safes was due rather to the varying degrees of heat to which the safes were subjected than to differences in the safes themselves. All the safes, or practically all in the Johnson Building, at 120 Sutter St., failed to save their contents, owing probably to the intense heat caused by the burning of large quantities of wooden clocks in the storerooms of the wholesale dealers and to the burning of the stock of Nathan-Dohrman Co., dealers in house furnishings, who occupied the ground floor.

Naturally the safes in the first-class office buildings which, while fire swept, were not destroyed and which kept the safes from falling, came through the fire better than those in cheaper buildings which fell one or more floors and were buried beneath several feet of red hot brick, when the building collapsed. The safes of A. I. Hall & Son, which were on the fifth floor of the Aronson Building, kept their position and the contents, while badly damaged, were better than in most other cases. All watch movements, however, were

sweated and had to be returned to the factory. Watch cases in these safes were not melted, but were oxidized, rendering repolishing necessary. Gold jewelry in the safes was in pretty good condition, although a portion will have to be repolished.

The large safe of the Bohm-Bristol Co., which was seven feet in height, tipped badly, owing to the partial giving away of the door, and the contents were badly damaged. Not a scrap of paper was saved in the safe. Out of 450 watches in the safe 150 were totally lost and the remainder had to be returned to the factory. Loose diamonds and pearls came through uninjured, but all silver in the safe was melted.

The big fire showed some peculiar phenomena on the part of safes and their contents. In the Bohm-Bristol Co.'s safe a pearl collar wrapped in many thicknesses of tissue paper, came through without any injury, while a number of pearl necklaces wrapped in silk were baked to a crisp. The large safes of A. I. Hall & Son were so badly burned that they had to be cut open to get at the contents, while a small diamond safe on the same floor and subjected to practically the same conditions, was easily opened by the combination.

The great lesson taught by the fire seems to be that vaults of the very best construction afford the only positive protection in such a fire as that which San Francisco experienced. The new vaults of Shreve & Co. gave their contents almost perfect protection. The vaults of the San Francisco banks also protected their contents in practically every case. These vaults, however, failed of their purpose where they were not built upon an absolutely solid foundation. In one case where a vault was built across steel beams, the beams settled on one side, causing the vault to crack, and thus admitting the flames to destroy the entire contents.

In justice to the safes, which failed to endure the heat of the late fire, it should be borne in mind that this was a fire practically without water, and that the heat engendered was unusually severe. Moreover, many of the safes lay in the ruins covered by hot brick and refuse for from one to three weeks before they could be taken out. One jeweler's safe was pulled out two weeks after the fire with portions of it still red hot.

W. N. Evans has moved from Minatare, Nebr., to Bayard, in the same State.

Advertisements Worth Reviving.

MANY admirable advertising devices have their reign of useful popularity and, as well worn factors, are placed aside and forgotten. Many of them are worth resurrecting. One very clever device of 30 years ago has passed the recollection of most and to the later generation has never been known. In fact, as a writer never saw it in use in this country, possibly England, its place of origin, and enjoyed the benefit of its being.

In those days gas was the sole illuminant for the show window, and a favorite method of increasing the light thrown upon the play without raising the temperature of the store to unbearable degrees, after lighting a certain number of gas jets, was to connect gas connection outdoors and thence return more illumination on the goods.

These outdoor gas show window reflectors consisted of a cluster of jets, where light was reflected by mirrors, the bottom metallic hood barring all light from the sidewalk. As innovations some inserted a “bull's-eye” glass in the metal sheathing to brighten up the appearance of the otherwise sombre contrivance on the outer side. And then some genius introduced this “bull's-eye” lens into the lower part of the casing, thus reflecting the lantern gleam as a cone of light that lit up a circular space on the sidewalk. And, by painting his name in black, bold lettering on the lens, a brilliantly illuminated disk advertisement attractively displayed on the pavement of the sidewalk.

The jeweler who will bring into existence once again this clever advertising device will be producing something which not only, if not all, those who pass his store cannot have never seen before.

With a little ingenious manipulation, perhaps a small illuminating glass clock dial (one whose works are confined to the center of the dial), might be inserted so that, by placing a white slab in the sidewalk, the reflected time as well as firm name would be clearly readable on the pavement.

The idea is well worthy of resurrection as an attractive and inexpensive advertising novelty.

Asbury & Reavis, Lexington, Okla., have dissolved, John H. Asbury continuing.

Hibbard & Wilcox, Akron, O., have dissolved, and the business will hereafter be known as the Hibbard Jewelry Co.

Storekeeping Department.

What Made the Bowery the Old Retail Jewelry Center of New York.

Speaking of the change in the retail jewelry centers of New York to J. H. Johnston, an old Bowery and Broadway dealer, who is now in business in John Street, THE ONLOOKER expressed surprise that the fashionable business center so firmly established as the Bowery should so completely lose its character in half a century. He asked for information on this point.

Mr. Johnston:

What made the Bowery for 40 years the principal retail artery? Well, first of all, its great width, and that it ran at right angles with the then residence streets, parallel to Broadway, and east of it, making it of the greatest convenience to the greatest number. Then, too, it was the shortest street to enjoy the advent of horse-car, then a decidedly progressive method of locomotion. For the Fourth Ave. cars, the first to get a charter, and the Third Ave. cars, below 9th St., joined, as they do, and ran down the Bowery, past 'Jewelry Row.' The growth of the city then shunted these stores from the Bowery but when the Elevated was completed it quickly ended the supremacy of that classic thoroughfare. Before the Bowery faded out, and before the East River Bridge and the Elevated combined to spoil Fulton St., the main artery from Brooklyn had quite a vogue as a retail headquarters. Notwithstanding its backsliding, the vision of J. H. Johnston did not leave the Bowery till 1892, although four years previously I had opened my store in Union Square, by which time the street had entirely lost its old-time character.

I am credited, among other things, with being the first dealer in New York to take down the old wooden shutters which had always been regarded as a safeguard against burglars. You know the kind I mean, with a small hole in one shutter, to permit the watchman to peek through and so that the interior, illumined by one still light, remained unmolested. There were 21 shutters in front of my store, and I had had several years in taking them down and putting them up again before I came 'boss.' I determined to risk the change. So without interposing a single pane, not even screens, against the protests of everybody, in 1860, I took them down forever. Nothing ever happened to make me regret my enterprise. Later on I was to have the honor also of being the first retail jeweler to put the convenience of telephone into his store.

The great hit of my life, however, was that I made as early as 1874. One day, during a season when trade had been very dull, I began to cudgel my brains as to what to do to revivify it. Out of that grew the business of relieving people of delicate wedding presents, and of disposing of these. The way of it was this: I inserted an advertisement in one of the daily papers, reading as follows: 'Cash paid for duplicate wedding presents. Inscriptions erased, silver refinished and sold at low manufacturer's cost.'

"What was the result? Why, in less than three months I had succeeded in revolutionizing my entire business.

During the early period when the Bowery was the best shopping district of New York, the indwellers of the city were an extremely conservative and unsophisticated lot, as compared to the great majority of folks of to-day. They lived extremely plain and simple lives, as compared with even those of the second period—how much simpler therefore than those of the cosmopolitans of whom there are now so many, an ever-growing percentage of to-day. The sum of happiness then was, I believe, greater than it is now, and happiness is, after all, according to my notions, the main thing." THE ONLOOKER.

Suggestions for Jewelry Clerks.

Earn more than your salary.

Don't wait for a raise in salary before working harder. If you do you will never get it.

A clerk has to do more than he is paid

An Attractively Furnished Jewelry Store in Mobile, Ala.

THE newly furnished store of I. Dahlheimer, 119 Dauphin St., Mobile, Ala., is shown this week. The store is 68 feet long and 19½ feet wide. The fixtures, etc., are of golden oak, and the walls are tastefully decorated with American Beauty roses on a light blue background. The floor is of cement and tesselated rubber tiling.

An attractive front entrance is flanked by two display windows of French plate glass, the sides being equipped with beveled edge mirrors. Each window is 74 inches wide, 42 inches deep and 7½ feet high. A new steel ceiling artistically tinted to harmonize with the general color scheme, has also been installed.

A fair idea of the effective lighting of this establishment can be gleaned from the photograph, which was taken at night. A feature of the store is the grill arch in the center of the room, where there are three arc sunbursts, each having seven lights. The wall cases also have each four lights, the

INTERIOR OF STORE OF I. DAHLHEIMER, MOBILE, ALA.

for before he can attract business. Then the increase of wages should come.

The least desirable of all clerks is the irresponsible one. You must make your employer understand that you have his interests at heart as much as though they were your own.

Every clerk should study his business with the intention of some day becoming a proprietor and managing a business of his own. Of course, if every man did become a proprietor there would presently be no clerks. But you needn't worry about that. There's not much danger of more than one man out of 10 making himself fit for what you intend to do.—Ex.

Let your advertising wear a silk hat—arguments to the contrary notwithstanding—even when you want it to mix with the common people. There's a wonderful power in distinguishing dress. Its very respectability challenges attention and its flattery wins the hearts and—orders.

whole establishment containing in all about 200 incandescent lamps.

By specially arranged prisms and mirrors in connection with concealed electric lamps the show windows are very attractively lighted, the light being soft, yet clear and bright, without glare. The private office is located over the partition in the rear.

Recent exterior renovations have much improved the appearance of Max H. Elbe's store at Niagara Falls, N. Y.

Sam F. Sipe, Pittsburg, Pa., has sent out as an advertisement to his customers, a polished mahogany foot-rule and paper-cutter. Accompanying it is also a piece of cardboard the same length as the rule, calling attention to the fact that the jeweler is giving a 15 per cent. discount on all diamonds purchased prior to his going abroad in July. The sending out of the advertisement contains the inference that it is always Mr. Sipe's custom to carry out "a good rule."

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1584.—Silvering Metals without Electric Current.—*I am manufacturing some metal objects that I want to silver, but do not wish to go to the expense of purchasing a plating dynamo. I know certain metals are silvered by simply dipping them in some sort of a solution. You kindly give me a good formula for this purpose?* S. M. E.

ANSWER:—One of the latest formulas for silvering metallic objects by merely rubbing has been patented by Walter Boltesli, Switzerland, and is said to give good satisfaction. The solution is produced by taking about 30 liters of water and dissolving 0.8 gram of silver nitrate. Precipitate this silver chloride with diluted hydrochloric acid of 20 per cent. strength. Wash this silver chloride well and dissolve the precipitate in a solution of about 30 liters of water and 3.3 kilograms of hyposulphate of soda, which solution is made up separately. Then mix with this solution, while stirring, 1 kilogram of caustic ammonia (8 per cent) and finally 8 kilograms of finely powdered Spanish whiteness. Clean the articles to be silvered and rub on the silver with chamois or linen. The solution may also be rubbed in until nearly dry, then washed and rubbed up with a dry chamois or woolen rag. This is said to be especially suitable for musical instruments.

QUESTION No. 1585.—Hot Galvanizing.—*Kindly describe to me the process of hot galvanizing iron and other objects.* H. G.

ANSWER:—Galvanizing consists in dipping the articles to be galvanized in molten zinc, at a temperature of about 900° F., after scales and oxides have been removed with the usual acid dips or pickles. It is then necessary to anneal the iron before plating. For cast pieces the cleaning is best done with a sand blast, but where sheet iron surfaces predominate the pickle is used. The mill scale must all be removed, and to accomplish this it is necessary to use sharply and with which fine shot is frequently used. For the small castings the tumbling barrel can be used in connection with sand and water. Commercial sulphuric acid with about 10 parts of water is the usual solution used for the pickle, which is heated by steam. Pickle the iron from one to two hours and then wash in fresh running water. Place on a table and remove patches of scale with a stiff brush or scraper, and let the iron remain in water from 10 to 12 hours. Before galvanizing the pieces are immersed for a few minutes in commercial muriatic acid, which forms a thin iron chloride on the surface and prevents oxidizing before the dipping. Try for half an hour and then the pieces are ready to be dipped in the molten metal. Muriate of ammonia is placed at one end

of the vat, and the articles are passed through before they enter the molten zinc, and may pass through sand as the piece comes out of the metal. Small quantities of tin may be added to the zinc to increase the size of the spangles.

QUESTION No. 1586.—Pure Manganese as a Deoxidizer.—*What can you recommend as a good deoxidizer for tin and other alloys?* P. M. A.

ANSWER:—One of the best deoxidizers for melting of tin and alloys is pure manganese. It is only within a very short time that pure manganese is being produced, and that through the invention of Dr. Goldschmidt, of Essen, Germany. It is beginning to be used extensively and is taking the place of ferro-manganese, which was formerly employed. Only about two pounds of the pure manganese to the ton of tin or alloy are necessary to use as a deoxidizer.

QUESTION No. 1587.—Chloride of Silver Reduced to Granulated.—*I have accumulated about 50 ozs. of chloride of silver that I want to reduce to granulated silver. How must I proceed?* Ch. S. R.

ANSWER:—For the 50 ozs. of silver it requires about 20 ozs. of pulverized charcoal and from eight to nine pounds of carbonate of soda. This is thoroughly mixed with the silver, placed in a crucible and heated until the fusion is complete. The melted silver is then poured into cold water, which causes the silver to granulate and gather at the bottom. The same method will apply to silver that is to be cast in the mould, except that the molten metal is poured into an ingot in place of the water.

QUESTION No. 1588.—Domestic and German Sulphuret.—*Which is the best sulphuret to use for French gray and oxidizing?* D. G. S.

ANSWER:—The best sulphuret of potassium to use is the imported German. This is much stronger than the domestic, and comes in very thin flakes, which allows it to dissolve very readily. The cost of the German article is about the same as the domestic, but the German gives a more adhesive deposit than the domestic.

QUESTION No. 1589.—To Prevent Fire Coat on Silver and Gold.—*When I solder silver or roll gold articles there is a coating over the work from the heat which I applied. How can I best prevent this?* P. F.

ANSWER:—This fire coating can be removed with the acid known as a pickle, but the best way to preserve the surfaces that may have been polished is to brush the surface over with a paste made of water and boracic acid. This should be done before the articles are annealed or soldered. This method may be applied to silver, gold or rolled plate.

QUESTION No. 1590.—Transparent Cement for Glass.—*We are often requested to mend broken pieces of glass, especially pieces belonging to clocks, for which we desire a cement that is effective and transparent. How can we make it?* T. C. Co.

ANSWER:—Transparent glass cement is made by digesting for a week, cold, one part, by weight, of caoutchouc, 67 parts of chloroform and 40 parts gum mastic.

QUESTION No. 1591.—Etching Grounds.—*Will you please give a formula for making a good etching ground, suitable for copper or silver.* E. G.

ANSWER:—The following, quoted from the *Scientific American*, will probably answer your question and give you the desired information: The articles to be etched must be covered with a substance which the etching acid will not affect and must be soft enough to allow the finest lines to be drawn with the needle. It should also be susceptible to complete and easy removal when the etching is finished. Varnishes which possess these properties are called etching grounds. They are made according to various formulas, but in all cases the principal ingredient is asphalt, of which only the best natural varieties are suitable for this purpose. Another common ingredient is beeswax or tallow. Etching grounds are usually made in small quantities, at a single operation, by melting and stirring the solid ingredients together and allowing the mass to cool in thin sheets, which are then dissolved in oil of turpentine. The article is coated uniformly with this varnish through which the engraver's tool readily penetrates, laying bare the metal beneath. After the lines thus drawn have been etched by immersing the plate in acid, the varnish is washed off with oil of turpentine. Formulas for etching grounds are: (1.) Yellow wax, 50 parts; Syrian asphalt, 20 parts; mastic, 25 parts. (2.) Yellow wax, 30 parts; Syrian asphalt, 20 parts; mastic, 25 parts. (3.) Yellow wax, 110 parts; Syrian asphalt, 25 parts; amber, 20 parts; mastic, 25 parts. (4.) Yellow wax, 40 parts; Syrian asphalt, 40 parts; resin, 20 parts; tallow, 2 parts; Burgundy pitch, 10 parts.

QUESTION No. 1592.—Black Stain for Hard Wood.—*How can I stain hard wood a nice black? I want to blacken such articles as knobs and handles for silverware.* B. S. H.

ANSWER:—The following is recommended for a black stain for hard wood: 20 parts, by weight of anilin hydrochlorate, dissolved in 300 parts of water, to which solution is added one part of copper chloride. Apply the liquid hot. When it has dried, apply a second solution, consisting of 20 parts of potassium bichromate in 400 parts of water. This stain has great power of resistance, even against acids.

QUESTION No. 1593.—Silver Soap.—*How can I make a silver soap? I want to use it for cleaning silverware.* S. S.

ANSWER:—For silver soap take 8 ozs. of hard soap, 1½ ozs. of turpentine and 4 ozs. of water. Boil until perfectly dissolved and add 3 ozs. of liquid ammonia.

The jewelry store of John F. Long, at Mackay, Idaho, was robbed recently of \$175 worth of stock. The robbers overlooked a tray containing jewelry worth \$300.

The Art School at Birmingham.

Translated especially for THE JEWELERS' CIRCULAR-WEEKLY from *Art et Décoration*.)

The annual competition organized each year between the English art schools, the great advance of that of Birmingham demands attention. The interest is great when an art school prosper in a city whence issues daily such an enormous quantity of works, of ceramics, and particularly wrought metals and jewelry. Birmingham has never passed as an intellectual center. Since it produced Shakespeare it has taken a respite in that regard and is very satisfied with its rapid industrial progress.

The conditions which gave birth to the Art School are exceedingly interesting. At the middle of the last century there was an art school at Birmingham directed by a private society, the Society of Art, and living on a narrow income from the interest of private gifts. These gifts were almost all made by industrial men who wished to elevate the standard of manufacturing production, and stamped the school at the outset with the character which its successive transformations have accentuated. On pressing appeal from the directors in 1838 Richard Tangye and Cregoe Colmore gave £24,000 sterling on condition that in the future the municipality would assume the direction and charge of the school. The conditions were accepted, the municipality took its charge on a grand scale, which in 1885 became the first municipal art school in England.

In order to serve industry the Art School not only completely penetrates the manufacturing life of the city. Neighborhood schools were built in proximity to the working quarters and arranged so as to receive apprentices during the intervals of their working hours, and give them the same instruction as at the Central School. One of these branch schools, that which is situated in the quarter of the jewelers and gem workers (Victoria St.), assumed at once an enormous importance, commensurate with that of the jewelry industry at Birmingham. Subsidized by the Jewelers' Association, it was comfortably settled in a building constructed especially for it, and has developed with immense rapidity, showing signs of emancipation.

The Birmingham Art School committee being also administrators of the municipal museum and its collections, is able to lend to art scholars ancient objects for study. These are changed regularly, as well as those obtained from the South Kensington Museum, and thus one sees in the small collection all the elements necessary

for the study of ancient technique; and by the relations carried on with industrial associations (whence it recruits a part of its members), it maintains an intimate and continuous contact between manufacture and the school. The entire organization is perfect for suppleness and coherence, and this practical sense is felt in every detail.

The immediate contact of articles to be copied is insisted on; drawing is from nature. Banished are the lithographed models, the plaster casts, the stuffed animals. As soon as they know something of geometric design even the youngest scholars are put to the study of plants of simple form. Every morning armfuls of leaves and boughs are brought in and distributed for the day's work. In a small conservatory in the school room are grown many species. Instead of being guarded by solemn statues, the hall of the school room is full of flowering plants, of cut flowers.

The relics which are preserved—a tapestry which belonged to William Morris and a sketch painted by Dante Rossetti—make one understand fully that antiquities are given the cold shoulder in this place, where on top of cupboards in the hall of design one sees the busts of Achilles looking down with terrified eyes on scholars copying carrots.

In this art school there is a menagerie for the use of the students. The animation, the variety, the picturesqueness of this class is extraordinary. The animals are in cages, with wide spaces between bars, so as not to interfere with the students' sight. Golden pheasants, conscious of their beauty, allow themselves to be drawn with ease; while on the other hand a squirrel refuses to be quiet an instant for the designer's pencil. Here, white rats are incessantly looking for an outlet to their cages, and stare with uneasy eyes at the students gathered about them. Yonder a peacock, revengeful of his imprisonment, refuses to unfold his feathers. The animals, whose peaceful nature does not call for their being shut up, are simply placed on tables or pedestals. This animal study demands great effort on the part of students, but renders immense service. Better than any other thing, it forces them to see quickly, to concentrate their attention, to observe a characteristic gesture, to catch a fugitive attitude. It accustoms them to be inspired with what is alive, and to go for that always as the source of their art.

John H. Leroy, who has been engaged in the jewelry business in Fairbury, Neb., is interested in the LeRoy Cutlery Co., which has just engaged in business in Lincoln, Nebr., and which will handle silver plated flat ware.

Some Interesting Facts About Crown Derby.

IN describing the sample recently put on display in the London show rooms of the Royal Crown Derby Porcelain Co., the *Pottery Gazette*, of that city, says: "Early 'Crown Derby' has a reputation that is now historical. There was, however, a period when the excellent workmanship and artistic taste upon which that reputation was founded was neglected, but the quality and beauties of the old Derby productions have been revived by the present company, whose enterprise has preserved to the town an artistic industry, the product of which will be known to all time simply as 'Crown Derby.' Even the word 'China' is not needed to describe it. So closely is the name of the town identified with the name of the company's industry that it is now synonymous with the name of their ware, which is spoken of as 'Derby.'

"Looking around the large assortment of purely ornamental ware, it will be seen that the Georgian period furnishes the style for the present day forms and ornamentations. The present partiality for 18th century furniture and decorations is fostered by the company's reproductions of their famous ware of that period. In many instances the exact shapes and embellishments are revived; in others new forms are treated in the old style—light, graceful decorations on light-toned and white grounds. The festoon and wreath schemes, which were so popular in the late 18th century, are in existence to-day—particularly the floral festoon primrose ground.

"There is, as usual, a brilliant show of the remarkable Japan patterns, for which the works have so long been famous. These are striking combinations of color and gold. Speaking of art forms, the figures of the best days of old Derby cannot be surpassed for fineness of modeling and beauty of finish, but it is, perhaps, not too much to say that they are equaled by the company's productions to-day."

Relics of Viking Jewelry Work.

IN the remains of a Viking ship recently unearthed, on an island off the coast of Sweden, one of the objects found was a well-polished crystal, hemispherical in shape and nearly two inches in diameter. Near the glass was a tiny pair of pincers, similar to those used by modern goldsmiths. Several pieces of goldsmiths' work were also discovered. It would seem that, rough as the Vikings were, they made use of microscopes for delicate gold work.—*British Weekly*.

PATENT APPLIED FOR

European Pawnshops.

(Continued from issue of June 6.)

THE SYSTEM IN PARIS, FRANCE.

Consul General Mason, of Paris, Consul General Roosevelt, of Brussels, and Vice Consul General Mueller, of St. Petersburg, have made reports concerning pawnshops in those cities. Consul General Mason says of the municipal pawnshop system of Paris is a venerable institution, having been founded in 1777. It is a distinct bureau of municipal government and includes in its control three members of the committee of public charities, three private citizens and the prefect of police. There is a main office and 21 branch offices. It is organized and administered to fulfill a distinctly philanthropic and useful purpose of enabling persons of limited means, or overtaken by misfortune, to obtain at a not excessive rate of interest money to meet pressing necessities without the sacrifice of their self-respect or the necessity of falling into the hands of extortionate usurers who in most foreign countries prey so rapaciously upon the victims of poverty and misfortune.

In the latest year for which complete statistics were obtained was 1904. During that year 1,449,168 loans on jewelry, clothing, tools, etc., were made of the average amount of \$6.46 each, and the total sum loaned was \$9,361,625. Besides these there were made during the same year 3,619 loans of \$200 or more each, the total sum of which was \$1,709,832. The rates of interest charged amounted in all to 8 per cent. on jewelry, articles of clothing, household equipments, etc., and 6½ per cent. on stock, bonds and other securities deposited as collateral. Articles forfeited by non-payment of renewal are sold at auction by the aid of special auctioneers, of whom there are fourteen, located in different parts of the city. If a greater sum is obtained for the article than that which was loaned thereon, the pawnshop owner may claim and recover the difference. In 1904 the profit above expenses amounted to \$992,417, which, after the deduction of various incidental obligations, is turned over to the fund for the support of municipal hospitals.

This is an official monopoly; no other pawnbroker is allowed to exist or do business within the limits of the municipality. But there is a class of outside operators whose traffic forms the one really sinister feature of the whole system. These are the brokers or dealers in pawn tickets, who work more or less secretly. It frequently happens that a person who has pawned an article wants more money than he has been able to obtain at the municipal pawnshop, which does not exceed one-third of the real value of the article. He goes with this pawn ticket to the broker, who lends him 2 per cent. of the face value of the ticket, but at an extortionate interest of from 3 per cent. to 7 per cent. per month. If this interest is not paid when due the broker redeems the article, which he sells at one of the auctions, and thereby reaps a large profit.

Various measures have been proposed to counteract this evil, but nothing satisfactory has yet been devised, and it is generally conceded that the only effective remedy would be for the pawnshop to lend on each

article a much larger percentage of its value and then keep the pawn ticket until the property were redeemed or forfeited by limitation. One of the obvious advantages of such a pawnshop system is that, being a Government institution, no discredit necessarily attaches to the act of making use of the facilities which it offers. People in good circumstances, who are leaving the city for the summer, not infrequently take jewelry and other valuables to the Mont de Piété, or pawnshop, borrow a nominal sum on them and thus secure their safekeeping with little expense.

MANAGEMENT AT BRUSSELS, BELGIUM.

Consul General Roosevelt says that the Brussels Mont de Piété was established in 1810, since which date it has exercised its functions without interruption. The legal rate of interest charged on loans is 6 per cent. per annum. It is the intention of the administration to apply for authorization to reduce this rate to 3 per cent. per annum for loans less than 5 francs (96 cents).

The administration of the pawnshop system in Brussels is somewhat similar to that in Paris. The mayor of the city is by right president of the board when he attends its meeting. The pawnshops in Belgium are organized under the direction of the communal council, which approves the budget and accounts. These shops are not allowed to receive money on deposits, or as investment, or under any form whatever from private parties. When the funds run short the administration has the right to borrow from the public charities and hospitals, or from the communal administration, paying for such loans an annual interest of 3½ per cent. During the year 1905 the establishment loaned on 312,794 pledges \$1,253,173. The net profit for the year was \$6,401. The Brussels pawnshop is under the management of three appraisers and other officers. It is obligatory that one of the three appraisers must be an expert gold and silversmith. The officers are obliged to keep a daily record of the transactions of their respective departments, which are collected and compared daily before the evening closing. The records of the redemption office are constantly verified and balanced with the receiver's books in such manner as to avoid error. Sales are public and periodical, but no object can be sold until the expiration of 14 months from the time it was pawned. Surplus not claimed within two years after the sale reverts to the establishment.

PAWNSHOPS OF ST. PETERSBURG, RUSSIA.

Vice Consul General Mueller, of St. Petersburg, reports that there are six institutions loaning money on chattels at a rate of interest stipulated by their by-laws, as follows:

- (1) The State Loan Office (controlled by the central government). The rate of interest is 6 per cent. per annum. Only gold, silver, precious stones and valuables are accepted here. Such articles are also taken for safekeeping at a low rate of interest for storage and insurance.
- (2) Society for pawning chattels.
- (3) St. Petersburg Company, for storage and pawning chattels and goods.
- (4) St. Petersburg City Loan Office.
- (5) St. Petersburg Private Loan Office.
- (6) St. Petersburg Municipal Loan Office, organized in 1898. Paid-in capital, 2,000,000 roubles—about \$1,000,000.

IMPORTED NOVELTIES
IN GREAT VARIETY.

NEVER before has there been seen in the salesrooms of Schwarz Bros. & Co., 29 Union Sq., New York, so varied and rich lines of foreign novelties, and this is saying a great deal, for the displays of past seasons have been notably attractive. The buyer's attention is caught as he enters by the sweet tones of the chimes, which are fastened to each door, thus announcing in a pleasing manner the entrance of each visitor. These harmonious tubes, which may also be used as dinner calls, come in five sizes and are themselves distinct novelties. In a collection of brass products are new shapes in desk and smoking sets, cigar holders, ash trays, paper cutters and other useful articles. These are shown in several kinds of finish, such as natural brass, dull and highly polished finish. The large pieces are ornamented with clever etchings of female heads and other pleasing subjects. The same articles have also been made up in brass in a Pompeian finish, and still another line is lacquered. To give even greater variety to this department there has also been obtained an assortment of articles in brass in a somewhat rougher finish. These specimens have been sawed by hand, producing pretty patterns. Empire shaped metal figures in iridescent colors, all small articles fashioned in amusing shapes, will appeal to a considerable part of the trade. In horn goods with glass mountings there are shown especially elaborate and beautiful specimens. Smoking sets, baskets and umbrella stands, are displayed, some showing notably large horns. Another collection recently received comprises bronze plaques in which hunting scenes are represented in high relief and in colors. There is also an excellent assortment of bronze frames for paintings.

ATTRACTIVE LINE OF
GLASS WARE.

AN attractive line of engraved glass ware from the Seneca Glass Co.'s works at Morgantown, W. Va., is shown in the New York salesrooms of Cox & Laferty, 32 Park Place, New York. The stems are cut on stone and the engraving is similar to rock crystal in its effects, although not cut as deeply as most lines of the latter ware. A floral design runs through the collection of samples which comprises practically everything in stem-ware.

THE RAMBLER.

M. Sievert, La Crosse, Wis., found a pearl in the Black river, which weighed 13½ grains and was of brilliant luster. It is believed to be worth \$500, having been so valued by an expert.

THE PERFECT SHAPE UMBRELLA

"MAIDEN BALTIMORE"

IT IS now nearing the time when Jewelers are looking toward purchasing their stocks for the Fall and Holiday seasons in Umbrellas and Canes. We are prepared with our line, which we have specially designed for the Jewelry Trade. It consists of rare novelties, and things entirely new and exclusive.

Our Detachable Handle Umbrella has met with great favor, and will increase your Umbrella Business, as it is the only

one on the market without levers, springs or screws.

We make Umbrellas from \$1.50, with Sterling Silver and Gold Handles, up to \$125.00 each, and Canes from 50 cents up to \$25.00 each. *Send for a Selection, Express paid.*

FAHYS

Montauk Case

The Montauk Case might well be termed the "Old Reliable" 20 year case; it has seen many 20 year cases placed on the market which have gradually been discontinued or disappeared.

The Montauk Case has withstood competition under trying conditions and has come out ahead.

Every improvement that is known to the case maker's art is embodied in the Montauk; it is a case that sells on its own personality—and on its true merit.

JOSEPH FAHYS & CO.

THE BEST JUDGES

Are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

J. R. WOOD & SONS,
Diamond Cutters,

Cutting Works:
1327-1329 Atlantic Ave., Brooklyn.

2 Maiden Lane, New York.

J. R. WOOD & SONS

*What
Our Name
and Workmanship
mean to you*

**We Stand Behind
Everything We Sell**

guaranteeing it to be exactly what it is represented to be.

You can be perfectly sure that you are getting the quality you think you are buying, and that the workmanship is the very best obtainable—while you are paying nothing extra for this, for our prices are the lowest it is possible to furnish honest goods for.

J. R. Wood & Sons,
RING MAKERS,
2 Maiden Lane, New York.

Design, Workmanship, Quality and Durability

are the four factors
which have made the

BIGNEY CHAINS

the most popular in the
market to-day. They
are handled and worn
by more people than
any other make.

We give you below an exact copy of an assay of chains manufactured by the leading chain makers of the United States.

1-10 GOLD FILLED WATCH CHAINS, MINUS BAR AND SWIVEL.

Number	Gross Weight Ounces	Dec.	Fineness Gold 1000ths	Value	Maker	Chain Number	Cost
15		71	29½	\$0.43		1155	\$2.85

NEW YORK } CHICAGO

WHY

are the **WADSWORTH WATCH CASES** the most attractive line on the market?

BECAUSE

they are a Brand New line—new engravings, new styles, finest finish, up-to-date in every respect.

CERTAINLY

you should familiarize yourself especially with our **PILOT** (25 year), our **TWENTY YEAR** and our **PERMANENT**.

Are you numbered among the thousands of satisfied dealers who have distributed more than one million **Wadsworth Watch Cases** in 17 years?

We are satisfied that careful investigation and a comparison with other makes will convince you that there is merit, worth and wear in **Wadsworth Solid Gold** and **Gold Filled Watch Cases**—the most profitable and best selling cases you can handle.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

SILVERWARE destined for the general service and adornment of the table should, in order to be wholly satisfying, possess not only a markedly decorative effect, but an opulent dignity and a well defined individuality of design.

¶ It is the belief of the Whiting Company that in their new Louis Quatorze pattern, which has been applied to every article suitable for table use, these essentials of success are very prominently displayed.

¶ With the confidence born of this belief, therefore, they beg to call attention to their novel and original treatment of one of the most popular, as it is one of the most effective, of historical styles.

WHITING MFG. CO., SILVERSMITHS
Broadway and 19th Street, New York.

Progression

This word signifies the course, and

Success

indicates the goal attained by

Dueber-Hampden Watches

**Pre-eminently and indisputably the
Successful American Watches**

in all sizes and grades.

Requiring no assistance but their own inherent value to find a market, and depending on no combination to bolster up weakness and lend help to force sales, they should be valued accordingly by fair-minded, independent, self-respecting Americans.

The W. J. JOHNSTON COMPANY,

Wholesale Agents of the Leading American Watch Companies,

Fifth Avenue and Market Street, Pittsburgh, Pa.

Looking Forward

is ever necessary

To the Successful Merchant.

**What you sell to-day is responsible
for your future Reputation
and Prosperity**

If poor judgment is used you are entitled to no more excuse than though you had deliberately sold what you knew to be inferior goods.

There is always **"THE BEST,"** and in watches that term stands out prominently for

Illinois Watches and Hamilton Watches

MAURICE L. POWERS.

JOSH W. MAYER.

IMPORTANT STONES.

THE different lots of Diamonds, Pearls, and other precious stones procured by this firm from abroad, have now been carefully assorted and most of them are being mounted for the exhibition goods.

Any jeweler in need of Diamonds, Pearls, Rubies, Emeralds, Sapphires or any other precious stones, will find our line of loose material one of the largest in this city to-day. No matter what your order may call for, either in loose or mounted goods, we have exactly what you desire.

Not alone will the Jewels to be displayed in our exhibit be the most prominent feature—it is the magnificent single pieces of loose material in Diamonds and Colored Stones of unusual merit that will bring the exhibit to the highest standard of completeness.

There is scarcely a happier interval to an up-to-date jeweler than that between a piece of distinctively exclusive jewelry and the knowledge that its counterpart does not exist. The merit of one and the anticipation and satisfaction of the other suggest our productions to those who are accustomed to, and most discriminating in, selecting fine and exquisite Diamond Jewelry.

To be fully convinced of all the details of our advertising in the past few weeks, we ask you to kindly view this remarkable display which will take place in our offices between August 13th and 18th inclusive.

Once a visit always a visit.

WE DO NOT SELL DEPARTMENT STORES

We Study the Interests of the Retail Jeweler

At a meeting of the directors of the W. & S. Blackinton Company, held May 28, 1906, the following resolution was adopted:

“Resolved: That on and after July 1, 1906, we confine our sales strictly to the legitimate jewelry trade, through the jobber.”

W. & S. BLACKINTON CO.

We believe it is impossible for us to sell department stores without injury to the retail jeweler. In declining the trade of department stores we close many large accounts. However, we are convinced that the adoption of this policy of protection to the retail jeweler and jobber will work to their best interests, as well as to our own.

Full List of the Jewelry Stolen from Atlantic City, N. J., Store.

ATLANTIC CITY, N. J., June 13.—A full list of the jewelry, which, as told in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, was recently stolen from the store of Mrs. J. A. Z. 731 Boardwalk, June 3, has been prepared and sent out by the police. The articles, which are worth about \$3,000, include the following:

Italian opal ball necklace, with crystal pendants.
Turquoise ball necklace, with gold filigree balls between.
Turquoise matrix necklace, with gold tassel on ends.
English gold filigree bracelet, gold in different parts; incomplete.
Turquoise heart necklace, with baroque pearl in center.
14-K. gold, 14-K. different stones collar, total effect.
Scarf necklace, scarabei varied in color and design.
Match safe, penknife, cigar cutter set with diamonds.
Pearl necklace, worked with horsehair on brooch to match.
Twenty-four loose fresh water pearls, particularly quality, assorted in colors.
Gold, 8 grs.
Gold button, 20½ grs.
Gold shape, 3½ grs.
Pearl, 40½ grs., smaller pearls weighing from 15 grs. each.
Yellow scarab, genuine. Kartoush proves it to be B. C.
Old gold coins, early Christian and Kufic.
Small seed pearl brooches.
Short ropes of seed pearls, one three strands, and light; one four strands, loose.
Enamel collar, ivy leaves and pearls.
Gull, silver white enameling.
Carving shaped matrix stones, set in a piece with baroque pearls as fringe, 14-K. gold.
Silk festoon necklace, square turquoise stones, gold.
Large Barbetier turquoise necklace, set in silver, silver filigree squares set between and irregular shaped turquoise tassels; drilled in the middle.
English 14-K. gold chain, with white baroque, finished with an antique tassel, set with pearls.
Thirteen-K. gold tassel, with coral at the end of old fashioned enamel top.
Antique bracelet with three diamonds at the snap.
Carved stones turquoise bracelet, with two rows of baroque pearls, 14-K. gold.
Turquoise bracelet with lentils and baroque pearls, 14-K. gold.
Turquoise lazuli collar, silver gilt, large stones.
Turquoise lazuli ball necklace, Swiss lapis, very old.
Turquoise lazuli small shirt waist piece, oxidized.
Turquoise filigree collar, with large turquoise stones, set in center of square gallery set around stones.
Oval shaped dark turquoise necklace, silver arranged in points.
Opal bracelet, stones set between silver gilt, pendants.
All diamond dinner ring, with yellow pearls.
Gentleman's antique emerald ring, cabochon, engraved on shank.
Turquoise ring, snapped together as fob, light emerald on top.
Green medium quality Alexandrites, weighing 2-K. and 4-K. each.
Turquoise Siberian amethyst.
Large silver amethyst collar, huge stones.
Turquoise karats clear turquoise lace pin, 14-K. gold.
Antique plated chain, 14-K.
Antique old English black slide, 14-K. gold.
Exceptionally good (Rococo) enameled necklace.
Diamond enameled necklace, St. George and dragon on pendant.
Turquoise seed pearl drop earrings, worked on pierceless screws attached.
Eleve half-inch long Spanish paste earrings.
Turquoise reconstructed rubies.
Turquoise silver gilt purse, with baroque pearl tassels.
Turquoise stone turquoise pendant, large stones set in silver, small pendant turquoise drop set in gold.
An assorted scarab pins in 14-K. gold.

Four lapis lazuli turquoise and amethyst rings, 14-K. gold, sizes 3 and 3½.

Long oxidized silver chain with baroque pearls and various colored scarabs.

Rose quartz necklace, very large stones set in silver.

Rose quartz pendant.

Rose quartz ball necklace.

Sixty ounces of filigree silver, mainly in daisy necklaces and oval-shaped ornament bracelets (innumerable brooches, dipped in various color gold).

Angel pink coral cameo, very large.

Antique silver chain with old locket hand chased.

Antique silver gilt bracelets, set with baroque pearls and small amethyst.

Two Chinese filigree silver bangles, set in baroque pearls and large turquoise, gilt.

The character of the jewelry is Oriental, antique and all are very fine reproductions. A reward of \$500 will be given for a clue that would lead to the recovery of the goods.

Dealers Asked to Watch Out for Jewelry Stolen from Traveling Salesman.

A circular was sent out last week by Pinkerton's National Detective Agency, notifying the trade of the loss of a quantity of jewelry taken on the evening of May 23 from the sleeping room in the Savoy Hotel, Kansas City, Mo., during the absence of the occupant, J. L. Holland, a traveling salesman for L. H. Schaffer & Co., Chicago. The jewelry was in a trunk which Mr. Holland had in his room.

Following is a list of the missing articles: Complete, 16 size, Champion, open face, engraved 20-year case, No. 2061616, movement No. 6392749; complete, 16 size, Wm. McKinley, hunting, 20-year case, No. 1984536, movement No. 6296973; complete, 16 size, Wm. McKinley, open face, 20-year case, No. 1989782, movement No. 6297024; complete, 16 size, 109 Hampton, engraved 20-year case, No. 1951868, movement No. 6389891; complete, 16 size, General Stark, engraved 20-year case, No. 1796658, movement No. 6392788; complete, 12 size, Dueber Grand, open face, 20-year case, No. 1732741; movement No. 6450561; complete, 16 size, 109, open face, 20-year case, No. 1093789, movement No. 6392571; complete, 12 size, Dueber Grand, hunting, 20-year case, No. 1730784, movement No. 6388806; complete, 6 size, 213, hunting, 20-year case, No. 196047, movement No. 6365424; two, complete, 12 size, 213, hunting, 20-year case, No. 1960141, movement No. 6452367; complete, 12 size, General Stark, 20-year hunting case, No. 1982048, movement No. 6296978; complete, 12 size, General Stark, 20-year hunting case, No. 1855177, movement No. 6450575; complete, 12 size, 300, 20-year case, No. 2101684; movement No. 6388811; complete, 12 size, Champion, 20-year hunting case, No. 1964734, movement No. 6452366; complete, 6 size, Champion, 20-year hunting case, No. 1964740, movement No. 6297610; eight or 10 Molly Stark watches, in addition to above, of which we have no numbers at present; 11 flower signet rings (ladies); one Norma bracelet; three Dickens watch chains; three enamel Swiss chate-laine watches.

Magnificent Pearl Necklace Sold at London for £10,000.

A dispatch to New York Wednesday stated that 120 lots of jewelry were sold at auction that day in London at the auction rooms of Christie, Manson & Woods, 8 King St., St. James Sq., realizing in all \$50,629.

The principal piece of the sale was a magnificent pearl necklace, formerly the property of a lady of title, composed of five rows of beautiful pearls, 285 in all, and the pearls being unusually fine, Oriental, well matched and graduated. The necklace contained a sapphire and brilliant clasp.

The bidding on this piece began at £5,000 and advanced rapidly to £10,000, at which price it was knocked down. The name of the buyer is not mentioned in the dispatch.

Court Hears Charges of Many Complainants Before Sentencing Morris and Joseph Klein.

Part III. of the Court of General Sessions in Manhattan Thursday looked as if a convention of the wholesale jewelers of Maiden Lane was being held when the time came for the sentence of Morris and Joseph Klein, who, as told in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, had previously pleaded guilty to a charge of grand larceny in the second degree.

The brothers were former members of the firm of Klein Bros. & Co., manufacturing jewelers, 51 Maiden Lane, and against them seven indictments have been found by the Grand Jury, two of which charge them with failing to return goods on memorandum, and five charge that they obtained merchandise on credit on the strength of false representations as to their financial standing.

The specific indictment in which the plea of guilty had been entered was that of failing to account for unset diamonds valued at \$560 obtained from H. A. Groen & Bro. This and a similar indictment on a charge of obtaining diamonds from Eduard Van Dam were obtained by George M. Simpson and Abraham Levy, as counsel for the creditors, while the other indictments were obtained by the Jewelers Board of Trade through their counsel, Hastings & Gleason.

On the chance that Judge Rosalsky might not be aware of the more serious charges against the prisoners, and give them a mild or inadequate sentence on their plea of grand larceny in the second degree, Mr. Gleason appeared before the court, Wednesday, accompanied by a large representation from diamond and jewelry firms, who claim they have been swindled by the Kleins. In addition, a number of other jewelers interested in the failure were present—altogether about 40 members of the trade appearing in the court room.

When the case came up the Kleins were represented by Attorney Louis Vorhaus, of House, Grossman & Vorhaus; the complainants, Van Dam and Groen, by George Simpson and Abraham Levy, and the other complainants by Albert Gleason, who was accompanied by C. N. Gray, of the Jewelers' Board of Trade.

Mr. Gleason explained the situation to Judge Rosalsky, and acquiesced in the suggestion of the defendants' attorney that sentence be postponed until Friday next. Judge Rosalsky agreed to hear statements from the other complainants, and in turn the various members of the trade were called up to the Judge and a stenographic report made of their statements. Among those who appeared were Charles F. Wood, of Charles F. Wood & Co.; Harry Oppenheimer, of H. Z. & H. Oppenheimer; David C. Townsend, of D. C. Townsend & Co.; A. Roseman; M. H. Shiman, of Shiman Bros. & Co.; Mr. Mayer, of Dreyfus & Mayer; Mr. Groen and George Jordan, of H. A. Groen & Bro.; Abraham Sluizer, of Eduard Van Dam, and Charles Jung, of Jung, Staiger & Klitz.

It was reported that a petition asking clemency for the Kleins was being circulated by their friends, and that another petition to counteract the effect of the former would be circulated in the jewelry trade.

ACTIVITY

The Keynote of Our Progress

A series of pictures showing various forms of active life.

THE INDOMITABLE TUG.

The puffing tug-boat typifies Strength, Energy and Perseverance, qualities which have helped build up our business to its present large proportions.

Our Strength is expressed in our lines of Rings, Locketts, Sleeve Buttons, Larter Shirt Studs and Larter Vest Buttons.

Our Energy is devoted to increasing these lines and widening our market.

Our Perseverance in applying high grade art work to gold jewelry of unquestioned quality and workmanship is being rewarded by a constantly increasing business.

An inspection of our goods will demonstrate these facts.

May we prove our statement?

Trophy Presented by Sir Thomas Lipton
for Brooklyn Yacht Club's Ocean Race.

As an example of English taste and in silversmithing, the trophy illustrated on the front cover of this issue, which was offered by Sir Thomas Lipton, through Thomas Fleming Day, the editor of *Rudder*, of New York, as a prize for cruising yachts contesting in an ocean race, will be studied with interest by the dealers and silversmiths on this side of the Atlantic. The race started from Gravesend Bay, May 26 and the course ended at Bermuda. Victory was won by Frank Maier's boat *Tamerlane*.

The silver trophy cost the donor \$1,000. The design is allegorical, the principal figure being a representation of an antique galley, having a winged female figure at the stern, indicating speed, one hand resting upon the tiller, and the other holding a Mercurial staff. At the prow there is a figure of a Triton blowing a trumpet in the form of a shell, to herald the race.

The galley is decorated with conventional waves, and has on either side an ornamental shield, one bearing the burgee of the Brooklyn Yacht Club and the other the burgee of the Bermuda Yacht Club, enamelled in colors. It is supported by the wings of a sea horse, resting upon an ornamental base, having four scrolls with two medallions introduced, one containing the American flag and the Union Jack entwined, and the other the following inscription:

"Presented by Sir Thomas J. Lipton for an ocean race from New York to Bermuda for cruising boats under the flag of the Brooklyn and Royal Bermuda Yacht Clubs, May 26, 1906."

The cup was designed and manufactured by the Goldsmiths & Silversmiths Co., Ltd. of London.

James C. Buchanan Files Answers to Suit Brought by the McKay Co. Washington, D. C.

WASHINGTON, D. C., June 13.—James C. Buchanan recently made answer to an equity suit filed against him by the McKay Co., on May 7, referred to in *THE JEWELERS' CIRCULAR*, May 16. He claims that he made no inducement to the McKay Co. that was going to sell out as alleged at any particular time other than his explanation of the bill of sale referred to. He further claims that he did not in any manner influence Louis Costaggini in his actions as an officer of the McKay Co., but that the bill filed by said Costaggini was upon his own motion.

The answer also sets forth that Buchanan did not do any malicious or wrongful act and that the claims that he did so are without foundation. Anything he did on premises 1115 F St. were acts of his as landlord.

Instead of interfering with the McKay Co., the answer sets up a counter claim that the McKay Co. interfered with Buchanan moving certain of his goods.

The store of Ivan J. Gray, Park Prairie, Minn., was practically destroyed by fire recently. The loss on the stock is estimated at between \$1,000 and \$1,500.

Shipments of Clocks, Watches, Jewelry, etc., to Alaska, Hawaii, Porto Rico and the Philippines.

WASHINGTON, D. C., June 14.—Details of the commerce of the United States with the non-contiguous territories in clocks, watches, jewelry, etc., during certain periods have just become available, and are now presented:

ALASKA.—Shipments of clocks to Alaska during the 10 months ending April, 1906, were valued at \$4,472, as against a value of \$11 for the same period last year. The shipments of watches during these periods were valued at \$1,377 and \$591, respectively. Every shipment to Alaska shows a large increase. During April last the value was \$43, as compared with a value of \$545 the same month last year. During the 10 months' periods the shipments of jewelry increased in value from \$25,599 in 1905 to \$1,994 this year. Plated ware shipments increased from \$4,630 during the 10 months of 1905 to \$6,685 during the same period this year.

HAWAII.—Clocks to the value of \$7,431 were shipped to Hawaii during the 10 months of 1905, increasing to \$10,177 this year, while watch shipments increased from \$85 to \$2,196 during the same periods. There was a tremendous falling off in the shipments of jewelry, both during the 10 months' period; the value of these shipments in April a year ago was \$1,000, declining to \$500 in April last, while during the 10 months ending April, 1905, shipments were valued at \$144,384, declining to \$82,071 during the corresponding period of this year. Plated ware shipments likewise declined in value from \$51 in April a year ago to \$50 in April last, and from \$51,309 during the 10 months of 1905 to \$24,489 this year.

PORTO RICO.—During April, 1905, clocks to the value of \$312 were shipped to Porto Rico, increasing to \$457 in April last. During the 10 months' periods the shipments increased in value from \$2,282 in 1905 to \$13 this year. Watch shipments likewise increased from \$88 to \$671 during the 10 months' period and from 2,159 to \$3,300 during the 10 months' period. During these same periods jewelry shipments increased from \$561 to \$1,003 and from \$7,696 to \$13,100 and plated ware shipments from \$535 to \$592 and from \$5,373 to \$7,755.

PHILIPPINE ISLANDS.—Shipments of clocks to the Philippines declined in value from \$926 in April, 1905, to \$435 in April last, but increased from \$2,403 to \$3,405 during the 10 months' periods. There were no shipments of watches either in April, a year ago or in April last, while during the 10 months' period the shipments fell from \$34 in 1905 to \$924 this year. Likewise there were no shipments of jewelry in April a year ago or in April this year, but the 10 months' shipments increased from \$57 in 1905 to \$2,146 this year. Plated ware shipments increased from \$1,624 last year to \$14,328 this year.

New Tariff of British India.

WASHINGTON, D. C., June 13.—The new British India tariff contains the following schedules:

German silver, 5 per cent. ad valorem.
Gold bullion and coin, free.

Silver bullion or coin, 5 per cent. ad valorem.
Works of art, except for the public benefit, 5 per cent. ad valorem; when for the benefit of the public, free.
Clocks, watches and other timekeepers, 5 per cent. ad valorem.
Optical instruments, 5 per cent. ad valorem.
Silverware, plain, other than European, 5 per cent. ad valorem on a valuation of 32c. per tola.
Silverware, embossed or chased, other than European, 5 per cent. ad valorem on a valuation of 34c. per tola.
All other sorts of jewelry, 5 per cent. ad valorem.
Precious stones and pearls, unset, free.

The Production of American Precious Stones in 1905.

WASHINGTON, D. C., June 18.—While the United States may never lead the world in the production of gems, the value of its output of precious stones in 1905 reached the very respectable figure of \$326,350.

The largest output is from the sapphires,

FRANK KELLEY AND MARY HENNESSEY, ALIAS MARY MACK.

mines, the yield of which amounted to \$125,000. Next in value are the turquoise, quoted at \$65,000. Then come the tourmalines, worth \$50,000. Peridots, crystal quartzes, and miscellaneous stones are accredited with a value of \$10,000 each. The production of aquamarines is valued at \$6,000; of kunzite, gold quartz, chrysoprase, silicified wood and garnet at \$5,000 each, of smoky quartz and chlorastrolite at \$3,000 each, of amethyst, agate, pyrite, malachite, anthracite and catinite at \$2,000 each; of moss agate at \$1,500; of beryl, rose quartz, amazon stone and arrow points at \$1,000 each; of topaz, utahite and mesolite at \$500 each; of fossil coral at \$250, and of dumortierite in quartz at \$100.

The southern counties of California bid fair to rival the Ural Mountains in the production of tourmaline, beryl, topaz and the other precious stone which have been the pride of that region for the last half century. The Palo region in San Diego County has become especially notable in gem production. A number of adjacent localities give indication of yielding the same minerals.

Dr. George F. Kunz, who has prepared his report, entitled, "The Production of Precious Stones in 1905," which will soon be published by the United States Geological Survey, is authority for these figures.

Alleged Diamond Thieves Held for Trial at Binghamton, N. Y.

BINGHAMTON, N. Y., June 13.—Frank Kelly and Mary Hennessey, or Mary Mack, the alleged diamond thieves who were arrested in Judson S. Newing's store at Court and Collier Sts., some time ago, continue to interest the police. Kelly was recently held for the Grand Jury by Recorder Watson E. Roberts, who discharged the woman. However, she was immediately rearrested on a warrant charging her with stealing a diamond from J. A. Merrill & Co., Portland, Me., the warrant having been sworn out by Albion Keith, manager of Mr. Merrill's store. Mr. Keith claimed he identified the ring worn by the woman at the time of her arrest as one which had been stolen from his house. When Miss Hennessey was arraigned before the court her attorney

waived examination, and she was held for the Grand Jury.

The article which the woman is alleged to have stolen from Merrill is a ring containing diamonds weighing 1-16 and 1-32 carat, valued at \$250, and the strange part of the complaint lies in the fact that Mr. Keith alleges that the larceny was committed in Binghamton. It is claimed that under the Penal Code of New York the conversion of the property can be considered as having taken place here, and the authorities intend to try her on that charge.

Kelly, who is about 38 years old, is 5 feet 4½ inches high, weighs 120 pounds, has brown hair, blue eyes, and a sandy mustache, good teeth, small ears and a ruddy complexion. It is alleged that he had been previously arrested in Chicago and in Syracuse.

Mary Hennessey is 28 years old, 5 feet 3 inches high, weighs about 130 pounds, has brown hair and blue eyes. She formerly resided at Kankakee, Ill. The photographs published above were taken by the police of this city.

The attorney for Kelly and his companion recently filed with the county clerk a bill of sale given him by the prisoners of a quantity of jewelry, in which is enumerated the ring believed to be the property of J. A. Merrill & Co.

**Jewelry, Clocks, Optical Goods and
Hundred Lines Exported from New
York.**

WASHINGTON, D. C., June 13.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and hundred lines from the Port of New York for the week just ended:

Switzerland: 2 packages silverware, \$111; 1 package watches, \$1,000.
France: 3 packages plated ware, \$578; 268 packages clocks, \$4,283; 1 package clocks, \$299; 12 packages jewelry, \$2,498; 5 packages watches, \$1,000.
Belgium: 23 packages clocks, \$305.
Germany: 1 package clocks, \$125; 7 packages watches and views, \$700.
Italy: 21 packages clocks, \$1,372; 2 packages watches, \$253; 7 packages freezers, \$178; 1 package plated ware, \$253; 1 package watches, \$1,000.
Spain: 3 packages plated ware, \$525; 1 package watches, \$225; 3 packages optical goods, \$1,000.
Austria: 11 packages plated ware, \$1,489; 1 package optical goods, \$272.
Greece: 2 packages watches, \$250; 32 packages jewelry, \$550.
Sweden: 57 packages clocks, \$978; 1 package optical goods, \$166; 6 packages plated ware, \$177.
Denmark: 38 packages clocks, \$712.
Norway: 12 packages clocks, \$207.
Finland: 1 package jewelry, \$565.
Czechoslovakia: 1 package jewelry, \$700; 1 package watches, \$350.
Hungary: 1 package optical goods, \$110; 2 packages optical goods, \$201; 11 packages clocks, \$410; 1 package scopes, \$200.
Poland: 20 packages clocks, \$173; 35 packages watches, \$409; 124 packages clocks, \$1,319; 1 package silverware, \$113; 1 package plated ware, \$100; 1 package jewelry, \$130.
Russia: 5 packages watches, \$542; 1 package jewelry, \$2,631; 1 package scopes and views, \$100.
Siam: 48 packages clocks, \$840.
Siam: 1 package watches, \$129.
Liverpool: 2 packages optical goods, \$110; 30 packages jewelry, \$18,500; 47 packages watches, \$998; 2 packages jewelry, \$1,005; 5 packages thermometers, \$205; 4 packages jewelry, \$500; 1 package optical goods, \$500; 1 package jewelry, \$500; 2 packages plated ware, \$1,000.
London: 55 packages clocks, \$1,645; 14 packages plated ware, \$694; 8 packages clocks, \$380; 1 package optical goods, \$252; 3 packages scopes and views, \$514.
Bourne: 156 packages clocks, \$2,887; 2 packages jewelry, \$221; 26 packages plated ware, \$2,400.
Birmingham: 1 package jewelry, \$380.
Birmingham: 4 packages scopes and views, \$100.
Singapore: 1 package watches, \$150; 8 packages watches, \$133.
Birmingham: 4 packages watches, \$1,370; 8 packages optical goods, \$1,545; 39 packages watches, \$4,477.
Cairo: 3 packages plated ware, \$112.
Cairo: 123 packages clocks, \$1,220.
Cairo: 1 package watches, \$624; 31 packages clocks, \$253; 14 packages plated ware, \$1,765; 1 package silverware, \$400; 4 packages watches, \$1,000.
Cairo: 2 packages plated ware, \$164.
Cairo: 315 packages clocks, \$4,645; 4 packages watches, \$442.

**Recent Changes in Tariff of French
Oceania.**

WASHINGTON, D. C., June 13.—The following tariff changes have recently been made in French Oceania:

Jewelry of gold, silver, plated, with precious stones, pearls, imitation pearls, etc., 13 per cent. ad valorem.
Jewelry, imitated, 13 per cent. ad valorem.
Gold and silversmiths' ware, 13 per cent. ad valorem.
Clocks and watches, 15 per cent. ad valorem.
Instruments, photographic, 8 per cent. ad valorem.
Sculptured and engraved, lusters and articles, 10 per cent. ad valorem.
Glass and crystal wares of all kinds, 15 per cent. ad valorem.

National Monthly Import and Export Statistics.

WASHINGTON, D. C., June 8.—The records of the Treasury Department contain the following comparative statistics of interest to the jewelry trade for April, 1905, and 1906, and for the 10 months ending April, 1906.

	IMPORTS.		—10 Months Ending—	
	April, 1905.	April, 1906.	April, 1905.	April, 1906.

Eleventh Annual Convention of National Association of Credit Men.

O. G. Fessenden, of Hayden W. Wheeler & Co., New York, as the president of the National Association of Credit Men, opened last Wednesday the 11th annual convention of the organization in Baltimore, Md. The reports from that city agree that this was the most largely attended and most successful of any meeting yet held by the association.

President Fessenden in his annual address spoke of the growth of the association since the first annual meeting in Toledo, O. Out of the movement he showed that results of the most beneficial character to the commerce of the country have come. Between the wholesaler and his customers closer relations have been effected, and the mutual confidence, which is a most valuable asset, has been established.

Before the association was formed, he said, many business houses had no real system of credits. Information when most needed by a credit man from his fellow credit men was slow in coming, and when received was often useless. Continuing, Mr. Fessenden said:

A distrust based on lack of acquaintance, or fear of each other existed in the minds of many of the credit men of the country. How great the difficulty of getting creditors to act in concert in a case of fraudulent failure those of us who unfortunately were interested know full well. The cases of creditors combining to help an honest but unfortunate debtor to get upon his feet were few and far between. The great merit of adjustment bureaus was not generally recognized and while some lines of business had organizations the work of many that existed was necessarily limited in scope.

The laws of many of the States in matters pertaining to creditor and debtor were unjust to both and a constant source of delay and loss. The conditions mentioned are but a few of those which confronted the credit man in 1896. Our work is by no means finished. Those who come after us must take it up where we leave off and labor as we have with disinterestedness for the general good of all. The records show the work we have done and its results. We have ample cause for congratulation.

No one who has followed the history of the national and local association can for a single moment doubt the absolute necessity for such organizations, if we desire to accomplish results beneficial to credit men and the business commu-

nity. Without local associations the national association could have accomplished little. With their watchful, zealous and enthusiastic support, we are invincible. I am equally sure that without a national association the work of the local associations would be confined to limits so narrow that no real benefit to the commercial world would result.

**Massachusetts Jeweler Causes Return
of Brooch Lost a Year Ago.**

SPRINGFIELD, Mass., June 13.—Through the astuteness of E. Penny, 417 Main St., this city, a brooch belonging to a lady of Manchester, Conn., which had been missed for nearly a year, was restored to its owner last week. The loss was advertised for many months and a reward offered, but nothing was heard of the property until it was recovered by the jeweler. The brooch in question was sold by Mr. Penny five years ago.

About two weeks ago a man walked into Mr. Penny's store and offered to dispose of a brooch. The stranger was well dressed, of prepossessing appearance, and there was nothing about him to excite the least suspicion; yet as soon as Mr. Penny took hold of the article he recognized it as the piece he had sold to the Manchester lady five years before, and also remembered that it had been advertised for as lost. Examining the article, he found the sales mark, and, referring to his record, he convinced himself that he was right.

He then informed the stranger that the brooch did not belong to him, and the man became indignant and demanded his property; but Mr. Penny told him to return in a few days, giving him a receipt for the article. Thursday morning last he came back to the jewelry store just in time to meet the owner of the brooch, who had been notified by Mr. Penny of its recovery.

The man had found the article, and when it was proven to him that it belonged to the lady in question he claimed the reward offered for its return. Inasmuch as he had held the brooch for a long time and attempted to dispose of it, the question was left to the Chief of Police of Manchester to decide.

Mr. ABE A. HELLER
is now in charge of our European offices. with headquarters at
39 Rue de Chateaudun, PARIS.

BIRDSEYE VIEW OF PARIS.

Many years of studying the Jewelry trade here have given our Mr. Abe A. Heller an intimate knowledge of the wants of the American Manufacturer, which will be of great advantage in selecting the right goods for the American Market.

Decisions by United States Courts on Jewelry, Gems and Kindred Lines.

Decisions by the United States Circuit Courts in cases involving duties on jewelry and kindred lines were announced last week as follows:

CLOCK DETECTORS.—C. D. Stone & Co. vs. United States. United States Circuit Court, Northern District of Illinois, eastern division, May 2, 1906. No. 27817. On application for review of a decision of the Board of United States General Appraisers. Before Betha, District Judge. Decision *affirmed* without prejudice, by consent. The importers contended that time detectors held by the Board to be dutiable as clocks under Par. 191, tariff act of 1897, should have been classified as watch movements under the same Par. For decision under review see Abstract 7206 (T. D. 26659). Appeal.

FINISHED JEWELRY.—Albert Lorsch & Co. vs. United States. United States Circuit Court, Southern District of New York, May 28, 1906. On application for review of a decision of the Board of United States General Appraisers. Before Platt, District Judge. Decision *affirmed* by consent, without opinion. The importers contended that finished watch fobs classified as parts of jewelry, unfinished, under Par. 434, tariff act of 1897, were dutiable as manufactures of metal under Par. 193. For decisions under review see Abstracts 7511-5 (T. D. 26637).

PINS—JEWELRY.—United States vs. Veit & Co. (2 cases). United States Circuit Court, Southern District of New York, May 12, 1906. On application for review of decisions of the Board of United States General Appraisers. Before Platt, District Judge. Decisions *affirmed* by consent, without opinion. The merchandise consisted of hat pins, pearl pins, wax pins, or jet pins, and plain heads of glass or paste. They were held by the Board to be dutiable as manufactures of the component material of chief value, and the Government contended (T. D. 26686) that they were properly classified as jewelry under Par. 434, tariff act of 1897. For decision below see Abstracts 7831 and 7869 (T. D. 26682).

PINS—JEWELRY.—United States vs. Sams & Hilder Bros. United States Circuit Court, Southern District of New York, May 9, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The merchandise consisted of lace or belt pins, held by the Board to be dutiable as manufactures of the component material of chief value, with the Government contended (T. D. 2663) were properly classified as jewelry under Par. 434, tariff act of 1897. For decision under review see Abstract 7874 (T. D. 26682).

PINS—JEWELRY.—United States vs. Dieckhoff, Raffloer & Co. (4099) and United States vs. Veit, Son & Co. (2 cases, 4100-1). United States Circuit Court, Southern District of New York, May 12, 1906. On application for review of decisions of the Board of United States General Appraisers. Decisions *affirmed* by consent, without opinion. The articles in dispute consisted of long pins, pearl pins, wax pins, or jet pins having plain heads of glass or paste; and of small belt or veil pins. They are

held by the Board to be dutiable as manufactures of the component material of chief value, and the Government contended (T. D. 26686) that they were properly classified as jewelry under Par. 434, tariff act of 1897. For decisions below see Abstract 7926 (T. D. 26691) and Abstracts 7868 and 7870 (T. D. 26682).

PINS—JEWELRY.—United States vs. I. Emrich & Co. United States Circuit Court, Southern District of New York, May 11, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The articles in dispute consisted of hat, shawl, belt, or toilet pins, which were held by the Board to be dutiable as manufactures of the component material of chief value. The Government contended (T. D. 26686) that they were properly classified as jewelry under Par. 434, tariff act of 1897. For decision below see G. A. 6139 (T. D. 26679).

PINS—JEWELRY.—United States vs. A. & H. Veith. United States Circuit Court, Southern District of New York, May 16, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The merchandise consisted of pins which were held by the Board to be dutiable as manufactures of the component material of chief value. The Government contended (T. D. 26686) that they were properly classified as jewelry under Par. 434, tariff act of 1897. For decision below see G. A. 6139 (T. D. 26679).

PINS—JEWELRY.—United States vs. Leon Rheims Co. (1104) and United States vs. George Borgfeldt & Co. (4105). United States Circuit Court, Southern District of New York, May 9, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The articles in dispute were described in the Government's petitions as consisting of hat, shawl, belt, toilet or lace pins, with black heads, faceted or otherwise, or with so-called plain wax paste or glass heads, or with beads imitating round or baroque pearls. The Board held them dutiable as manufactures of the component material of chief value, and the Government contended (T. D. 26686) that they had been properly classified as jewelry under Par. 434, tariff act of 1897. For decision below see G. A. 6139 (T. D. 26679).

PINS—JEWELRY.—United States vs. Dieckhoff, Raffloer & Co. United States Circuit Court, Southern District of New York, May 12, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The articles in dispute consisted of hat, shawl, belt, toilet, or lace pins. They were held by the Board to be dutiable as manufactures of the component material of chief value, and the Government contended (T. D. 26686) that they were properly classified as jewelry under Par. 434, tariff act of 1897. For decision below see G. A. 6139 (T. D. 26679).

PINS—JEWELRY.—Leon Rheims Co. vs. United States. United States Circuit Court, Southern District of New York, May 11, 1906. On application for review of a decision of the Board of United States General

Appraisers. Decision *affirmed* by consent, without opinion. The goods in question consisted of hat, bonnet, or shawl pins, made entirely of metal in imitation of gold or silver, having heads enameled or otherwise ornamented, or made of metal set with imitation precious stones faceted, or set with pearl, ivory, paste, or other materials, the mountings ornamented with metal bands, scroll work, or other ornamental designs. The Board held them to have been properly classified as jewelry under Par. 434, tariff act of 1897. The importers contended that they should have been classified as manufactures of the component material of chief value. For decision below see G. A. 6139 (T. D. 26679).

BELT BUCKLES AND CLASPS—JEWELRY.—Blumenthal & Co. vs. United States. United States Circuit Court, Southern District of New York, May 9, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *reversed* by consent, without opinion. The articles in controversy are described in the opinion of the Board (1) as metal belt knuckles and clasps, substantially constructed to stand constant use, made respectively of steel, base metal made to imitate gold or silver, and steel and imitation gold or silver more or less elaborately enameled, and (2) as belt buckles elaborately ornamented, composed of base metal made to imitate gold and oxidized silver, set with imitation diamonds and other precious stones. The Board held on the authority of Bader vs. United States (116 Fed. Rep., 541) that they had been properly classified as jewelry under Par. 434, tariff act of 1897. The importers contended that they were dutiable as manufactures of the component materials of chief value. For decision under review see G. A. 6141 (T. D. 26681).

PINS—JEWELRY.—United States vs. I. Emrich & Co. (4110) and I. Emrich & Co. vs. United States (4111). United States Circuit Court, Southern District of New York, May 14, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The articles in dispute consisted of hat or bonnet pins, some held dutiable by the Board as manufactures of the component material of chief value as claimed by the importers, and some to have been properly classified as jewelry under Par. 434. Each side appealed from the decision of the Board in the respects in which it was adverse. For decision below see Abstract 7927 (T. D. 26694).

PINS—JEWELRY.—United States vs. Worthington Smith & Co. United States Circuit Court, Southern District of New York, May 9, 1906. On application for review of a decision of the Board of United States General Appraisers. Decision *affirmed* by consent, without opinion. The merchandise consisted of pins composed of metal or horn, with plain round heads, held by the Board to be dutiable as manufactures of the component material of chief value, which the Government contended (T. D. 26686) were properly classified as jewelry under Par. 434, tariff act of 1897. For decision under review see Abstract 8026 (T. D. 26708).

Ninth Annual Convention of Iowa State Association of Opticians.

DES MOINES, Ia., June 14.—The ninth annual convention of the Iowa State Association of Opticians, held here Tuesday and Wednesday, was favored with the largest attendance in the history of the organization, and the proceedings were of much interest and value. The large attendance and enthusiasm of the members placed the association on a firmer footing than ever before. Kansas City was chosen as the next meeting place for the reason that the national association will hold its convention there, and the Iowa men will meet at the same time.

The following officers were elected: President, A. F. Thompson, Adel; vice-president, B. M. Bills, Vinton; treasurer, J. Nuckolls, Eldora; secretary, George Feige, Des Moines. Directors: B. M. Bills, A. F. Thompson, H. W. Krotzer, Osceola, G. L. Goodale, Lenox, and M. Hurlburt.

F. Renaud, Keokuk, refused re-election for the presidency for a second term, so that there was a promotion of the old officers, George Feige being the new member of the staff. The association presented Mr. Renaud with a silver loving cup in recognition of his services.

There was a pleasant surprise in store for the opticians, and they were not slow to take advantage of the opportunities for social enjoyment that it afforded. The date of their annual meeting coincided—quite unintentionally, it is said—with the annual meeting of the Iowa Graduate Nurses' Association, and on the evening of the closing day the opticians officially became the guests of the Graduate Nurses' Association. The evening was spent at the pleasant open-air vaudeville theatre at Ingersoll Park, the popular summer amusement resort of Des Moines.

The opticians determined to continue their efforts for a State examining board. Failure attended their efforts in this direction at the last session of the Iowa Legislature, and a great deal of disappointment was expressed. Karl D. Fisk, West Union, legislative agent of the association, expressed dissatisfaction with the action of the legislature, which he declared did not give the demands of the opticians a fair hearing. The effort will be renewed at the legislative session next winter.

The paper of A. F. Thompson on "Skiascopy" was a scientific and able presentation of that interesting subject. The illustrated address of Dr. Arthur C. Campbell, Topeka, Mo., on "Light, Health and Lenses," was another very interesting feature of the programme. Other subjects treated were: "Special Lenses as Therapeutics," by J. C. Turk, Sioux City, Ia.; "Energy, Its Distribution to the Eye," G. J. Feige; "What's ailing?" William E. Huston, Kansas City; "Accommodation," H. P. Holmes, Des Moines; "Legislation," Karl D. Fisk, West Union; "Here and There," W. B. Ankeny, Corning.

Dr. Arthur Campbell, who spoke in favor of the use of health lenses, described the action of the ultra-violet or "health" rays on the tissues of the eye. He dealt with the health-giving influence of the violet rays and their action on the blood, and discussed

various makes of lenses as regards their value in transmitting the rays.

Speaking of the distribution of energy to the eye, Mr. Feige said in part: "Many attempts have been made with mechanical apparatus to thoroughly control energy, and the results are well known. The eye being the most active function that the brain has to deal with, it necessarily demands a larger amount of energy, and, like any delicate or complicated piece of machinery, every detail of its requirements must be accurately looked after."

He referred to the success in making lenses which insured a perfect distribution of energy and the prevention of waste.

H. W. Krotzer, Osceola, made a plea for the continued use of the trial case.

Second Annual Convention of the Iowa Retail Jewelers' Association.

DES MOINES, Ia., June 16.—A movement designed to bring about fixed selling prices for watches in all parts of the country was launched at the annual meeting of the Iowa Retail Jewelers' Association in this city, Thursday and Friday. There was a strong sentiment at this meeting in favor

J. M. NABSTEDT, PRESIDENT.

of restricted prices. In the meantime, the members of the Iowa association were urged to adhere to uniform prices as nearly as possible.

The convention was the second which the Iowa jewelers have held. The association has manifested a very encouraging growth since its organization, Feb. 13 last. The attendance was large, as the meeting followed the next day after the close of the opticians' State convention, and a large number of jeweler-opticians remained for both meetings. As showing the interest taken in the new organization, it may be mentioned that of the jewelers who attended the gathering, only one went home without subscribing his name to the membership list.

The best means to overcome the competition of the mail order houses and department stores formed an important part of the discussion. In the speeches made

on this subject the members were urged to patronize only those manufacturers and jobbers who declined to supply mail order houses. The convention did not adopt resolutions on the catalogue question, but the sentiment in favor of showing the fullest appreciation of the manufacturers who refused to sell to mail order firms found emphatic expression on the floor.

J. M. Nabstedt, Davenport, who had been vice-president of the association, was elected president of the association; M. A. Hurlburt, Fort Dodge, was elected vice-president, and J. H. Lepper, Mason City, was re-elected secretary-treasurer. Mr. Lepper has been most enthusiastic in the work of organization, and the association was only too glad to recognize his services by unanimously re-electing him. The three foregoing officers, together with N. Nielson, Harlan, and L. E. Smith, Oskaloosa, constitute the new executive committee. The association adopted an official emblem, consisting of a watch dial, on the rim of which appear the words, "Iowa Retail Jewelers' Association."

The following papers were read: "Value of Organization," J. H. Lepper, Mason City; "The Optical Business as a Side Line for Jewelers," W. H. Ankeny, Corning; "Advertising, Good and Bad," M. A. Hurlburt, Ft. Dodge; "Work Shop Notes," J. M. Nabstedt, Davenport; "Advertising Value of Jewelers' Show Windows," L. E. Smith, Oskaloosa; "The Little Things That Stop Watches," Charles Peck, Ottumwa; "Side Lines for Jewelers," N. Nielson, Harlan; "Value of a Fixed Selling Price," J. J. Dalgleish, Grundy Center; "Mail Order Competition and How to Meet It," W. J. Pilkington, Des Moines.

A humorous incident of the convention was the presentation to Gov. A. B. Cumins of a "jumbo" display watch, as a souvenir of a visit paid by the jewelers to the State capitol.

On Thursday evening, June 14, the members of the association were tendered a banquet by the following Des Moines firms: M. A. Lumbard Co., Guinand-Jones Co., Herman Kirch, Frank Schlamp, R. N. Bromley & Sons and J. C. Robinson.

Authorities of Denver, Colo., Seek Whereabouts of George Freeman.

DENVER, Colo., June 18.—Alexander Nisbet, sheriff of this city, has issued a circular containing a full description of George Freeman, alias Isaac Freeman, who is wanted for swindling jewelers throughout Colorado and other places. Many local dealers have fallen victims to the culprit.

He is an Englishman, 29 years of age, with blue eyes and distinctly bad teeth. He is 5 feet 3½ inches in height, weighs 159 pounds, and has a peculiar habit of carrying his head on the right side. The initials, "F. K. R. E.," appear in India ink on the left arm, just above the wrist. He was apprehended in 1904, but then jumped his bond.

David S. Wolfkill, a retail jeweler, of Tacoma, Wash., recently sustained serious injuries. While at work in his store an alcohol lamp exploded and the blazing contents was hurled over Wolfkill's face and head, painfully burning his scalp and face.

Death of Andrew J. Lloyd.

Boston, Mass., June 16.—Andrew J. Lloyd, senior partner of the prominent Boston firm of Andrew J. Lloyd & Co., jewellers, of which he was the founder, at his home on Bay State Road, this morning on the morning of June 14. He was 58 years. He left a widow.

Mr. Lloyd had been ill but a few days. He was at his office on the previous Sunday, apparently in excellent health, and tended to routine affairs in which he was interested. During the past two or three years he had not devoted so much time in previous years to business, taking recreation, and leaving details to the active partners. On Sunday he went to Brookline, visiting the beautiful estate of the Sargents, known as Holmwood, and while there was stricken with apoplexy. He was conveyed to his home, and did not regain consciousness.

Mr. Lloyd was a native of Nova Scotia, his birthplace being Lockport, whence he came to Boston in 1866 at the age of 18. He served an apprenticeship with the time house of William Bond & Son, maker of clocks, chronometers and nautical instruments. In 1870 he started the business in which he has been steadily built up under his own direction, and the firm ranks among the leading concerns in the city, conducting large stores, one at 315 Washington St., the other at 310 Boylston St. The former establishment occupies several floors of building, housing various departments of manufacturing and retailing branches of business that comprises all kinds of optical goods, photographic supplies and kindred stock.

Deceased was personally the inventor of several improvements in glasses and spectacles, and had done much to advance the optical profession, of which he was an exceedingly skilful exponent. His proficiency in his chosen life work brought him in contact with experts in the use of microscopes, lenses, cameras and scientific instruments of similar nature. He was also a member of several scientific societies, took an interest in the optical associations at their conventions, and developed within himself a spirit of true scientific investigation, especially in the world of nature, which afforded him unending delight. Natural history, botany, geology and the animal kingdom were all embraced to a marked degree in his book of knowledge, and the circumstances attending the beginning of an illness which proved fatal were such as to attest to the habitual trend of his character and ideals.

Funeral services were held at Mr. Lloyd's residence, Bay State Road, this afternoon at 2 o'clock, and were attended by a large number of representative members of the optical and jewelry trades, among which had a host of friends.

The British Consul at Alexandria, Egypt, finds many commercial opportunities for the sale of foreign manufactures. A reliable watch retailing from \$5 to \$10, says, will find a ready market among natives if properly advertised. It should be plainly stamped with the name of the country where manufactured.

National Gold and Silver Stamping Law Enacted.

B Started by Circular-Weekly and Introduced by Representative Vreeland signed by President Roosevelt—A Brief History of the Measure. and the Full Text of the Law.

WASHINGTON, D. C., June 14.—President Roosevelt has signed the Jewelry Trade's Gold and Silver Stamping Bill, introduced by Representative Vreeland, and the measure is now a law, though its provisions do not take effect until one year from this date. The bill had previously been signed by Representative Fairbanks and Mr. Cannon, having been passed by the Senate and House respectively and was sent to the President who turned it over to Attorney-General Moody to pass upon its constitutionality, etc.; the attorney-general's report most favorable and the President then gave his signature.

The bill, which was inaugurated by THE CIRCULAR-WEEKLY shortly more than a year ago, established a record for the rapidity with which it passed both houses of Congress, that astonished legislators and the public alike as it was introduced into the House of Congress for the first time, less than five months ago (Jan. 31). It given careful consideration by the interstate commerce committees of both houses, was subjected to no delay whatsoever and passed in practically the same form as introduced, being amended in only a few slight particulars in a way that was generally agreed to by the interests behind the bill before the measure was offered to Congress for its consideration.

What is especially remarkable is the fact that so much consideration was given to a bill of this kind at one of the most important sessions of Congress held for many years, when the calendars of both houses were practically choked with measures of most vital interest to the country at large.

HISTORY OF THE BILL.

The passing of the Jewelry Trade Gold and Silver Stamping Law, to a certain extent, ends one of the most important fights to enforce honest business methods that has ever been made in the jewelry trade and the victory is one of which all members of the jewelry, gold, silver and kindred industries may feel justly proud, as it is to a great extent due to the harmony of feeling and the absolutely united support given to the measure by all branches in the jewelry industry.

The desire for national legislation on this subject goes back almost as far as the oldest jeweler of the country can remember, although one or two attempts to obtain such a bill were made in former years, no definite movement of the kind was inaugurated until little more than a year ago, and it was not until THE CIRCULAR-WEEKLY appeared before the trade the bill, of which the present law is the outgrowth, that a measure, constitutional in all its features and one capable of being passed by our national legislature, was put forth in a way that made victory possible.

Shortly after the agitation for regulation of the marking of silver in various States began in 1893, a movement for a national law was proposed. The idea of having such a law apply to gold was finally

abandoned, but a bill to regulate the stamping of silver alone was introduced in the United States Congress by Representative Amos Cummings, of New York, in May, 1894. The jewelry trade, particularly the retailers and the silversmiths, almost as a whole were in favor of this measure, but unfortunately doubt as to its constitutionality was immediately expressed, and this doubt was confirmed through interviews given to the editor of this journal by many of the most prominent constitutional lawyers of the country, among which were the late E. R. Coudert, the late Austin Abbott, the late James C. Carter, and a number of others whose authority to speak on such subjects was generally recognized by the bench and bar.

It was on the advice of Austin Abbott that this journal then bent all its energies to obtain State legislation, and also on his advice that we watched for the opportunity to propose a measure covering interstate traffic in such articles, the moment that the marking and stamping of gold and silver were regulated by the State in which the greatest business in these lines is done, namely, New York. For some years little hope of obtaining any relief from Congress was entertained and the subject was dropped by this journal, but not abandoned while attempts to obtain a gold law in New York were made.

In the meantime a careful perusal of the anti-lottery law and some of the more recent decisions of the Supreme Court, in relation to the Interstate Commerce Law, convinced the management of this journal that an act could be drawn that would supplement State laws in a way that would practically and constitutionally put a stop to the selling of spuriously marked goods; provided one or two States, such as New York, Massachusetts, or Illinois, would legislate on the subject. The question arose, however, as to whether the subject still held the keen interest for the jewelry trade that it did a decade ago, but this was quickly answered in the affirmative when the wholesalers and retailers had a chance to express themselves on an amendment introduced to a bill in Congress in January, 1905.

The subject of false marking was no new one to Congressman Vreeland, as in the latter part of 1904 he introduced into the House of Representatives a bill forbidding the stamping upon precious metals of any words or phrases that would indicate that the government in any way certified as to the fineness of the metal; which bill was effectually passed and is now on the statute books. When the measure was in the Senate, an attempt was made to amend it by adding a new section that would apply to false marking of gold and silver of all descriptions, and though this amendment was crudely drawn and of decidedly doubtful constitutionality, nevertheless, the expressions in favor of such a law that were heard from all parts of the jewelry trade were sufficient to show that such a meas-

ure was not only wanted, but was needed as badly, if not more than ever before.

Members of the trade in all parts of the country were then interviewed by THE CIRCULAR-WEEKLY and the sentiment in favor of such a law was so unanimous that it was decided to take up the subject immediately after Congress had finished with Mr. Vreeland's bill as to marks that related to government certification. Circulars were also sent to retail jewelers throughout the country by the Ducler Watch Case Mfg. Co., and the answers received were exactly to the same effect; i. e., as received by THE CIRCULAR-WEEKLY, that the trade as a whole was strongly in favor of such a measure.

In January, 1905, THE CIRCULAR-WEEKLY began work upon its bill and as the result of the study of the question which the management had made for eight years, it decided upon a measure which would be in line with the anti-lottery law and interstate commerce decisions, and would forbid interstate traffic in products of the precious metals that were improperly marked as to quality.

While work was going on in this way, a bill to regulate the marking on goldware was introduced for the third time in the legislature of New York which had already passed laws for silver, and the gold bill made such great progress that it was decided to wait until after this was enacted before pushing the movement for a national law. Mr. Vreeland's first bill became a law in the latter part of February, 1905, and it was then so late in the session that little or nothing could be done on the subject of a general stamping bill until Congress met in the following December; but the moment that the gold law was passed in New York, and signed by Gov. Higgins (April 24, of last year), the campaign for the national law was begun by this journal in earnest. Frank L. Crawford, of New York, the attorney, who had had charge of the gold legislation before the New York legislature and had successfully carried it to victory, was engaged by THE CIRCULAR-WEEKLY to draw up a national law on the lines mentioned above, and after he completed his work, the bill was submitted to the members of the trade in all branches for expressions of opinion, suggestions and comments; after these were received, the measure was finally placed before the members of the trade at large and was printed in full in the issue of THE CIRCULAR-WEEKLY, July 5, 1905.

The Ducler Watch Case Mfg. Co., also had had a bill drawn, but on entirely different lines, and copies of this were sent to the retail jewelry trade in all sections of the country. This bill the company had placed in the hands of Congressman Vreeland to introduce, Mr. Vreeland having practically stated to the members of Congress when his former bill was being considered, that he would introduce a general stamping bill at the next session.

The unanimity with which the retail trade supported the stamping movement was remarkable, thousands of comments in favor of such legislation being received by Congressman Vreeland and by THE CIRCULAR-WEEKLY from the retail jewelers of every State in the Union, many of which com-

CORAL**CORAL**

ments were published in this journal last summer. Although the two bills were distinctly unlike, one being a drastic measure providing for heavy penalties, forfeiture and compulsory stamping of quality of articles, and the other (THE CIRCULAR WEEKLY'S bill), being in substance the same as that has just been passed. Nevertheless, both were praised and endorsed, showing that as far as the retail trade was concerned the substance of the bill did not count, provided it accomplished the object. All were willing to leave the text to those who they considered competent to push the movement.

This journal was committed to no course, not even its own, and was without prejudice, and was willing to endorse and support any bill which it was convinced would accomplish the object desired, was constitutional in its provisions and was likely to be passed by Congress. A careful consideration of the subject, and the bills had been submitted to expert authorities, convinced the management of THE CIRCULAR WEEKLY that its measure, though not as strong and drastic as we desired, was the one drawn on the best and most likely to obtain the approval of Congress. Copies of the bill were sent to the manufacturing jewelers' association in New York, New England, Newark, and other centers, as well as to leading manufacturers of the trade.

The New England Jewelers' and Silversmiths' Association, whose members had become interested in the subject, and had been visited by Congressman Vreeland, pointed a committee to express their views in a bill. This committee, after due deliberation, reported a measure which was thought was in the best interests of the association, and which bill followed the substance of THE CIRCULAR WEEKLY'S bill, with a few slight amendments, and contained a few additional paragraphs that would cover marking of rolled gold and electroplated subject which had not been touched upon until then.

In December of last year, a conference was held between the editor of this paper and Congressman Vreeland, after which Mr. Vreeland stated that he had decided not to introduce a bill such as had been handed to him by the Dueber Watch Company, but instead would draw a measure on the lines of THE CIRCULAR WEEKLY'S act. At the same time there was submitted to Mr. Vreeland a copy of the New England manufacturing jewelers' measure so that all interests became in accord.

There were still some differences of opinion as to minor points between jewelers in various sections, such as the proper amount of leeway (or variation from quality) to be allowed, and to settle this and make the trade unanimous on every point of the bill, a movement was begun to obtain joint action by representatives of manufacturers in various sections. A meeting of the manufacturing jewelers of New York was called Jan. 8 last, to take action on the stamping bill before it was finally introduced; at this meeting a committee, to act for the trade in New York, was appointed consisting of a number of the leading members of the craft, including the presidents of practically every association in the trade, who were empowered

FULL TEXT OF THE NATIONAL STAMPING LAW.

AN ACT

FORBIDDING THE IMPORTATION, EXPORTATION, OR CARRIAGE IN INTERSTATE COMMERCE OF FALSELY OR SPURIOUSLY STAMPED ARTICLES OF MERCHANDISE MADE OF GOLD OR SILVER OR THEIR ALLOYS, AND FOR OTHER PURPOSES.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That it shall be unlawful for any person, firm, corporation, or association, being a manufacturer of or wholesale or retail dealer in gold or silver jewelry or gold ware, silver goods or silverware, or for any officer, manager, director, or agent of such firm, corporation, or association to import or cause to be imported into or exported from the United States for the purpose of selling or disposing of the same, or to deposit or cause to be deposited in the United States mails for transmission thereby, or to deliver or cause to be delivered to any common carrier for transportation from one State, Territory, or possession of the United States, or the District of Columbia, to any other State, Territory, or possession of the United States, or to said District, in interstate commerce, or to transport or cause to be transported from one State, Territory, or possession of the United States, or from the District of Columbia, to any other State, Territory, or possession of the United States, or to said District, in interstate commerce, any article of merchandise manufactured after the date when this act takes effect and made in whole or in part of gold or silver, or any alloy of either of said metals, and having stamped, branded, engraved, or printed thereon, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which said article is incased or inclosed, any mark or word indicating or designed or intended to indicate that the gold or silver or alloy of either of said metals in such article is of a greater degree of fineness than the actual fineness or quality of such gold, silver, or alloy, according to the standards and subject to the qualifications set forth in Sections 2 and 3 of this act.

Section 2. That in the case of articles of merchandise made in whole or in part of gold or of any of its alloys so imported into or exported from the United States, or so deposited in the United States mails for transmission, or so delivered for transportation to any common carrier, or so transported or caused to be transported as specified in the first section of this act, the actual fineness of such gold or alloy shall not be less by more than one-half of one karat than the fineness indicated by the mark stamped, branded, engraved, or printed upon any part of such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed; except that in the case of watch cases and flat ware, so made of gold or of any of its alloys, the actual fineness of such gold or alloy shall not be less by more than 3-1,000 parts than the fineness indicated by the mark stamped, branded, engraved or printed upon such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed: *Provided*, That in any test for the ascertainment of the fineness of any article mentioned in this section, according to the foregoing standards, the part of the article taken for the test, analysis, or assay shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior fineness used for brazing or uniting the parts of said article: *Provided further*, That in the case of any article mentioned in this section, in addition to the foregoing tests and standards, the actual fineness of the entire quantity of gold or of its alloys contained in such article, including all solder and alloy of inferior fineness used for brazing or uniting the parts of such article (all such gold, alloys, and solder being assayed as one piece), shall not be less by more than one karat than the fineness indicated by the mark stamped, branded, engraved, or imprinted upon such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, it being intended that the standards of fineness and the tests or methods for ascertaining the same provided in this section for articles mentioned therein shall be concurrent and not alternative.

Section 3. That in the case of articles of merchandise made in whole or in part of silver or any of its alloys so imported into or exported from the United States, or so deposited in the United States mails for transmission, or so delivered for transportation to any common carrier, or so trans-

ported or caused to be transported as specified in the first section of this act, the actual fineness of the silver or alloy thereof of which such article is wholly or partly composed shall not be less by more than 4-1,000 parts than the actual fineness indicated by any mark (other than the word "sterling" or the word "coin") stamped, branded, engraved, or printed upon any part of such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed; and that no such article, tag, card, label, box, package, cover or wrapper shall be marked, stamped, branded, engraved, or printed with the word "sterling" or "sterling silver" or any colorable imitation thereof, unless such article or parts thereof purporting to be silver contains 925-1,000 parts pure silver; and that no such article, tag, card, label, box, package, cover or wrapper shall be marked, stamped, branded, engraved, or printed with the words "coin" or "coin silver" or colorable imitation thereof unless such article or parts thereof purporting to be silver contains 900-1,000 parts pure silver: *Provided*, That in the case of all such articles whose fineness is indicated by the word "sterling" or the word "coin" there shall be allowed a divergence in the fineness of 1-1,000 parts from the foregoing standards: *Provided*, That in any test for the ascertainment of the fineness of any such article mentioned in this section according to the foregoing standards the part of the article taken for the test, analysis, or assay shall be such part or portion as does not contain or have attached thereto any solder or alloy of inferior fineness used for brazing or uniting the parts of such article: *Provided further*, That in the case of any article mentioned in this section, in addition to the foregoing tests and standards, the actual fineness of the entire quantity of silver or of its alloys contained in such article, including all solder and alloy of inferior fineness used for brazing or uniting the parts of such article (all such silver, alloys, and solder being assayed as one piece), shall not be less by more than 10-1,000 parts than the fineness indicated by the mark stamped, branded, engraved, or imprinted upon such article, or upon any tag, card, or label attached thereto, or upon any box, package, cover, or wrapper in which such article is incased or inclosed, it being intended that the standards of fineness and the tests or methods for ascertaining the same provided in this section for articles mentioned therein shall be concurrent and not alternative.

Section 4. That in the case of articles of merchandise made in whole or in part of an inferior metal, having deposited or plated thereon or brazed or otherwise affixed thereto a plating, covering, or sheet composed of gold or silver, or of an alloy of either of said metals, and known in the market as rolled gold plate, gold filled, silver plate, or gold or silver electroplate, or by any similar designation, so imported into or exported from the United States, or so deposited in the United States mails for transmission, or so delivered to any common carrier, or so transported or caused to be transported as specified in the first section of this act, no such article, nor any tag, card, or label attached thereto, nor any box, package, cover, or wrapper in which such article is incased or inclosed, shall be stamped, branded, engraved, or imprinted with any word or mark usually employed to indicate the fineness of gold, unless such word or mark be accompanied by other words plainly indicating that such article or part thereof is made of rolled gold plate, gold plate, or gold electroplate, or is gold filled, as the case may be, and no such article, nor any tag, card, or label attached thereto, nor any box, package, cover, or wrapper in which such article is incased or inclosed, shall be stamped, branded, engraved, or imprinted with the word "sterling" or the word "coin," either alone or in conjunction with other words or marks.

Section 5. That each and every person, firm, corporation, or association, being a manufacturer of or a wholesale or retail dealer in gold or silver jewelry, gold ware, silver goods, or silverware, who or which shall knowingly violate any of the provisions of this act, and every officer, manager, director, or managing agent of any such corporation or association having knowledge of such violation and directly participating in such violation or consenting thereto, shall be deemed guilty of a misdemeanor, and upon conviction thereof in any court of the United States having jurisdiction of crimes within the district in which such violation was committed or through which has been conducted the transportation of the article in respect

to the form of the bill and arrange for concerted action with committees of jewelers in other sections.

The committee endorsed THE CIRCULAR-WEEKLY's stamping act with some amendments that had been made to it, and invited committees from the New England Jewelers' and Silversmiths' Association and the Newark Jewelers' Association to act with it. Many conferences were held in New York, and Frank L. Crawford, who drew THE CIRCULAR-WEEKLY's bill, appointed counsel for the joint committee. In this committee the bill was rejected and conferences were held between Mr. Vreeland and Mr. Crawford. As the result that the bill, as it finally came from the hands of the joint committee, expressed the views of, and was accepted in, by every section of the jewelry trade.

The bill was introduced in the House by Mr. Vreeland, Jan. 31, and re-introduced Feb. 12 last; it was immediately referred to the Committee on Interstate and Foreign Commerce which held a hearing on the bill, March 9; at this hearing appeared Mr. Vreeland, Mr. Crawford, and committees from the associations in New York, Newark, New England, and after giving the matter careful consideration the House committee finally reported it to the House with unanimous approval.

With little delay, and at the first opportunity the bill came before the House of Representatives, and was passed April 16, without amendment, by a vote of 138 to 35; then went to the Senate and was referred to the Committee on Interstate Commerce. That body and was reported favorably by the committee, May 8, 1906, with two slight amendments, one reducing the penalty from \$1,000 fine and six months imprisonment to \$500 fine and three months imprisonment, the other extending the time in which the bill should go into effect from six months to one year after its passage. As soon as the rate bill had been disposed of in the Senate, the Stamping Bill was immediately considered and was finally passed and approved May 22, and returned to the House. The House concurred in the two slight amendments made and the bill was sent to the President and approved.

THE COMMITTEE.

The joint committee of the jewelry trade which had charge of the bill consisted of: NEW YORK—A. K. Sloan, of Sloan & Co.; H. Bliss, of the Gorham Mfg. Co.; Oliver G. Isenden, of Hayden W. Wheeler & Co.; George E. Fahys, of Joseph Fahys & Co.; Francis R. Appleton, of Robbins & Appleton; F. H. Larter, of Larter & Son; Col. J. L. Shepherd, of the Keystone Watch Co. Co.; Leo Wormser, of the Julius King Co.; George W. Street, of Geo. O. Street & Sons, and T. Edgar Willson, editor of THE JEWELERS' CIRCULAR-WEEKLY. NEW ENGLAND—William A. Copeland, of Martin, Copeland & Co.; Henry B. Thresher, of the Vite, Thresher Co., and G. K. Webster, of Webster & Co. NEWARK—Samuel Clark, of Day, Clark & Co.; Mr. Schuetz, of C. Schuetz & Sons; Mr. Angell, of Link & Angell Co., and Thomas W. Adams, of T. W. Adams & Co.

to which such violation has been committed shall be punished by a fine, of not more than \$100, or imprisonment for not more than six months, or both, at the discretion of the court. Whenever the offense is begun in one jurisdiction and completed in another it may be dealt with either jurisdiction in the same manner, as if the offense had been actually and wholly committed therein.

Section 6. That the expression "article of merchandise" as used in this act shall signify goods, wares, works of art, commodity, or thing which may be lawfully kept or offered for sale.

Section 7. That all articles of merchandise which this act applies which shall have been imported into any State, Territory, District, or session of the United States, and shall therein for use, sale, or storage, shall, upon importation in such State, Territory, District, or possession be subject to the operation of all laws of such State, Territory, District, or possession of the United States to the same extent and in the manner as though such articles of merchandise had been produced in such State, Territory, District, or possession, and shall not be exempt therefrom by reason of being introduced therein in packages or otherwise.

Section 8. That this act shall take effect after the date of its passage.

LETTERS OF CONGRATULATION

NEW YORK, June 15, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

Manufacturers and dealers in jewelry goods in the jewelry trade are to be gratulated in that the National Silver Stamping Bill has become a law, having received the signature of the President to the act. THE JEWELERS' CIRCULAR-WEEKLY is fully to be commended for the part taken in bringing about this most desirable enactment.

Yours respectfully,

FREDK. H. LARSEN

President of the Jewelers Board of Trade

NEW YORK, June 18, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

We are gratified to learn that the Silver Stamping Bill, called the National Silver Stamping Bill, has become a law. We are aware of the valuable services which THE JEWELERS' CIRCULAR-WEEKLY has rendered in having this bill promoted. We believe the law to be a very desirable one, and the jewelry and sterling silver interests will be very much benefited by its passage. We congratulate THE JEWELERS' CIRCULAR-WEEKLY on this opportunity of expressing thorough appreciation of its able service in this work.

Very truly yours,

GORHAM MANUFACTURING CO.

H. A. Bly

NEW YORK, June 14, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

We note with pleasure that President Roosevelt has signed the gold and silver stamping bill. This is a signal victory for THE JEWELERS' CIRCULAR-WEEKLY and those men who have fought so hard and earnestly for a standard of value, and to create a condition whereby honest merchants would be protected against unscrupulous competition in the manufacture and sale of gold goods. This is a most important move in the right direction.

Very truly yours,

SOLIDARITY WATCH CASE CO.

PITTSBURG, Pa., June 16, 1906.

Editor THE JEWELERS' CIRCULAR-WEEKLY

We congratulate you on the passage of the bill for the proper stamping of gold. It is the first valuable recognition the jewelry

have ever received at the hands of the Government. It will certainly please the jewelry trade and place it on a higher plane in the question of manufacturing and merchandising. It will be a great assistance to the retail jewelry trade throughout the country. It marks an epoch in the history of the jewelry business, and the trade can look to THE JEWELERS' CIRCULAR-WEEKLY for bringing it to pass.

Very truly,
STEELE F. ROBERTS,
of E. P. Roberts & Sons.

New York, June 19, 1906.

For THE JEWELERS' CIRCULAR-WEEKLY: The good news that President Roosevelt signed the Gold and Silver Stamping bill undoubtedly give great pleasure to the trade who have supported the bill so ardently since the movement began. I want to express my appreciation of the work done by THE CIRCULAR-WEEKLY in this good cause, and congratulate you that your bill has finally found its way into the statute books.

Very truly yours,
LEO WORMSER

North Attleboro, Mass., June 16, 1906.

For THE JEWELERS' CIRCULAR-WEEKLY: It is a pleasure to express our pleasure and appreciation over the passage of the National Stamping Act, and to thank you for the work you have performed in connection with it.

The worst competition we have had to encounter has been the dishonest kind; the kind that put out merchandise purporting to be 10 karat or 11 karat when it was only six or eight, or 10 or 12, and we heartily approve any measure that checks this.

Respectfully yours,
BUGBEE & NILES Co.

Pittsburg, Pa., June 16, 1906.

For THE JEWELERS' CIRCULAR-WEEKLY: The bill is admirable because, first, it imposes no hardship on the honest manufacturer, and second, because it is a protection to all buyers of jewelry, silverware, etc. Accept our congratulations.

E. W. HILL,
of Goddard, Hill & Co.

June 16, 1906.

For THE JEWELERS' CIRCULAR-WEEKLY: We are very much gratified to hear that President has signed the national law regarding the stamping of gold and silver articles.

Most 20 years ago Joseph Fahys, of our firm, went to Washington with other members of the trade and endeavored to secure legislation on this very subject, but his efforts were futile, and the reason was that such legislation did not come within the scope of the Federal Government.

We feel that all manufacturers in our line of goods are to be congratulated that the Federal Government has seen the necessity of adopting laws to take care of the interests of this nature which are of national importance, and cannot be successfully confined to State legislation.

Very truly yours,
JOSEPH FAHYS & Co.,
GEORGE E. FAHYS.

CONGRATULATIONS FROM PROVIDENCE.

A number of Providence jewelers were heard to comment most favorably on the bill and the activity and keen interest which THE CIRCULAR-WEEKLY has shown in pushing it forward.

President William A. Copeland, of the New England Manufacturing Jewelers' and Silversmiths' Association, said: "The jewelers are certainly to be congratulated that they had such good friends in their effort to get this bill. We naturally feel here in Providence as if we had helped all we could and had something to do with the final framing of the bill. It is a good measure and THE CIRCULAR-WEEKLY is to be congratulated on the support it has given it. I have caused to be written a letter of thanks in behalf of the association to Congressmen Vreeland, of New York; Aldrich and Wetmore, of Rhode Island, for the interest they have taken in pushing the bill."

Former President Henry G. Thresher said: "There is every reason to feel extremely good over the passage of this bill. THE CIRCULAR-WEEKLY and all others who have helped in getting it through are deserving of the thanks of the jewelers throughout the country who are interested in seeing such a law on the statute books. Congressman Vreeland did some good work on this bill and so did Senator Aldrich, and the almost record-breaking way in which it went through without a hitch, shows what powerful influences were back of the bill."

COMMENTS BY BOSTON JEWELERS.

"The stamping bill just signed by the President is certainly a good thing, both for the protection of the dealer who wishes to sell reliable goods and of the public, who should receive nothing but reliable goods in return for their money. THE CIRCULAR-WEEKLY should be congratulated and its efforts very much appreciated by both the dealers and the public. I wish we could get more good laws passed for the protection of the public."—J. C. Sawyer.

"There can be but one sentiment among all jewelers who want to sell honest goods, and that is, to heartily endorse a bill that favors keeping up the standard of quality, and to appreciate the interest shown in the matter by THE CIRCULAR-WEEKLY."—C. W. Davidson, of Thomas Long Co.

"The passage of this bill is one of the best things that ever happened for the jewelry business. It will drive out lots of the unscrupulous manufacturers who make and sell spurious goods. It secures universal conformity in this country to recognized standards, and should compel the manufacturer to keep his goods up to the quality that he represents them to be. THE CIRCULAR-WEEKLY has done good work in urging the adoption of this measure."—Carl D. Smith, of Smith, Patterson Co., 52 Summer St.

"All jewelers of high standing and honest intentions throughout the country have been in favor of the bill, and acknowledge the value of the efforts of THE CIRCULAR-WEEKLY. A special feature with us is the furnishing of prize and presentation silverware, medals and such goods. We have encountered competition which could only be successful by means of estimates based upon the furnishing of goods of inferior quality. The stamping law should put an end to that sort of business, and we welcome it most heartily."—Fred M. Wood, of N. G. Wood & Sons, 128 Tremont St.

"The law is an excellent one, and THE CIRCULAR-WEEKLY deserves credit for its part in securing the passage of such a good bill. I believe that goods should be stamped with their quality, and I would also like to have manufacturers compelled to stamp their trade-mark or some mark that would identify the maker upon their products."—George E. Homer.

Death of Max J. Lissauer.

The trade in New York was shocked yesterday to hear that Max J. Lissauer, head of the firm of Lissauer & Co., one of the most prominent wholesale jewelers in the trade, had died suddenly at Amsterdam, Monday, whether he had gone, accompanied by his wife, a short time before. Word of Mr. Lissauer's death was received at the office of his firm, 12 Maiden Lane, in a cablegram from Mrs. Lissauer Monday morning. No details were given except that Mr. Lissauer had been in the best of health up until his death. Deceased sailed for Europe from this country on May 30, and had just finished making purchases of diamonds in the diamond markets when he was gathered in by the Grim Reaper.

Few men in the entire jewelry trade were better known or more generally liked, hon-

THE LATE MAX J. LISSAUER.

ored and respected than was Max J. Lissauer. He was a native of Wurtemberg, Germany, having been born in the city of Stuttgart, Oct. 21, 1841. He learned the jewelry trade in the town of his birth, and came to this country in 1860, settling in New York, and entered the jewelry trade here with a watchmaker in 86th St.

In 1866 he formed the firm of Lissauer & Co., which was later succeeded by the firm of Lissauer & Sondheim, and soon began to build up a large and extensive business as jobbers in watches and jewelry and importers of diamonds. To this firm Samuel Joel was subsequently admitted, and the style continued until 1892, when the partnership dissolved and was succeeded by Lissauer & Co., composed of the deceased and his nephew, Max Kallman. Later another nephew, Macel M. Mirabeau, was taken into the concern, the firm being composed of these three at the time of Mr. Lissauer's death.

Mr. Lissauer was president of the Jewelers Relief Association, a director of the Jewelers Board of Trade, vice-president of the Jewelers League and chairman of the executive committee of that organization, ex-president of the Verein Freundschaft and the chairman of the jewelers' committee of the recent Russian Relief Association, a director in the Hudson County Realty Co. and of the Columbia Bank, and in addition was prominently identified with many charitable organizations.

Mr. Lissauer is survived by his widow, a

A full sketch of the career of Mr. sauer will appear in the next issue of CIRCULAR-WEEKLY.

Gold and Silver Stamping Bill Considered by Canadian Parliament.

OTTAWA, June 14.—In the Banking Commerce Committee of the Senate a bill was considered respecting the sale manufacture of gold and silver. It provides that gold, silver and plated ware shall be of the quality indicated by the marks on them. A manufacturer may make gold, silver and plate without marks, but if a mark is put on, it must be the name or trade mark, a date mark and a quality mark prescribed by the act. Articles of less than 10 karat shall not be sold as gold. The word "sterling" shall mean .925 pure silver.

In the case of gold-filled, rolled plate or silver, the actual fineness and weight of the gold and silver in or on the article shall be indicated on the box or article. Imported goods have to correspond to their marks. A maximum penalty of \$100 is provided for each article improperly marked.

W. K. McNaught, of the American Watch Case Co., who appeared for the jewelry section of the Canadian Manufacturers' Association and the Canadian jewelry manufacturing trade in general, said that the present great fraud was practised by manufacturers marking 10-karat gold, 14-karat gold, or 16-karat gold, and marking their articles as sterling, when they were below those grades, and guaranteeing plated goods to wear 10, 15 or 20 years which would not wear anything like the time specified. He explained that the bill was for the protection of the public.

This bill, which is held for further consideration, is the result of a combined effort on the part of Canadian manufacturers put an end to a condition of things which has reflected disgrace on the trade. Jewelers belonging to the Canadian Manufacturers' Association met some months ago at the Windsor Hotel in Montreal and agreed upon the present action.

Arrangements have been completed for the 27th annual outing of the New England Manufacturing Jewelers' & Silversmiths' Association Friday of this week. At 10 o'clock the members and guests will assemble at Free Mason's Hall, Providence, R. I., and at 11:30 the line will be formed and will proceed, headed by Reeves' American Band, over a brief line of march. The steamer will then be boarded and the company will proceed to Field's Point, where a shore dinner will be served. At 2:15 the boat will leave for a sail down the coast. A baseball game between nine, representing Attleboro and Providence, will be played at some suitable spot "down the river" and at 5 o'clock the party will again board the boat for a continuation of the outing. Lunch will be served during this trip. At 7 o'clock the party expects to be in Providence. The Executive Committee, consisting of Frank B. Reynolds, Chairman, M. Robbins and Harry Cutler, are in charge of the affair, assisted by the officers.

Trade Conditions in San Francisco Improving Daily—Many Firms to Resume Business on Van Ness Ave.

SAN FRANCISCO, Cal., June 13.—The situation in San Francisco is improving every day. The amount of work now going on is almost past belief, although, of course, much of it is of a temporary character. One day you may see lines of wagons holding debris from a lot, the next day an army of carpenters are busy, and if you come back in a week's time you may see a new wooden building with an up-to-date store front and a full stock of goods for sale inside. The steam railways are now hauling debris out of the city as fast as insurance companies will allow the lots to be cleared.

Plans for dozens of large structures are being drawn, and in some cases actual construction work has been commenced. For a time the outlook seemed dubious, but now that minds have become concentrated on business affairs once more, every one is forging ahead with a better feeling. The retail jewelry trade a great amount of business is not being done, because people are not buying much in that line just now and tourists are not numerous.

One of the great drawbacks to the local rail trade is the lack of hotels here now. Thousands of sightseers throng the streets every day, but as their stay is limited, owing to the utter lack of accommodations here, they make no pretense of shopping, as they would were time no object to them. The new retail center now located on Fillmore St. promises to be supplanted to a great degree within the next month by the Van Ness Ave. section, which is rapidly being built up. Here are to be had many of the advantages that Fillmore St. lacks. It is nearer the old business district by many blocks, is a beautiful wide street with handsome residences on one side and the ground on the other, so that stores may be put up to suit tenants and not have to be altered from old buildings.

Shreve & Co. have decided to locate in the Van Ness Ave. district pending the pairing of their building at Grant Ave. and Post St., and have secured a three years' lease on a lot at Van Ness Ave. and Sacramento St., adjoining the ruined mansion of Claus Spreckles. A handsome one-story building will be erected there as soon as possible.

Hammersmith & Field will locate at Broadway and Van Ness Aves., and carpenters are now at work on the store, which is expected to be open Wednesday, June 20. The Bohm-Bristol Co. has secured a lot on Van Ness Ave., just across from Shreve & Co., and expects to be located there within two months. The Baldwin Jewelry Co. has also decided to locate on Van Ness Ave. until the downtown section is ready for retail trade again, and has secured a site for a store near the corner of Sutter St. The Berteling Optical Co. will locate on Bush St., near Van Ness Ave., and install a complete plant. Market St., however, is not being entirely neglected in the rush of resuming business. T. Lundy is putting up a store at its old location on Market St., near Grant Ave. Adjoining this will be the new store of the L. E. Waterman Co., whose handsome home at 18 Geary St. was destroyed

shortly after being newly fitted up. Across the street from here the J. A. Sorensen Co., for many years located on 6th St., near Mission St., will occupy a store in the Kamm building.

Woman Employed in Buffalo Jewelry Store Arrested and Charged With Many Thefts.

BUFFALO, N. Y., June 16.—By the arrest of Mrs. Carrie Schlenker, saleswoman in the retail department of the Freeman Jewelry Co., 84 Seneca St., Manager Pickert claims to have ended a systematic and baffling scheme of robbery. Mrs. Schlenker's arrest occurred on Monday, and yesterday she was held to await the action of the Erie County Grand Jury on a charge of grand larceny, first degree. Manager Pickert says the woman has taken in cash and jewelry, principally watches, a total of something more than \$1,200.

Mrs. Schlenker is about 42 years of age. She came to Buffalo from Batavia, in which place she was implicated in a forgery case, but the evidence was insufficient to warrant her arrest. She had been employed in the Freeman Jewelry Co.'s store here more than a year.

Watches and money had been disappearing most mysteriously. Mr. Pickert made up the cash deficit in the money drawers. Even then the cash would be short at the close of business every day. On the day of the arrest Mrs. Schlenker left the store ostensibly on an errand. Mr. Pickert had missed a watch that day, and had strongly commented on the fact. He therefore followed Mrs. Schlenker. She entered the Forster pawnshop, at Seneca and Washington Sts. Mr. Pickert, after a few minutes, followed her and saw her redeem a watch. Mrs. Schlenker arrived at the store just ahead of the manager, but not in time to replace the watch in the show case. Mr. Pickert said nothing about the watch, but sent her on an errand. In her absence he searched her coat and found, he says, 38 pawn tickets for watches and other jewelry.

In the meantime the police had been notified. Mr. Pickert and a detective followed Mrs. Schlenker, found her on the street and confronted her, demanding the watch she had redeemed from the pawnshop. She denied having it at first, but finally took the watch from the bosom of her dress and admitted the theft. She was then locked up.

The prisoner's plea is insanity. She declares she has not been right in her mind for a long time.

Two Clever Women Thieves Visit Jewelers of Alton, Ill.

ST. LOUIS, Mo., June 14.—J. H. Booth and Joseph Bauer, retail jewelers of Alton, Ill., reported to the police here that they were robbed of six diamond rings by two women, who worked a confidence game. Two of the rings came from Mr. Bauer's store and four from Mr. Booth's. Mrs. Annie Lohr, a young woman, living on Missouri Ave., near Collinsville Ave., in East St. Louis, Ill., was arrested by detectives Hurley and Nevills of the East St. Louis police department as a suspect.

One of the women was large and well dressed; the other, a blonde, was smaller and not so well dressed. They asked to see diamond rings, also other articles to

get which the clerk would have to turn his back. The large woman carried a handkerchief, with which she managed to cover up some of the jewelry that was spread before her, and when Bauer picked up the handkerchief four rings fell from it, but he failed to recover two others. The women pursued the same tactics at Mr. Booth's store, and also tried to get other diamond rings from C. L. Goulding, but failed because they aroused suspicion.

Mrs. Lohr was arrested on the streets of East St. Louis. She had two valuable diamond rings on her fingers and in her possession were also found pawn tickets for earrings, a watch, a brooch and several rings. She denies the charge, declaring that her husband, who is now in the Louisiana State Penitentiary, gave her diamonds and jewelry. The jewelry was identified by the jewelers and the woman was held.

Son of Philadelphia Jeweler, Kidnapped a Week Ago, Rescued by Police.

PHILADELPHIA, Pa., June 18.—The most sensational case of kidnapping in which any jeweler in the trade has ever been involved was solved to-day when Freddie Muth, the seven-year-old son of Charles Muth, was restored to his father in the office of Mayor Weaver, and the kidnapper, the first to risk a life sentence in this State, was also brought before the Mayor and finally committed to jail.

While the public and trade wondered and became skeptical the detectives, always sure their man had not left town, waited their opportunity to seize their criminal prey. This opportunity came to-day. The boy and the man who kidnapped him were found in a newly built but yet unoccupied house at 63d and Vine Sts. The little lad was asleep, making a pillow of the school books which he had with him when the man took him from his school under pretense of taking him to his mother, whom he said had been seriously injured. All sorts of clues were followed out, and though the detectives were assured that they had the right man, they were careful to mislead the public and the newspapers as far as possible that the suspect might not make his escape. It was known that the man's first intention was to kidnap the child for a handsome ransom, and much anonymous correspondence passed between him and the officials and members of the Muth family.

The man arrested is John Joseph Keane, a former well known real estate agent and broker, but now in a position of little consequence in connection with a West Philadelphia building operation. He had hidden the Muth lad in one of the untenanted houses in an operation of which he had charge. When trapped he attempted an escape, which was cut off by a show of weapons. The boy was found safe and sound. The prisoner is a married man with three children, which fact makes his crime all the more incomprehensible. In the week in which the Muth child has been away his mother has been bordering on the verge of nervous prostration.

Mr. Muth has occupied the store at 1632 Columbia Ave. for about seven years. He has been widely known and much esteemed in the local trade for more than 10 years. His Columbia Ave. store is one of the handsomest and finest in that section of the city.

NEW YORK, 41 Maiden Lane

Conrad Schickerling Arrested on Complaint of Gustave Edelhoff—Indignant at the Charge.

Conrad Schickerling, who was president of Schickerling Bros. & Co., bankrupt jewelry manufacturers at 28 W. 22d St., New York, was placed under arrest on Thursday last week on a warrant obtained by Gustave A. Edelhoff, the president of Edelhoff Bros. & Co., who were retailers at 574 Fifth Ave., and who, also, are in bankruptcy. The warrant charged that the defendant counted a quantity of diamonds, valued at a little more than \$6,000, that were entrusted him on memorandum.

It is learned that the proceedings were instituted in a convenient manner to bring before the court several disputed matters which have grown out of the failures of the two corporations. The expectation is that Mr. Schickerling is held for the Grand Jury then the prosecution will present to the body testimony in relation to other charges of a somewhat similar character.

It will be recalled that when the Edelhoff corporation failed charges were made that Mr. Schickerling was responsible for the embarrassment. It was said that he had organized the corporation, and had used it as a dummy to obtain stock and credit, which he could no longer obtain on the credit of Schickerling Bros. & Co., who were then insolvent. When the Edelhoff directors met, Abe Gruber, as counsel for the officers of that corporation, made a statement in their behalf which reflected seriously on Mr. Schickerling. The lawyer said that the Edelhoff brothers were boys, who had been led into the business without experience, relying entirely upon Mr. Schickerling, who was their father's friend.

According to the story, as then told, the organization of the Edelhoff corporation was a sham from the beginning. Mr. Schickerling, it was said, ostensibly put in \$8,000 in merchandise for the company's stock, but immediately took away the merchandise, substituting notes for it. Thereafter it was said he induced the Edelhoffs to go down to the Maiden Lane district and buy diamonds and other stock, which he was to make up into jewelry. For some of this jewelry, it is said, he said that orders had already been received and other jewelry was to be made for the retail store. Instead of filling orders and stocking the store, it was asserted that a large quantity of the diamonds were taken to the pawnshops by Mr. Schickerling, who in this way raised cash, which he put to his own immediate uses.

The charge in the present case is based on one of these transactions. Edelhoff, in an affidavit, says that on Jan. 24, 1906, his firm received a memorandum order from Schickerling saying that he would like to have diamonds purchased for him to fill an order for a lorgnette chain given him by Oscar L. Richards, president of the State Bank. He wished to see if he could match what diamonds he had already.

Edelhoff affirms that he went to Henry J. Oppenheimer, 3 Maiden Lane, and obtained 19 diamonds of about 19 carats weight, valued at \$175 each, and 20 diamonds of about 19 carats weight, valued at \$147 each, and delivered them to Schickerling.

When he demanded the return of the diamonds or payment for them, he says he was delayed until Feb. 7, when Schickerling confessed that he had pawned them at William Simpson's pawnshop, 155 Bowery. The tickets for the pawned gems were handed over to Edelhoff in Lawyer Abe Gruber's office, on Feb. 19. Then, the complainant alleges, he had to borrow \$6,732 from his father, part of which he used in redeeming the diamonds, upon which Schickerling had realized \$1,000.

After Mr. Schickerling was brought into the Tombs Police Court last Thursday he gave bail for \$3,000, and his examination was set for Friday of this week. Mr. Schickerling has frequently denied all the charges against him as far as they involved any criminal conduct. In the case of the Oppenheimer diamonds he denies that the transaction was of a memorandum character. According to his statement the diamonds were sold to him the same as other stock. Mr. Schickerling adds that he turned over two-thirds of the money obtained from the pawnbroker to the Edelhoffs for use in their business, retaining one-third for use in his own business.

It is claimed by Mr. Schickerling that the Edelhoffs were all of the time cognizant of what was going on in the business, and that he did not mislead them in any respect. He says that they hold pawn tickets for \$36,000 as security for the \$6,000 paid in redeeming the Oppenheimer diamonds. If they will return the pawn tickets held as security, he says, it will be easy enough for him to refund the \$6,000. His friends say that an effort is being made to use him as the scapegoat.

Mr. Schickerling says that he has acknowledged the Edelhoffs in writing to show that he personally bought much jewelry from them, paying partly in cash and partly with his personal notes. He says that such evidence will refute the charge that these transactions were of a memorandum character. He adds that to the extent of his ability he will meet these personal notes as they fall due, and if he cannot pay them on maturity he intends to pay them all in time.

Leonard Bronner represents Mr. Schickerling. The Edelhoffs are represented by Col. Gruber and C. A. McKenzie, the latter being counsel for the receiver of Edelhoff Bros. & Co. It is expected that the proceedings in court will throw considerable light on the affairs of the two corporations, which have been so interwoven that the exact nature of some of the transactions has not yet become fully understood.

In the daily papers the reports of the arrest of Mr. Schickerling were given an exaggerated turn. It was said that the case had something to do with that of the two officers of the Klein Bros. Co., who recently pleaded guilty of grand larceny. The attorneys in both cases say that there is no connection of one with the other. Many other statements in the daily papers are also said to be absolutely without any foundation in fact.

Edward Clouser, for many years in the employ of J. W. H. Mortimer, Pottsville, Pa., died recently, aged 48 years. He is survived by his widow and four children.

C. P. Goldsmith & Co. Win Suit Against Hammel, Riglander & Co.—Appeal to be Taken.

The case of C. P. Goldsmith & Co. against Hammel, Riglander & Co., an action for an alleged breach of contract, was tried before Justice Dowling and a jury in the Supreme Court, last Friday, and a verdict of \$1,688 was awarded to the plaintiff. The testimony indicated that in May, 1904, the defendants ordered a quantity of manufactured articles from the plaintiffs. A part of the order was thereafter delivered and was returned by the defendants on the ground that the gold plating of articles was not up to the guarantee. It was claimed that the plaintiffs had agreed that the goods should be "14 karat filled, acid-proof stock."

The plaintiffs denied that such a representation of quality had been made, but set forth that in fact the articles were plated with 14 karat gold, and could stand any reasonable acid test that should be applied to articles of that character.

At the trial some of the articles in controversy and others were actually tested before the jury. The issue seemed to turn on the character of the test. The plaintiffs claimed that plated ware of this character should not be submitted to the test of chemically pure nitric acid. It was claimed that so severe a test, especially if the articles were allowed to remain a considerable time in the acid, would not give a satisfactory result, and that in fact the acid would eat through the plating and reach the filling. According to the usage of the trade, the plaintiff claimed articles of this kind, selling at 12 cents each, are subject only to milder acid tests which they would meet satisfactorily.

The jury agreed with the plaintiff, awarding a verdict for the full amount of damages claimed for the breach of contract. Afterward the defendants served notices of an intention to appeal. Wm. Victor Goldberg represented the plaintiffs as attorney. Einstein, Townsend & Guiterman appeared for the defendants.

Nels Frandsen Asks to be Declared a Voluntary Bankrupt.

OMAHA, Nebr., June 16.—Nels F. Frandsen, a jeweler at 109 S. 16th St., has filed a voluntary petition in bankruptcy in the United States Court. He states that he owes \$8,439.01 and has property amounting to only \$9,105, including that which is exempt.

Mr. Frandsen originally started in business in 1899, and later formed the firm of Frandsen & Abel. The partnership was later dissolved, and he succeeded to the business, continuing it alone until the early part of the year, when he admitted as a partner Edward J. Andersen, who had been with him for some years as clerk, the style becoming Frandsen & Andersen. He has been prominent in the trade, well regarded and was believed to have a capital of about \$5,000.

Thieves recently broke into the store of Lee Thompson, Andrews, Ind., and stole \$200 worth of jewelry. The safe, which contained a large amount of valuable stock, was not molested.

New Stores and Enterpris.

Emil Walters is a new jeweler in Wood, Wis.

W. E. Hotchkiss has opened a store in Canton, S. Dak.

James Medley recently started in business in Wausau, Wis.

A. S. T. Mahnberg has begun business in Chicago City, Minn.

J. A. Robinson is now engaged in business in Lyndon, Kans.

Henry Birkestrand will shortly engage in business in Huxley, Ia.

J. Walker commenced business in Lyndon, Kans., a short time ago.

Fincher & Osment will shortly open a tail jewelry store on Greensboro Ave., Caloosa, Ala.

A. J. Calkin, Ione, Ore., has moved to Lexington, where he has secured room and will open a store very soon.

A. U. Schleudecker & Son are new jewelers in Erie, Pa., where they opened a store at 1027 State St.

Chas. V. Keeling and Chas. Allen recently started a wholesale jewelry business in Montreal, under the name of C. A. Re

Martin & Co. have opened an attractive furnished store at 211 Main St., Evans Ind. Sol Martin, Jr., is the manager of the concern.

R. F. Newman has leased one of Mr. Stewart's buildings at North Yal Wash., and intends opening a jewelry store at that place.

The Cousins-Carroll Jewelry Co. is the name of a new concern which recently began business in Bessemer, Ala. The incorporators were: J. M. Cousins, Mrs. A. L. Cousins, and A. S. Carroll, Jr.

The Larney-Barr Jewelry Co. is a new concern which was incorporated last month in Camden, N. J., to deal in jewelry, clocks, watches, etc., with a capital of \$75,100. The incorporators were: A. Larney, E. C. Barr, and H. A. Davis.

The Logan-Shipley Silver & Clock Co. has been incorporated, with a capital of \$15,000, fully paid, to manufacture and sell clocks, silverware and novelties. Logan and R. P. Shipley have 65 shares each, and J. C. McCoy 20 shares. The store is located in the Star building, 12th and Olive Sts., St. Louis, Mo.

Columbus, O.

D. S. Miller and his bride will return to New York from a two weeks' wedding tour to New York, Philadelphia and other points in the east.

R. N. Whitford, of the Hofman Jewelry Co., has returned from Los Angeles, where he went to inspect claims of so-called precious stones. The firm acquired during his stay there, and he brings encouraging reports as to its possibilities.

Jesse E. North and Miss Flora Braun, daughter of Leo Braun, a jeweler in Springfield, O., were married in Columbus, June 12. There was no objection to the match, but the young people disliked the idea of a formal wedding and came to Columbus and were married without notifying any of their friends, until the event was over.

The Diamond Markets.

BRIDGEPORT, June 7.—The month of May was without any change in the business situation. The diamond trade is quiet, except for mellee, which are in good demand, prices of which are continually rising. Foreign buyers who have been here have been particularly desirous of obtaining very small brilliants of good quality, very small roses. There is no demand for faces or brown roses. Rough goods, small brilliants and mellee are not much in demand. Several rough series of Western, Kimberley, Jagersfontein and Bulwer were bought in London by our large manufacturers.

The following foreign buyers have been during the past fortnight: Messrs. Adler, Jacobson, Oppenheimer, Lieberman, New York; Messrs. Gross, Weinman, Metzka, Steiner, Vienna; Mr. Martino, Naples; Messrs. Slycer, Slabotzky, B. Rapoport, D. Van Praag, Weissberg, André Lévie, Lambert, Gounet, Paris; Messrs. Stodt, Kroll, Elld, Messrs. H. Strauss, Vichman, Van; Mr. Benham, Constantinople; Mrs. L. Van Moppes, Mendelsohn, Khorst, Kauffmann, London; Mr. Zipf, Lemberg; Mr. de Botton, Salonique; Oakley, Birmingham; Mr. Myers, Boston; Mr. Bianowici, Czernowitz.

PARIS, June 6.—The end of May has shown activity in the precious stone trade, and business has been done especially with Spain. Large lots of brilliants and pearls have been sold to firms of Barcelona and Madrid. The marriage of the King of Spain has been the cause of the activity in the jewelry trade there.

Roses have not been very much in demand during this fortnight, but June is generally a good month for their sale, and merchants hope that this year will not mark the rule. Very small roses of 300 to 400 pieces per carat are in demand, for which about 100 francs per carat is paid. Some lots of mixed roses of 100 to 150 pieces per carat were also sold.

The following firms have been declared bankrupt: J. O. Ohanian, a pearl merchant, living at 45 Rue Laffitte, and André Sabat, 53 Galerie, Montpensier, at the Palais Royal.

The marriage is announced of Mr. Aron, a diamond merchant, to Miss Davis, of London.

A new firm has been established here under the style of Marquand & César, 12 Rue Lafayette, with a capital of 140,000 francs.

AMSTERDAM, June 7.—The presence of several American buyers brought activity to the market at the end of the last month. The goods chiefly sold consisted of mellee of two, three and four stones per carat. Several lots were sold to firms of London. Representatives of the following American buyers have been here: S. Lindenborn, Klijn, Frank & Shire, Zimmern, Rees & C. L. & M. Kahn & Co., Fox, Bros. & Co., Tomar, Goldsmith & Co., Laubheim & Co., William I. Rosenfeld, Oppenheim & Suss, Levey Bros. Among the European buyers were: Y. B. Kaufmann, London; Mr. Oakley, Birmingham; Messrs.

Lambert Freres & Co., L. Prager and A. & E. Worms, Paris.

The firm of Peter Abas & Co. has changed its style to Abas & Furth.

Series of rough are bought at London now to a great extent, but the competition is always brisk. For a single lot there are often 25 buyers. Mr. Ehrman, of the firm of Ehrman & Balshen, is now the London agent of the Premier Mine Co. Max Friedlander, who was the agent of the company since its foundation, has left the concern, but the reason is not known.

Death of Chas. Rubens.

Word was received in New York Monday of the death at Paris, France, about June 1, of Charles Rubens, who was for many years engaged in the Swiss watch importing business at New York.

Mr. Rubens was 87 years old at the time of his death. When he came to New York

OBVERSE AND REVERSE OF MEDAL PRESENTED TO BARON ROSEN.

as a young man he engaged in the watch business, and was one of the first to import Swiss watches for the trade in this country. He built up a large and prosperous business, which in the early 60s was at its height. He was at that time one of the largest watch importers in New York, having his offices at 21 Maiden Lane. In the early 80s, after a successful career of a quarter of a century in New York, he decided to retire, having accumulated a sufficient fortune on which to take things easy for the remainder of his life. He went to Paris, where he had since resided. About four years ago Mr. Rubens was bereft of his wife.

Many old members of the trade will recall Mr. Rubens as a man of amiable disposition, a sturdy friend and a straightforward merchant. He was held in the highest esteem in the trade during all the years of his active business life, and in his retirement enjoyed the continued friendship of his old associates.

Market Price of Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmerman & Forshay:

	New York.	London.
June 12.....	\$64 3/4	29 13-16d.
" 13.....	64 3/4	29 7-8d.
" 14.....	64 1/4	29 11-16d.
" 15.....	64 1/4	29 9-16d.
" 16.....	63 3/4	30 1-8d.
" 18.....	65 3/4	30 1-4d.

Medal and Silverware Presented to Baron Rosen Upon His Visit to Bridgeport, Conn.

BRIDGEPORT, Conn., June 16.—One of the most pleasant features of the visit of Baron Rosen, the Russian Ambassador, to this city, last week, was the presentation of a number of souvenirs which were made in the factories of this city. One of the most conspicuous of these was the medal, in silver, which was given during the dinner tendered by the Board of Trade Friday night. This medal, which was from a special design, was two inches in diameter and was designed and made by the E. H. H. Smith Silver Co. It was intended to be emblematic of the diversified industries of this city.

On the obverse, in the center, was a facsimile of the seal of the city, and surrounding this upon a raised ribbon were the words "Seal of Board of Trade, 1876,"

Bridgeport, Conn." Surrounding this were emblems of the leading industries of the city. These included a full-rigged ship, an automobile, typewriter, silverware, cart-ridges, artillery guns, sewing machine and an electric motor. Surrounding these were two inscriptions, the upper one being, "Dinner to Ambassador Baron Rosen" and the words "Made in Bridgeport." On the reverse were the coats of arms of Russia and the United States, with the words, "130 Years of Friendship."

Besides the medal the Baron was presented with a set of gold plated silver knives and forks by the E. H. H. Smith Silver Co. These were of the American Beauty pattern and were from the regular stock of the company. The International Silver Co. presented him with a gold meat fork, and the American & British Co. gave a toilet set of unique pattern made from brass shells.

John A. Diem, Jefferson, Ore., has moved to Mt. Angel, Ore.

Contrary to a previously published report, the Kann Bros. Silver Co., Baltimore, Md., is not moving into quarters adjoining its present location at 303 W. Lexington St., but is retiring from the retail jewelry business in order to devote its entire time to the manufacture of silverware, replating and repairing. The concern has leased its present building, and will move its factory and salesroom, Aug. 1, to 525 N. Eutaw St.

Rochester.

Humburch Bros., 182 Main St. E., are conducting their annual inventory sale. Judge Hazel, of Buffalo, has announced the reappointment of Quincy Van Voorhis referee in bankruptcy for the Monroe county district.

M. B. Rosenthal, with Philip Present, turned from the road a few days ago, and will not go out again until August. Philip Present, who was selected as one of the delegates of the Rochester Credit Men's Association, to attend the meeting of the National Association at Baltimore last week, has returned home.

Alfred Kaplan, formerly at 301 Hudson St., has removed to 418 Clinton Ave. for the reason among others that the location seemed to be an operating district for all the thieves and swindlers who come to Rochester. Mr. Kaplan has been a victim of crooks four or five times during the past year. Mr. Kaplan will engage his stock, and his new quarters being commodious, he will have a better and easier store than before.

Justice Chadsey a few days ago refused to issue a warrant for the arrest of John Nudd, who conducts a jewelry establishment on East Ave., on information sworn out by K. Wassenski, in which it was charged that the jeweler had defrauded John Nudd. Nudd teaches apprentices the watchmaking and engraving trade, and the complainant claims that he paid Nudd \$100, which was to be refunded in 30 days if everything was not satisfactory. He claims that demands for the money did not produce it. The warrant was refused on the ground that it was a controversy for civil court action. Nudd denied that he had failed to live up to the contract made with his pupils, and attributed the whole matter to spite work on the part of a rival jeweler, so he claims visited his shops recently and threatened his pupils and himself with arrest. He claims that the man induced one of his pupils to leave, but he denies that Wassenski paid him more than \$50, or that he ever demanded the return of his money at the end of 30 days. Nudd says that he will begin an action to recover damages from the jeweler who is at the bottom of the whole affair.

Buffalo, N. Y.

Mrs. C. F. Chouffet is home from an extended visit in New York.

S. L. Levy, 483 Main St., will spend part of the summer at the Thousand Islands. Fred C. Smith goes on the road next week for Chas. F. Damm. It is Mr. Smith's initial trip.

The Beck Mfg. Co., 113 Clinton St., jewelers, has added a safe department to the establishment.

Hugo Kuster, Main and Genesee Sts., goes next week to the St. Clair Flats, a fishing resort on Lake Erie, near Detroit, Mich.

T. & E. Dickinson & Co.'s tower clock over the old store at 252 Main St. has been taken down, thus removing a sort of landmark from that section of the city. The clock had for many years been one of the most familiar objects in Main St. It will be mounted on a handsome post at the edge

of the sidewalk in front of the new Dickinson store, 432-434 Main St.

Walter Harrington, who pleaded guilty to the theft of \$3,000 worth of diamonds from the store of Paul Foerster, 134 Seneca St., has been released from the county jail on \$1,000 bail. The authorities expect to use him in an effort to connect Eugene Lobel and Peter Regan with the robbery. Lobel and Regan, however, are still at large.

Buffalo jewelers, especially those who deal in souvenirs, were benefited by the convention of the National Jewelers' Protective Association here last week. In the way of souvenirs this city is especially fortunate. Pictures of Niagara Falls on silverware are an especial valuable asset in many of the jewelry store. Traveling representatives of jewelry houses, by reason of the convention, had difficulty in securing hotel accommodations, as a result of which most of them departed on the same day they arrived.

Connecticut.

L. V. B. Hubbard, Shelton, on Sunday of last week distributed over 300 roses to persons who passed his place on their way to and from church.

Otto Hauschild and wife, Meriden, celebrated their golden wedding, Friday. Mr. Hauschild has been in the employ of the Bradley & Hubbard Mfg. Co. many years.

The Seth Thomas Clock Co., Thomaston, is about to install a new tower clock in the town hall of Stamford. S. Kronholtz will have charge of the winding and cleaning of the clock for the first year.

Considerable attention is being directed to the show window of C. Howard Daley & Co., Danbury, by several mounted quail which are placed on exhibition there. The birds were mounted by Geo. Beeker, of Bristol.

The fire department was called out about seven o'clock Tuesday morning, of last week, to extinguish the blaze in the blasting room of the Morgan Silver Plate Co., Winsted, but the services of the firemen were not needed.

A. L. Atwood, Bristol, on Tuesday of last week, celebrated his 90th birthday, and a large number of friends called to pay their respects and offer congratulations. Mr. Atwood is a veteran clock maker. He retired from active business 30 years ago.

Exhibited in the library of the Connecticut Historical Society, in Hartford, are three tools which were used by Alexander Anderson, the first American wood engraver. Mr. Anderson was born in New York, in 1775, and died in 1870.

An addition will shortly be built to the plant of the Wallace-Barnes Co., Bristol, which manufactures steel clock springs, etc. The structure will be of brick and steel construction, 40 by 140 feet and four stories high.

The case of John Rolston, alias Barney Haines, who was arrested a short time ago on a charge of being implicated in the theft of a diamond pin from the store of the Davis & Hawley Co., Bridgeport, has been continued, and the accused is held in \$500 bonds. Rolston has also been identified as the man who stole a diamond ring from a New Haven jeweler.

Boston.

Charles A. Easton, salesman for N. G. Wood & Son, is ill at his home in Hyde Park.

E. A. Bigelow, treasurer of the E. Howard Clock Co., is in New York on a business trip.

Charles W. Smith, formerly with Harwood Bros., has taken a position with the Globe Optical Co.

Frank H. Gale, of the Gale Jewelry Co., Norfolk, Va., was among the visitors in town during the week.

The New England Association of Opticians held its regular monthly meeting last evening at Young's Hotel.

D. C. Percival, Jr., has gone to the Rangeley Lakes for the remainder of the month, being in camp at Barker, Me.

H. W. Patterson, of the Smith-Patterson Co., was in Baltimore last week attending the National Association of Credit Men's convention.

I. Charles Nye, clerk for William A. Thompson, was united in marriage with Miss Bailey, of Malden, Tuesday evening, June 12, in that city.

R. J. Taylor, heretofore with R. H. Ingersoll & Bro., has taken a position with E. A. Cowan, and will travel in the west for the Boston concern after July 1.

The magnificent chime clock on the new Christian Science Church in Boston was built by the E. Howard Clock Co. It has a 4,000-pound bell for the striking of the hour and a full set of chime bells.

Emma A. Sylvester, dealer in beaded and art work jewelry, at 3 Winter St., has taken the "Maplewood Shop," at Maplewood, N. H., and will have a branch store there during the Summer season at the mountains.

The New England Watchmakers' Club was pleasantly entertained at the American House in Boston last evening, having been tendered a banquet by the Waltham Watch Co., whose representative of the manufacturing department in the Boston office, F. W. Ruggles, is president of the organization. A full report of the meeting will appear in the next issue of the CIRCULAR—WEEKLY.

At the midsummer meeting and banquet of the Boston Jewelers' Club at Point Shirley last week six new members were admitted, namely: Herbert A. Sawyer, Boston representative of the Gorham Mfg. Co.; Richard T. Supple, representative of William B. Durgin Co.; G. A. Henckel, New York; A. Connett, New York; Edward K. Colby, Newburyport, and Newton B. Eltinge, New York. Among those present at the dinner were: Charles O. Lawton, D. C. Percival, H. W. Patterson, Charles F. Morrill, H. E. Slater, E. H. Ensign, F. R. Hollister, Col. John L. Shepherd, W. W. Williams, E. Cooper Stone, Benjamin F. Griscom, Charles H. Singleton, Edwin S. Simmons, E. R. Crippen, Harry F. Hayes, A. S. Cook, Jr., John B. Humphrey, M. N. Smith, "Jack" Townsend, Emery Clement, G. A. Henckel, Newton B. Eltinge, Ray Randall, W. L. Washbourne, Mr. Graff, Charles Cook, Oscar C. Lane, J. T. O'Connell, Frank H. Elliott, Fred E. Chick, Carl D. Smith, J. C. Bachelder.

GORHAM LEATHER GOODS

A SEASONABLE SUGGESTION

¶ June, July and August are undeniably the "Travel Months" of the year, a fact which further suggests the increasing attention that is paid by people of refinement to the appearance and quality of their traveling equipments.

¶ For this reason the Gorham Manufacturing Co. desire to call attention to the high character of workmanship, originality of design and the admirable quality of material displayed by the products of their Leather Goods Department.

¶ Especially notable is the assortment of Travelers' necessities, including Kit and Club Bags, and Dress Suit Cases for both Ladies' and Gentlemen's use, either plain or fitted with a complete set of toilet and traveling conveniences in Gorham Silver, Ivory, Tortoise Shell and Turtle Ebony.

ACCORDING to dispatches from Springfield, Ill., last week, the German Baptist Brethren at their annual conference adopted a report prohibiting members from engaging in the sale of diamonds, gold rings, gold watches, dominos, dice, playing cards and from articles for games of chance or display. And this was done in the United States of America in the year of our Lord 1906. Does the world move?

A National Stamping Law at Last. PROBABLY the most important piece of legislation ever enacted in behalf of the jewelry trade in the United States is the bill which became a law last week when President Theodore Roosevelt affixed his signature to the Jewelry Trade's Gold and Silver Stamping Bill, introduced by Representative Vreeland, of New York, and incorporated by THE CIRCULAR-WEEKLY. This measure, which becomes a law after a short campaign in which it received the ardent and unanimous support of all branches of the jewelry trade from every section of the country, is a bill that has practically been desired by the workers of gold and silver from the time of the beginning of the republic. That it could be obtained in a single session of Congress at a time when the calendars of both houses were choked with general legislation of the greatest political and economic importance effecting the welfare of the people of the whole country, is a surprise as delightful as it was unexpected.

The success of the movement for this bill, whose history is briefly traced on another page of this issue, is due in great part to four factors: (1) It was purely a bill made to promote honesty and to protect the public; (2) it sought to exploit and give advantage to no individual interest, industry or geographical locality; (3) it had the united and unqualified support of every one engaged in the trades and industries to which it applied, and (4) it was given strenuous and able backing by its friends in Congress and the trade. To Hon. E. B. Vreeland, who introduced the measure, first of all, the gratitude of the jewelry trade is due, not only for his indefatigable energy and work in and out of the halls of Congress in favor of the measure, but also for his broadmindedness and the deep interest which he took in the subject from the beginning, which helped to make possible the introduction of a single measure on the subject, expressing the views of and endorsed by all sections of the trade. Second only to the work done by Mr. Vreeland in the House was that of Congressman Sherman, who was temporary chairman of the committee of Congress which considered the measure; quick to appreciate the merits of the bill and the necessity of its passing, Mr. Sherman lent his every aid in not only getting votes for the measure, but in facilitating the work of getting it through the House. In the Senate the measure had many friends, but for its success credit is in great part due to Senators representing three States having large jewelry industries; namely, Senator Aldrich, of Rhode Island; Senator Kane, of New Jersey, and Senator Crane, of Massachusetts. All three not only favored the measure, but did everything in their power in its behalf.

For the work outside of the halls of Congress thanks of the trade are largely due to counsel who drew the bill and who has watched over it during its career, and to the members of the joint committee of the jewelers from New England, New York and New Jersey, to whose ability and disinterestedness in the work of perfecting it the unanimous support of the trade was in great part due.

THE CIRCULAR-WEEKLY, while congratulating the trade as a whole at the end of this memorable campaign, is especially proud that it has been able to be an agent in such a noble cause, and is gratified that its work in drafting the initial act, supporting the movement and helping to harmonize the various interests in the trade that might otherwise have worked on different lines to the same end, contributed so much to accomplishing that which the trade has so long desired. To the readers of this journal whose hearty support and co-operation has made it possible for us to be a factor in this great work, we extend our heartfelt thanks and express our sincere appreciation.

Death of Elizabeth Schaible.

Troy, O., June 14.—Elizabeth Schaible, widow of the late John Schaible, and senior member of the firm of Schaible Bros., of this place, having retained her husband's interest in the business, died at her home in this city Monday, aged 70 years.

The deceased was a native of Heiterbach, Germany, where she was born March 25, 1836.

Mrs. Schaible came to this country with her parents in 1849, and the family settled in Greenville, where, on Aug. 31, 1858, she was married to Mr. Schaible. The couple moved to Troy in 1873 and Mr. Schaible died in 1890.

The deceased is survived by six children. The remains were buried from her late home at 2 o'clock Wednesday afternoon.

Trans-Atlantic Voyagers

TO EUROPE.

I. H. Weinberg, New York, sailed Sunday on the *Zealand*.

W. S. Manheimer, of Louis Manheimer & Bro., Chicago, will sail to-morrow.

Leo Goldsmith, New York, will sail today on the *Kaiserin Auguste Victoria*.

W. A. Moore, Jr., of Alfred H. Smith & Co., New York, will sail June 23 on the *Deutschland*.

George M. Van Deventer, of the W. T. Bury Clock Co., New York, and wife sailed last week on the *Moltke*.

L. A. Breiting, president of the American Cuckoo Clock Co., Philadelphia, will sail Saturday on the *New York*.

Richard Friedlander, of R. L. & I. Friedlander, New York, will sail to-day on the *Oceanic*. On the same boat will sail Herbert W. Allen, of Herbert W. Allen & Co., Chicago; Frank K. Huff, vice-president of Mount & Woodhull, and Mrs. Huff, New York.

FROM EUROPE.

Irving Levinson, president of the S. L. Co., New York, returned last week. Charles N. Hancher, Wheeling, W. Va., arrived last Wednesday on the *Kaiser Wilhelm II*.

Wm. G. Pollack, of W. G. Pollack & New York, returned recently on the *Amerika*.

Joseph E. Whitten, Ripley, Miss., is now at Ensley, Ala.

New York Notes.

Charles E. Tripp, 411 Amsterdam Ave., took a week out of business.

Isaac Goldsmith, 9 Maiden Lane, will sail for Europe on the *Kaiserin Augusta* via Bremen.

Job J. Schmuckler, jeweler at 131 Canal St., and Miss Lazette Cohen, 113 Second St., were married June 10.

Isaac Weinberg, 14 Maiden Lane, sailed today on the steamship *Zeeland* to visit the diamond markets of Antwerp and Amsterdam.

Isaac Friedlander, of R. L. & M. Friedlander, 90 Maiden Lane, will sail tomorrow on the *Oceanic* to purchase diamonds in European markets.

W. Huggins, the president of A. I. & Son, San Francisco, Cal., has returned to the city for sometime making his headquarters with Larter & Sons, 21 Maiden Lane.

Frank K. Huff, the vice-president of Huff & Woodhull, New York, accompanied by Mrs. Huff, will sail to-day on the *Oceanic* to spend two months in the European markets.

Charles Jackle, 806 3d Ave., who some time ago obtained an injunction to prevent the Interborough Co. from constructing a third track through the street, has withdrawn his opposition, it is said.

Isaac S. Baum & Hunold last week moved their New York office from room 1503 to room 506 in the building at 9 Maiden Lane. Their new quarters provide increased facilities for displaying the firm's sterling silver wares.

The second annual convention was opened yesterday by the National Association of Jewelers and Manufacturers in the Hotel Marlborough. Delegates from associations in all large cities of the country were present. Sessions will continue until to-morrow.

Under an order of United States District Court, the business of Barney Steinfeld, 100 Sixth Ave., was given last Wednesday in charge of William F. Allen as receiver. A petition in bankruptcy against Mr. Steinfeld was filed as related in last week's issue.

Eugene S. Toner, formerly of the Eugene S. Toner Co., has recently opened an office at 9 Maiden Lane as manufacturer's agent, representing Fessenden & Co., and the Hanover Follis Co., both of Providence, R. I., and the Silver City Cut Glass Co., Meriden, Conn.

A jewelry workman, named Isaac Beschi, 40 years old, of 854 Myrtle Ave., Brooklyn, was arrested last Thursday, after he had collected a crowd on the street, it is said, by making a speech and acting in a disorderly manner. He was held the next day on \$100 bail for examination by Magistrate Frong.

Four new members of the Jewelers Board of Trade were admitted at a regular monthly meeting held last Thursday by the Board of Directors: Bigalke & Eckert Co., New York; Block, Berthold & Co., Buffalo, N. Y.; H. Kroll & Co., New York; Holsman & Lister, Chicago; Western Selling Agency Omega Watches, Chicago.

The current number of *Printers' Ink* contains an article of several pages devoted to the business of R. H. Ingersoll & Bro. The writer describes the growth of the

"dollar watch" business, and explains the advertising methods that have been used. On the first page are excellent pictures of Robert H. and C. H. Ingersoll.

Frank M. Mulreim, who was for 36 years with the Whiting Mfg. Co., and John C. Cook, who was for 22 years in the silver business, the last nine years with Redlich & Co., as manager of their factory, recently formed a co-partnership and bought out the Central Plating Co., 34 E. 29th St. The new firm has a fully equipped plant for repairing, replating and regilding all kinds of metals.

Creditors of Bernhard Cohen, Trenton, N. J., met Tuesday of last week in the rooms of the Jewelers' Board of Trade, and requested the Board to send a representative to Trenton for the purpose of looking into his affairs. C. N. Gray, representing the board, visited Trenton during the week and conferred with Mr. Cohen. As a result of the conference Mr. Cohen is now offering his creditors 25 per cent., 15 per cent. in cash and 10 per cent. in notes for the assignment of claims.

Reduced rates to this city for out-of-town buyers will be in effect during the Fall buying season from Trunk Line Association territory, the dates being Aug. 18 to 22, inclusive, and Sept. 2 to 6, inclusive. The special fare will, as usual, be made under the certificate plan, the rate being one fare and one-third for the round trip. The return limit on the certificates will be 15 days. The arrangements with railroads have been made, as usual, by the Merchants' Association of New York.

L. A. Breiting, the president of the American Cuckoo Clock Co., Philadelphia, Pa., will sail Saturday on the *New York* for Europe, intending to visit the company's movement factories in the Black Forest. He will disembark at Cherbourg and go thence by way of Paris. His principal purpose is to see that the equipment of the shops is continued up-to-date, and that wherever possible improvements are introduced. Incidentally he will purchase such novelties as the European markets may offer at this time.

Dieges & Clust, 23 John St., sent out a letter last week, announcing to friends and customers the death on June 8, of Henry Clare, Jr., in his 36th year. Mr. Clare had been with the firm for a number of years. This tribute from his late employers shows the high regard in which he was held: "For many years our confidential friend and business associate, he won an established position in the trade by his tireless energy, strict integrity, exceptional ability, loyalty and that winning personality that always cemented ties of friendship and brotherly love."

The wife of the Gaekwar of Baroda, one day last week, called at the salesrooms of Chas. S. Crossman & Co., 3 Maiden Lane, and the presence of the East Indian princess in the jewelry district caused some excitement for a short time. The Princess wore a white robe in Oriental style. In her ears were a pair of cluster ruby ear studs. On the upper parts of both ears she wore two other earrings of large fancy pearls fastened to her ears, but not pierced. Ornaments containing three diamonds were fastened to her nose apparently with a small clamp. She had many rings on her

fingers and about her waist was a fancy gold belt about three inches wide.

Suspicion was awakened in the mind of Solomon Newman, 1952 3d Ave., last Wednesday, when a stranger offered to sell a string of pearls with a diamond locket and a diamond butterfly pin. A policeman was summoned and placed the young man under arrest. The prisoner, who at first gave his name as Harry Wilson, was taken to the East 67th St. Station. Later the jewelry was identified as part of the property stolen on June 6, from the summer home of W. S. Gould, at Port Chester, N. Y. The police say that Wilson is also known as Edward Shubert, and that he is a professional crook, who makes a business of obtaining employment as a butler in the homes of wealthy people whom he robs.

When Bernardo Settecasi, a Sicilian, second cabin passenger on the *Cretic*, stepped on the White Star pier last Friday customs inspectors saw something suspicious in his appearance, and in searching his baggage found the following jewelry: Ten pairs of pearl earrings, 5 amethyst scarf pins, 11 small diamonds rings, 3 pearl necklaces, 2 gold watches with chains and charms and a quantity of cuff buttons, collar buttons, shirt studs, brooches and bracelets. The jewelry is valued at \$800. Some of the articles were sewed in the lining of his clothes, and the stick pins were imbedded in stockings. The Sicilian was arraigned before United States Commissioner Shields on the charge of smuggling, and bail was fixed at \$1,000, in default of which he was sent to the Tombs.

Articles of incorporation of the International Watch Co. were filed last week with the country clerk in Jersey City. The company will manufacture watches, clocks, chronometers, nautical instruments, mechanical toys and games. The factory will be at 9 to 21 New St., Jersey City. The capital is \$600,000, divided into 6,000 shares of the par value of \$100. Of the capital 4,000 shares will be 10 per cent. preferred stock, and the remaining 2,000 shares common. The company will start business with \$540,000. The incorporators and number of shares held by each are Ernest Bunzl, 155 W. 75th St., New York, 1,700 shares of preferred and 999 shares of common; Otto Bartel, Jersey City, two shares of common stock, and Gustave Bunzl, 14 E. 60th St., New York, 1,700 shares of preferred and 999 shares of common stock.

George Montgomery, of Montgomery Bros., Los Angeles, Cal., will arrive in New York about July 1, and will make his headquarters with the Gorham Mfg. Co.'s uptown store, 5th Ave., and 36th St. One of the objects of Mr. Montgomery's eastern visit is to obtain ideas which will help the firm in fitting the new store which his firm expects to occupy in less than two years. It is the intention of the concern to make this one of the most handsome stores in the country, and so an early start is being made in preparing the plans.

Henry C. Perley, of Perley Bros., 26 John St., is mentioned this week in the papers as among the citizens of New Rochelle, who have taken an active part in the presenting to the district attorney evidence of bribery affecting aldermen of that

FINE GENEVA WATCHES.

THIS IS HOW IT HAPPENED.

Some few years ago we determined that first of all we were going to make the best Cuckoo Clocks that brains and skilled craftsmanship could put together; then we were going to sell them for as little as we could.

The expected happened. Quality won out as it always does. We have a country-wide reputation for making the best Cuckoo Clocks that have ever been produced, and with that reputation has come the largest Cuckoo Clock business in the world.

Better write for our new Catalogue.

and growing out of a new telephone company's application for franchise. The suit in which many druggists and others, who purchased jewelry from the Wm. Mfg. Co., Iowa City, Ia., are interested, was decided in favor of the defendant in the Second District Court of New Jersey City, N. J., last week. The plaintiff in the action was the Johnson County of Iowa City, which sued L. E. Carver, a druggist of Jackson and Bramble Aves., Jersey City, for \$254.22 on a promissory note given in payment for jewelry. The defense contended that the stock was not what it was represented to be by the salesman.

Arrested in New York on Charge Virginia Jeweler Pleads Mistaken Identity.

Wheaton B. Despard, also called by the name Dean Stevens, was arraigned in the New York Police Court last Saturday, on the charge of grand larceny, in stealing a diamond ring, valued at \$175 from John F. Kohler, a jeweler, of 209 E. Broad St., Richmond, Va. Despard gave his address as 10 W. 84th St. It is charged that Despard is the man who, with an accomplice, on May 28, went into Kohler's store and stole a diamond ring, valued at \$30. The next day the man returned to look at other diamond rings, and when he left Kohler discovered that a \$175 diamond was missing. The police were notified, and say that Despard was traced to this city. Detectives learned that he expected a package to arrive from Richmond on Friday which contained another diamond ring, valued at \$180, which he had ordered sent to him by a pawnbroker. The detectives watched the office of the Adams Express Co. at 11 W. 4th St., until Despard and his wife appeared and asked for the package. Before the package was delivered to him he was arrested. Despard created a scene. She said that they had been married for six years, and that her husband was a traveling diamond salesman. Nine pawn tickets were found in his possession. Kohler appeared in court and identified Despard by a deep vertical gash on his forehead. The man was held in default of \$10. He retained a lawyer, who said that he would oppose efforts to extradite his client on the ground that this is a case of mistaken identity. Despard is about 38 years old.

S. S. Ketchum, Imboden, Ark., has sold out to J. W. Matchell. Montgomery Bros., Los Angeles, Cal., have leased a new store, 80 by 120 feet, which they expect to occupy in a little less than two years. The firm has obtained a lease and intends to fit up the store in a magnificent style, making it one of the most attractive in the country. In order to accomplish this result, the members of the firm are already getting information and making plans. Everything in the store is entirely new, and special furniture is being designed.

Patents and Trade-Marks.

THE difficulties that American inventors have experienced in procuring patents in Germany led a foreign patent attorney in New York to take up the subject with the German patent office. That institution gave it serious study and discussion, which resulted in a reply by President Hauss making full explanation, and granting some amelioration. The letter in part follows:

In complaining about a too severe definition of the term invention you refer especially to the fact that the proof of a "new technical effect" is more often acquired than it appears advisable according to the circumstances. This should only be regarded as an expression to the effect that in the opinion of the examiner there is lacking in the subject-matter of the application any considerable effect. Such an estimate, whether the invention, in as far as it is new, exceeds that which also an "ordinary workman" is able to do, must be left to the examiner and the departments of the patent office. It is of less importance than the expression that is used by the patent office in refusing a patent. However, I have taken care that the phrase requesting to "prove a new technical effect" is limited to those cases in which an industrial process does not come into question except from the mechanical view point, and when the stated technical effect is so improbable that a proof must be demanded.

President Hauss says that the patent office must be guided by the decisions of the German supreme court, which has laid down a series of principles covering inventions, and which cannot be left unobserved in granting patents without great injury to the interested industrial branches. He also points out the fallacy of the statement that in Germany "every invention must contain a new principle" "by the fact that about 10,000 patents are annually granted in Germany, whereas nobody will say that fundamental new inventions are remotely made in any such number."

That American applicants are not treated worse than Germans is evident, says Mr. Hauss, for 1,069 German patents were granted to Americans in 1903, or only a decrease of 2.3 per cent. from the number granted in 1901, whereas the decrease was 4.2 per cent. in the number granted to German applicants for the year 1902, as compared with 1901, the figures being 6,334 and 6,699, respectively. Also that out of every 100 applications in the German Empire an average of 34 patents were granted in the years 1901 to 1903, whereas on 100 applications from the United States an average of 59 patents were granted in the same period. The year 1904 showed a still more favorable comparison for Americans.

TRADE-MARK DIFFICULTIES IN CUBA.

The Merchants' Association, of New York, announces that it has recently received a number of complaints from its members concerning the confiscation, by citizens of Cuba, of trade-marks which have been established by American citizens by years of use, and have been made valuable by expensive advertising. Hence the association is seeking to secure the same degree of protection of American trade-marks in Cuba as the laws of the United States give to Cuban trade-marks. In America foreign

owners have the same right to registration of trade-marks as citizens, while in Cuba a citizen may register any well-established and valuable American trade-mark not already registered in the island, and thus become the owner of same. Then if the American goods bearing this trade-mark continue coming into Cuban custom houses they are liable to confiscation, and the Cuban who has registered the trade-mark has both a criminal and a civil action against the American owner for infringement. The Merchants' Association is seeking to remedy this trouble.

AMERICAN TRADE-MARK AMENDMENTS.

Some notable changes will affect trade-mark registrations in the United States after July 1. The new law provides that classifications shall be established as in foreign countries, England having 50, Germany 12, and France 74, one section reading:

That the Commissioner of Patents shall establish classes of merchandise for the purpose of trade-mark registration and shall determine the particular description of the goods comprised in each class. On a single application for registration of a trade-mark the trade-mark may be registered at the option of the applicant for any or all goods upon which the mark has actually been used comprised in a single class of merchandise, provided the particular description of the goods be stated.

The third section of the bill changes existing laws to give a citizen of a foreign country who has a manufacturing establishment within the territory of the United States the same rights and privileges "so far as the registration and protection of trade-marks used on the products of such establishments are concerned," as are enjoyed by our own citizens.

Albany, N. Y., Jeweler Robbed of Stock Worth \$1,300 by Two Men Who Use an Old Method.

*ALBANY, N. Y., June 16.—Two young men this morning stole a quantity of jewelry from the store of Wm. F. Antemann & Son, 21 N. Pearl St., and escaped with articles valued at \$1,300. The men entered the store at the same time, but acted as if they were strangers to each other. One of them, after looking in the show case, asked Mr. Antemann to get something for him out of the show window. The man then walked out to the sidewalk in order to point out the article. In this way he occupied Mr. Antemann's attention, and as there was nobody else in the store at the time, the other man had an opportunity to carry out the theft.

The man inside was tall, and it is supposed that he reached across the show case and opened one of the sliding doors which was not locked. He then took a number of articles. The man on the sidewalk, apparently dissatisfied at not finding what he wanted, walked away and the tall man also left. Mr. Antemann did not discover the robbery for some time. Then he found that there were missing a diamond ring with a single stone, weighing 2¾ by 1-32 carats and set with smaller diamonds; four Princess diamond rings, a diamond and ruby ring, diamond and opal ring, diamond sunburst pendant, the central stone weighing 2¾ carats.

The tall man had light hair and wore a light suit. He looked like an Englishman. The shorter man had black hair.

Ball's Official Standard R.R. Watches

WHAT WOULD YOU GIVE FOR A LIFELONG CUSTOMER?

Try this plan.

Sell your next watch customer a "Ball."

Its reliable performance will convince him you are a dealer to be depended on—he'll keep coming back for other things.

No. 20.

Chicago Notes.

Weidlich, St. Louis, Mo., was here last week.

Olph Weiss, of Heinrich, Hermann & Co., is in New York.

Mund Stern, of Stern Bros. & Co., left Chicago last week.

Robert W. Allen and wife, sailed to-day on the *Oceanic* for Europe.

Harvey H. Miller, with Hutchison & Co., has returned from an Eastern trip.

X. Parsche & Son, cut glass manufacturers, have incorporated with a capital of \$100,000.

"Lebolt" Lebolt, of Lebolt & Co., sailed for Europe last week, to visit the diamond markets.

Frank H. Challen visited the Ohio Cut Glass Co.'s factory at Bowling Green, O., last week.

H. Van Bergh, of the Van Bergh Silver Plate Co., Rochester, N. Y., was here last week.

Harper, with the American Silver Co., returned from a visit to the factory at Bristol, Conn.

F. Spies, of Spies & Co., is the proud father of twins, a boy and girl, who first saw the light June 10.

E. McCullin, Western manager for W. A. Rogers, Ltd., is on a visit to the company's factory East.

W. H. Thomas, with the Mauser Mfg. Co., is taking a vacation with his wife and daughter at Petoskey, Mich.

The engagement is announced of Jos. Brown, of Jos. Brown & Co., to Miss N. Phillips, of Seattle Wash.

W. Crofts, retail jeweler of Greenland, Mich., was married last week at Ravenswood to Miss Frances Lawton.

A meeting of the Chicago jobbers' association was held last Friday. The proceedings were not made public.

Miss Rebecca Gelder, formerly jewelry buyer for Hillmans, will shortly sail for Europe for recreation and rest.

Harry E. Jones, with the Wadsworth Watch Case Co., has returned from a Western and Northwestern trip.

E. Ziehme bought real estate last week to the extent of \$95,000, giving partly in exchange real estate valued at \$77,800.

S. Metcalf, of the Plainville Stock Co., visited this city last week as did Jos.

T. Homan, of the Homan Silver Plate Co., Cincinnati.

G. M. Landon, with the Homan Silver Plate Co., and G. S. Titus, with the Barbour Silver Co., are recreating at Eagle Springs, Wis.

Miss Rose Noel, sister of Max, Rudolph and Phil. Noel, was married yesterday at the Metropole Hotel in this city to Sam Gersten.

E. B. Hoffman, salesman for H. F. Hahn & Co., is taking a vacation at Big Rapids, Mich., where he recently became the owner of a summer hotel.

W. A. Moore, Jr., with Alfred H. Smith & Co., left here last week for New York. He sails from there on June 28 on the *Deutschland* to visit the European diamond markets.

Jacob Wolf, 116 E. 31st St., will discontinue business at that address July 16. Mr. Wolf says he is going into the jewelry business in either Spokane, Seattle, Portland, or Tacoma.

The estate of Buck & Schmitz, bankrupts, formerly in the Masonic Temple, who went under about a year ago, owing over \$7,000, has declared a first and only dividend of 3 per cent.

Adolph Kronberg, formerly with S. Lazarus & Co., has opened a jewelry repair shop at 1012 Champlain Building. Mr. Kronberg bought the plant of the Roberts Mfg. Jewelry Co.

Arthur J. Williams, of A. L. Williams & Co., was married Wednesday last to Miss Gertrude Hemmersbach. The young couple are spending a honeymoon at Niagara Falls, and the East.

Wednesday evening last, Theo. Gribi delivered a splendid lecture before the American Horological Society of this city. His subject was, "The Pyramids, the Oldest Scientific Monuments in Existence, and Their Relation to Horology."

Wm. S. Manheimer, of Louis Manheimer & Bros., left for New York last Wednesday. He sails for Europe to-morrow on the *Kaiserin Augusta Victoria*. Mr. Manheimer will be absent two months, visiting the principal cities of Europe.

Among the jewelry buyers here last week, were S. W. Crofts, Greenland, Mich.; Hermann Chas. Watts, Forrest, Ill.; Cyrus Stall, Bryan, O.; D. B. Stall, Hoopeston, Ill.; B. Ochiltree, Clarksville, Ia.; O. C. Zinn,

Hastings, Nebr.; Mr. Eyster, of the Jewelers' Supply Co., Seattle, Wash.

Miss Ada Hill, formerly assistant jewelry buyer for The Fair, has been appointed jewelry buyer for Hillmans. Miss Carrie Stern, assistant silver ware buyer for The Fair, is Miss Hill's successor. She will assist in buying for both departments.

A "to let" sign is displayed on the store of the Fidelity Trust & Receivers' Co., 88 State St. This is the concern which recently started to conduct daily auction sales of jewelry, etc. One feature of the business was that of advertising for bids by mail.

D. B. Stall, of the Stall Jewelry & Optical Co., Hoopeston, Ill., was a visitor here last week. Mr. Stall, who recently bought out J. A. Seekatz, recently sustained a loss by fire; he reports that he received \$1,800 for his loss from the insurance companies.

Louis Carter, buyer and manager for the cut glass, bronze, lamp and kindred departments of Mandel Bros., has resigned to accept the position of European buyer for L. D. Block & Co., New York. Mr. Carter will remain with Mandel Bros. until his successor is appointed.

At the recent meeting of the Elgin National Watch Co.'s stockholders, the retiring directors and officials were re-elected. President Hulburd is quoted as saying that the net earnings for the fiscal year exceeded \$700,000 or 14 per cent. on the capital. No statement has been issued.

Miss Ione Garlick, daughter of Charles A. Garlick, received a gold medal last week, for her success in oratory at the 20th annual commencement exercises of the American Conservatory of Music, held at Orchestra Hall. Miss Garlick received many floral tributes from her friends.

Judge Mack, of the Circuit Court, has granted an injunction in favor of the United Cigar Stores' Co. against a barker, employed by Doyle's jewelry store, located just west of State St., on Monroe, and next to the cigar store. The court declares that "barking" was undignified and liable to cheapen the business of the neighborhood. The nickel theatre next to C. D. Peacock will be the next to receive attention.

Auctioneers from all over the country opened the second annual convention of the International Auctioneers' association at the Sherman House last week. The principal

To the Jobbing Trade.

with the "Busy Buyer." If time and money are both objects to you, use our line of Diamond Mounted Jewelry and Mountings when you need set or unset goods. We also make and show the most complete line of Rose, Green, and Rose and Green finish rings.

Notwithstanding the Spring advance in diamonds, our prices remain the same.

work of the association will be to ways and means to abolish what the neers call the "license evil"; i. e., the they have to pay in different cities to hold sales. A resolution was allowing women to become members association.

Indianapolis.

Edward McNulty, of this city, Cincinnati, O., last week.

It is not known wha position will be made of the store, w located in the Traction Terminal bu in N. Illinois St. The stock is nev large. Mr. Cullen had no relatives n the time of his death. The adminis is now trying to ascertain the where of Mrs. Cullen. She is thought to returned to St. Louis prior to her hus death. It is thought that the admi tive affairs will finally reach the courts.

St. Louis.

Goldsmith, diamond importer, New Orleans, called on the retail trade here last week.

Ernest White, manager of the J. Bolger Jewelry Co., who is an enthusiastic golfer, is announced as one of the contestants in the golf tournament for the championship and the Republic cup, which began Saturday morning.

The name of the Langsdorf-Byers Jewelry Co. has been changed to the Langsdorf Jewelry Co. The firm is now occupying the ground floor and basement (6,000 square feet of floor space), formerly occupied by the Gauss-Langenberg Hat Co., at 111 Washington Ave.

John Schmidt, of the material department of Bauman-Massa Jewelry Co., has returned from Houston, Tex., where he was present at the funeral of his father. Maury, brother of the same department and firm, made a visit to his old home in St. Paul, Minn.

Freund and family have left for a months' trip. They will visit Chicago, St. Louis, Philadelphia, Detroit, Baltimore, and will spend three weeks at the City. They will visit their brothers Jacob Freund, of Buffalo, and Max M. Freund, of Brooklyn, N. Y.

F. Dailey, of J. F. Dailey & Co., is expected to return to St. Louis about July 1 from Chicago, where he has been. The new store of the firm was opened by Ralph Wilson, manager of the store, who will change places with Mr. Dailey, and go to Chicago, for a time.

Ernest Mauch, president of the Retail Jewelers' Association of Missouri, who is president of the Public School Patrons' Association of St. Louis, addressed the graduates at the Shepard and Monroe schools recently, presenting certificates to 100 pupils from the two schools, which he represents in alliance.

Ernest Bauman, of the Bauman-Massa Jewelry Co., departed Saturday for a vacation to Old Point Comfort, Atlantic City and New York. In New York, July 3, he will meet his father, S. H. Bauman, president of the company, who will arrive on the *Der Wilhelm*, after an extended trip in the diamond markets abroad.

Ernest King, president of the Mermod, Ward & King Jewelry Co., is a member of the advisory board of the Millen Populists Club, which has just inaugurated a campaign in the interest of St. Louis made. The club will soon place in every home in St. Louis a complete directory containing every brand and article made or sold by St. Louis firms.

Among the visiting jewelers, who transacted business in St. Louis last week, were the following: August Winkler, Poplar Bluff, Mo.; Jacob Bersche, Waterloo, Ill.; F. S. Brickey, DeSoto, Mo.; J. W. Buchanan, Benton, Ill.; W. H. Wheeler, Palmyra, Ill.; Philip Levy, Henderson, Ky.; J. Stewart, Albion, Ill.; F. Denizet, Perryville, Mo.; L. A. Bunch, Herrin, Ill.; John Koetting, Ste. Genevieve, Mo.

Elaborate preparations are being made for the outing of the employees of the Ermod, Jaccard & King Jewelry Co., which will take place at Romana Park,

Saturday, June 30. The programme includes an address of welcome by J. C. O'Brien, chairman of the committee, a game of baseball between the married and single men, athletic exercises, 3:45 to 5 o'clock, and music and dancing from 5:30 to 10:30. Handsome prizes will be awarded to the winners of the various events. The officers of the course are: Referee, J. C. O'Brien; clerk of course, N. P. Logan; starter, Charles Stephens; judges, W. A. Boehm, E. C. Eiseman and E. W. Bornmueller.

Incorporation papers have been filed for the United Dry Goods Co., which will be known as the Scruggs, Vandervoort & Barney Dry Goods Co. The new concern's capital is \$5,250,000. The company, which will include the Simmons Co., Georgia-Stimson Furniture Co. and the Scruggs, Vandervoort & Barney Co., is to occupy the \$1,800,000 department store building now being constructed on the west half of the block, bounded by 9th, 10th, Olive and Locust Sts. The building is planned to be ready in 12 months, and the new department store is designed to be one of the largest and most complete establishments of its kind in the United States. The stockholders in the company are: D. R. Calhoun, president of the Ely Walker Dry Goods Co., Hanford Crawford, D. D. Walker, Jr., Robert Johnston, W. E. Georgia, W. E. Morgan, Edward Hidden, G. H. Walker, and J. D. Perry Francis.

Kansas City.

The Hassig & Krieke Jewelry Co. has ordered a new furnace and machinery for its plant.

Clem B. Altman left last week for a combined business and pleasure trip to eastern points.

Noble L. Fuller, of the Edwards & Sloane Jewelry Co., has returned from an extended buying trip.

Dr. and Mrs. Lane, of the Southwestern Optical College, spent Saturday and Sunday of last week at Excelsior Springs.

Will Hoefler, a brother of C. C. Hoefler, of the Woodstock-Hoefler Watch & Jewelry Co., has taken a position with that concern.

P. J. Duke, Marceline, Mo., has returned from a visit to his home, and is again at work with the Kansas City Polytechnic Institute.

George Taylor, with the Woodstock-Hoefler Watch & Jewelry Co., has gone down to Excelsior Springs to spend a short vacation.

J. Levin, traveling representative for Kionka & Kionka, has returned from his trip through Kansas, and will soon start out on a new territory.

C. B. Norton, Ward Lewis, J. B. Robinson and Mr. Phillips, all of the C. B. Norton Jewelry Co., went up to Bean Lake last week on a fishing trip.

A. E. Howell, Excelsior Springs, Mo., passed through this city last week on his way to Phoenix, Ariz., where he will take a position in a retail jewelry store.

Charles J. Mount, Jr., of the material department of the Meyer Jewelry Co., is taking a vacation, and will probably be away several weeks, on account of ill health.

E. E. Branch, who has been taking a course with the Kansas City Polytechnic

Institute, has taken a position as watchmaker in the store of S. Swarts, 218 W. 12th St.

George Newman, with the Jaccard Jewelry Corporation, will leave to-day for a two weeks' vacation trip to his old home in Evansville, Ind. He will be accompanied by his wife.

The following out-of-town jewelers visited this market during the past week: S. Freidberg, Topeka, Kans.; Mr. Roder, Higginsville, Mo.; A. D. Ackerman, Fairbury, Nebr.; Mr. Murchison, of Murchison Jewelry Co., Cheyenne, Wyo.; A. Tittle, Chouteau, Ind. T., and B. L. Seybold, McLouth, Kans.

Denver

Louis Miller, Laramie, Wyo., was a recent visitor to the city.

S. C. Morgan, Longmont, Colo., was here last week, looking up the trade in general.

William Oppenheim, 1231 16th St., has left on a two weeks' trip to Chicago, combining business with pleasure.

M. C. Nester, Alamosa, Colo., paid the city a visit recently, and expressed surprise at the busy atmosphere on 16th St.

S. L. Harrold, of J. C. Bloom & Co., has returned from an extended trip through Illinois and Iowa. He reports that business surpasses that of last year.

J. B. Johnson, Walsenburg, Colo., was in this city last week to attend the graduation exercises of the Walcott School, where his daughter was one of the graduates.

Boyd Park, Salt Lake City, Utah, president of the Boyd Park Jewelry Co., of this city, has returned to the Mormon State after a two weeks' visit to his store in this city.

W. C. Nelson, Omaha, Nebr., has joined the forces of the Johnson Jewelry Co., Colorado Springs. Mr. Nelson is well known as a watchmaker in the west.

A. Rapin, Central City, Colo., and Mr. Bentley, of Bentley & Craig, Boulder, Colo., visited Denver to make purchases last week, and incidentally enjoyed the attractions of the city.

W. W. Hamilton, of W. W. Hamilton & Co., has just returned from a month's sojourn in California. He visited the ruins of San Francisco, but spent most of his time in the southern part of the State.

That Sarah Bernhardt is an ardent lover of jewelry was fully demonstrated on her recent visit to this city. She was here for only a day, but in that short space found ample time to make some extensive purchases. A fine collection of pearls was purchased from Joseph L. Schwartz.

William Fleishman, traveling representative for J. C. Bloom & Co., has not been heard from in five weeks. He left on a business trip through Kansas in the latter part of April, but since has disappeared entirely, much to the annoyance of his employers, who would be glad to get any tidings of him.

A new firm was established here last week under the name of Neser & McCausland on Stout St., near 18th. Mr. Neser, who is a manufacturing jeweler, hails from Iowa, while his partner, Mr. McCausland, comes from Providence, R. I. Both have been in business for many years, and are confident of success in the west.

San Francisco.

A. A. Ritter has opened a store at his residence, at Fulton and Webster Sts.

Mr. Casanova, who was burned out in the fire here, has started a store at Petaluma, Cal.

Carrau & Green, wholesalers, are now located in their new building at 1510 Buchanan St.

Henry M. Abrams, who represents C. Ray Randall & Co., is now located in the Kamm building, and has resumed business.

W. S. Fulton, who represents the Potter & Buffinton Co. and the Roy Watch Case Co. on the Pacific coast, is now in the east.

The Morgan & Allen Co., which now has a temporary office at 1867 Post St., expects to be in its offices in the Kamm building shortly.

M. L. Levy & Co., wholesale jewelers, formerly located at 115 Kearny St., are temporarily located with Voss & Rich Co., 466 13th St., Oakland.

J. Wexel, whose store in the Lick Hotel building was destroyed, is at present entirely out of business, pending the settlement of his insurance.

The Alphonse Judis Co. announces that as soon as its old quarters at 708 Market St. are fitted up that it will return from Oakland, where offices have been secured.

Rothschild & Hadenfeldt, formerly at 134 Sutter St., are now at Broadway and 14th St., Oakland, but will return here as soon as suitable accommodations can be secured.

Paul V. Garin, formerly located on Sutter St., is now at 405 14th St., Oakland, where he will remain until conditions in San Francisco assume a more tangible shape.

Nordman Bros. now have several men out on the road, the northern territory being handled by Fred Davis. A. Cantoe is in the southern part of the state, and good orders are being received from both of them.

Julius A. Young, who moved to 1116 Broadway, Oakland, after the fire, has returned to his old stand in the Kamm building here. He reports that he now has a good stock of jewelry on hand and is prepared to fill orders promptly.

Nordman Bros., located before the fire at 134 Sutter St., are now settled in the Kamm building, having just moved from 2505 Clay St., where they had a temporary office. A stock of goods is now arriving, and business is being resumed once more.

M. W. Graves, who represents the Watson & Newel Co., the Pairpoint Corporation and the Chapin & Hollister Co., and who had just moved into the Kamm building at the time of the fire, occupied offices for a time at 1116 Broadway, Oakland, but has returned and fitted up his rooms here, and is now ready for business.

Fred Lezinsky is now at San Mateo, Cal., but has city offices at 2076 Bush St. A. H. Bullion, who was formerly connected with him, has entered business on his own account, and is now in the east to secure some agencies for himself.

A. I. Hall & Sons are now getting settled a little after the fire and confusion. Their Mr. Mathews states that already they have traveling men out on the road, and that highly satisfactory orders are coming

in. So heavy is business, in fact, that goods are going out about as fast as they are being received now. Owing to the fact that safes proved no protection in many cases from fire, they are having heavy vaults constructed in their show rooms. At present they are occupying only the front part of their floor in the Kamm building, the rear of it being badly wrecked, and it will be some months before it can be placed in a condition for use.

Minneapolis and St. Paul.

Bullard Bros., St. Paul, are making alterations to their store.

C. A. Reed has taken a position with Johansen & Kohl, Minneapolis.

M. Swenson, with Kirchner & Renich, Minneapolis, was married recently.

Wm. Young is a new addition to the working force of the Paegel Jewelry Co., Minneapolis.

The Ryan block, St. Paul, was destroyed by fire Monday. Among the jewelers who lost heavily were: Sischo & Beard, Geo. W. Wooley, C. F. Yager, T. A. Shirley, W. E. Mowrey and Lewis Finkelstein.

Out-of-town jewelers in the Twin Cities recently, were: Mr. Cockburn, of J. T. Cockburn & Co., Drayton, N. D.; Julius Anderson, Mora, Minn.; E. A. Walters, Elmwood, Wis.; D. G. Gallett, Aberdeen, S. Dak.

W. R. Cooper, with S. H. Clausin & Co., Minneapolis, is away on a vacation. B. Clausin, of the Spokane office of this house, is now in the city. Elmer Anderson and B. J. Duntley, traveling representatives, have started on their vacations.

Proceedings in involuntary bankruptcy have been started against the Minneapolis School of Engraving & Watchmaking. The liabilities are about \$1,000. It is understood that arrangements are well under way for reorganizing, and the company will pay up in full.

J. B. Hudson & Son, Minneapolis, have been incorporated, with officers as follows: J. B. Hudson, president and treasurer; W. G. Hudson, vice-president; W. A. Lawhead, secretary. Mr. Lawhead, who has been with the firm for 14 years has been given an interest in the business.

Pacific Coast Notes.

M. O. Hart, St. Louis, has been visiting the trade in New Mexico.

E. J. Mullin, Los Gatos, Cal., has gone to Eureka, Humboldt Co., on a business trip.

Fred. Lezinsky, a manufacturing jeweler of San Francisco, at present is at Los Angeles, Cal.

H. Rubenkamp, a jeweler and pawnbroker of Stockton, Cal., was swindled last week by a woman who sold him a piece of brass for gold, for which he paid \$10.

After July 1, A. A. Poole, Santa Barbara, Cal., will move to the store now occupied by L. J. Newberry, 1007 State St., Santa Barbara, Cal. This change is made necessary by Mr. Poole's growing trade.

F. M. Washburn, formerly located at 11 N. Fair Oaks Ave., Pasadena, Cal., has removed to new quarters at 388 E. Colorado St. Mr. Washburn has installed new fixtures and greatly added to his stock of jewelry.

Frank Bowman, aged 17, has been arraigned before Justice Chambers on a charge of petty larceny. He was employed by Birnbaum Bros., 457 S. Spring St., Angeles, Cal. Although Bowman is thought to have taken jewelry valued at \$200, he is said to have stolen at different times small amounts, making the charge one of petty larceny.

The Mexican Onyx Co. is to make a test case of the demand of the United States government of a duty of \$1.50 cubic foot for sawed onyx. The claim the company is that the duty should be 50 cents, and the case will be fought in the United States court. The basis of the suit will be laid when the next shipment of onyx is landed in San Diego, Cal., Lower California. If the government the suit the company announces that it will erect a plant at Tia Juana, Lower California, one-half of which will be in Mexico and the other half in the United States.

Cincinnati.

Fox Bros. & Co. are making extensive improvements in their offices.

After July 1 H. J. Greenloh will travel in Arkansas for D. Jacobs & Co.

J. W. Forsinger, Chicago, was a visitor in this city during the past week.

Oscar Keck, of the Herman Keck & Co., is back from a business trip to Chicago.

Hugo Lindenberg, of Lindenberg & Co., has returned from a fishing trip at Geneva, Wis.

Alfred Cook, with Frank C. Taylor, of Isle, Ky., spent a part of last week visiting his parents.

J. W. Thornton and wife, Knox, Tenn., and J. B. Settle and wife, Ellettsburg, Ky., were guests of local jewelers last week.

J. V. Thompson, a well-known watchmaker, of Tiffin, O., has become connected with the material business of Joseph J. Mertz.

The G. I. J. Club, composed of the employees of Richter & Phillips, took a social outing in the way of a trip to Licking river last week.

The local trade extends its sympathies to Louis Rauch in his bereavement caused by the recent death of his daughter, Nell, aged 12 years.

A. J. Thoma, of Thoma Bros., and wife have gone on a business trip to New York. Harry Dieters, head maternal of this house, is very happy over the arrival of a baby boy at his house.

The Gustave Fox Co. employees have organized their baseball team, which is stronger than heretofore. Harry Fox, foreman of the factory, is captain, pitcher, and Leonard J. Fox, of the company, is manager and first baseman. The nine is now booking games.

Out-of-town dealers who were here during the past week buying stock included F. W. Bromberg, Birmingham, Ala.; Tiffany, Xenia, O.; R. Kirkwood and W. Scranton, Miss.; A. J. Winters, Paris, P. D. Freeman, Ashland, Ky.; W. Roberts, Nicholasville, Ky.; G. W. F. Ansonia, O.; Mr. Bowen, of Bowen & Son, Winchester, Ky.

C. A. Elder has purchased the jewelry business of L. C. Pedersen, in Walnut

Omaha.

E. Flodman is spending a few days at Chicago Lakes, Minn.

H. Janssen, with the Shook Mfg. Co., just returned from a western trip.

Joseph Hartman, St. Paul, Minn., has in a position with Jacob L. Jacobson, of this city.

T. Jones, of the Haigler Drug & Jewelry Co., Haigler, Nebr., was a visitor in this city last week.

L. Johnson, Genoa, is rejoicing over arrival of a new baby girl at his home. Axel Holmberg, with S. W. Lindsay, has returned from Chicago, where he spent his vacation.

F. Smith and J. F. Mawhinney, will accompany the Commercial Club on its excursion this week.

Mrs. C. Johnson, mother of Mrs. Jacob L. Johnson, died last week from a paralytic stroke. She was 80 years old.

August Reichenberg, formerly of the Reichenberg-Smith Co., has moved to Chicago, where he will reside in the future.

F. Smith will leave for New York, Tuesday 25. He will make his headquarters at L. & M. Kahn & Co. while in that city. David Marshall, San Francisco, Cal., whose place of business was destroyed by earthquake, is in this city at present visiting his brother.

H. Carlson & Co., Auburn, are selling their store in that city. Mr. Ellison will leave shortly for Seattle, Wash., where he will reside permanently.

The following out-of-town jewelers were in this city last week purchasing stock: N. H. Unger, Plymouth; E. J. Long, Evanston; Frank Comte, Springfield; G. S. Smith, Humphrey.

W. E. Burrell, Dr. H. L. Burrell, Geo. W. Burrell and J. F. Mawhinney have incorporated the company being known as W. E. Burrell & Co. A new jewelry store has been opened at Fairbury, Nebr., where W. E. Burrell has assumed the position of general manager.

Jack Jennings, alias "Kid" Clark, who is now in custody for the robbery at M. D. Links jewelry store, has been identified by J. A. Nash, western agent for C., St. P. & M. R. Railway, as the man who helped him to a ruby and diamond scarf pin, valued at \$500, several weeks ago while Mr. Nash was riding home on a street car.

Murtis M. Lindsay, son of S. W. Lindsay, was the recipient recently of a beautiful sword, presented to him by the Omaha High School Cadets, Company E, of which young Lindsay was a captain during the year 1905. He has just returned home from Armour School of Technology, Chicago, and will spend the Summer with his parents.

L. Roy Penfold, son of H. J. Penfold, of the H. J. Penfold Co., of this city, died recently in St. Louis, Mo., in an ambulance en route to the city dispensary after taking poison. Letters in his pockets from relatives, written on stationery of H. J. Penfold Co., indicated that the young man had been in financial straits. Mr. and Mrs. Penfold were greatly surprised when told of their son's death, and Mrs. Penfold was prostrated. Young Mr. Penfold was about 27 years of age, and had been employed in St. Louis about two years. A

private funeral was held from the residence in Omaha.

Canada Notes.

R. R. Dowsley, Prescott, Ont., is about to sell out.

E. L. Weiss, Bancroft, Ont., recently sustained a loss by fire.

The death is announced of D. D. Crue, Summerside, P. E. I.

W. H. Atkinson has succeeded to J. E. Atkinson, Deloraine, Man.

W. J. Markle, Rainy River, Ont., has returned home from a trip to Winnipeg.

C. Clarkson, Cypress River, Man., has assigned to D. A. Clark, Winnipeg, Man.

W. S. Bartley, Russell, Man., has given a chattel mortgage to the P. W. Ellis Co., Ltd., for \$1,047.

Edgar H. Flach, St. Thomas, Ont., has given a renewal chattel mortgage for \$1,000 to Henrietta C. Flach.

Amos Chatfield, Macleod, Alberta, has had judgment given against him for \$100 on behalf of F. W. Law & Co.

The premises of Louis Lemarbre, 3287 Notre Dame St., Montreal, were recently broken into and goods worth several hundred dollars stolen.

John J. McDougall has been found guilty of obtaining money by false pretenses from David Spencer, Montreal. The accused obtained the money by means of a bogus check.

A. C. Anderson, formerly in the wholesale jewelry business in Toronto, and more recently manager for A. Ross & Co., Port Arthur, Ont., has, together with a partner, purchased the jewelry department of the Port Arthur Bazaar Co.

The Grand Jury at the Welland County assizes, June 12, found true bills against the Ontario Silver Co. for applying and selling goods under false trade descriptions, and against George W. Clark, managing director, for conspiring to defraud.

Bell & McCaul's general store, Dominion City, Man., which carries a large stock of jewelry, was broken into recently and a quantity of valuable goods, including watches and jewelry, was stolen. Entrance was secured by breaking a pane in the front window.

Out-of-town buyers visiting Toronto, Ont., last week, included: W. R. Jackson, St. Thomas, Ont.; J. J. Johnson, Attwood, Ont.; R. F. Dale, Harriston, Ont.; John S. Barnard, London, Ont.; W. H. Hopper, Cobourg, Ont., and E. D. Wilcox, Uxbridge, Ont.

Ellis Bros., Toronto, Ont., have moved from 344 Yonge St. into their new store at 108 Yonge St., in the central business section. The establishment is neatly and handsomely fitted up with square projecting window fronts, the lower portion underneath the glass front being ornamented with mosaic work. The design is simple, but very effective.

The rapid growth of Montreal uptown continues, the latest big downtown retailer to move up being M. Cochenthaler. Mr. Cochenthaler was in business on St. James St. for 20 years. The store has been re-decorated after the manner of the Fifth Ave. jewelry stores in New York. Show cases and counters of cherry wood display

the gems, silverware and cut glass on backgrounds of dark blue. Electric light fixtures have been imported from New York. An up-to-date workshop has been installed in which the latest machinery for manufacturing and repairing has been installed.

A daring attempt at robbery was recently made at the store of W. W. Matthews, 558 Main St., Winnipeg, Man. Four stylishly dressed men asked the clerk to show them diamond engagement rings. A large number of valuable stones were submitted for their inspection. After looking at them for some time they left, saying the rings were too expensive. A. Baudry, chief clerk, picked up the tray of rings, and at once noticed that a \$250 diamond ring was missing, a ring with a glass setting having been substituted. He at once rushed out and seized the last man, who was only a few feet away from the store, saying: "I want the diamond you have in your hand." The man made no resistance, and promptly returned to the store, where he dropped the diamond with the remark: "I thought you didn't know diamonds from glass." All four then made off rapidly, and no attempt was made to pursue them. The whole affair passed off so quickly that no one outside the store knew what was happening. The clerk describes the man who took the ring as fine-looking and of prosperous appearance, about 30 years of age, and dressed in light clothes.

Utica.

Creditors of Otto G. Fasoldt, the bankrupt jeweler in Albany, have elected James E. Earhart as trustee. He has qualified to the court in this city with a bond for \$1,200.

There is no change in the strike situation at the plant of the William A. Rogers, Ltd., in Oneida. The company is operating its plant, and Mr. Jameson, the superintendent, states that the company will not recognize the local silversmiths' union. The latter has issued a statement giving its side of the difference with the company. It is stated a strike was declared because 10 men who had joined the union formed in January were directed to leave it or lose their positions. They refused to leave the union and the strike followed.

Federal process servers have been unable to locate Samuel Orbach, the former jeweler, who disappeared after his bankruptcy case resulted in an order by Judge Ray directing him to turn over property and money aggregating \$16,000 to Charles B. Mason, his trustee in bankruptcy, or show cause why he should not be adjudged in contempt of court. Orbach's lawyers opposed the matter to the last ditch, and then Orbach went to New York and he has not been located since. Judge Holt has continued the orders against Orbach until the court term at Auburn on the second Tuesday in October, and meanwhile the hunt for Orbach will be continued.

John S. Byrd, Reardan, Wash., has been succeeded by L. W. Scheifeins.

J. G. Maurman, Tacoma, Wash., was found unconscious one morning recently at the foot of the Tacoma Eastern Walk, half buried in mud. He was taken to the county hospital in an ambulance. His condition is not serious.

News Gleanings.

H. L. Tucker, New London, Ia., has sold out.

J. D. White, Santa Cruz, Cal., died recently.

Ernst Nickl, St. Louis, Mo., has sold out to August Banjot.

F. J. Scott has discontinued his business in Parkersburg, Ia.

Fred. Wm. Ansley, Hampton, Va., has discontinued business.

J. R. Lucas, Rockwell City, Ia., has sold out to W. R. Owells.

Charles B. Green, Marion, N. Y., has gone out of business.

Philip Klayman has succeeded E. A. Bailey, Cambridgeport, Mass.

Mat. Bruhy, Kewaskum, Wis., has been succeeded by Mrs. K. Endlich.

Thos. Miller has purchased the store of H. M. Swearingen, Altoona, Kans.

A. H. Callison & Co. are elbising out their stock of jewelry in Auburn, Nebr.

Julius A. Sommer, Hinsdale, Ill., has been succeeded by Charles Pfeifer.

Mr. Gardner, Verona, N. Dak., is renovating a store for his jewelry business.

Walter Ware, Waverly, N. Y., has made a number of improvements in his store.

Extensive improvements are being made in the store of Arthur Bland, Greenfield, O.

Moore Bros., Vandalia, Mo., have dissolved, Harvey E. Moore continuing alone.

Herbert L. Gould, Florence, Mass., has sold out to Walter E. Tetro, Waterbury, Conn.

Spurlock & McMillan, Cushing, Tex., have been succeeded by the Cushing Jewelry Co.

S. M. St. John, Calhoun, Ga., moved recently to Dallas, Ga., where he will continue business.

N. M. Porter, Longton, Kans., has admitted a partner. The firm style is now Porter & Marlow.

The store of S. H. Ledden, Sedan, Kans., has been destroyed by fire. The loss amounted to \$2,500.

C. H. Gros, Cuba, N. Y., will next month move to a larger store on Main St., which will give him more store space.

A. B. Scott, Marietta, O., has purchased the business of C. S. Beard, Fairmont, W. Va. He will take possession about July 1.

Curran Bros., Zanesville, O., are conducting an auction sale prior to making extensive improvements in the interior of their store.

F. P. McCurdy & Son, Buena Vista, Va., are enlarging their store and contemplate installing a soda fountain and a drug department.

Joseph D. Wright, Geary, Okla., has admitted his brother into the business which is being continued under the name of Wright Bros.

Thieves recently broke into the store of Frank Moore, Maquon, Ill., and escaped with \$100 worth of miscellaneous jewelry. There is no clue.

R. L. Leonard, formerly of Union, N. Y., has moved to Endicott, N. Y., where he has erected a one-story building in the center of the business district.

The meeting of the retail jewelers, which will be held in Greensboro, N. C., July 19, for the purpose of perfecting a State organization, promises to be well attended.

The questions to be discussed are of extreme importance to the retail jeweler.

Frederick Davis was recently sentenced to 18 months' imprisonment in the penitentiary at Anamosa, Ia., for breaking and entering John Hunds' jewelry store, Iowa City.

J. F. Hartwell, Oklahoma City, Okla., was recently granted permission to place a large street clock suspended on a post in front of his jewelry store. The clock will be illuminated by electricity at night.

J. J. Lohr, Hooversville, Pa., is at present a patient in the Allegheny Hospital, Allegheny, where he recently underwent an operation. Mr. Lohr expects to be able to return home about the middle of August.

In the large fire which visited Sodus, N. Y., on the 12th inst., Chas. W. Snyder sustained a loss of about \$300, most of his stock having been removed before the fire reached his building.

John W. Ware, Dunkirk, N. Y., has received the appointment of District Deputy Grand Master of the 10th Masonic District of the State of New York, which comprises the entire county of Chautauqua.

John F. Kauffman, who had been employed in the retail jewelry business at Belleville, Pa., for more than 30 years, died recently at his home at that place, aged 58 years. A widow, three sons and one daughter survive him.

Kurt Landenberger, purchasing engineer for the Hamburg-American Clock Co., of Schramburg, Germany, was a recent visitor to Oshkosh, Wis., looking over woodworking machinery which he intends to purchase for the use of the concern in the manufacture of clock cases.

S. J. Cohn, alias Dr. J. H. Boyer, alias J. H. Boyd, is under arrest at Muncie, Ind., on the charge of having obtained money under false pretenses at Eaton, Ind. Cohn posed as an oculist and itinerant vender of eyeglasses. Several charges of fraud have been preferred against him.

C. C. Carr, alias L. Gray, alias C. A. Bruce, and Adolph Beyer were arrested in St. Louis, Mo., while trying to dispose of valuable jewelry which was believed to have been stolen. The men came from Dallas, Tex. Detectives who searched the trunks of the prisoners found a lot of burglars' implements.

Some unique advertising was done a short time ago by Oscar J. Ludwig, a retail jeweler, of Waterloo, Ia., who gave away 1,000 cow bells. The event had been advertised in the local papers, and when the time came a vast throng of men, women and children was lined up in front of the store waiting to receive the odd gift.

Louis Reiter, aged 66, for over 25 years a traveling salesman for a jewelry house, died recently at New Orleans. Mr. Reiter was well known in Pittsburg, where he resided for the past 30 years. He was born in Germany in 1840 and came to America when a child. The funeral services were held Sunday afternoon at Holy Trinity Church, Pittsburg.

While arresting O. Neal and his son, Irwin Neal, one night last week, on a charge of assaulting J. C. Sharer, a jeweler of Alliance, O., Constable Dennis Smeltz, Capt. Harry Oswolt and two assistants were badly bruised in a fight which lasted half an hour. The jeweler had attempted

to pass the men in his automobile, whereupon they assaulted him.

An absent-minded jewelry salesman a satchel with a quantity of diamonds in Boston, Mass., barroom, last week, for where the barroom was and reported to the police that he had been robbed. That drummer did not lose his property as did the honesty of a bartender, who, on finding the gems and jewelry, turned them over to the police.

Jewelry valued at \$179 was stolen last week from Jansen & Woodruff, New York, N. Y., who conduct business under the name of "Lyon the Newburg Jeweler." A thief secured the plunder by breaking plate glass window with a stone. Among the loot are several gold bracelets, six gold filled chain fobs, two gold lockets and gold filled locket. There is no clue to the robber.

Edward Ross, a jeweler and pawnbroker of Connellsville, Pa., was convicted of larceny by bailee, last week. Ross was prosecuted by L. A. Riordon, who alleged he pawned a \$5 revolver at Riordon's store getting \$1.50 for it. He testified that when he offered the money and the additional premium, Ross refused to surrender the pledge to him.

Chas. Smith, Albany, N. Y., and M. Cosman, of Providence, R. I., who were arrested recently, in Manchester, N. H., on a charge of the larceny of three diamond nickel watches from the John B. Va. Co., were arraigned before Judge He about a week ago, and pleaded not guilty. The case was continued for one week, the couple were held under bail amounting to \$300 each.

A negro, who gave his name as G. B. Ertson, and who said that his age was 15 years, but who is thought to be several years older, was arrested June 10, in Norfolk, Va., after he had broken into and robbed the jewelry store of N. High, 68 Atlantic St., at that place. Two men who attempted to stop the thief, were tacked with a knife. Three watches which had been taken from the store were recovered at the police station.

In the case of the Equitable Mfg. Co. of Iowa, against H. Bailey Johnston, of Newburg, N. Y., for the recovery of \$110 jewelry alleged to have been delivered to the defendant, Special County Judge R. recently affirmed the decision of the District court in favor of Johnston. Johnston claimed that the jewelry had been sold him on condition that he was to have a time in which to pay for it. After the delivery of the jewelry, he alleges, he was called upon to pay at once. The jury decided that there was no cause for action.

After a quarter of a century the mystery of the strange disappearance of William Dawson, once a wealthy jeweler and prominent resident of Brookville, Ind., has been solved, the jeweler's body having been found in the debris which had filled the cellar underneath what was once the jeweler's store. The skeleton was unearthed, Friday morning, by workmen excavating for a new building. Mr. Dawson is believed to have emigrated from England in 1872. He opened a jewelry store about that time in Brookville, where his business and wealth increased. He was eccentric and reticent and made but few friends.

Our Traveling Representatives

Among the traveling representatives to visit Buffalo, N. Y., jewelers, last week, were: F. O. Jones, H. I. Judd Co.; W. H. Osborne, R. Wall & Sons' Mfg. Co.; T. E. DeLano, Day, Clark & A. J. Parker, Osmun-Parker Mfg. Co.

Newhouse, representing Schultz, Leiss & Co., O. Ketter and Weizenegger Bros., Newark, N. J., was in Denver, Colo., last week. He is on his way to Seattle, Wash., and the Puget Sound territory, after which he will proceed to San Francisco.

The following traveling representatives called on the trade in Kansas City, Mo., during the past week: R. I. Warner, Empire Jewelry Case Co.; J. C. Strassburger's Son & Co.; Mr. Macintosh, C. Ray Randall & Co.; Theo. L. Lyons, J. C. Gen Co.; Max Huss, S. & A. Borgzinner. Among the traveling salesmen in Columbus, O., last week, were the following: John W. Case, H. F. Benter & Son, C. L. Harshorn, Kremenitz & F. E. Kitendagh, Onida Community, Ltd.; H. Remington, Mainline Bros. & Elbert L. Donald, Robt. H. Ingersoll & Bro.; Wm. Hamer, Wm. Demuth & Co.; J. L. Gross, Knickerbocker Silver Co.

The following traveling representatives visited the trade in Lancaster, Pa., recently: Henry Hoffa, Lempi & Walker; Ludwig Lehmann; Ernest Kremenitz & Co.; Albert F. Carter, Sloan & Co.; Ferd. Levy, Ferd. Levy & Co.; E. M. Perl, E. & Hochstet; Mr. Halbert, Kohn & Co.; Mr. Ston, Dennison Mfg. Co.; J. W. Henry, J. W. Perry & Co.

The trade at Pittsburg, Pa., was, last week, visited by the following traveling representatives: Mr. McMane, Mandeville, Carrow & Crane; Mr. Ingram, Field & DeWyngeart; Charles T. Dougherty, Liam L. Sexton & Co.; Mr. Somes, Bates & Son; W. J. Parker, Osmun-Parker Mfg. Co.; Robert B. Steele, David Kaiser & Co.; A. J. Sherard, Enos Richardson & Co.; H. F. Tourtelot, Hite, Thresher Co.

Among the traveling representatives who called on the trade in St. Louis, Mo., last week, were: Louis Knoel, Lois Ettlinger & Sons; Percy D. Cas, Frank W. Smith Co.; C. B. Bartlett, Whitcomb Mfg. Co.; F. C. Allen, Sansbury & Nellis; Max Huss, S. & A. Borgzinner; I. Price, Louis Ashurberg's Son & Co.; Edward E. Allsopp, Ardley, Allsopp & Bloemke Co.; W. S. Willis, Rham Mfg. Co.; J. A. Thompson, J. B. Bowden Co.

Traveling men in Boston, Mass., during the past week, included: H. C. Barnum, Shafer & Douglas; J. John L. Shepherd, Keystone Watch Case Co.; R. Crippen, Philadelphia Watch Case Co.; "Jack" Townsend, David C. Townsend & Co.; A. Shiman, Shiman Bros.; T. G. Frothingham; E. L. Spencer; Harry Lissauer, Jacobson Bros.; Frank Waite, Webster Co.; Alex. Chase; Benjamin F. Bissom, Bippart, Griscom & Osborne; E. Cooper Jones, Jones & Woodland; R. W. Simpson, Riker Co.

Traveling representatives who visited the Cincinnati, O., trade, last week, included: W. H. Osburn, R. Wallace & Sons Mfg. Co.; Walter Strauss, Jacob Strauss & Sons; Wallace E. Welch, J. H. Ohrig & Geiger Co.; Fred J. Foster, Unger Co.; John Abel and Mr. Buck, Abel Bros. & Co.; W. A. Tiffany, F. H. Sadler & Co.; R. A. Williams, A. C. Messler & Co.; Charles W. Hicock, Rham Mfg. Co.; I. Rosenberg, I. Rosenberg & Co.; Walter S. Noon, Cory Bros. Co.; A. J. Terrard, Enos Richardson & Co.; M. J. Lamert, H. Zimmern & Co.; Mr. Sherrell, Sinnock & Terrell.

Among the traveling representatives who called on the trade in Denver, Colo., recently, were: F. Barton, Fontneau & Cook Co.; John S. Cunningham, E. L. Spencer Co.; L. E. Fay, R. F. Mmons Co.; G. H. Howard, Mason, Howard & Co.; O. P. Bliss, Wm. C. Greene Co.; Harry E. Farquharson, E. D. Gilmore & Co. and E. A. Potter & Co.; C. E. Sutton, Flint, Blood & Co.; Mil-

ton Sandfelder, D. F. Briggs Co.; Mr. Kleckner, Theodore W. Foster & Bro. Co.; Mr. Kaufman, Eisenman, Kaiser & Co.

Traveling representatives who called on the trade in Omaha, Nebr., during the past week, included: James J. Doll, A. S. Zugsmith; E. R. Horton, Carter, Howe & Co.; Max Huss, S. & A. Borgzinner; W. A. Crocker, Crystalleries De Baccarat; B. Wille, M. Wille; C. M. Newcomb, Maple City Glass Co.; Hubert Somborn, Hipp, Dulsheim & Bro.; W. B. Howe, Bradley & Hubbard Mfg. Co.; N. F. Swift, Webster Co.; F. R. Krugler, H. A. Kirby Co.; F. E. Buffum, Bristol Mfg. Co.; E. W. McAllister, Irons & Russell; Izzi W. Lederer, S. & B. Lederer Co.; F. E. Hyatt and Mr. Levy, Philadelphia Watch Case Co.; E. Huebner, E. Huebner & Sons; A. M. Breckenridge, Benj. Allen & Co.; Harry E. Farquharson, E. D. Gilmore & Co.; E. A. Potter, Smith, Keller Jewelry Co.

News in the Optical Trade.

The Elderson Optical Co. recently began business in Sandusky, O.

B. Milgrom has started in business as an optician at 1616 Atlantic Ave., Atlantic City, N. J.

The optical establishment of W. B. Allen, Marshall, Tex., was badly damaged by fire a short time ago.

The J. J. Boyd Optical Co., York, Pa., recently opened a branch office in the Nutting building, Lebanon, Pa. The concern also contemplates establishing offices in Bloomsburg, Williamsport and Carlisle, Pa.

Phillip Mallay for several years a traveling optician, died Wednesday evening, at his residence, 139 Oklahoma Ave., Youngstown, O., of liver trouble, aged 52 years. The deceased is survived by a widow and several children.

Opticians of Buffalo, N. Y., have signed an agreement whereby they close their places of business on Saturday at 1 o'clock in the afternoon during the months of July and August. The Saturday half holiday season ends Sept. 15.

The Arkansas Optical Society was organized at a recent meeting of the State opticians at the Capitol Hotel, in Little Rock. Thirty opticians from different parts of the State were present. The membership of the society is rapidly increasing.

L. M. Swikerath, of the Swikerath Bros. Optical Co., Denver, Colo., who contracted a cold while on a mining trip in March, which resulted in pneumonia, is now improving, and is expected to resume his interests in the business in a short time.

Recent graduates from the Leader Optical College, Topeka, Kans., are: Miss Helen Williams, E. Stevens, George James, Topeka; Mrs. Margaret H. Farnsworth, Drexel, Mo.; E. E. Stanton, Lusk, Wyo.; Julius M. Sides, Dobyville, Ark.; H. Grant Farmer, Nixtaze, Kans.; G. J. Long, College View, Nebr.

Dr. Phillips, recently of San Francisco, Cal., has become connected with C. E. Ford, 1033 16th St., Denver, Col. Dr. Phillips was formerly with the Berkeley Optical Co., which was completely gutted by the fire. He escaped unharmed, and is none the worse for the experience, although he deemed a change of location desirable.

The meeting of the Tennessee Optical Society will be held at the Maxwell House, Nashville, Tenn., July 6 and 7. Among those who will attend are: George R. Calhoun, secretary, Nashville; H. W. Leggett, E. B. Meyer and Herman Laufer, Memphis; J. E. J-hrke and H. W. Johnson, Chattanooga; W. O. Hoover, Cleveland;

Weakly Ruth, Shelbyville; W. T. Newton and O. C. Wiley, Knoxville; C. L. Andrews, Union City.

The regular meeting of the Rochester Optical Society was held Tuesday evening, of last week, with 15 members present. Chas. Buskirk, Corning, N. Y., Julius L. Miller and E. P. Lescott, Rochester, applied for membership and their applications were referred to the executive committee. H. M. Bestor, president of the society, suggested that the society have a booth in the Assembly Hall during the convention at Rochester and have representatives to give information to members of the American Society, in regard to the workings of the minimum price list as well as general information to visiting opticians. It was decided that the society wear badges during the convention in order that the members might be distinguished from those of other societies.

Lancaster, Pa.

L. C. Reisner is home from an extended trip through eastern Pennsylvania, New Jersey and Washington, D. C.

J. M. Kreider, Denver, Pa., has taken the position with W. W. Appel left vacant by the recent sudden death of Edwin L. Snyder.

Among the few out-of-town jewelers in Lancaster lately were C. E. Hinkle, Elizabethtown; J. H. Sensenig, New Holland, and W. J. Frazer, Lincoln.

Oscar M. Lowrie, late of Norfolk, Va., and formerly of the jewelry firm of Keller & Lowrie, Lancaster, has taken a position with E. J. Faust, Allentown.

A Tonopah, Nev., paper received here gives a flattering account of a concert given there recently by James A. Ziegler, jeweler, formerly with John B. Roth, Jr., but now with George F. Blakeslee, Tonopah.

The Homely Camping Club has been organized by Hamilton Watch Co.'s factory employes, with Edward Zahn as president, and the members will camp along the Susquehanna River the first part of July.

Marcus Edelstein, who came to Lancaster a few months ago from New York and opened a jewelry store on N. Queen St., was married last week to Miss Fannie Cohen, daughter of Max B. Cohen, of this city. The ceremony was performed in Philadelphia by Rev. Dr. Leventhal.

William M. Fraker, the railroad engineer who robbed L. C. Reisner on a railroad train, April 11, of a satchel containing jewels worth \$3,500, was sentenced to prison last week in Carlisle for two years. Having been instrumental in restoring some of the stolen property, so that Mr. Reisner is only out \$800, the latter appealed personally to the court for mercy for the prisoner.

H. H. Blase opened a branch store at 64 S. Main St., Wilkesbarre, Pa., about a week ago.

A valuable diamond ring, which was stolen some time ago from James H. Feaster, a jeweler, of Piedmont, W. Va., was recovered recently from Al. Carter, a colored man. Carter had been arrested for the theft, but vigorously protested his innocence until the stone was finally found in his possession.

ELSIE BEE'S FASHIONS.

NOVELTIES SEEN IN A LADY'S RAMBLES AMONG THE JEWELERS.

HAIR barrettes or slides divide favor with the back comb for keeping unruly locks in order. The handsomest of these are of narrow diamond bands interwoven in some very open loop or scroll patterns.

*

Some heavy chain bracelets have the top only of elaborate diamond scroll work.

*

Many new pendants or brooches dispense with the little chains in the use of drop stones.

*

A diamond buffalo head and a diamond and pearl bee are among rather odd fancies in scarf pins.

*

A cut glass bucket for cracked ice has a solid silver rim and handle with fancy silver ladle or helper.

*

Magnificent diamond brooches are mostly in the pendant style with drop stone somewhat closely attached.

*

Conventional designs of unusual grace and beauty are very much to the fore in choice designs, although natural forms still furnish inspiration for many taking ornaments.

*

Something new in the line of collar supporters are those finished with diamond studs, where a little diamond spray falls from the upper stud to rest on the lace collar beneath.

*

A charming little watch in pavé diamond work is inset with a design in green tourmalines, and the same design is carried out on the chateleine pin to match, which is of fancy triangular shape.

*

Bracelets will doubtless remain in high favor for some time to come, and one really should have a diversity of styles to keep in touch with fashion as to appropriateness in jewels as well as in dress.

*

As a variation on the perfectly flat gold mesh purse, some of large size are shown with the top slightly fuller than the flat frame, simulating a gathering which makes the bottom wider than the top of the bag.

*

A new brooch has a ruby about half an inch in diameter as a central stone, framed in diamonds and set about with a wide border beautifully manipulated in diamonds. The drop stone is a large ruby with a little ornamental cap of diamond leaves.

*

Very wide gold bracelets are of filigree set with green tourmalines and diamonds or with other colored stones, while heavy, half round bands are ornamented in like manner. The ends of bracelets that do not clasp are finished with dragon, dog or lion head, with half inch space between the ends.

*

A style shown in some costly brooch designs, where choice stones are employed,

has a single large stone or ornamental form surrounded, as far as may be, by comparatively large open space and enclosed in a band or border of diamonds forming the outline. A charming little pendant of this order is of triangular shape with three large diamonds in three separate openings, across the top, and finished with an ornamental base and a beautiful drop stone without chain.

Trade Gossip.

Perhaps one of the most novel imported watches now shown is a ring watch, worn on the finger, and resembling a heavy signet in appearance. The rim of gold surrounding the crystal is studded with diamonds, and the movement is one of the smallest made. Klipper Bros., 59 Maiden lane, New York, are the importers of this novel creation.

Bingaman & Co., Cincinnati, O., have designed and made to order a flexible "La Valliere" diamond cross. The centerpiece is entirely flexible, the cross arms being solid. It is entirely an innovation in the way of a cross and is something that has long been desired. Mr. Bingaman is making for himself quite a reputation as a designer in novel goods.

The W. & S. Blackinton Co., North Attleboro, Mass., at a recent meeting of the Board of Directors, decided that in the future the company would cater to the jewelry jobbing trade exclusively. The argument was presented that the retail jewelry trade could be better cared for if the efforts of the concern were centered in their interests entirely.

Bertram Bernhard, who was for some time in the collection department of the Jewelers Board of Trade, New York, is distributing among his friends in the trade an interesting booklet containing a compilation of the collection laws of the various States, in convenient and condensed form, published by Adolph M. Schwarz. Mr. Bernhard is now managing the Chicago office of Mr. Schwarz at 115 Dearborn St. Those who have not received a copy of the booklet may obtain same by addressing him there or applying at the New York office, 299 Broadway.

The Holtzer-Cabot Electric Co., Brookline, Mass., has recently mailed its customers, and the jewelry trade in general, a comprehensive booklet which deals with many new creations in annunciators and burglar alarms, numbers of which are at present in use throughout the trade. The booklet, known as bulletin No. 150A, contains 21 pages of illustrations of annunciators and safety devices with their cost prices, handsomely arranged. It is the intention of the concern to mail one of these bulletins to any jeweler from whom a request is received.

The magnificent statue of M. W. Baldwin, founder of the famous Baldwin Locomotive Works, who in early life was a manufacturing jeweler, was unveiled in Philadelphia recently. Few people seem to have been aware that Mr. Baldwin's early career was in the jewelry trade, in which line he first displayed his inventive genius. It was while in this business he designed and built an upright engine for himself, after he found

he was unable to buy one in the market. He built his first locomotive in 1832, and laid the foundation of the great works which bear his name. Mr. Baldwin died Sept. 7, 1866.

A Strange Order.

"SOME men," said a local jeweler yesterday, "have mighty queer notions. The other day, for instance, a man came into my place and said he had a little for me.

"'But first,' he explained, 'I want to know something: Do you believe that prayers are answered?'

"'Certainly I do,' I declared.

"'Well,' he said, 'maybe you are right, and maybe you are wrong. I don't know, but I'd like to, and now—now I want you to tell me what I do. When I pray I toss a coin to see whether the prayer will be answered or not. I figure that if it comes down head the prayer will be answered, and if it comes down tail it won't get what I pray for. You see in that way I always get sort of a positive decision one way or another, and that's what's bothering me now. Once in a while I'd like to be left in doubt, you know, and that's why I've come here.

"'What I would like to have you do is to continue, in deadly earnest, to tell me some sort of a three-faced coin, a triangular silver block or something, so when I toss it up I won't know whether it will come down "yes" or "no" or "no decision."

"That," went on the jeweler, "struck me as being gambling with a vengeance, and I couldn't make this man see it in that way, and not wanting to be a party to anything that came so near being sacrilegious, I told him that we couldn't fill his order. He seemed to mind that, but when he went away he declared that he would see what other jeweler could do for him. Queer order of a chap, eh?"—*Newark Evening News*.

The Sancy Diamond.

WITH regard to the Sancy diamond, presented by William Waldorf Astor to his daughter-in-law on the occasion of her wedding, says the *Marquise de Tenen*, it is undoubtedly one of the most famous precious stones in the world. Its history can be traced back for nearly 500 years. In the middle of the 15th century it was worn at the Battle of Tewkesbury by Charles the Bold, Duke of Burgundy, and was found set in his helmet when his body was discovered in a ditch by a Swiss soldier, who, knowing nothing of the value of the stone, sold it for about a shilling to a priest.

Since then the Sancy diamond has passed through many vicissitudes. It has belonged, in turn, to Queen Elizabeth, to King James I., and to Queen Henrietta Maria of France; to Cardinal Mazarin, the celebrated French statesman and prelate, to Queen Marie Leczinska, the consort of Louis XV.; to Queen Marie Antoinette; to the Russian Prince, Anatole Demidoff, and to Jamsetjee Jejeebhoy, the multi-millionaire Parsee philanthropist of Bombay, before coming into the possession of Mr. Astor.

The Jewelers' Circular Pub. Co., 11 John St., N. Y.

Philadelphia.

Paul Bracher is closing out his business as wholesale jeweler at 292 Chestnut St. M. Tucker, watchmaker, with William Jones, 40th and Market Sts., spent a few days last week at Atlantic City, recuperating.

After a seven weeks' trip through the West, Fred Barry, of S. O. Bigney & Co., reunited with his family in this city last week.

Anton Reed, a prominent retailer of jewelry in this city last week, attending the Consistory of the Masonic Lodge.

Spaerhase has advised friends in the city of his safe arrival at the homestead in the Fatherland, where he remains until September.

Sickles, of M. Sickles & Sons, has returned from a trip through the eastern States. Louis Sickles, of the same firm, spent a few days last week in New York, getting goods.

A prominent silver plater is reported to be soon to remove to a building which he has purchased and which he will fit up for his trade in general on Sansom St., between 5th and 6th Sts.

The jewelers in town during the week included: John Merz, Hopewell, N. J.; S. Kratz, Souderton; D. H. Krause, Philadelphia; F. Gilpin Massey, Wilmington, Del.; J. W. Parrish, Newark, Del.

In another baseball game was played between nine representing wholesale jewelry and nine last week when on Saturday teams, selected from the employes of I. Bedich & Co., played the M. Sickles & Sons.

Joseph Fussman, watchmaker, formerly of the Philadelphia Watch Case Co.'s factory, Riverside, N. J., opened a store of his own last week at 118 W. Main St., in Westtown, N. J. He has made the new town attractive in many ways and a prosperous career is looked for from him by the Philadelphia trade.

Robert Russell, who is associated in the management of M. Sickles & Sons' jewelry store, is expected to return this week from an extended honeymoon trip. He is married to a Miss Hoeflich recently. Charles Bohrer, of the shipping department of M. Sickles & Sons, was ill all of last week with gastritis.

Following upon a formal application, the State authorities granted Monday a charter for the incorporation of the business of Koshland & Italie as the Koshland & Italie Manufacturing and Wholesale Jewelers of 4th and Chestnut Sts. The incorporators are Charles Koshland, Bernard Italie and George E. Donaldson.

Governor Pennypacker last week assented to the incorporation of the Ford Leather Co. to manufacture among other things jewelry novelties for the trade. The incorporators are John E. Kleinhorst, Joseph H. Ward, M. R. Ward, J. Deal, Jr., F. K. Miller, Oscar D. Loeb, David Millar, Elmer E. Fricke and Arthur Fricke.

The local trade generally is awaiting with great expectation the summer outing of the Jewelers' Club which is this year being given June 26 in the nature of a baseball game between Philadelphia and New

York members of the club and to be followed in the evening by a spirited vaudeville entertainment at an athletic club at 11th and Catharine Sts. A large attendance is already assured.

Charged with robbing the J. Castberg Jewelry Co.'s store, 11th and Market Sts., and other stores, of trinkets while pretending to make purchases, two girls were arrested last week. In their possession were found valuable goods apparently taken from other stores. They admitted their guilt, but declared that these are their first offenses. They gave their names as Bessie and Edna Vochell of Wilmington. They are being held pending an investigation by the detective department.

T. Zurbrugg, president of the Keystone Watch Case Co. and the Philadelphia Watch Case Co., was given the privilege last week to elect whether he would pay \$25,000 to a blackmailer, or be killed and have his home dynamited and his entire family killed. He took a chance and is today alive and well, enjoying domestic happiness and business prosperity. It happened this way, according to the most reliable accounts: Mr. Zurbrugg's wife found a letter addressed to her husband on the lawn of their handsome residence at Riverside, N. J. Mrs. Zurbrugg read it with difficulty, for it was little else than a scrawl, but she deciphered this much—that it threatened her husband's life, his business prosperity and everything else which was dear to him. Mr. Zurbrugg laughed when the letter was handed to him by his wife. But Mrs. Zurbrugg became apprehensive. She finally prevailed upon Mr. Zurbrugg to notify the police, believing it the wisest way to prevent harm coming to him. This was done and thus the threatening letter became public property. It is believed that the letter was written by a discharged employee.

Providence.

Frank B. Reynolds, well known in jewelry circles, has been named by chairman Fitzsimmons of the Democratic State Central Committee a member of the campaign committee to boom Col. R. H. I. Goddard for United States Senator from Rhode Island.

Among the jewelry buyers in town last week were J. E. Bamberger, of Philadelphia; B. Wolf, St. Paul; T. R. Allen, Denver; H. Cerf and M. Bonn, Pittsburg; Goldsmith Bros., Cleveland; Gilbert Friedlich, Baltimore; P. Hermes, Chicago; H. T. Poindexter, Kansas City, Mo.

Articles of incorporation of the Brown & Dean Co. have been filed at the office of the Secretary of State. According to the articles the company is formed for the purpose of engaging in the business of refining and for the transaction of such other business as may arise in connection therewith or is incidental thereto. The incorporators are Samuel Brown, Robert W. Dean, and Herbert A. Capron, and the amount of capital stock is \$25,000.

John H. Le Roy, Fairbury, Nebr., has disposed of his interest at that place to Harry J. Engels, formerly of Red Cloud, Nebr.

Pittsburg.

TRADE CONDITIONS.

A marked improvement in the tone of business has taken place during the last two or three weeks, and a healthy demand for diamonds and the better grade of goods is reported. There has also been a splendid business in presents, as an unusual number of weddings have marked the present month. A number of jewelers also have conducted special discount sales and this has attracted business.

W. S. Bickert, manager for the I. Ollen-dorff Co., left, Friday night, for New York on a two weeks' vacation.

E. H. Hill and his family will leave in a few days for Europe. Mr. Hill will not return to Pittsburg until September.

E. P. Roberts & Sons are preparing to move into their new building in Fifth Ave., a few doors east of the present establishment.

Henry A. Barrett, whose health has been such that he has not been able to be at the store this year, contemplates taking a trip to Europe.

The following out-of-town merchants last week visited this city: E. A. Bloser, New Kensington; J. Linnenbrink, Rochester; W. H. Hill, Fayette City; Frank Bloser, New Kensington; E. L. Young, Latrobe; J. F. Murphy, Dawson.

Greater Pittsburg is now an accomplished fact, the court having signed the decree Saturday, consolidating the cities of Pittsburg and Allegheny, and the latter now becomes the North Side. An appeal by the anti-annexationists has been taken, which probably will delay actual consolidation for a short time. Some of the Allegheny jewelers were opposed to consolidation, the city voting against it three to one, but Pittsburg voted for it five to one, and as the count was by joint vote, Pittsburg voted Allegheny in with a total of 20,000 majority for consolidation.

A charter was granted Saturday by the State department at Harrisburg, Pa., to E. P. Roberts & Sons, Inc. The paid up capital is \$160,000, with the privilege of increasing the capital to \$200,000. The officers of the company are Steele F. Roberts, president; Elizabeth P. Roberts, vice-president; Charles W. Roberts, secretary and treasurer. The Roberts house is preparing to move into its new store at 233 Fifth Ave., July 1, having spent \$50,000 in placing the building in repair and installing new fixtures. The house is one of the oldest in Pittsburg, enjoys a fine trade and has a high class patronage.

C. Wiley, secretary of the proposed Pennsylvania Retail Jewelers' Association, last week sent out notices to all of the jewelers of the State, announcing the call for the convention to organize the society in this city July 10. Hotel Henry, which will be the headquarters, has announced a rate of \$1.50 a day, European plan. The convention is not expected to be in session more than one day. Mr. Wiley during the last week has received assurances from a number of additional jewelers that they will take part in the movement, and the association from present indications will organize with at least 125 members, and perhaps more. Mr. Wiley requests prompt replies to his circular, so that he can make the necessary arrangements for the entertainment of the visitors.

*Our Mr. Richard Friedlander sails to-day on the Oceanic.
The DIAMONDS selected by our Mr. Louis Friedlander, who
has recently returned, have arrived and are now on sale.*

New Orleans, La.

onard Krower, the well-known wholesaler, will leave to-day for New York on his usual business trip.

m Cohen, for many years a jeweler on Podras St., is now seriously ill at the St. Louis Infirmary.

A. Walter contemplates enlarging his establishment and making it one of the finest in the French quarter of the city.

Max Goodman, of Leonard Krower, was married yesterday to Miss Celeste Levy, with the firm for many years.

A very handsome watch and chain, presented to George Vandervoort, secretary of the firm, by the attaches of the central office, was supplied by T. Hausmann & Sons. The watch was ordered especially for the occasion by the firm.

An exceptionally fine display has always been seen in the windows of Coleman E. Adler, where taste of design and arrangement have always predominated. Jos. Lipman, with Mr. Adler, is now on a pleasure trip to the northern cities.

Fischel has decided to open a new store and has given the contract for new premises. The new establishment, which will be one of the handsomest in the city, will be in the heart of the banking district, which has become quite a center for the jewelry trade.

On the annual orphans' excursion given on the steamer *St. James* to 1,000 asylum children, J. J. Weinfurter was one of the chief directors, and himself led the children in sports and games. Mr. Weinfurter is on the Board of the St. Joseph's Orphan Asylum.

Tom Ging, a Chinese jeweler and watchmaker, whose place of business was destroyed by fire and earthquake at San Francisco, is in New Orleans, the guest of the Bu Wung Wei. Wom saved a few cases of his most valuable wares, but it is not probable that he will open up a shop here, where there are only 700 Chinese.

J. Vorhaben & Bro., 809 Baronne St., are unfortunate in being made the victims of robber schemes quite frequently. Twice within a year have Messrs. Vorhaben been robbed, and on the second occasion they lost over \$1,000 worth of diamonds. Last week a negro boy employed about the place as porter, stole a tray of rings. The thief was captured, however, and sent to jail, and much of the booty was recovered.

O. Thompson, manager of the optical department of Leonard Krower, is in New York on a business trip. J. T. Kirkland, representing the firm in Louisiana, Mississippi, Tennessee and Arkansas, and E. J. Gsias, who covers Alabama, Georgia, Florida and the Carolinas, are now on their vacation, taking in St. Louis, Chicago and New York. William E. Taylor, formerly of Boston, Mass., now in charge of the material department, will leave shortly on a pleasure trip. E. Mangus and V. Wisch, of the firm, will leave to-day on their regular business trips.

The country parishes are responding generously to the appeal of the committee appointed to solicit funds for the silver service to be presented to the battleship *Louisiana*, and already several thousand dollars has been collected. The parishes are favoring the plan of being taxed \$100 each. Local

jewelers are thoroughly alive to the possibility of procuring the contract for furnishing the silver service, and all firms of any note will send in their estimates. A committee on the design has been appointed as follows: Hon. M. Berhman, Mayor of the city; Page M. Baker, T. O. Rapier, R. A. Blakely, Leonard Krower, Sam Weiss and J. T. Dencchaux. Designs are to be submitted to-day, and it is evident that there will be considerable competition.

North Attleboro.

Artner Chace, of F. S. Gilbert, is home from the west.

George Whiting and Roswell Blackinton are home from a fishing trip to Rainbow Lake, Me.

Donald LeStage, of the H. D. Merritt Co., and G. Cheever Hudson returned Thursday from the west.

Fred Paye was operated upon Thursday at the Emerson Hospital, Boston, for appendicitis. Reports from the hospital say he is steadily improving.

William H. Riley, whose injury was noted in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, is now able to be out, although he is still obliged to have the assistance of a crutch.

The factory of G. K. Webster & Co. was struck by lightning during an electrical storm last week. The bolt hit the flagstaff on the shop and broke it in two, but fortunately did no other damage.

Local jewelers are very much pleased with the enactment of the National Stamping Act, and many words of commendation have been given THE JEWELERS' CIRCULAR—WEEKLY for draughting the law as well as its aid in helping in the passage of the bill.

Brockton.

Sanford K. Gurney, of Gurney Bros., has opened a new Summer home at Monument Beach, Mass., for the rest of the season.

Edward Haase, an alleged eye specialist, who was arrested in New Jersey recently after a long and profitable tour through southeastern Massachusetts, was last week sentenced to five months in the House of Correction. The court said a longer sentence was only prevented by his making restitution to some of his dupes.

Attorney H. F. Parker, acting in behalf of Samuel J. Vucker, of Providence, against the Davis Optical Co., Ward and Main Sts., Friday placed a keeper in the store, and since that time John Davis, proprietor, has not been seen, counsel states. Should he not return after the claim of Mr. Vucker for about \$300 is satisfied, it is understood the property in the store will be sold under the usual process. There are no goods in the showcases and windows, and several parties who left articles of value there to be repaired regret that Mr. Davis is not about, that they may receive their goods.

A unique exhibition consisting of father and three juvenile watch repairers at work in the show window in full view of passers-by is to be seen at the store of Cohen Bros., Reading, Pa.

Attleboro.

Frederick G. Mason, a banker, has succeeded the late Louis J. Lamb, of C. H. Allen & Co., as one of the town's Sinking Fund Commissioners. A tribute was paid Sunday to Mr. Lamb, when all the children of the Universalist Sunday-school, of which he was long superintendent, marched to his grave with flowers.

Mrs. Charles W. Blackinton passed away at her home on N. Main St., Saturday, leaving an aged husband and several sons. Her husband was one of the pioneer jewelry manufacturers in his younger days, and still owns the so-called "old shuttle shop," near his home, which has been the cradle of a score of the most flourishing jewelry concerns of the present day.

The Selectmen of Attleboro last week granted to the Interstate St. Railway Co. the right to operate a trolley freight line through the western part of the town. This will give greatly improved shipping facilities to the manufacturing jewelers of North Attleboro and South Attleboro, both of which sections have long labored under the handicap of having to depend on their shipments being taken several miles over the road in wagons.

Hon. Sidney O. Bigney was accorded a unique distinction last week. As a member of the Governor's Executive Council he attended the celebration of the 250th anniversary of Dorchester, going as the personal representative of Governor Guild. Owing to a slight resemblance he was mistaken for Governor Guild by cheering thousands, and presented with a bouquet by a chosen delegate for that purpose. He bore the part with dignity and explained away the error, promising the flowers should be sent to the Governor.

Few weddings in Attleboro have been more brilliant in their appointments or more happy in their spirit than that last week which made Miss Ethel R. Wolfenden, the bride of Frank E. Guild, formerly a partner in Peacock & Guild, Providence manufacturing jewelers, but now sole owner of the concern. Merry friends frustrated every attempt to start on their honeymoon the night of the wedding, and they were obliged to spend the time until morning at the home of the groom's father, Emmons D. Guild, of the W. H. Wilmarth Co.

Diligent inquiry among the manufacturing jewelers fails to bring to light one who believes he will be directly affected by the joint action of the western jobbers, against all manufacturing houses which sell direct to the retail trade. Only a few of the minor concerns in this town sell to any but jobbers. Several of the Attleboro manufacturers stimulate the sale of their goods after they have reached the retailer through jobbing houses, by prizes for best window displays, by wide advertising and other devices, but few sell their goods to the retailer without an intermediary. Some of the manufacturers of the older generation say they can remember several such movements in the past as that recently made in Chicago, but none recalls any tangible results that ever came from it.

WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE BEEN AND THE REGISTERED TRADE-MARKS.]

UNITED STATES PATENTS.

ISSUE OF JUNE 5, 1906.

822,313. FASTENING DEVICE. SERIAH STEVENS, Boston, Mass. Filed Dec. 28, 1905. Serial No. 293,602.

a fastening device, a socket member, shank and retaining parts combined therewith, and a pen

locking-arm the free end of which is disposed between said restraining parts and provided with diagonally opposite shank-engaging portions.

822,393. WATCH COVER AND HOLDER. ALEXANDER L. SHONFIELD, Muncie, Ind. Filed March 7, 1905. Serial No. 248,910.

protector for watches comprising a soft highly flexible bag adapted to readily conform to the shape of a watch, therein having an opening at one edge for the introduction of the watch and a light-opening in one of its sides of less diameter

to said other opening through which the face of the watch may be seen, a reinforcing-frame bordering the sight-opening and secured to the interior edge of the flexible material of the bag to prevent distortion thereof and enlargement of the sight-opening, and means for closing and maintaining in closed position the opening at the edge of the bag including a two-part hinged reinforcing-frame having oppositely-disposed outwardly-projecting portions to form when the parts are closed together an inclosed opening for the reception of the watch-stem whereby the latter may project through the bag and the watch be held in place independently of the reinforcing-frame of the sight-opening, and means for locking the parts of the last-mentioned reinforcing-frame in said closed position.

822,555. SPRING BOX-HINGE. EDWARD L. ROGERS, Boston, Mass. Filed Oct. 24, 1904. Serial No. 229,735.

a box, a body, a lid, a hinge member secured to the body, a complementary hinge part secured

the lid, and a wire pintle pivotally connecting the parts, said pintle having its two ends bent parallel with each other to present offset portions

to engage the inner wall of the lid and having intermediate of its ends a portion bent laterally in the opposite direction to engage the inner wall of the body of the box whereby when the lid is closed the pin is put under torsional strain.

822,598. CLOCK. EDWIN M. GOLDSMITH, Philadelphia, Pa. Filed July 21, 1903. Serial No. 166,432.

A clock, a coin-receiver permanently secured to said clock and having a closed coin-exit aperture closure therefor, a guard movably secured to said coin-receiver and normally obstructing access

to the winding mechanism of said clock and to the locking means of said closure of said exit-aperture locking means for said closure, and coin-controlled means in said receiver for releasing said guard.

822,638. SALT-SHAKER. GUSTAVE J. VESTER, Providence, R. I. Filed Sept. 11, 1905. Serial No. 277,920.

In a salt-shaker, a receptacle, a rod projecting within said receptacle and formed with a threaded lower end, a collar on said rod spaced from said lower end, a box having an opening in its bottom

to receive said rod, said box having perforations in its sides, compressible absorbent material in said box, a cover formed with an opening receiving said rod and shutting said collar, and extending within said box to engage said compressible material, and a nut on said threaded end of the rod to engage and support said box and to enable adjustment of the degree of compressibility of said absorbent material.

822,728. BODKIN. LEWIS F. EARL, Philadelphia, Pa. Filed Nov. 3, 1905. Serial No. 285,769.

In a device of the character described, a flat body, a flexible tongue movable transversely thereof, said tongue being normally in the same plane

as the body, serrations on the free end of said tongue, a stationary bar forming part of said body and opposing said free end, serrations on the said

bar adapted to co-operate with the serrations on the said tongue.

822,729. COMBINED BUTTON AND PIN FASTENER. ROBERT ELLIS, Niagara Falls, N. Y. Filed Nov. 29, 1905. Serial No. 289,651.

A combined button and pin fastener, consisting of a bar having a centrally-located lateral extension, a button on said extension, a lateral extension at each end of the bar, one of said extensions

formed hooked transversely of the bar, a post on the extension at the other end of the bar, the post having an opening formed transversely therethrough located above the bar, and a spring-wire having one end introduced into said opening and coiled around the post, the free end of the wire being pointed and extended adapted to engage the hooked end of the bar.

822,766. WATCH. ARNOLD SCHWEIZER-SCHATZMANN, Chaux-de-Fonds, Switzerland. Filed July 28, 1905. Serial No. 271,595.

The combination in a watch having a pendant, of a dial provided with an hour graduation, arranged eccentrically with regard to the watch, a going-train, the seconds-wheel whereof has its axle eccentric to the watch, and outward of the said hour graduation, said dial having an aperture at a point diametrically opposed to that occupied by

the pendant, and entirely lodged inward of the second graduation, the latter being arranged in a very large circle, a correspondingly long seconds-hand fixed to the axle of the seconds-wheel, a case having a central window at the back, and two internal disks of large diameter, each of said disks provided with a series of views on its outer face and each fixed to the axle of the seconds-hand wheel, the one beneath the watch-dial and the other beneath the back of the watch case, the views of the said disks becoming successively visible, in a continuous manner, respectively through the said dial-aperture and the said case-window, when the watch is going.

822,806. SPECTACLES. THOMAS A. WILLSON, Reading, Pa. Filed March 6, 1905. Serial No. 248,415.

A spectacle-temple comprising a temple wire or shaft, and a separately-formed pivot-piece having a pin-engaging ear and a shank portion inclosing said shaft, the extremity of said shaft being projected through said shank portion and shaped to

form a stop to turning movement of the pivot-piece thereon.

822,856. TICKET STAMPING AND DELIVERING MACHINE. HENRY H. CUMMINGS, Newton, Mass., assignor to Adams D. Clafin, Newton, Mass. Original application filed Feb. 19, 1904. Serial No. 194,334. Divided and this application filed April 15, 1905. Serial No. 255,697.

In a ticket stamping and delivering machine, the

combination of a stamping device provided with rotatable type; a watch-holder on the stamping device and means thereon to detachably secure a

watch, and means, connected with the rotatable type, to engage the hand of the watch, whereby the driving-train between the watch mechanism and type is established.

822,873. PROCESS OF COATING ONE METAL WITH ANOTHER AND THE RESULTING PRODUCT. SAMUEL H. THURSTON, Newark, N. J. Filed April 1, 1905. Serial No. 253,260.

The process substantially as herein described of coating one metal with another, which consists in first forcibly beating one metal into and upon the other systematically and continuously until the

particles, or molecules, of the coating metal are driven into the metal being coated and incorporated with the particles at and beneath the surface of the same, thereby forming an adherent and coherent permanent coating irremovably united with the metal being coated, and then forming an electrodeposit of metal upon said coating.

DESIGNS.

38,048. BADGE. SUSIE DERRY PARKER, Macon, Ga. Filed March 5, 1906. Serial No. 304,347.

413. Term of patent 14 years.

38,019. FOUNTAIN-PEN-HOLDING RECEPTACLE. FRANK A. WEEKS, Plainfield, N. J. Filed March 10, 1906. Serial No. 305,415.

Term of patent 7 years.

38,051. JUG OR SIMILAR ARTICLE. CHARLES JOHN NOKE, Stoke-upon-Trent, England, assignor to William S. Pitcairn, New York.

Filed April 16, 1906. Serial No. 312,032. Term of patent 3½ years.

38,052. JUG OR SIMILAR ARTICLE. CHARLES

JOHN NOKE, Stoke-upon-Trent, England, assignor to William S. Pitcairn, New York.

Filed April 16, 1906. Serial No. 312,033. Term of patent 3½ years.

38,053. JUG OR SIMILAR ARTICLE. CHARLES JOHN NOKE, Stoke-upon-Trent, England, assignor to William S. Pitcairn, New York.

April 16, 1906. Serial No. 312,034. Term of patent 3½ years.

38,054. JUG OR SIMILAR ARTICLE. JOHN SLATER, Brown Edge, Stoke-upon-Trent, England, assignor to William S. Pitcairn, New York.

York. Filed April 16, 1906. Serial No. 312,036. Term of patent 3½ years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

PUBLISHED JUNE 5, 1906

SER. No. 5,758. SPECTACLE AND EYEGLASS FRAMES AND MOUNTINGS. MERRY OPTICAL Co., Kansas City, Mo. Filed May 15, 1905.

Iridium

The fanciful word "IRIDIUM." SER. No. 15,271. CLOCKS, CLOCK CASES, CLOCK MOVEMENTS, AND PARTS THEREOF, WITH THE EXCLUSION OF WATCHES AND PARTS THEREOF. HAMBURG AMERIKANISCHE UHRENFABRIK, Schramberg, Germany. Filed Dec. 8, 1905.

The representation of two feathered arrows, an-

gularly crossing one another and pointing upwardly.

SER. No. 16,079. OPERA-GLASSES AND FIELD-GLASSES. SUSSFELD, LORSCH & Co. New York. Filed Sept. 21, 1903. U.S. Pat. 1,000,000.

Jena Glass

The words "JENA GLASS."

SER. No. 16,080. OPERA-GLASSES AND FIELD-GLASSES. SUSSFELD, LORSCH & Co. New York. Filed Sept. 21, 1903. U.S. Pat. 1,000,000.

Jena Special Glass

The words "JENA SPECIAL GLASS."

TRADE-MARKS REGISTERED JUNE 5, 1906.

53,379. ALARM-CLOCKS. THE WESTERN MFG. Co., La Salle, Ill.

The word "STRENUOUS."

Filed Nov. 9, 1905. Serial No. 14,443. U.S. Pat. 1,000,000.

53,382. AMERICAN TURQUOISES. MINING Co., New York.

A geometrical ring in intaglio. Used to verify. Filed Dec. 23, 1905. Serial No. 15,611. U.S. Pat. 1,000,000.

53,386. BROOCHES, SCARF PINS, CUFF-PINS. KREMENTZ & Co., New York.

A figure having substantially the parts of an anchor—a shank, stock, and two arms curved slightly to each other.

Filed Aug. 26, 1905. Serial No. 12,021. U.S. Pat. 1,000,000.

53,526. RINGS. ADOLPH TANZER, New York.

A representation of two bells between which is arranged a rectangular figure containing the letters "T."

Filed Dec. 28, 1905. Serial No. 15,726. U.S. Pat. 1,000,000.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued June 11, 1889.

404,870. POCKET-KNIFE. J. C. F. SCHMIDT, Moline, Ill.

404,906. ELECTRIC ALARM-CLOCK. W. HADLOCK, Wenham, Mass.

404,910. THIMBLE. CHARLES HORNER, Hull, England.

404,937. WATCHMAKER'S TOOL. A. THOMPSON, Adel, Ia.

404,956. FINGER-RING. L. L. BURTON, Providence, R. I.

404,979. POCKET-BOOK FRAME. ERNST DENBUSCH, New York, assignor to J. Schimper & Co., same place.

404,997. PENDULUM. JOSEPH WERNER, Eden, Germany, assignor to Arthur Deane, same place.

450,004. KEY FOR TIMEPIECES. MAX BOCK, Hazleton, Pa.

450,033. INKSTAND. J. J. HOEY, New York.

450,089. SELF-WINDING CLOCK. L. GERRY, Brooklyn, N. Y., assignor to the Winding Clock Co., New York.

450,157. MOUNTING FOR EARRINGS. V. TINE GENTNER, JR., Buffalo, N. Y.

450,160. CALENDAR. C. K. HAMPTON, Brooklyn, N. Y.

450,206. ELECTRIC ALARM-CLOCK. BENJAMIN DUBINSKI, St. Louis, Mo., assignor to one-half to C. P. Budd, same place.

Design issued June 7, 1892, for 14 years.

21,612. JAR. F. M. UNDERHILL, New York.

- ignor to Whitall, Tatum & Co., same place.
 Signs issued June 13, 1899, for 7 years.
- 30,17. PAPER-CUTTER. O. L. STORY, Somerville, Mass.
- 30,51. MATCH-BOX. CHARLES DOESCHER, Waterbury, Conn.
- 30,53. CLOCK-CASE. C. F. MOSMAN, Bridgeport, Conn., assignor to the Jennings Mfg. Co., same place.
- 30,54 and 30,985. CLOCK-CASE. E. M. JENNINGS and C. F. MOSMAN, Bridgeport, Conn.
- 30,60. GONG. E. D. ROCKWELL, Providence, R. I., assignor to the Liberty Bell Co., same place.
 Signs issued Dec. 9, 1902, for 3½ years.
- 31,2. BROOCH. W. C. BOWLEN, Providence, R. I., assignor to the Wightman & Hough Co., same place.
- 31,5. BUCKLE. A. J. HOULE, Manchester, N. H.

BRITISH PATENTS.

1. STATEMENTS OF SPECIFICATIONS, 1905, FROM *The Illustrated Official Journal*.

ISSUE OF MAY 30, 1906

7. BLOWPIPES FOR SOLDERING, ETC. ADAMS (trading as Burrigge & Co.), Birmingham. Jan. 28.
 Blowpipe apparatus for soldering and other uses consists of an oil, spirit, or like lamp, a blowpipe attached to it. An oil lamp is having a burner *c* with a circular wick *d* held by a pointed pin or other implement in-

- through a slot *c* in a nozzle *c* which can be covered by a screw cap engaging a screw-threaded part *c*⁵. A filling-opening on the reservoir is closed by a screw stopper *f*². The lamp carrier bracket *g* having a hole *g*² in which the blowpipe *h* can be slid and turned before being secured by the screw arranged on either of the ends shown in Figs. 1 and 3. A piece of flexible tubing connects the end *h*³ of the blowpipe with the mouthpiece *m*².
- 31,1. KEY HOLDERS. H. TUPPEN, New Cross, London, S. E. Jan. 31.
 Key holder consists of a plate *a* provided with a notch *b*, and a chain *d*, one end of which is secured to the plate, while the other is fastened to a key *e* provided with a ball head *f*. The

- where *a* is provided with notches *c*, and the slot *b* is smaller in diameter than the ball *f*. In use the bow of a key *h* is passed through the slot in the plate, while the pin *e* rests in one side notch; when it is then transferred through the bow of the key to the other side notch. The key will then be secured on the chain.
- 31,1. ORNAMENTING METALWORK. C. M. SMITH, Birmingham. Jan. 31. Drawings to specification.
 relates to the ornamentation of articles which

are formed of stamped metal, such as toilet sets, cabinet furniture, jewelry, clock fronts, and photograph frames. Sheets of contrasting material such as silver and colored celluloid are placed together, the silver one being embossed and perforated so as to expose to view through the perforations the similarly embossed back-plate of celluloid.

- 2,008. CANDELABRA. A. C. GUNTHER, New York, U. S. Feb. 1.

The body *A*, Fig. 2, is made in the form of a cross and is detachably mounted at an angle on a standard 16 by means of a head-plate 14 which engages with two converging slideways 12. Candlesticks *C* are provided with hollow bottom sections 25, and their bottom faces have inverted key

hole slots to engage with headed projections *B* on the face of the cross. Some of the candlesticks can when desired be removed to make space for a figure of Christ. In a modification, the candlesticks are fixed by means of a projecting tongue 30, Fig. 7, which fits in a slot *c*, the lower part 27 of which is dovetailed.

- 2,145. COFFEE-MAKING APPARATUS. J. S. CAMPBELL, London. Feb. 3.

The apparatus shown in Fig. 1 is used in conjunction with a pot *a*, and consists of a tubular holder *b*, divided into two compartments by a perforated conical partition *d* which is kept in position by frictional contact of the lower ring portion *d*¹ with the holder *b*. A perforated bottom *c* is kept in position by an annular rib *d*² and lugs

*d*³, and it can be removed by rotating it so that notches in its periphery enable it to pass the lugs. The holder *b* fits loosely in a flanged ring *c*, fixed on the top of the pot, and by means of pins *b*¹, which can be caused either to rest on the flange or to pass through a groove *c*² therein, the holder can be retained at various heights. The lid *f* may be doubly flanged so that it fits both pot and infuser. In use, fine coffee is placed above the partition *d*, and coarser coffee, which may be of a different blend, is placed beneath the partition *d* and retained by the bottom *c*. Sufficient hot water is then poured into the holder. By this means, the fine coffee is prevented from stopping percolation and the coarse coffee from rising to the top. In a modification, for a jug, the ring *c* is provided with a hinged flap, which covers the lip during percolation but when the infuser is removed may act as a protector for the thumb. The partition *d* may

consist of a flat disk and may rest on an annular rib.

Complete specifications accepted May 23, 1906.

- 9,781. FOUNTAIN-PEN. WEIDLICH.
 12,390. TEAPOT. SMITH & SMITH.
 20,887. SUSPENDERS. JENKINS.
 4,991. STUD. KAY.
 Applications filed May 14 to May 19, 1906.
 11,284. CLOCK. HOWARD WRIGLEY, Liverpool.
 11,292. SPECTACLES. ALOYS RODENSTOCK, London. Complete specification.
 11,322. CUFF-ADJUSTER. E. K. HEAPS, Sheffield.
 11,455. SPOON. EMIL MARKS, London.
 11,489. HAT-FASTENER. ROBERT YOUNG, London.
 11,635. KEY-RING. A. H. MERRILL, London. Complete specification.
 11,664. SPECTACLES. T. O. WINDSOR, London.
 11,677. CIGAR CASE. E. L. WARREN, Liverpool.

An Exhibition of Jewelry.

DESIGNING jewelry, as it has been carried on by the professional designers, was in great need of some revolutionary stroke, to cure it of all sorts of chronic ills, and it seems likely to get this turn from amateur competition. The story is like to that of photography, which, under professional handling, was sunk in ruts, and as far as art was concerned, seemed likely to become a byword; but the fearless amateur, rushing in, with nothing to lose, and no precedent to restrain, soon transformed the situation into a most optimistic phase, and we are now obliged, willy nilly, to recognize that there is a man behind the camera, or a woman, and that the personal equation may be made to count in anything.

The exhibition of handwrought jewelry designed by Mrs. May Mott Smith Cunningham, of San Francisco, which has been in progress at the O'Hara & Livermore studios of applied art, 2 Arlington St., Boston, was very well worth seeing, and to the visitor who took the pains to look over the numerous articles with some care it brought conviction of the truth of the postulate above set forth. Mrs. Cunningham has been at this work for five or six years, and has won the unqualified commendation of experts at the St. Louis Exposition of 1904 and at the last Paris Salon, where she exhibited no less than 27 pieces of jewelry.

Her designs are in the mode of the period in which we live, that is to say they are on a rather bold and big scale, as if intended to carry at some little distance, and many of them are distinguished by a sort of barbaric magnificence, which is, we take it, an effect often aimed at in the jewelry of the day. The precious stones utilized, whether of great value intrinsically or not, are employed as the central motifs of harmonizing designs, built up, as it were, around them, so that each gem has the setting which best becomes it.

Mrs. Cunningham's studio in San Francisco was destroyed by the fire, but a number of her jewelry designs rescued from a safe, in a curiously discolored condition, show many curious freaks of the action of heat on metals and gems.—Boston Transcript.

WALTHAM WATCHES

We beg to announce the issuing of the following described 16 size movements :

16 SIZE, $\frac{3}{4}$ PLATE, S. W. MOVEMENTS

LEVER SETTING

OPEN FACE

Crescent St., Nickel;

21 Fine Ruby Jewels; Raised Gold Settings; Jewel Pin Set without Shellac; Double Roller Escapement; Steel Escape Wheel; Exposed Sapphire Pallets; Compensating Balance, Adjusted to Temperature, Isochronism and Five Positions; Patent Breguet Hairspring, Hardened and Tempered in Form; Patent Micrometric Regulator; Tempered Steel Safety Barrel; Exposed Winding Wheels; Double Sunk Dial.

AMERICAN WALTHAM WATCH CO.,

WALTHAM. MASS.

THE HOROLOGICAL REVIEW.

How Father Knickerbocker Marks *the* Hours

Prominent Clocks That Give the Time to New Yorkers in Manhattan, Brooklyn and the Bronx.

(Continued from issue of June 6.)

MISCELLANEOUS CLOCKS.

THE aim of this series of articles on the clocks of Manhattan doing general pub-
service is not an attempt to bewilder THE
LAR WEEKLY's readers with a full list
of such timepieces. Their bare enumer-
ation would fill a large number of pages
giving their location alone. The aim is to
set only those that come to mind as of

is due to their position and, by implication,
should be of interest to the reader.

In order to inject some sort of system
into this final enumeration, suppose the
start to be made from the extreme North.

CLOCK IN CATHOLIC PROTECTORY TOWER.

mentous value to a very large mass of
ings, either on account of their location
some other peculiar condition, rendering
ir service of extreme utility.
But, having this selective mission in view,
hough the series has already carried the
ider through nearly every section of this
Cosmopolis, a casual survey of the
ound covered lays bare the fact that many
t-door timekeepers serving equally large
asses of travelers, have been omitted. A
al "round-up" of at least a few more of
e important ones not already mentioned

FIRE TOWER, WHOSE BELL NOW RINGS CURFEW
IN MT. MORRIS PARK.

In the tower of the Catholic Protectory a
most useful instrument for the traveling
public adorns the religious edifice. And the
Westchester contingent of New York's
workers very largely place their faith in the
accuracy of this dial.

Traveling southward brings one in sight
of James Everard's great brewery on 133d

St and Madison Ave. Perched high and
overlooking a very wide section of the land-
scape is this brewery clock on top of a
four story tower. And the tower starts
from the roof of the six story building.
The great dial sets the time o' day for a big
neighborhood and its bell, heard all over
Harlem, reminds many thousands that "life
is not all beer and skittles," as Dick
Swiveller discovered and imparted to the
light-hearted generation.

This brings the story down to that chil-
dren's play ground Mount Morris Park,
with its green sward and wooded hill.
Who, of Manhattan's denizens, has not
climbed "Mount" Morris and, resting on
one of the many seats, has not recalled the

CLOCK TOWER AND BELL ON TOP OF JAMES
EVERARD'S BREWERY.

historic origin of the bell hanging within
the trestled structure. Placed on its ele-
vated position when fields separated the
dwellers of this part of town, the warning
notes of this big bell called citizen volun-

tee from their home to fight the flames, whenever the watchman on the top of the tower saw, during daylight the tell-tale smoke ascend, or the gleam of conflagration at night. Electric notification to the best disciplined force on earth makes such primitive means of alarm unnecessary. But the Mount Morris bell's occupation is, unlike Othello's, not by any means "gone." Its former usage is antiquated, its present utility is one of the greatest antiquity consists of ringing the "curfew." At 8 P. M. the tired little tots go out to rest by their nurses. When the mellow notes of that bell give forth the evening hour, adolescent gamblers of a certain degree also leave the open to their infant brethren in trips through the park, and the bushy paths return to solitude.

It is indeed, to review the evolution brought about such conditions that this is erected to warn of fire should warn of the hood of bedtime; that these hours of 8 P. M. and 9 P. M. should be the ancient

dials, the hands of each controlled by a secondary electric movement.

The Hotel Netherland's clock, facing the entrance to Central Park, is a temporal guide to the thousands going into and returning from a walk or a drive through the park's serpentine roadways.

Wandering eastward the footsore searcher in quest of outdoor clock knowledge meets with refreshing visions when he reaches 54th St. and Ave. A. The hands of the eight-foot dial in the tower of the big Consumers' Brewery (the clock is by Charles Korfhager) here meets his gaze, and being an illuminated dial is accessible, like the amber beverages issuing from the vats within, "any old time" night or day.

Between 4th and 45th Sts., on Eighth Ave., one comes across a sidewalk clock that is much consulted by nearby dwellers.

In the "shopping district" section of this series, mention was made of Union Square's denudation on removal of the artistic Tiffany clock, but omission was made in not recording the fact that Jeweler

SCHUMACHER'S STREET CLOCK, COLUMBUS AVE. AND 93D ST.

Frederick Kanter's two-dial timepiece still maintains its ancient guard on the sidewalk in front of 88 Union Square.

Dodging a little eastward again brings to sight a useful clock projecting out from the

CLOCK SEEN FROM FRANKLIN ST. STATION OF SIXTH AVE. "L."

corner of the drug store of Schlesinger & Benninger on Third Ave. and 10th St.

Passing down Broadway one meets a much consulted dial facing Grace Church's

A CONSPICUOUS CLOCK ON BROADWAY.

It is in front of the jewelry store of Meiners & Schutte.

Truly the life of a sidewalk clock, like that of the policeman's, "is not a happy one," as before stated, especially considering New York's distressing extremes of temperature and the stormy inclemencies that lay siege to the healthful pulsations of the outdoor timepiece. But Aaron Cohn's sidewalk clock on 42d St., between Lexington and Third Aves., sustained a shock which caused its absolute prostration when the disastrous explosion of recent memory took place on that thoroughfare. And the timepiece at present standing on that site is a surgical resuscitation of some of the original members with a predominant blending of new parts in its present renovated condition.

ILLUMINATED CLOCK IN CONSUMERS' BREWERY TOWER.

few hours coming to Great Britain as an institution from France; the hours when William the Conqueror (1066) enforced by sound of bell the extinguishing of all lights and fires (*couvre feu*—cover fire), curfew is mentioned now the bed-time for babyhood and youth.

On Columbus Ave. and 93d St. the "Elevated" passengers find a useful record of time on the dial in front of the Schumacher jewelry store, a photographic reproduction of which is given herewith.

To people passing downtown on the Sixth and Ninth Ave. elevated railroads the Tiffany clock in the 22d Regiment's armory, on 6th St., affords a very useful dial.

But perhaps the latest and greatest in horological perfection is the beautiful sidewalk clock recently erected by the E. Howard Clock Co. in front of the property of the Northern Trust Co., on 60th St. and 10th Ave. This is a most imposing and attractive timepiece of "marquis" style, and is controlled by a master clock located within the trust company's building. It has four

ecy building. And just a little further to town brings one to the characteristic of Berliner, Strauss & Meyer, 737 Broadway. Its dial lettering, N, E, C, K, A, E, A, R, attracts attention and creates moment, which no doubt is the benevolent of its owners.

the sidewalk opposite 46 Eighth Ave. Schumacher has a timepiece consulted by any pedestrians.

to the commuters going and coming to and from the North river ferries.

Taken as a whole Greater New York undoubtedly receives a very liberal allotment of outdoor clocks, but an exception exists, and this in the section containing the densest population. The home of the tenement dweller—the factory toiler—that seething hive of humanity where the proverbial sardine compactness rules in notorious “double-

accurate information as to the hour—the minute—is too painfully clear. Of jewelers and clock repairers this so-called “East Side” section shows no lack. But the dials that hang outside the store are almost all of the soulless effigy variety, whose only movement is the swinging on their hinges as they hang dull-faced from their brackets; the only sound given forth is the rusty creaking of wind action.

Exceptions there are, of course, but usually in the wider thoroughfares or in the churches, several of which have been already mentioned in the section dedicated to those sacred edifices. On Ave. A, for instance, in front of the jewelry store of J. Brüll & Son, near 3d St., stands a sidewalk clock of full standard proportions. And the mechanical arrangement of its movement is worth further notice. Stepping to the rear of the jewelry store you will find the movement in active operation and in full view of the store's customers under a glass case. And over the doorway, on the outside, you can spy a gong on which every quarter hour is struck. The ingenious arrangement and also the works are from Charles Korfhage's hands.

But perhaps the meagerness of public time information in this section is best evident in and around Tompkin's Park. With its throngs of nurse girls and infant charges, the absence of large dials becomes acute when warnings of mealtime and the hour for the sleep of infancy arrives. St. Bridgid's Church looks patronizingly over the green space, and its two towers, just adapted by location and style for a pair of handsome, truth-telling dials, make a frigid blank appearance for lack of this needed adornment. Visitors to this spacious park, if sans pocket timepiece, have perforce to rely on the little dial of a kitchen clock placed on the blank sidewall of a drug store, corner of 7th St. and Ave. A, by the aforementioned jeweler, J. Brüll & Son. And that diminutive clock has to do valiant service to an immense crowd of citizens as it looks down ironically from its humble wooden boxing.

It would be a pity to close this horological series without a few words of generalization. In considering the comparative usefulness of these timepieces exposed for the public's benefit, one has to acknowledge that the later built timepieces, having electric control and synchronous adjustment from the Washington, D. C., meridian, are the ones to which the people's faith must be pinned. Therefrom we are assured of learning absolutely accurate time. While the church steeple clocks in their hoary age and historic memories engender poetic idealization, this intensely practical body of burghers must be forgiven if they irreverently throw their preferences in favor of Washington Observatory electric connection with the accuracy of old Sol and his regular habits as a daily time adjuster.

A 20th century sidewalk clock synchronized electrically may be “cheap and nasty” when thrown into the ideal scale alongside one of those ancient yet vigorous pendulum regulated steeple clocks that ticked out time to our forefathers when synchronization was not yet invented and the electric current was still an unharnessed giant of the cloud only. But *O tempora, O mores!* we have

LARGE CLOCKS IN THE TOWERS OF THE GRAND CENTRAL STATION.

and even while these notes are being compiled another useful dial is born. In the high office building just erected on the northwest corner of Fulton and Greenwich St. has blossomed out under the hammer and chisel of the sculptor our latest and probably a unique time dial in the corner of the Ckner building. Cut from the material the structure itself, with its artistically celed ornate stone girdling, this clock must prove from its position a useful factor

decker” habitations—a sad dearth of outdoor clocks becomes conspicuous as reward for one's searches. And in what class of our social cosmos is the accurate knowledge of time more important than among the factory workers?

Long working hours extending to 12 or even 14 per day wins them merely a bare living, and unpunctuality at the workshop spells abuse verbal as well by pecuniary curtailment. To such the necessity of

stick on other days, and with the simple life transformed to strenuous struggle for existence the city's human units must husband and count out the fleeting minutes like pieces of precious gold or drops of life's blood. For "time is money," and it is money alone in the densely crowded city that purchases the wherewithal to keep the clock within us, and makes the very heart

of the commuter living north of the city uses the New York Central or its allies the first and last of the great clocks within the municipal boundary that sees each day are those in and on the Grand Central Station, 42d St. and Fourth

On arriving in the morning the clocks you strike his eye first are the two big pieces at the south end of the reception station and just above the center of it is known as the "concourse," and the railway at the top of the extreme south of the building.

For the homegoing passenger in the afternoon and evening rushing to the trains that use this great terminal, the clocks in the

CLOCK IN CONCOURSE OF GRAND CENTRAL STATION.

overs of the buildings hold his anxious eye until the waiting room is reached. The most important of these are the two which are the west and south in the tower at the corner of Vanderbilt Ave. and 42d St. By these the anxious traveler may gauge his time for catching convenient trains for any blocks away.

In the waiting-room, which is one of the most beautiful as well as the most commodious within the United States, the clock in the eastern wall above the stairs communicating with the elevated road, is truly a possession of all eyes, and the beautiful simplicity of its lines and its accurate time-keeping qualities merit the important position which it holds with the traveling public.

[THE END.]

Dummy Clock Hands.

It seems to be a general impression, says the *Scientific American*, that the exact minute when Lincoln was shot is marked by the hands of every jeweler's sign-watch—an impression which seems to have been given by jewelers themselves.

The baselessness of this yarn, which has gone all over the country, is to be seen at once from the fact that President Lincoln was shot by Booth at about 9 o'clock in

we do not know, unless it was the offspring of some reporter's imagination. It has undoubtedly been kept alive for business as well as sentimental reasons.

A certain dummy-clock maker in New York has obtained considerable advertising on several occasions by telling a story to reporters about a jeweler rushing into his father's place after Lincoln was shot, and asking him to paint the face on the dummy clock he had ordered at 18 minutes past 8 to represent the hour that Lincoln had died;

CLOCK IN WAITING ROOM OF THE GRAND CENTRAL STATION.

the evening, and died about 10 o'clock the following morning. Therefore the clocks do not represent the time of the event. That they were not intended to represent such time is proved by the fact that jewelers' dummy clocks have shown that time since the early part of the century.

All the clocks prior to 1861 did not show that time any more than they do to-day. Some of them show 5 minutes to 1, some 14 minutes to 9 and other positions, but in nearly all the hands are equidistant from the figure 12. As far as 18 minutes after 8 or 18 minutes of 4 is concerned, this is probably used because in this position the hands are most symmetrical, the first being one-third the distance from 12, and the second two-thirds. In this position they leave a long sweep above the imprint of the jeweler's name and address, and do not interfere with the diagram of the seconds' dial when such is used.

How the Lincoln story got into circulation

that his father liked the position of the hands in that way and used it on subsequent clocks, making a stencil from which all markings were done.

The story, as it goes on, in most cases is to the effect that after Lincoln was shot, a meeting of the National Jewelers Association being then in session, the jewelers resolved to perpetuate the time on their signs, and the resolution was adopted to this effect; but inasmuch as there was no National Jewelers Association at that time—in fact, there was no meeting of jewelers of which we have any record—the story is a yarn on its face, even if the proof was not clear that such a position of the hands had been common prior to 1861.

John Collins was taken into custody in Mobile, Ala., a short time ago, on a charge of larceny preferred against him by H. G. Sandoz, of the E. O. Zadek Jewelry Co., of that place.

OPTICAL DEPARTMENT

The Optometrist's Catechism.

SERIES OF QUESTIONS AND ANSWERS ON ELEMENTARY OPTICS, IN CATECHETICAL FORM.

By E. Le Roy Ryer.

Copyright, 1903, by THE JEWELERS' CIRCULAR PUBLISHING CO.

(Continued from issue of May 16.)

Q.—(655.) What systems are used in numbering the lenses employed in optical practice?

A.—There are two systems of numbering lenses. One is called the old or "inch," and the other the new or "dioptric" system.

Q.—(656.) What are the chief characteristics of the old and new systems? What

hardness) of the glass employed. It is the refractive index as well as the curvature that regulates the power of any lens. For instance, we might take two lenses having exactly similar curves; according to the "inch" system these lenses would be numbered the same, but had one lens been made of a piece of glass twice as hard as the other it would be twice as powerful and should be so numbered. This one instance shows how unreliable the old system is, because as a matter of fact the focal distance equals the radius of curvature of a bispherical lens only when the index of refraction of the glass used is 1.5 and the refractive index of the glass used for optical purposes is always greater than 1.5, being, on an average, 1.53. Hence the focal distance of a No. 36 lens of 1.53 refractive index, is not 36 but 34 inches, and the lens is therefore stronger than the old system supposes it to be. The following table affords further evidence of the inaccuracy of the old inch system:

Substance.	Index.	Radius of Focal curvature, distance.	
		mm.	mm.
Flint glass	1.6	1,000	833
Rock crystal	1.56	1,000	893
Ordinary spectacle glass.	1.53	1,000	943
Crown glass	1.5	1,000	1,000

It will be noticed from the above table that the radius of curvature is the same (1,000 mm.), in each instance; according to the old system, lenses made of these different materials, one of flint glass, one of rock crystal, one of spectacle glass and one of crown glass, would be marked the same; in other words, any lens having a radius of curvature of 1,000 mm. would have formerly been marked No. 40. The truth is, however, that even though all four lenses had the same curves their optical effects would be entirely different; the flint glass lens would cause parallel light to focus at a point of 167 mm. (over 6½ inches) nearer than the point of focus of the crown glass lens, the former being one-fifth more powerful than the latter, though ground with the same tool.

Besides these inaccuracies we encounter the disturbing fact that the inch is not an invariable unit of measure but differs considerably in different countries: For instance, the English inch equals 25.40 milli-

meters; the Prussian inch, 26.15 millimeters; the Austrian inch, 26.34 millimeters; the Paris inch, 27.07 millimeters. There are at least 30 different lengths for inches of different standards.

The old inch system has still another fault. The optometrist, in his regular practice, has much more to do with the refractive powers of his lenses than with their focal distances, and the radius of curvature is seldom of any direct importance. In using lenses we are continually forced to add and subtract their refractive values and if we attempt to combine values as designated by the "inch" system we are obliged to deal with vulgar (common)

FIG. 85.

their relative values? Which is the better system to employ and why?

A.—THE OLD OR "INCH" SYSTEM.—In the old system the numbers indicate, in inches, the radius of curvature of the surface of the lens. In former days the double or spherical forms of lenses were used almost entirely, and consequently these formed the basis of calculation; when other forms of lenses were employed they would, by this method, be known by different numbers although they might in other respects be such as to produce the same optical effect. On this account convex and concave lenses of other forms came to be known by the number of the equivalent convex or biconcave lens, this number being the number of inches in the radius of curvature of the equally curved surfaces. This method, though inaccurate, was of great convenience to the manufacturer of lenses, inasmuch as he simply had to work on the lens the number of the tool with which he ground it, without taking into consideration the strength or refracting power of the lens. Tools, we all know, are bound to become worn and calculations made solely upon their assumed curves could not possibly be trustworthy.

A still more noteworthy defect of the old system is that no account is herein taken of the refractive index (density or

FIG. 86.

fractions which frequently have to be reduced to a common denominator and even when this has been accomplished our results are not clearly explanatory. For instance, let us endeavor to add a No. 10 inch to a No. 3 inch lens and we will find it no easy matter and seldom can we do it mentally. It has been found that the strength of a lens is the reciprocal of its focal distance. If the focal distance be expressed in a whole number its strength is expressed by a fraction—one divided by that number. Therefore, in the above example 10 represents the focal distance and the strength would be expressed by the fraction $\frac{1}{10}$; in like manner the strength of the No. 3 inch lens would be represented by the fraction $\frac{1}{3}$; to add these two fractions we must first reduce them to a common denominator. In this case the lowest common denominator is 30, and $\frac{1}{10} = \frac{3}{30}$ and $\frac{1}{3} = \frac{10}{30}$ and together they aggregate $\frac{13}{30}$. The fraction $\frac{13}{30}$ now represents the combined strength of the two lenses; dividing 30 by 13 gives us the focal distance of the combination, namely, 2.3 inches. Thus a 10-inch added to a 3-inch lens gives us a 2½-inch lens, but one can

Optical Department.

readily perceive that to add or subtract even the commonest lens values necessitates complicated calculations, if the inch system be employed.

Figs. 85 and 86 are introduced to show how lenses were numbered according to the old system. In Fig. 85, LS represents a biconvex lens; the center of curvature is at C and the radius of curvature is therefore RC. It can readily be perceived that the surfaces are segments of circles whose radii equal RC. If this radius of curvature be one-half an inch long the lens would have formerly been numbered a No. 1/2-inch lens (80.00 dioptry, new method).

Fig. 86 shows a lens LS, whose surfaces correspond to segments of a circle whose radius equals RC. This radius RC, in Fig. 86, being twice as long as the radius RC in Fig. 85, makes the lens LS, Fig. 86, only half as powerful as the lens LS, Fig. 85. In other words lens LS, Fig. 85, would refract the parallel rays PP¹ twice as much as would the lens in Fig. 86. In both cases, however, the old system assumes that the rays would come to a focus at the center of curvature. This is only true when the refractive index of the glass used is 1.5; so when we recollect that the refractive index of ordinary optical lens glass is 1.53 we see that the focus will not coincide with the center of curvature but will be somewhat nearer the lens.

Again had the lens in Fig. 86 been made of diamond while that in Fig. 85 had been made of crown glass the former, while having only half the curve, would have been almost as powerful in optical effect as the latter on account of its higher refractive index and consequent greater bending or refracting power.

This subject has been given detailed attention with the hope of laying all its many faults bare and convincing all that the old or inch system of numbering lenses should be discarded by those dealing with optical problems.

(To be continued.)

Optical Notes and Briefs

A. L. Freed, general manager of the Consolidated Optical Mfg. Co.'s stores, will have charge of a branch store which that concern will open this Summer at 306 Brooklyn Ave., Asbury Park, N. J.

J. W. Jarvis, optician, Buffalo, N. Y., had a most attractive window display on Memorial Day, the exhibit being thoroughly appropriate. The window was neatly draped with American flags, the golds encasing oil paintings of Abraham Lincoln, William McKinley and Gen. U. S. Grant. Much attention was drawn to the window by the artistic scheme in the decorative arrangement.

The California Optical Co., San Francisco, Cal., which secured a two years' lease on the store at 2109 Fillmore St., immediately after the fire, was the first optical concern in that city to get a plant in operation after the disaster. Mr. Davis, of the company, states that the house is now running full blast, and is prepared to take care of all orders. The retail prescriptions, a gathering of 18 years, were all saved.

Anatomy of the Nervous System.

(Lecture recently delivered before the Rochester Optical Society by DR. RALPH H. WILLIAMS.)

(Continued from issue of June 6.)

THE ophthalmic is divided into three divisions—the lachrymal, frontal and nasal—which are distributed to the forehead and scalp back to the crown, the eyelids, lachrymal gland, conjunctiva, iris, ciliary muscle, the nasal cavity and the nose.

The superior maxillary division of the fifth is divided into the orbital, palatine, posterior and anterior dental and the infra-orbital. It supplies the temple, cheek, lower eyelid, nose, lip, palate, upper teeth and sends a branch to Meckel's ganglion. Meckel's ganglion is the controlling center of the nose, palate, and the roof of the mouth. It is composed of trunks from the facial motor, fifth, and the sympathetic. It is the operation of the ganglion which is principally affected in catarrhal conditions.

The inferior maxillary division of the fifth, which contains the motor root, is both sensory and motor, and is divided into seven greater divisions as follows: The recurrent, pterygoid, deep temporal, buccal, auriculo temporal, lingual and inf. dental. Its motor root supplies all of the muscles of mastication, and its sensory root supplies the auditory meatus, the anterior part of the tongue, the cheek, lower teeth, the sensation of the lingualis muscle, and sends communicating branches to the optic and sub-maxillary ganglion.

The sixth nerve, or abducens, is a motor nerve of the eye. It arises deeply from the floor of the fourth ventricle. It makes its exit to the orbit through the sphenoidal fissures and is distributed to the external rectus muscle of the eye.

The seventh nerve, or facial, is the great motor nerve of the face, ear, palate and tongue. It arises from the floor of the fourth ventricle and makes its exit from the skull just behind and below the ear. It passes forward across the ramus of the jaw, supplies all of the muscles of expression in the face and upper part of the neck, the tongue, the muscles of the ear and palate, and furnishes the motor root to Meckel's and the otic ganglion, and communicates with the auditor, great auricular, pneumogastric, gloss-pharyngeal and fifth nerves. It also communicates with various plexuses of the sympathetic. The facial nerve is the one involved in facial paralysis, which is so common, and in spasms or twitchings of the muscles of the face.

The eighth nerve, or auditory, is the special nerve of the sense of hearing and is distributed exclusively to the internal ear. It arises from the floor of the fourth ventricle and is distributed to the vestibule and cochlea of the internal ear.

The ninth nerve, or glosso-pharyngeal, a nerve of sensation and taste, arises from the floor of the fourth ventricle, makes its exit through the jugular foramen and is distributed to the back of the tongue (giving the sense of taste), the middle ear, tympanum, eustachian tube, tonsils and pharynx. It is this nerve and its distributions which are principally affected in pharyngitis, or tonsillitis.

The 10th nerve, or pneumogastric, otherwise known as the vagus, vagrant or wandering nerve, is accurately described by

the name which has been given to it, the auriculo-laryngeal-pharyngeal-esophageal-tracheo-pulmonary-cardio-gastro-hepatic nerve. It is a nerve of motion and sensation and arises from a nucleus in the floor of the fourth ventricle. It makes its exit through the skull by the jugular foramen. It supplies sensation to the external ear and larynx and motion to the other parts. Its distribution is well indicated by the phonious name given it. This nerve probably receives its motor root from the spinal accessory. It communicates in a number of places with the sympathetic. It communicates with the hypoglossal, glossopharyngeal, facial and first and second cervical nerves.

The spinal accessory nerve arises from a double root. One from the floor of the fourth ventricle and the other from the lateral columns of the cord and gray matter in the anterior horns as low as the sixth cervical nerve. The accessory is that which arises from the floor of the fourth ventricle and is the portion which passes into the vagus or pneumogastric.

The nerve makes its exit from the jugular foramen, supplies the sterno-cleidomastoid trapezius muscles, communicates with the pneumogastric and also with the second, third, fourth and fifth cervical nerves and is continued with them in their distribution.

The 12th nerve, or the hypo-glossal, is the motor nerve of the tongue. It arises from the floor of the fourth ventricle, exits by the ant. condyloid foramen, passes downward and supplies all the muscles attached to the hyoid bone, and to the sterno-thyroid. It communicates with the pneumogastric, first and second cervical nerves and with the lingual branch of the fifth nerve.

PHYSIOLOGY OF THE NERVOUS SYSTEM

Having considered the general features of the anatomy of the nervous system we will now take up its function and its reflexes. In considering nervous tissue in general, which includes special organs, medullated and non-medullated nerves, ganglia, nerve centers and granular nerve tissue which makes up a portion of the spinal cord and brain, should say that the function of this tissue is to receive, transmit, register, reorganize and forward nervous impulses.

In other words, the impulse, of whatever nature it may be, must be received by a nerve terminal, either in a special end organ or in the ordinary terminal plexus of a sensory nerve. It must be transmitted along the course of the nerve to the origin of that nerve either in the sensory ganglion on the sensory root of the spinal nerve or in the sympathetic ganglia, there to be received and either forwarded to the brain for reorganization or reorganized there and returned along other fibres in the shape of an afferent or centrifugal impulse.

In the discussion of nerve fibres we find there are three different classes of fibres regards function. There are the afferent fibres carrying impulses to the center of the nervous system from the periphery, the efferent fibres carrying impulses from the center to the periphery, and intercommunicating fibres, or those which connect together nerve centers; either connecting centers in the brain together or centers

Optical Department.

cord together, it being the connecting link between centers in the cord and brain. Their arrangement is most complex, too rich so for discussion in more than a superficial manner in a lecture of this kind. The afferent fibres conduct sensations which can, in the broad use of the term, be called sensory, such as the touch of the finger to some substance. The sensory or afferent nerves of the finger carry that impulse to the cord and thence to the brain, where the impression is registered. This registration or mental process constitutes a sensation. These nerves have, however, a further function than carrying sensations, in which there is a mental registration.

For instance, in many of the automatic reflex actions the afferent impulse is one of which we are not conscious, nor are we more than indirectly conscious of the reflexing reflex. Small particles of dust may accumulate on the eyeball. While not of sufficient moment to cause the slightest sensation or discomfort, yet there is registered on the nerve that impression which is carried to the brain where an impulse is organized and sent out along the nerve to the muscles of the eye, causing the closing of the eyelid and the consequent removal of the offending substance or the lubrication of the eye to such an extent that its effect is counteracted.

The reflex, by which the increase of saliva is produced by the smell or presence of food, may be an absolutely unconscious operation, and yet an afferent impulse will be involved. There are, of course, all of the special senses, sight, hearing, taste, smell and touch. These are all special end organs sending to the center special impressions. There are the nerves of general sensibility which are not referable to any of the special senses. These nerves are capable of producing a feeling of general discomfort. Pain is a sensation which can be created by the excessive stimulation of any sensory nerve.

The afferent nerves are more complex in their function and embrace five separate and distinct variety of nerves as follows: motor, accelerator, inhibitory, secretory and trophic. These nerves are separate and distinct fibres as near as we know and each carries its special function. One nerve trunk may carry all of these functions, but it will be due to the different nerve fibres, each having its special function.

The motor nerves cause muscular contractions in either voluntary or involuntary muscles. The voluntary muscles are such as those in the arm or trunk, while the involuntary are represented by the vaso-motor nerve in the blood vessels or the fibres of the intestines and stomach.

Accelerator nerves are those which produce an increase in the rate of rhythmical action. This is seen in the sympathetic nerves which supply the heart. Derived from the upper dorsal and cervical sympathetic ganglia, their stimulation will cause quickening of the heart beat.

Inhibitory nerves are those which cause slowing of rhythmical action. There are so nerves to the heart which are derived from the pneumogastric or vagus, the stimu-

lation of which will cause a very material slowing of the heart action.

These accelerator and inhibitory nerves are found in the walls of the blood vessels and are part and parcel of the vaso-motor nervous system of the entire body. In fact, the vaso-motor system of nerves, while primarily motor in function, are also either accelerator or inhibitory. It is through these nerves that some of the most important effects are secured in the handling of the human body in pathological conditions. It is only within the last few years that the subject has been even vaguely understood.

(To be continued.)

The Health Ray Lenses.

(Lecture by DR. ARTHUR C. CAMPBELL, Topeka, Kans., before the convention of the New England Association of Opticians, May 16, 1906.)

(Continued from issue of May 30.)

PEBBLES were used more or less for many years, but have been discontinued by most oculists and opticians for several reasons. First, it is a well-known fact in science that this material, like Iceland spar, fluor spar and similar substances, possesses a double refractive power which makes it impossible for use in any perfect lens. That this is well understood is shown by the following from "Manuel de L'Etudiant Oculiste," par Arthur Chevalier.

"The double refraction of rock crystals renders them useless for optical purposes, and especially for the manufacture of spectacle lenses, and although the images do not appear double across such lenses in consequence of their thinness, and the manner in which they are used, it is, nevertheless, true that double refraction exists, and that it can cause considerable trouble to vision by weakening the retina, and producing fatigue of the accommodation, or even a kind of amblyopia."

Second, to make anything like a perfect lens it is absolutely essential that the material be "axis cut"—that is, cut crosswise to the axis of the pebble and so finished that the axis of its crystallization is directly in the pupillary center. Rohne, after making a careful examination of pebble lenses, says that in his opinion of the regular stock of "pebble lenses," not more than two pair out of a thousand properly axis cut could be found.

Third, photography has known for years that pebble lenses would transmit a great amount of chemical light, and it has been the dream of the camera maker to utilize this material in order to make a more rapid and clear-cut photograph, but, owing to its double refractive power, it could not be used. Manufacturers in Europe have spent thousands of dollars in melting rock crystal with the idea of doing away with this double refraction, but after a long series of experiments find it impossible to obtain a piece of any practical size possessing a single refractive power.

Fourth, pebble lenses absorb a large amount of the red, orange and yellow, which is believed to be a serious objection; all rays are needed, as Nature sends them to us in order to insure the best possible results.

In all the literature consulted I have failed to find any reason given why one kind of glass is not as good as another for making lenses, provided it will take a good

polish, will not corrode, is white, free from streaks, etc. "Lenses of the first quality always contain more or less lead, the larger the quantity (to almost half its volume) the finer its luster and beautiful sparkling. This kind is known to the trade as extra white, and cannot be distinguished from pebbles by simply comparing them together by look." This is quoted from one of the best authorities.

As a matter of fact, lead, which is the ingredient here mentioned as making the best glass, and which imparts its brilliancy to cut glass, is the one thing which absorbs more health rays than any other ingredient used in glass-making. It is true it makes a white brilliant glass, and the more injurious it is to the eye.

If the heat, light and health rays come from heaven in their proper proportions, as they surely do, then it must follow that the best material for lenses through which the light passes to the eye is that medium which will transmit the greatest possible number of all these rays.

But, says a critic, all the rays lost in either case are not lost by absorption; some of them are lost by reflection from the surface of the glass itself. True, the lead is used in the cut glass to increase the number of reflected rays in order that the eye receiving them may be dazzled. For the purpose of this discussion it is not important to determine whether the loss is due to absorption, to reflection or to both.

The important thing is the loss of these rays so priceless to the eye and to its proper use and health. Herein lies the inestimable advantage of health ray glass—it transmits more of all the vibrations or wave lengths with less diminution of energy than any other lens material known to man.

I am not going to tell you what is in the health-ray glass or how it is made. I offer you the simple proof of its merits, the proof that it will and does transmit heaven's light just as it leaves the sun more nearly than does any other material known to man. If you are convinced that that is the way the eye needs it, if you are wise in business methods, if you are true to sufferers, if you are loyal to your profession of healing, you will adopt the only means to secure that need, namely, prescribe and furnish to your patients, who rely upon your judgment and advice, health-ray glasses.

[THE END.]

The San Francisco opticians are recovering rapidly from the effect of the recent fire and have already commenced to resume business to a greater or less extent. The demand for optical goods in the new retail district is good and considerable business could be done were it not for the shortage of stock and for the lack of the necessary machinery. A number of the larger establishments saved all their prescriptions and are already at work to a limited extent. The larger optical establishments all along the coast have been exceedingly generous in offering their facilities to their burned-out competitors in San Francisco. From Los Angeles, Seattle, Portland, Oakland, San Jose and other cities have come offers of assistance in a business way, and in some cases the San Francisco trade has been glad to avail itself of these kind offers.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

A Palatial Retail Jewelry Establishment.

IN this issue of THE CIRCULAR-WEEKLY are shown views of W. W. Wattles & Sons, new quarters, Pittsburg, Pa. After 47 years on Fifth Ave. they determined to

The diamond office at once arrests the attention of those who enter. It is made of plate glass and mahogany and adorned with blue raw silk curtains which match the paper. The general offices, which are spacious and handsomely equipped are situated

are arranged around the room for the play of cut glass, rock crystal, etc., etc.

The second floor is finished in dark beautifully grained, and blends well with the gray-blue paper, which also forms part of the decoration. On this floor the partition of dark oak with rich green hangings between the arches, which separate the silver from the Tiffany room. The walls here are covered with antique velvets displaying to advantage Tiffany lamps, electroliers, which are also suspended from the ceiling. The windows have blue shades and the walls are stippled in blue-green, while the woodwork is of green oak, the general effect tending to enhance the beauty of the Tiffany products.

The front of the store is of Green marble, and was imported by the company from Switzerland. It is plain, but substantial, being devoid of carving, save the flutes and capitals of the Ionic pillars. Under the mezzanine there are seven large electroliers besides several brackets and water

DIAMOND AND JEWELRY ROOM

take a new and much better building on Wood St., between Fifth and Oliver Aves., which has been magnificently fitted up.

There are three floors in the establishment, each 20 by 80 feet, the ceiling being 15 feet high. Wooden beams cross the ceiling on the first floor, where on the left, as one enters, is seen a beautiful arch, in which stands the firm's regulator for timing watches. The vestibule and main floor are beautified by large squares of Tennessee gray marble, with a light green marble border and base to the counters.

The entire left side of the store is paneled with dark, beautifully grained mahogany of the finest quality. This paneling extends upward seven feet, above which is a gray blue Ingram paper which makes a pleasing contrast with the dark wood. All the woodwork throughout the store, including the paneling wall and counter cases, diamond office, general offices and even the door leading to the lavatory and bathroom is mahogany.

SILVERWARE ROOM.

in the rear of the store under the mezzanine.

All the furnishings of the mezzanine are none the less attractive. Persian rugs adorn the floor, and mirror-covered tables

lights. The lighting facilities on each floor are fully adequate for the proper display of the rich stock.

The show window is five feet six inches deep, 10 feet six inches high and about

Storekeeping Department.

a width. It has plate glass back and iron. The ceiling of the show window is of full gold. The bottom of the window is 25 inches from the pavement and is mounted on a mahogany and marble base. The stock on display is illuminated by a 100 c. p. electric globe of high efficiency. The concern has its own electric motor and is protected by the Holmes Electric Protective Service.

What Some Jewelers Say.

DIAMOND Locketts.—Round Roman finish gold lockets, set with one or any desired number of diamonds formed into various designs. They are rarely beautiful. Prices are lower than you are asked to elsewhere, and bear in mind that the

in the south, and ask the most reasonable prices for them.—Albert Pfeiffer & Bro., Little Rock, Ark.

How the Retail Jeweler Can Combat the Trading Stamp Nuisance.

THE cost of using trading stamps averages about five per cent. of the retailer's gross business. Therefore the merchant who does a gross business of \$20,000 a year pays the trading stamp concern about \$1,000. This without any benefit to himself because his competitors are able to secure exactly the same inducement, and the profits of all are reduced proportionately. The only ones benefited are the promoters of the scheme.

Granted that the retailer pays out this \$1,000, for which he secures no adequate return, what can he do to overcome this drain on his resources?

Let us look into the matter. The trading

papers, whose combined circulation will reach 8,000 families. To insert a four-inch single column advertisement with two changes of copy a week in both papers would cost just \$240.32. In addition the retailer could use the street cars, which in a town of the above size would number 25, for about \$10 a month, or \$120 a year. For \$360.32 the retailer could present his story to the people for a whole year, and if his appropriation was two and one-half per cent. of his gross sales, he still would have \$140 remaining, which he could use for cutting prices on certain goods to be used as leaders. The retail jeweler has a wonderful opportunity along these lines, and if he will supplement these efforts with good, appropriate window displays and mailing lists, he will not lose any sleep over the trading stamp nuisance.

But a word of caution. Do not use stereotyped advertising copy. Put yourself

TIFFANY ROOM OF THE ESTABLISHMENT OF W. W. WATTLES & SONS, PITTSBURG, PA. W. W. WATTLES, FOUNDER OF THE BUSINESS AND THE OLDEST JEWELER IN ACTIVE BUSINESS IN THAT CITY, IS SEATED AT THE LEFT.

goods are honest. Ed. N. Rose, Butte, Mont.

Diamonds.—Invest in a diamond; it is better than banking your money. There is a time when nobody but the rich thought of buying diamonds, when they were bought for their prettiness and the play in dress that they created. Now, diamonds are a good poor man's proposition or, we might say, a man in moderate circumstances, because they're a safer investment than placing money in a bank, and after paying one, too, as they're constantly increasing in value. This is especially applicable to those that find it difficult to keep money in the bank. Money on diamonds is easily realized—when the necessity arises, it is easy to keep until that time arrives. It carries the largest collection of diamonds

stamp inducement is expensive and is destructive of reputation, profit and business. Something then must be found to be constructive which will build up the reputation, business and profits. The same antidote for this very condition has been offered the retailer time and time again, but in every instance, with few exceptions, the opportunity has been allowed to go by.

Suppose, for instance, a jeweler in a town of 40,000 people does a gross business of \$20,000 per year. How much does that merchant invest for advertising in that year? As a rule, if it exceeds \$100 the merchant thinks he is extravagant and throwing money away.

But let us study the matter closely. In that town there are at least two good news-

into your advertisements. Make them breathe your own individuality and take as much if not more thought concerning them than you do of the other parts of your business.

It may be of interest to retailers to know that there are some retail merchants who pay men from \$1,500 to \$10,000 a year to prepare their advertisements for their local papers. An instance comes to my mind of one firm that pays an advertising man \$4,000 a year to write a different advertisement measuring 10 to 12 inches single column daily. This firm and every other that goes about it systematically finds that they can get more results out of their five per cent. if they expend it constructively.

Try this plan for a year and you will be surprised at the results. J. G. K.

Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1594.—Verde Antique.—*Will you tell me how to produce on brass or copper the green color known as "verde antique"; also how to produce on brass the black finish?* C. F. W.

ANSWER: Verde antique bronze is represented by two shades of green—a light one for the recessed spaces, which are generally rough and unfinished, and an olive or dark green for the smooth and polished places. The ingredients for the solution to produce the light green shade are: Strong vinegar, 200 drs.; carbonate of ammonia, 30 drs.; common salt, 10 drs.; cream of tartar, 10 drs.; acetate of copper, 10 drs. These ingredients are placed in a strong, tightly corked bottle, which should be kept in a warm place and shaken at intervals until the ingredients are dissolved. The articles to be bronzed, either brass or copper, must be scrupulously clean, exposing a porous metallic surface. Paint them quickly with a camel's hair brush, and do not pass over the space the second time. When the color begins to dry, take a soft brush with long silky hair and pass it over the object to equalize and smooth the covering. As soon as this brush begins to get damp, change it for a dry one. You may repeat these operations two or three times, but be careful to let the preceding covering be thoroughly dry. The recessed and rough places are then considered finished with a light green color, but the smooth parts need to be varnished to protect them when being touched. This varnish is impregnated with fine lampblack, sparingly, which will change the light green into a handsome olive green. For this operation the articles should be warmed in a suitable oven. The varnish used is generally of French make and may be known by the strong smell of lavender spirits, when this varnish is thoroughly dry, after, say, about a day or two. To procure a black finish on brass, coat with a diluted solution of mercurous nitrate. The result is a quick silver layer, which, by repeated applications of potassium sulphide solution, is changed into mercuric sulphide. The coating thus formed presents a lustrous black. A brilliant blue-black is formed by immersing the polished brass objects in blue vitriol solution. The proportions of the solution are governed by the composition of the brass.

QUESTION No. 1595.—Etching on Glass. *Can you inform us how we can engrave or etch on glass?* M. L. M.

ANSWER:—Coat the glass with asphaltum and scratch the names in it so that the glass will be bare where the name is to be. Then pour two parts of sulphuric acid over the part of pulverized fluorspar in a lead pan, and dip the glass into this mixture. In an hour or two the name will be etched

into the glass and the asphaltum can be removed with oil of turpentine. A simple method is to apply an aqueous solution of hydrofluoric acid to the names with a soft brush. This should be done several times to insure a successful result. You should be very careful with the hydrofluoric acid, as it and its fumes are very injurious to the eyes.

The Enameling of Jewelry.

By CECIL H. SHERMAN.

(Copyright, 1906, by The Jewelers' Circular Publishing Co.)

(Continued from issue of May 23.)

A NUMBER of articles require lapping after the last firing. There are different opinions as to which method is the best. Lapping is the process of smoothing or polishing the surface of an enameled article by means of a revolving wheel and a paste made of water and some one of the polishing mediums, such as rouge, tripoli, pumice, putty, powder, etc. Some use a wheel of soft wood; others, hard wood, leather, tin or felt.

In a shop where there are 80 persons employed as enamellers all the year round (the largest in this country), the following method is used:

A polishing lathe head, with a spindle on either side, is belted up so that the outside of a wheel, six inches in diameter, will run a little faster than the outside of a power grindstone. On one of the spindles is placed a six-inch white wood disk, one inch thick; on the other is placed a wooden disk, faced by closer pitch or fish glue with the hardest kind of felt, one-fourth to one-half an inch thick, and white and smooth. It is trimmed even with the wood and fixed on the opposite spindle, felt side out. The lathe head or polishing head, is arranged so that the light is in front of the operator, and high enough for one to stand up when using it. It is just about as high as an old fashioned power polishing lathe; in fact, you can use one of these if the drive wheel is heavy enough to run the lap at a slow rate of speed.

Make a thin paste of finely pulverized pumice (the kind that is not gritty) and water, about the consistency of thick cream. A bowl half full will be enough at a time. Place the bowl under the wooden wheel, scoop up with your hand the pumice and water and literally plaster the wheel with it. Hold the piece to be lapped for a second or two against the wheel with a pretty good pressure, either against the side or the edge, to suit the surface. Look at surface to see what progress you have made. Then scoop up more pumice and water and repeat until you have a perfectly smooth

surface, finished on the felt wheel, using just enough pumice, called "slush," to keep the piece from getting hot.

If you cannot get hard felt wash the wooden wheel clean and proceed in the same manner, using water instead of slush. Do just enough of this lapping to remove the greasy appearance from the article.

If you are generous with the slush, have a soft pine or white wood wheel (poplar or bass wood are equally good), and pumice of the finest kind, free from dirt or grit, the results will be satisfactory. Dirt or grit will make scratches on the surface, and a little pimple or bump on the enameled surface before you start to lap will leave a ridge, etc.

Usually a piece of jewelry that is decorated by the process of enamel painting is first prepared for enameling in the regular way, and then given one or two coatings of white enamel, each of which is charged on very smooth and even and not fired too smoothly. On this white surface one can proceed to paint as though it were china, using the same colors. La Croix tube paints for china give very good results, but the better work is accomplished by using dry colors that you yourself grind in lavender oil. Instruction in China painting would enable one interested in this work to accomplish very good results.

There is, however, quite a difference in the mode of firing an enamel painting; also in colors after firing.

If one desires to make a test plate of oxide on silver which has been given two coats of white, take the enamel paints (or china paint) and make a blend of each color on the plate; then place it on top of the furnace or in some very warm place, and when the paint is thoroughly dry, fire it the same as you would an enameled article which has been stoned off and cleaned; then cool and note the results, bearing in mind when you proceed to make some design or tint the way the paint appears after firing.

Should you find it difficult to paint on such a smooth surface the plate can be dipped in hydrofluoric acid, wet brushed and rinsed in clean water. It would be better, in making this test, to make, say two blends of each color, to fire, and, when cool, to give each of them a second coat of the paint; fire again and, when cool, charge an even coat of fondant (or flux) for painting over all of the painted surface, and fire it the same as you would a coat of enamel. A great many colors disappear on enamel; some will stand a number of firings and others only a few. When you know your color, the rest depends upon your artistic ability.

The most common enamel paintings are violets and pansies. In order to get the deep colors on these some are fired eight or 10 times, and are then given two coats of flux. The dead finish on the flowers comes from dipping them in white acid (hydrofluoric) and rinsing them in clean water, some preferring warm water. This is usually done after the work is polished, gilded or finished in whatever way desired.

Devoted to Art Pottery, China, Marbles, Bronzes, Cut and Decorated Glass Ware, Bric-à-Brac, Lamps, Art Metal Wares, Fancy Goods and Kindred Lines.

A fine Bronze Group Recently Presented to the Metropolitan Museum of Art.

The Mares of Diomedes, by Gutzon Borglum, presented to the Metropolitan Museum of Art by James Stillman, is now its place in the Court of Sculpture, and is a most beautiful and significant addition to the museum's collection of

sprang upon one of the animals and led them in a wild stampede to the coast. Overtaken on the way by the Bistones, Hercules gave the mares into the keeping of his friend, Abderus, whom they promptly devoured. Finally succeeding in killing Diomedes, Hercules threw his body to the mares, who became tame upon partaking of the flesh of their master.

bears Hercules has already gained the level. This device in the conception serves admirably to hold the composition together. There is none of the unpleasant stringing out of attenuated figures which so often takes place when the object of the sculptor is to give the sense of motion. The eye readily seizes the group as a whole and receives the impress of a beautiful silhouette.

THE MARES OF DIOMEDES, BY GUTZON BORGLUM, IN THE METROPOLITAN MUSEUM OF ART.

African sculpture, says Annie Nathan Meyer in a second number of the museum's *Bulletin*.

The motive of the group is taken from the eighth task of Hercules, which was to bring to his master, Eurystheus, the man-eating mares of Diomedes, King of the Bistones in Thrace. Hercules made an unexpected attack upon those who guarded the stables where the mares were kept,

The sculptor has seized upon the moment of stampede—the horses dash forth at headlong speed close upon the heels of their leader, upon whose back clings Hercules urging them on. They have encountered a slight rise, one is in the act of dashing breathlessly up, others stumble as they encounter the obstacles to their mad flight, one crowns the summit, another slides down on its haunches, while the horse that

Furthermore, the sense of the slight elevation encountered accentuates the powerful onrush of the horses. It would seem almost as if something of the increased impetus that seeks to overcome the barrier is communicated to the spectator. While the spirit of panic is caught most wonderfully by the sculptor—the high-strung steeds fairly quivering in their frantic desire to escape from some unknown terror—yet

SIGNS

WE make all kinds from the smallest card for your window to the mammoth display for your factory roof. Have made signs you could read a mile.

"No trouble to ship out of town."

THE FORMAN CO.
SIX LIBERTY PLACE
NEAR MAIDEN LANE NEW YORK

There is not the slightest confusion. The flow of the utterance has not been made a cause for incoherence.

There is in the group the exquisite feeling or mass which is like the unison of a perfectly controlled orchestra, through the most impassioned performance is the restraining touch of the baton. Though the subject of the group is that of flight under the disintegrating influence of terror, the striking note of the composition is repose. To produce an impression of repose by a reliance solely on the subject, is a matter of comparative ease; to produce it by a reliance solely on artistic treatment, indeed in this case actually in spite of the subject, is to attain a bound to an exceptional mastery of sculptural expression.

It is certainly easier to record results than to point out their source, yet it is only clear that in this group the sculptor has triumphantly solved several of the most difficult sculptural problems. Note, for instance, how he treats the subtle problem of suppression. Note the backs of the figures, every muscle is not insisted upon, there is no sense of bareness, every part has its due interest. The result of this judicious suppression is that the spectator's eye does not painfully bump along the surface as in the case of so many modern statues, but is encouraged to follow the sweeps of significant and beautiful lines. Again, see how the chief elaboration of detail is upon the long strained heads of the animals, with their wide nostrils, their tiny, savage mouths, which express so much of the spirit of the myth. With what skill our interest is really kept up and centered upon the point that the sculptor has selected, yet nothing is lost by too great a neglect of the spots to fasten our attention on precisely that which the sculptor would have us miss by. The manes are treated, not merely, but sculpturally, the 28 legs are modelled under the influence of instantaneous impress of the brain, which records, in a confused jumble of minute contradictory contortion, but the co-ordinated motion of rapid motion.

Recent Decisions by General Appraisers on Terra-Cotta, Statuary, Earthen Ware, Etc.

Terra-Cotta Statuary.—Protest of Mrs. E. H. G. against the assessment of duty by the Collector of Customs at Washington. Certain terra-cotta statuary was held to have been properly assessed under Par. 96, Tariff Act of 1897, relating to undecorated earthen ware, the Board ruling the contention that it should have been assessed as works of art.

Statuary.—Protest of John Wana-maker against the assessment of duty by the Collector of Customs at Philadelphia. A statue and medallion, classified under Par. 115, Tariff Act of 1897, as manufactures of marble, were claimed dutiable as statuary as defined in Par. 454, Act of 1897. The protest was sustained as to the statue and overruled as to the medallion. 5501 (T. D. 24822) and G. A. 5225 (T. D. 10) followed.

Decorated Steins.—Protest of Moses Norris against the assessment of duty by the Collector of Customs at Baltimore, G. A. 5948 (T. D. 26095) sustained, relating to decorated steins.

The Gotthelf Jewelry Co., Vicksburg, Miss., has moved its stock into larger quarters directly opposite the old location.

Odd Silver Necklaces Made by Skillful Navajo Jewelers.

There arrived at B's big curio store something that there has been a good deal of inquiry for by collectors of curios—silver necklaces of the Navajos. They are exceedingly rare. Mr. B. has been trying for a long time to get some of them, but never until yesterday did he succeed. He has now only three. One is known as the chief's necklace, another as the necklace of the medicine man, and the third is a simple necklace.

The necklaces are made of coin silver. The beads are hollow globes of silver of varying sizes. The pendent is the sign of authority, and in both the chief's and the medicine man's necklace it is a sort of crescent, the horns of which nearly meet. Within the pendent of the chief there is a smaller pendent set in turquoise. The medicine man's necklace is without this inner pendent and is also less highly ornamented.

The origin of this sign of the crescent is lost in antiquity. It is only known that it prevailed among the prehistoric races, for in the ruins of the cave dwellers' abodes are found the shell necklaces in which the same form of pendent figured. There is one of these prehistoric necklaces on exhibition.

Besides these necklaces there are many other articles of Navajo jewelry. There is the chief's belt, formed of several shields of silver, each shield being made of ten silver dollars. Then there are the silver bracelets of various widths and designs; there are the souvenir spoons, no two alike; in fact, the Indians never made two spoons of precisely the same design. There are buttons made of silver coins. On the inner side of some of them the stamp on the coin is yet visible. There is a very large variety of Indian rings, some of them set with turquoise and other native stones.—Phoenix (Ariz.) Republican.

Maiden Lane.*

DOWN Maiden Lane, where clover grew,
Sweet-scented in the early air,
Where sparkling rills went shining through
Their grassy banks so green, so fair,
Blithe little maids from Holland land
Went tripping, laughing each to each,
To bathe the flax or spread a band
Of linen in the sun to bleach.

More than two centuries ago
They wore this path—a maiden's lane—
Where now such waves of commerce flow
As never dazed a burgher's brain.
Two hundred years ago and more
Those thrifty damsels, one by one,
With plump round arms their linen bore
To dry in Mana-ha-ta's-sun.

But now! Behold the altered view;
No tender sward, no bubbling stream,
No laughter—was it really true
Or but the fancy of a dream?
Were these harsh walls a by-way sweet
This floor of stone a grassy plain?
Pray vanish modern city street
And let us stroll down Maiden Lane!

*From "In Sun or Shade," by Louise Morgan Sill. Published by Harpers.

THE CUT GLASS
TRADE IN SUMMER.

A FEW samples of cut glass are making their appearance in some of the

New York salesrooms, and they will keep coming for another month or six weeks. Some of the salesmen will soon start on their Summer trips, and the ranks of the men in the field will be enlarged each week until all the territory will be covered by the middle of August. In the warm months of the year the salesmen are generally the only busy men connected with the glass making and glass cutting industries. The glass works are now running quite light, and, as is usual, most of them will shut down for a considerable part of the next two months. Glass cutting factories, it is understood, are quite well provided with blanks to turn out any urgent orders during the Summer, but in these works also the two warm months of the year are mostly given up to vacations, the making of necessary repairs, cleaning up the machinery and things of that kind. By September everything will be in readiness at the factories, so that work may be started with a rush. By that time the salesmen will naturally have sent in a sufficient quantity of orders to make the wheels hum for a time. It is generally remarked, too, that after the Summer lassitude everybody gets extremely busy, all at once. Buyers who had been indifferent for weeks begin to inquire about deliveries. The deliveries for the Fall trade begin in earnest early in October, especially for freight shipment from the eastern factories to far western points. For nearby shipment November is sufficiently early as a rule. All the prominent cutters will offer as usual a considerable number of new designs which have been prepared in the course of the last year. The staple lines are generally made up in stock of sufficient quantities, so that orders may be delivered at any time. In the new designs the quantity to be made up will generally await the judgment of the trade, as shown by the early orders.

RICHLY DECORATED
DOMESTIC CHINA.

IN the factory show rooms of Lenox, Inc., Trenton, N. J., a new line is now on exhibition, including acid gold borders, on fish, game and service plates, tea sets, carving sets and fruit sets. This company is inviting a discriminating class of trade by making a feature of individual services with monograms and family crests. The confidence of this domestic manufacturing house in the output is indicated by the fact that the management urges the trade to call and inspect the samples in order to make comparisons with the china produced in other countries.

THE RAMBLER.

SPECIAL NOTICE

Our line of samples of European Novelties will be withdrawn on July 1st.

Jewelers seeking a collection of choice pieces should not fail to inspect this display. ♡ ♡ ♡ ♡ ♡

FAHYS

Montauk Cases

M2290

They wear—

That's why they are such stars. For no matter how good a case may look when it's new, what counts most is the way it looks when it's old.

And though we're proud of the new looks of the Montauk, it's their old looks that keep the business growing.

The Montauk has always been a successful case, the price and quality have never been juggled with. The sale this year is far in excess of any previous year, a feature that speaks volumes.

• JOSEPH FAHYS & CO.

THE BEST JUDGES

Are the most critical as to the cutting, when considering the worth of a diamond—it's the cutting that makes the diamond brilliant—it's because of its brilliancy that the diamond is so highly prized.

The diamonds we offer are cut in our own cutting works, and no effort spared to see that they are cut right. The price we ask for them—the actual cost of the rough stone, plus the workmen's wages, with our modest profit added.

J. R. WOOD & SONS,

The REPAIRING

END OF YOUR BUSINESS IS THE
MOST IMPORTANT PART OF IT

More people come into your store to leave work than to purchase goods.

Almost every one of your good customers became so through your repair department.

Progressive jewelers know this and concentrate their efforts on the repair department of their business. They give it the most prominent place in their stores; they emphasize it in all their advertisements; they keep themselves and their employes thoroughly informed of the costs of all kinds of work, new ideas and methods; they are courteous and accommodating to repair customers; have all work ready when promised; and do only such work at home as they can do well.

They send all the rest to us.

We devote our entire time, energy, capital, and twenty-five years' experience to this important branch of the jewelry business; employ and educate the best help that can be obtained; systematize and inspect the work, and use every modern method to produce the best work promptly at reasonable prices.

It is to your interest to do business with us, it is to our interest to have you.

Let us work together.

WHY

are the **WADSWORTH WATCH CASES** the most attractive line on the market?

BECAUSE

they are a Brand New line—new engravings, new styles, finest finish, up-to-date in every respect..

CERTAINLY

you should familiarize yourself especially with our **PILOT** (25 year), our **TWENTY YEAR** and our **PERMANENT**.

Are you numbered among the thousands of satisfied dealers who have distributed more than one million **Wadsworth Watch Cases** in 17 years?

We are satisfied that careful investigation and a comparison with other makes will convince you that there is merit, worth and wear in **Wadsworth Solid Gold** and **Gold Filled Watch Cases**—the most profitable and best selling cases you can handle.

IT is the unanimous opinion of those jewelers who have examined the new O and 12 size movements of the ILLINOIS WATCH CO. that they are the best watches in these sizes ever manufactured in America.

SILVERWARE destined for the general service and adornment of the table should, in order to be wholly satisfying, possess not only a markedly decorative effect, but an opulent dignity and a well defined individuality of design.

¶ It is the belief of the Whiting Company that in their new Louis Quatorze pattern, which has been applied to every article suitable for table use, these essentials of success are very prominently displayed.

¶ With the confidence born of this belief, therefore, they beg to call attention to their novel and original treatment of one of the most popular, as it is one of the most effective, of historical styles.

Fifth Avenue and Market Street, Pittsburgh, Pa.

DO YOU realize that most of your customers drink Coffee?

They are doubtless interested in the best methods of making coffee. Nothing is so difficult to obtain as a cup of really good coffee, not because of the poor quality of the bean itself, but because few people really understand how to prepare it as a beverage. The injurious effects from the use of coffee are due to boiling, and the consequent extraction of caffeine and other deleterious substances.

In the Sternau Coffee Machine the coffee is distilled, not boiled, and thus only the wholesome properties are extracted.

The Sternau Coffee Machine is invaluable on the yacht or at the summer house.

Jewelers should see that they are well stocked with Sternau Coffee Machines, for they are in constant demand. Made in copper, nickel-plate, and silver-plate.

Let us furnish you with illustrations and quotations.

JOSH W. MAYER.

NEW DEPARTURE.

THE chief motif of our special designing for our exhibit is essentially conservative decoration for the wearer. To meet the demand of a growing artistic taste for jewels of this character and quality is uppermost in our mind in creating it. In all respects this jewelry differs materially in construction from others; a difference that makes it distinctive, not altogether unconventional, and, withal, in no sense irrational. It is practical and effective where elegance is required and possesses to a marked degree all the charm of individuality. In the hands of clever and ingenious artists, much may be done with it.

What we call "The New Departure" is a pronounced innovation, and while it is anticipated that this is likely to be regarded by old-fashioned makers as "freakish" and provoke much adverse criticism, yet this is one of its most distinguishing features and lends to the face a style peculiar to itself.

So far as we have gone with our new effects, we are especially well pleased with the manner in which our designers and workmen have carried out our original ideas; these will be shown at our fourth exhibition to be held in our offices from August 13th to 18th inclusive.

Once a visit always a visit.

WE DO NOT SELL DEPARTMENT STORES

We Study the Interests of the Retail Jeweler

At a meeting of the directors of the W. & S. Blackinton Company, held May 28, 1906, the following resolution was adopted:

“Resolved: That on and after July 1, 1906, we confine our sales strictly to the legitimate jewelry trade, through the jobber.”

W. & S. BLACKINTON CO.

We believe it is impossible for us to sell department stores without injury to the retail jeweler. In declining the trade of department stores we close many large accounts. However, we are convinced that the adoption of this policy of protection to the retail jeweler and jobber will work to their best interests, as well as to our own.

BROOCHES AND MOUNTINGS

Also GOLD FILLED RINGS, including the popular THREE CROWN

Ostby & Barton Company respectfully announce to the jobbing trade that their fall line comprising many new and original designs is now ready.

OSTBY & BARTON COMPANY

New York, 13 Maiden Lane
Chicago, 103 State Street

PROVIDENCE, R. I.

Tortoisene Combs

Mounted with 10-K. hand-work patterns. Every design is characteristic of originality and every detail is significant of superior workmanship.

Tortoisene is hard to detect from the real tortoise shell, having a rich effect that pleases the most skeptical in artistic hair treatment.

This cut represents a few of our patterns, actual size.

Combs will be much in demand throughout the year and orders should be in advance to insure prompt attention.

Prices on request.

ZIMMERMAN'S ELK MASTERPIECE

Ever on the alert to improve our already most popular line of Elk emblems, we have added what we consider the

Most Wonderful Reproduction of an ELK Head

in gold ever attempted. This is known as the Zimmerman Masterpiece of an Elk.

This Elk head is an exact reproduction in gold of Zimmerman's Masterpiece, "The Elk," which is world famous, receiving

Prizes at Every Exhibition Where Shown

Every line in the painting has been faithfully reproduced by us in the emblem.

We are making this head in 3 sizes (medium, small and midget) in both gold and silver, and in various finishes, also combining it with the dial, with and without diamonds and other precious stones. If your jobber does not handle our line, send for a selection package. Our phenomenal success has inspired many imitators. There is but one line of FOX Emblems, and all goods of our make are stamped with this trade-mark  A quantity or low price may sell the first bill, but quality as well is required to get succeeding orders. Our goods are of the highest standard of quality.

SOLID GOLD CHAINS

OF EVERY DESCRIPTION

The selling expense of chains is an item which ordinarily affects the cost in a measure which is greatly to the disadvantage of the retail jeweler.

In the price of our chains, this selling expense does not appear. You get this benefit when you buy

SOLID GOLD CHAINS

direct from us, as you do not have to help pay the salaries and expenses of salesmen. We have no traveling salesmen and our prices are therefore very low.

For 56 years exacting jewelers have found our chains ready sellers, very profitable to handle and most durable in service.

We will be pleased to send you a selection package

JOHN W. SHERWOOD & FRANK E. HARMER.

Sold through the Jobbing Trade only.

THE Order of Elks has many members in its midst who have money to spend and are willing to use for the purpose of obtaining a fine piece of jewelry, typical of the Order. For these we have added to our ready large variety of buttons, charms, etc., a number of exquisitely made charms, consisting of fine teeth, set in mountings of beautiful designs, enriched with diamonds. The designs vary, all are artistic, the prices reasonable for an article of this high grade. Some of these in your stock will surely bring you "Elk" business. Probably you can dispose of a number of members attending the coming Convention of the Grand Lodge in Denver. Memo. package on request.

ARTIFICIAL
PEARLS.

EGYPTIAN PEARLS

MOUNTED
IN
POPULAR
JEWELRY.

THE PEARL has always symbolized Beauty and Value. Nature's product is most closely approximated in the handsome "EGYPTIAN" Pearls. The iridescence, weight and color of natural Pearls are retained; and inspection of the "EGYPTIAN" Pearls will demonstrate their pre-eminence. The results attained are possible only by a special process, supplemented by expert workmanship. The articles of Jewelry to which "EGYPTIAN" Pearls are applied are artistic creations meriting your attention.

Diamonds Set Without Cost

Means a lot of money saved during the year. This you can do very easily if you have your settings done by a first-class setter. Your diamonds will improve in value more than three times the money you pay for setting them. At the same time your mountings improve greatly. Your customers are satisfied with all the orders you turn out. You can compete with all others who are slow in grasping the importance of these facts, by giving me all your settings. I am sure you will make no mistake. I will prove these facts.

I make a specialty of setting the Platinum Mountings, Watch Cases, Locketts and Gypsy Settings.

"The Armlet"

Well Known Toronto Manufacturers Urge Passage of Gold and Silver Stamping Bill Which Has Been Recast.

ONTARIO, Ont., June 21.—The gold and silver marking bill was again up for consideration before the Senate Committee on Banking and Commerce at Ottawa yesterday. Sir George Drummond, chairman, when a hearing was given to depositions and against the measure. The passage of the bill was urged by W. K. McNaught, V. P. of the American Watch Case Co.; K. George, Standard Silver Co.; Thomas Ren, of Roden Bros., and M. E. Ellis, of V. Ellis & Co., all of Toronto, and C. Stewart, Montreal Watch Case Co., Montreal. Opposition to some of the clauses offered by Walter J. Barr, manager of Goldsmiths' Stock Co., and Samuel G., representing H. & A. Saunders, jewel manufacturers.

The bill has been recast, and some modifications have been effected as the result of discussion of its provisions. The clause prohibiting the use of any trade-marks on stamped jewelry unless accompanied by a stamp of quality was amended so that a trade-mark may be used without a quality mark. It was also provided that a quality mark if used is to be accompanied by a qualifying description such as "gold plate," "plated gold plate," "electroplate," etc. The clause fixing the minimum karat stamp of gold at 10 karats was supported by the committee, but will be strongly opposed at a later stage.

A strong lobby has been working for the bill and despite the lateness of the session it is now generally believed that the Government, having adopted the measure, will put it through before prorogation.

Jewelry, Silverware, Clocks, Watches and Kindred Lines Exported from New York.

WASHINGTON, D. C., June 20.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Berlin: 3 packages clocks, \$140.
 Berlin: 69 packages clocks, \$3,650.
 Bombay: 2 packages plated ware, \$310; 4 packages stereoscopic goods, \$1,100.
 Buenos Ayres: 3 packages plated ware, \$570; 6 packages clocks, \$220.
 Calcutta: 38 packages clocks, \$747; 71 packages clocks, \$871.
 Christiania: 9 packages clocks, \$375.
 Cienfuegos: 1 package jewelry, \$500.
 Glasgow: 1 package optical goods, \$304; 59 packages clocks, \$1,051.
 Hamburg: 2 packages optical goods, \$363.
 Havana: 6 packages jewelry, \$1,422.
 Havre: 3 packages jewelry, \$1,019.
 Hull: 2 packages plated ware, \$300.
 Kingston: 3 packages clocks, \$111.
 La Guayra: 1 package precious stones, \$1,000.
 Lisbon: 41 packages clocks, \$436.
 Liverpool: 1 package plated ware, \$523; 65 packages clocks, \$1,189.
 London: 35 packages clocks, \$793; 2 packages plated ware, \$373; 11 packages optical goods, \$29; 3 packages scopes and views, \$420; 7 packages watches, \$1,357; 1 package plated ware, \$6; 29 packages clocks, \$731.
 Montevideo: 5 packages clocks, \$853.
 Nara: 3 packages jewelry, \$462; 41 packages clocks, \$604.
 Santiago: 3 packages plated ware, \$138.
 Southampton: 1 package jewelers' findings, \$100.
 Tavergher: 5 packages clocks, \$210.
 Sydney: 3 packages plated ware, \$165; 31 packages clocks, \$346.

Trinidad: 2 packages watches, \$228; 1 package jewelry, \$142.

Valparaiso: 1 package jewelry, \$130.

How Thief Who Robbed Richmond, Va., Jeweler Was Cleverly Traced to New York.

RICHMOND, Va., June 23.—Indictments were presented several days ago against Wheaton B. Despard, alias Dan Stevens, who was arrested in New York on the charge of stealing two diamond rings from J. F. Kohler. A special Grand Jury was convened by Judge Witt as soon as word was received here of the arrest, and the indictments were promptly returned. Detective Wiltshire has already started for New York with requisition papers, intending to bring the prisoner to this city.

Charles M. Kohler, who was in the Adams Express Co.'s office at 11 W. 34th St., New York, when the arrest was made, is positive in identifying the prisoner. Mr. Kohler said that one day last week two men entered his store and looked over the diamond rings. He did not notice until after they had gone that they substituted two rings with paste stones for genuine diamonds. He said that one of the men was Despard and the other was a man named Preston, who has not yet been arrested. It is said that Despard registered as Dan Stevens, New York, when he came to this city, and he was for a week a guest of Murphy's Hotel.

In tracing the man the police had the benefit of information obtained from Samuel Steiner & Bro., of this city. On May 26 a diamond ring was pawned by Stevens at this firm's office for \$175. In pledging the ring Stevens said that he had "gone broke" playing faro, and needed the money to get back to New York. After learning of the Kohler robbery Mr. Steiner became suspicious and notified the police.

When Stevens left this ring with the pawnbroker he said that he would take it up through the Adams Express Co. He kept his word as to this. The local office of the express company paid the pawnbroker the money loaned, and took up the ring on an order from New York. The ring was then sent to the New York office for delivery to Stevens, who was arrested when he and his wife called to get the package. The ring pledged with Steiner was not one of those stolen from the Kohler store.

California and New Mexico Turquoise.

The turquoise mines of New Mexico and Arizona have lately not been as productive as formerly, says George F. Kunz, in the report on the production of precious stones in 1905, which the United States Geological Survey will soon publish. The turquoise properties of California and Nevada have, however, been increasing their output.

Considerable quantities of turquoise have been taken from the mines in the desert region of San Bernardino Co., Cal. Many of the stones range from 50 to several hundred carats in size. Some of them have sold as high as \$1,500 each. The color is pale, but it has gained favor, and large quantities of the stones have been sold in the form of beads for necklaces.

Interesting Decision by United States General Appraisers as to Duty on Combs and Necklaces.

Protests of G. W. Sheldon & Co. against assessments of duty by the Collector at Chicago on importations of back and side combs and necklaces were last week overruled by the Board of United States General Appraisers, New York. The combs are declared to be dutiable as a manufacture of celluloid, under Par. 17 of the Tariff Act of 1897, the rate being 65 cents a pound and 25 per cent. ad valorem. The collector assessed duty at 60 per cent, claiming that the articles should be classified either as jewelry or cut glass. The Board did not agree with the collector, so that the decision is not a victory for either side.

General Appraiser Sharretts, in his opinion, says:

"The articles covered by these protests are invoiced as 'combs' and 'necklaces,' assessed with duty by the collector at the rate of 60 per cent. ad valorem as jewelry under Par. 434 and claimed by the importers to be dutiable at 45 per cent. ad valorem under Par. 112 or 193 of the Tariff Act of 1897.

"Regarding the necklaces, no samples were submitted and we affirm the collector's decision relative thereto, the articles being dutiable at 60 per cent. ad valorem either as jewelry under Par. 434 or as articles composed in chief value of beads under Par. 408.

"The combs are known as back and side combs, have each 22 teeth, and are composed of celluloid made to imitate horn or tortoise shell, a row of disks or ornaments composed of imitation jet made of paste disposed in symmetrical arrangement being riveted to the top of each comb. These disks have molded faceted surfaces which have been ground and polished to add to their luster.

"In a supplementary report to the collector the appraiser expresses the opinion that the combs are dutiable at 60 per cent. ad valorem, not as jewelry but as articles of glass cut under Par. 100.

"The invoice value of these combs averages Krs. 10 per dozen, while the testimony taken by the Board shows the value of the paste ornaments to be Krs. 4 and Kr. .40 for the respective sizes per hundred dozen. Inasmuch as the cost of attaching the ornaments to the combs applies equally to both materials, it is manifest that celluloid is the component material of chief value in the completed articles, and we so find as a fact.

"The importers not having claimed redress under Par. 17, we are constrained to overrule the protest, the collector's decision standing affirmed."

The Passamore Gem Co., 373 Washington street, Boston, Mass., has greatly increased its facilities for the cutting of gems by taking large and adequate factory quarters in the home office building. The new space will be furnished with modern and up-to-date lapidary equipment, and will accommodate over 30 cutting hands, making the company the largest individual cutting concern in New England. Joseph B. Wagner and Stephen Hadley will hereafter represent the company on the road.

Trade-Mark Registered.

THE NATIONAL STAMPING LAW

was signed by the President of the United States on June 15th, 1906.

This law does not go into effect for one year; this time is allowed so that manufacturers and dealers may readjust the quality of their goods, so that they will be up to the quality they are stamped.

There will be no readjustment in our factory, for one of our principles in business is to make goods of unquestioned quality.

As a guarantee that the quality is just as it is stamped, we place upon every article we make this registered trade-mark—

Beautiful Silver Statue of Elk to be Awarded at Convention of B. P. O. E.

THE trade in Denver, Col., has reason to feel proud of a splendid piece of work recently turned out by the Boyd Park Jewelry Co., of that city. It is a silver elk, signed and modeled by T. C. F. Sorensen, of that firm's engraving and designing department. The elk stands on a base composed of valuable gold and silver ore from mines of Colorado and is composed of ounces of native silver. It is 33 inches high and is valued at \$1,000.

The trophy was offered by Fred. G. Shaffer, a local mining man, as a prize to the lodge which sends the largest number of ladies to the convention and reunion of B. P. O. Elks, which will be held in Denver in July.

Mr. Shaffer is very enthusiastic over the skillful modeling of his gift to the Elks. The silver in its native state was placed in the hands of the designer, and under skillful manipulation there grew out of the great bulk of silver the magnificent figure of an elk, perfectly proportioned and every way fitted to typify the state in which it was fashioned.

Mr. Sorensen, the designer, was formerly with Tiffany & Co., New York, and samples of his work are to be seen at the National Museum, Stockholm, Sweden, and Windsor Castle, England.

Further Litigation Between the McKay Co. and James C. Buchanan, Washington, D. C.

WASHINGTON, D. C., June 22.—A suit to recover \$5,000 damages has been filed in the District Court by the McKay Co., a corporation formerly conducting a jewelry business at 1115 1/2 St., N. W., against James C. Buchanan and Thomas H. Hall. According to the papers filed with the District Supreme Court, the McKay Co. alleges that Buchanan and Hall conspired to oust it from the half of a store occupied by the company. In furtherance of the alleged plan it is charged that Buchanan, from whom the McKay portion of the store was leased, defaulted the payment of rent due June 1 on the store building, which Buchanan held, it is claimed, under lease from Hall. It is further charged that Hall sued Buchanan for possession before a justice of the peace and was awarded judgment.

The McKay Co. claims that under the proceedings it was dispossessed, notwithstanding it had performed, so it is claimed, all the terms of the agreement with Buchanan.

There seems to be no end to the suits and counter suits entered by these parties, who have been fighting each other for a number of months.

Bergeda Bros. have leased quarters at 1 Church St., Nashville, Tenn., where, September 1, they will open a first-class retail jewelry establishment. David M. Bergeda, a junior member of the firm, has returned from San Francisco, where he was connected with one of the leading houses in the recent disaster. Aaron Bergeda, senior member of the firm, is an experienced watchmaker, having learned his trade in Austria.

New England Watch Makers Make Merry at Banquet Held in Boston, Mass.

Boston, Mass., June 23.—The dinner of the New England Watchmakers' Club at the American House last Tuesday evening was an unqualified success. The club was the guest on this occasion of the Waltham Watch Co., and Supt. Edward A. Marsh, of the big factory, represented the company as host.

There were nearly 200 participants, and at the reception and in the banquet the scene was an exceedingly animated one with the spirit of thorough comradeship and unalloyed enjoyment pervading the entire assemblage. Songs and instrumental music enhanced the reception, and when the march for the banquet hall took place, Superintendent Marsh and President F. W. Ruggles, of the club, led the long line to the tables, where a most appetizing spread was provided.

The menu was as follows:

MENU.

Little Neck Clams.
Chicken Gumbo. Consomme Julienne.
Olives. Radishes.
Broiled Bluefish, au Beurre.
Sliced Cucumbers. Charrau Potatoes.
Roast Spring Lamb, Mint Sauce.
Delmonico Potatoes. String Beans.
Maraschino Punch.
Lobster Cutlets, with peas.
Banana Fritters, au Kirsch.
Strawberry Shortcake.
Frozen Pudding. Assorted Cake.
Cheese. Crackers.
Coffee.

The postprandial exercises were also of great interest, and fully a great source

of enjoyment as the feast. President Ruggles happily introduced the various speakers, first making a brief address in which he set forth the purpose of the club, which was formed not only to gather for recreation at intervals, but to listen frequently to instructive papers and addresses on topics related to the important industry with which the members are identified.

Superintendent Marsh, of the Waltham Watch Co.'s factory, was presented as the first speaker, and received an ovation as he rose to respond for the company. He contrasted the watchmaking of modern times with that of the past most effectively, for he has been identified many years with the remarkable growth of the establishment over which he so ably exercises supervision, and his talk was listened to attentively and appreciatively by all present.

Assistant Superintendent John W. Burckes, of the Waltham factory, was also present and spoke of the advantages to be derived from such associations as the Watchmakers' Club.

A large number of the members and honorary members were also called upon and responded briefly during the next hour, which was made the occasion for a series of informal and impromptu remarks, which afforded much pleasure for the gathering. Among the participants in this feature of the after-dinner exercises were H. E. Dunbar, M. N. Smith, Mr. Bagley, Chicago; Treasurer W. E. Geyer, who reported a

fund of \$500 in the treasury; Secretary John S. Lowell, who called attention to the growing membership list, with upward of 200 names, and an honorary list of nearly 30; Charles M. Smith, who told some witty stories with excellent effect; Thomas F. Proctor, Olaf Olsson, Charles J. Olney, Jr.; F. R. Cunningham, F. J. Whitton, R. A. Lohnes, Worcester; Charles S. Robb, Maurice Conner, and others.

Regrets at the absence of Conover Fitch, who was detained by illness, were expressed by Mr. Ruggles, and a letter from James S. Blake, one of the honorary members, was read.

The exercises concluded shortly before 11 p. m., after an evening that was a red-letter event in the history of this promising new association in the trade.

The roster of the club, most of whom were present at the banquet, and of the honorary members, several of whom were at the banquet in person, or represented by proxy, is as follows:

F. W. Ruggles, John S. Lowell, W. E. Geyer, M. H. Keyes, H. S. Reynolds, F. R. Cunningham, W. B. Garfield, P. A. Lesperance, Edgar R. Hills, Thomas F. Proctor, Alex. Fish, L. M. Watson, J. W. Smith, A. R. Stanley, J. T. Tudor, Herbert L. Gruber, D. J. Dannahy, Roy M. Nichols, George Garland, Adolph Faller, Wm. N. Loud, Conrad Erickson, Charles S. Rodd, K. E. Ohstedt, C. S. Blake, J. Emanuels, C. T. Jenkins, L. T. French, K. Luben, J. Charles Stever, Frank W. Dodge, Alfred F. Motschman, F. W. Harness, Frank A. Gendreau, E. D. Clarke, George A. Wildon, H. D. Higgins, Charles K. Magnuson, F. R. Furbush, O. C. Dow, J. M. Bird, B. T. Parker, Samuel Baker, Louis F. LaPointe, C. S. Freeman, Charles N. Brown, C. C. Miller, Fred S. Harlow, Charles H. Swaisey, L. M. Coburn, A. F. Thurlow, C. W. Jonhnet, C. F. Raash, Bernard G. Hushband, Elmer C. Read, Charles Pass, George W. Hallett, A. Anderson, Albert H. Brooks, John Ferguson, F. D. Bacon, C. G. Tucker, Thomas Milner, A. Johnson, J. W. Cahill, Henry S. George, J. M. Vass, E. A. Gregor, Howard L. Margeson, Herbert N. Libbey, James F. Murphy, Dr. J. L. Basford, W. E. Stormant, L. Kibbler, C. M. Smith, Eloi Lamont, Geo. E. Homer, P. H. Whitton, L. Schworer, W. J. Anderson, P. D. Vaughn, Walter C. Jenckes, A. B. Sly, Charles M. Murphy, Pierce

MEMBERS AND GUESTS OF THE NEW ENGLAND WATCHMAKERS' CLUB AT BANQUET IN BOSTON, JUNE 19.

During the celebration of

MERIDEN'S CENTENNIAL

June 10-16, 1906, the buildings of the city were handsomely decorated—among them the factory of

The Meriden Britannia Co.

The electric sign shown in the center picture is a permanent institution; it is the doorplate announcing the home of

"1847 Rogers Bros."

"Silver Plate That Wears." The other views show parts of the decorated factory, as seen from different positions, nearly 2,000 separate flags in all being used.

The Meriden Britannia Co.

is not so old as Meriden, which was incorporated as a town 100 years ago, in 1806, but for over half a century it has been the leading industry of the "Silver City." For fifty-nine years the original silver-plated spoons, forks and knives, the famous brand marked

"1847 Rogers Bros.,"

have maintained the standard of silver-plated flatware established in 1847 by Rogers Bros., then of Hartford, whose interests later were merged with those of the Meriden Britannia Co.

The jewelry trade is among the many lines of business, heretofore exempt, which come under the new law adopted by the Legislature of Kentucky which requires license fees to be paid by merchants. The bill which became effective June 11 provides that each transient vender of spectacles or jewelry must pay \$10 license fee whether the articles are offered for sale in the store or not.

Death of the Late Max J. Lissauer
Funeral to be Held in New York—
Resolutions on His Death.

The body of Max J. Lissauer, the head of the wholesale jewelry firm of Lissauer & Co., 12 Maiden Lane, New York, whose sudden death at Amsterdam, Holland, was announced in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, was placed on the steamer *Sandam*, which sailed from Rotterdam on its way to New York July 3. Mrs. Lissauer is coming on the same boat. Arrangements are being made to conduct funeral services in this city.

The career of Max J. Lissauer was only sketched in last week's issue. In that of a man who had been for many years as active as was Mr. Lissauer in business and in the social affairs of his community, the pen is quite inadequate to more than merely call attention to some features in his busy life.

His birth took place in the city of Stuttgart, Wurtemberg, Germany, Oct. 21, 1841. After learning the jewelry trade in his own town he came to New York in his 19th year, and three days after landing the young man obtained work as a watch repairer in the Maiden Lane district. A proof of his business ability was not destined to work long for others, and in 1861, just six years after he arrived in the city, he engaged in business on his own account as a member of Waaser & Lissauer, the two partners having been schoolmates at Stuttgart.

In 1869, after Mr. Waaser's death, the firm style was changed to Lissauer & Co. The next change was the admission of L. I. Sondheim, who had been with Mr. Lissauer for several years, the firm style becoming Lissauer & Sondheim. The association between these two men continued for 23 years until 1893, when Mr. Sondheim withdrew to become a member of the New York Stock Exchange. The old style Lissauer & Co. was again adopted in the following year, and has been continued since. The new partners were admitted in 1893, M. S. Kallman, A. Boehme and D. H. Leman. At the same time Marcel Mirabeau obtained an interest in the business. In 1898 Mr. Lowman withdrew and Mr. Mabeau became a full partner. Mr. Boehme after having for years been confidential man and bookkeeper retired in 1901, since which time the members of the firm have been Messrs. Lissauer, Kallman and Mirabeau.

When Mr. Lissauer first engaged in business the firm sold jewelry, materials and tools. Gradually the character of the business changed until the firm came to deal in diamonds, watches and jewelry. During the existence of the old National Association of Jobbers in American Watches Mr. Lissauer was the chairman of its executive committee, and this position naturally gave him much prominence in the trade. He was a director at the time of his death in the Jewelers Board of Trade and was a member of the Jewelers Protective Union. An organization whose work appealed most strongly to him, was the Jewelers Relief Association, which he assisted in forming back in 1896, the year which has always been remembered as one of more trials for many in the jewelry trade.

He was the first president and held the position up to the time of his death. The organization helped many worthy jewelers over a period of financial stress, and while the occasions for it to act have not been numerous in recent years, yet it has been a force for good and only a few weeks ago donated from its treasury \$500 for the California sufferers.

Another organization in which Mr. Lissauer labored with fervor, in order to give aid to others, was the Jewelers' League, of which he was first vice-president and chairman of the executive committee. As the chairman of this committee it fell to his lot to take an especially active part in putting into effect the recent changes in the constitution and by-laws, involving a new plan of assessments. He attended the meeting of the league, at which the plan was discussed and he explained to the members with clearness and frankness the reasons why the changes had become necessary. The strain proved considerable and after the meeting his friends noted that he was quite exhausted. He had, however, an engagement to attend that same evening, as a guest of honor, the annual dinner of the 21 Karat Club, and he was present. Since that time he had felt the need of rest and had hoped to obtain it on his trip to Europe, while also making purchases in the diamond markets. He sailed with Mrs. Lissauer on May 30.

Outside of the jewelry trade Mr. Lissauer took a prominent part in many enterprises and social movements. In 1890 while he was president of the Verein *Freundschaft* that organization erected its \$500,000 building at 72d St. and Park Ave. The educational and social work of this organization was especially dear to him and he continued his interest up to the end. He was a member of *Tecumseh Lodge* of Masons and of various other brotherhoods. Practically all of the Jewish philanthropic and educational organizations in New York had the benefit of his active interest and support. In politics he was a Republican, and he was a delegate to many conventions of his party. He was a member of the committee of 70 which helped to elect Mayor Strong.

Many young men went to Mr. Lissauer for advice and always found him ready to assist them. His counsels were highly valued by his business associates and friends, as he had a faculty of readily grasping the facts and searching out the vital side of any question that arose. The friends whom he chose were bound to him by the closest ties of companionship. His manner was unassuming; his ways simple and at all times he showed a genial, kindly and sympathetic side to all with whom he came in contact. His sense of justice was clear and keen and his moral standards the highest, and men who had relations with him of a business or social character soon learned to appreciate his worth. In assisting others, when he could do so, he took great pleasure.

The fact that many people continued business relations with him for long periods of time tells better than words the fact that he won and maintained the respect and confidence of all those with whom he moved and worked. A watchmaker had been in his employ from 1866

through the various changes, and is still with the firm. Several others have been associated with him for 20 years or more. Various organizations to which he was a member have passed memorial resolutions indicating the high regard in which he was held.

The body will be taken, on arrival in New York, to his home, 64 E. 83d St., where Mr. Lissauer had bought a residence a number of years ago. He is survived by a widow, one daughter and a grandson.

At a special meeting of the officers and executive committee of the Jewelers' League of New York, held in its offices June 20, the following preamble and resolutions were unanimously adopted:

The officers and executive committee of the Jewelers' League of New York, having been notified of the death of the first vice-president, their associate and fellow member, Max J. Lissauer, and desiring to give expression to the profound sorrow felt by every member of the organization, have ordered the following resolutions to be spread upon the records of the League, and instruct the secretary to transmit an engrossed copy thereof, to the family of the deceased:

Whereas, We deeply mourn in the death of our beloved vice-president, Max J. Lissauer, the loss of a true friend and an upright business associate of unexcelled integrity, a gentleman in all walks of life, always ready to devote his disinterested aid and counsel to the best of his great abilities to the welfare of religious, charitable, business and social affairs, but especially most energetically to the success of the Jewelers' League, which he has faithfully served as vice-president or as a member of the executive committee for nine successive years.

Resolved, That in the death of Max J. Lissauer, the jewelry trade of the entire country has lost one of its most eminent men. By his faithful work as vice-president of the Jewelers' League and as an officer and member of various other trade organizations, he contributed in no small degree to the welfare of these associations, and to the making of them what they are to-day, successful, co-operative trade institutions.

Resolved, That by his demise the League has lost an energetic officer, and a most congenial friend and loved companion.

Resolved, That we tender to his bereaved family our sincere sympathy in their irreparable loss.

Resolved, That the officers and executive committee attend the funeral service in a body, and as a further mark of respect this office remain closed on the day of the funeral, and that this meeting do now adjourn.

Death of Charles F. Kern.

ROCHESTER, N. Y., June 25.—Charles F. Kern, treasurer of the Rochester Spectacle Co., on Water St., died of heart disease in a Pullman berth between Baltimore and this city Saturday morning. His death was not discovered until a porter started to awaken him. Mr. Kern retired in good spirits shortly after leaving Baltimore and died while asleep. On the arrival of the train in this city Coroner Kilip was notified, and took charge of the remains. An autopsy was performed the same evening.

Mr. Kern was 24 years old and unmarried. Up to a few years ago he was an employe of the Bausch & Lomb Optical Co. He left this company to form a partnership with Frank Stortz, also of the Bausch & Lomb house, to engage in the manufacture of spectacles. Mr. Kern was popular with the trade, and the business was successful from the start. His death will be mourned by many friends in this city and among the trade in general.

Wm. E. Crellin, Chillicothe, Mo., has been succeeded by E. M. Crellin.

Mr. ABE A. HELLER

Death of Edwin H. Poor.

BOSTON, Mass., June 22.—Edwin H. Poor, a prominent member of the jewelry trade in this city, and jewelry buyer for the Shreve, Crump & Low Co., died suddenly of heart failure in the concern's store, Somer St., yesterday. His death was entirely unexpected and a great shock to his friends, as he had made preparations to sail Sunday from New York on a trip to the Mediterranean to benefit his health. Though severely ill, he felt that a rest was needed, but no one had any idea that his condition was critical until he was stricken in the store. Mr. Poor, who was about 65 years old, had a career in the jewelry trade of nearly

THE LATE EDWIN H. POOR.

half a century. He first learned the watchmaker's trade as it was taught in his time and later became employed by C. A. W. Osby, leaving the latter over 30 years ago to join the forces of Shreve, Crump & Low Co., with which house he spent the remainder of his life. When the Civil War broke out he enlisted in the Fifth Massachusetts Infantry and served three years before receiving his discharge. He was a member of the G. A. R., of the Masons and also of the Odd Fellows; he had traveled extensively in this country and Europe and had a wide number of acquaintances and friends.

Mr. Poor was a perfect embodiment of the old school gentleman. There are scores of regular customers of the concern which he served so long who never dreamed of making an important purchase in the watch or jewelry line without consulting Mr. Poor regarding the matter in hand. He was courteous, accommodating, patient and well informed regarding the details of manufacture, intrinsic values and other points calculated to be of assistance to purchasers. Such a man in a concern of the standing of Shreve, Crump & Low Co. had a most uplifting influence upon the entire personnel of the sales department. That he

Clocks, Watches, Jewelry and Gems Imported Into Canada.

TORONTO, Can., June 21.—The monthly report of the Department of Trade and Commerce of Canada for March, just issued, gives the value of imports for home consumption in the jewelry and kindred trades as follows:

was thoroughly appreciated and esteemed by his employers was a matter of course. That his associates also were grieved and shocked by his sudden demise is evident from the manner in which they speak of the establishment's loss and of his long and faithful service among them. In disposition he was quiet and genial and a universal favorite of all with whom he came in contact. Modest in the extreme, even his most intimate friends seldom knew the extent of his knowledge or acquaintance on various subjects until some particular occasion would serve to draw it out.

Deceased never married. He will be buried with the rites of the Masonic order.

Death of H. M. Carpenter.

MINNEAPOLIS, Minn., June 20.—H. M. Carpenter, president of the Minneapolis Jewelry Mfg. Co., died Monday of heart failure, aged 78 years. He leaves a widow and one son, Henry. Mr. Carpenter was a pioneer resident of Minneapolis, having come to the city in 1854, after having learned the jewelry manufacturing business in Providence. In 1858 he engaged in the general store business, but was burned out a year later. He determined to pay all his liabilities, which he did in six years.

In 1860 deceased engaged in the general store business again, and later was a paper manufacturer. He afterward established the Minneapolis Jewelry Mfg. Co. The latter was very successful, and Mr. Carpenter gradually withdrew from many of his other interests, although he continued a warehouse and building material business, under the name of the Union Railway Storage Co.

Thieves Who Robbed Albany Jeweler Not Yet Captured—A List of the Missing Articles.

ALBANY, N. Y., June 25.—A detective went to Troy last week and brought back a man who was suspected of being one of the thieves who recently robbed W. F. Antemann & Son, 21 N. Pearl St., as told in the last issue of THE CIRCULAR-WEEKLY. The prisoner was taken to police headquarters, where Mr. Antemann, after examining him carefully, stated that he was not one of the men whom he believed committed the theft.

Mr. Antemann has asked THE CIRCULAR-WEEKLY to ask its subscribers to let him know if any of the stolen property is offered to them for sale. Among the missing articles are: One diamond sunburst brooch, the diamond weighing altogether 2½ carats; one diamond and ruby ring set diagonally with diamonds weighing ¾—1/32 carat, ruby weighing ⅞—1/32 carat; one four-stone pearl diamond princess ring, with pearls weighing 8 grains and diamonds weighing 1½ + 5/32 carats; diamond and opal cluster ring; one single-stone navette cut ring set in platina, with stone weighing 2¾ + 1/32 carats, and 18 diamonds on each shank weighing 1/32 carat.

C. A. Elder has purchased the business of Lewis C. Pedersen, Walnut, Ia.

A portion of the roof of the Calendar Clock Co.'s factory, in Ithaca, N. Y., was blown off during a gale which swept over that place, about a week ago. A large chimney near the rear of the building was also blown down.

Many Opticians Pay Last Tribute to the Late Andrew J. Lloyd.

Boston, Mass., June 23.—Andrew J. Lloyd, whose death was reported last in THE JEWELERS' CIRCULAR—WEEKLY, was esteemed throughout the optical trade in the country. That fact was attested in several ways during the week succeeding his death, when the firm of which he was senior member was in receipt of many expressions of sympathy.

His career had been a conspicuously successful one, marked by steady growth and expansion, until the firm of A. J. Lloyd & Co. had attained a prominent place in the

THE LATE ANDREW J. LLOYD

the foremost concerns in all lines of business in this city.

At the funeral services there were a number of exceedingly beautiful floral tributes among them being remembrances from American Optical Co., the Globe Optical Co., Sussfeld, Lorsch & Co., Martin, C. Land & Co., Bausch & Lomb Optical Co., Oelschlaeger Bros., and others of prominence. A beautiful blanket of roses, tirelessly covering the casket, came from the firm's employees, by whom Mr. Lloyd was held in high esteem.

Rev. E. A. Horton, one of the best known Unitarian ministers in Boston, and personal friend of Mr. Lloyd, was the officiating clergyman. The burial was at Mt. Auburn Cemetery in Cambridge.

The third annual conference of American Republics will open in Rio de Janeiro, Brazil, July 21, and remain in session until Sept. 1. Secretary of State Root has six delegates of this country will also sail from New York. The conference has been the subject of a series of articles recently in the *American Exporter*, particularly the issue of June, which is Pan-American number, a perusal of which will prove highly interesting to all manufacturers and merchants engaged in trade with South and Central America. The entire issue is profusely illustrated with portraits of South and Central American presidents and typical views of tropical scenery. The publisher, William J. Johnston, will attend the conference and make an extensive tour of South America.

Outing and Clambake.

Manufacturing Jewelers of New England Enjoy Annual Midsummer Sail and Feast.

PROVIDENCE, R. I., June 23.—That the Providence and Attleboro jewelers can make and make a fine showing, that the Attleboro men can play rings about the local location on the ball field, and that it is an even break when it comes to taking a fall out of the Rhode Island clam served in a bake, were among the things demonstrated at the annual outing of the New England Manufacturing Jewelers' and Silversmiths' Association held yesterday. The men from the Attleboros led away the scalps of the Providence delegation of ball tossers to the tune of 2, and the much-talked-of game has none of its verdure as a topic of conversation, although the men from up north long most of the talking. Providence, it is said, is silent.

The festivities, as usual, began with a ride, after a brief reunion at Freemasons' on Dorrance St. Here the members' guests were decorated with a tag bearing the inscription: "When this package is returned to N. E. M. J. and S. Association, Providence, R. I." On this was also noted the name of the wearer. Each member and guest was then provided with a Japanese umbrella. On the arrival of the Attleboro and North Attleboro delegation, the 100 odd strong, preparations were at once begun for the parade. This gave the place a treat.

There were about 400 in line, and every one was equipped with a parasol, and over the shoulder was slung a canteen, a precaution against any sudden indisposition. Led by Reeves' American Band and a platoon of police skirmishers, the marchers proceeded through the down-town section thence to the steamer *Warwick*, which awaited the party's arrival. Field's Point was the first stopping place, and here the members disembarked and proceeded to the dining halls, where Col. Atwell served one of his best shore dinners.

After dinner was out of the way, shortly

after 2 o'clock, the boat was again boarded and the jewelers started for Rocky Point, where the ball game was to be played. But they had a part to play before reaching there. Just off Crescent Park a sister steamer of the *Warwick* was found stranded on a sand bar. This predicament of fellow pilot was too much for the captain of the *Warwick*, and he went to the craft's aid. After much difficulty and the snapping of several hawsers, to the accompani-

c f.; Crandall, r.f. The All-Attleboro aggregation sized up something like this: R. Sherman, s.s.; Maintien, 2b.; Le Stage, c.; C. Sherman, p.; Frothingham, 3b.; Bullock, 1b.; Straker, r.f.; Hodge, l.f.; Chisholm, c.f.

With the first stage of the battle, Providence at bat, the local rooters began to open up. It was well they did, for they didn't have much opportunity afterward. Reynolds, the first man up, found the curves of the Attleboro man altogether too de-

HOW THE JEWELERS PARADED TO THE BOAT LANDING.

ment of various helpful (?) suggestions from the party aboard the *Warwick*, the distressed vessel was once more floated and the jewelers proceeded on their way in the consciousness of a duty well performed.

Rocky Point was finally reached, and the ball game was started. The Providence warriors lined up like this: Reynolds, 2d; Carpenter, p.; Almy, 1b.; Ford, s.s.; Burt, 3b.; MacDonald, l.f.; Williams, c.; Mif-

ceptive and retired to the extreme rear. Carpenter connected with a high one and sent it out toward centre field, causing the gentleman in that section of the country much unnecessary labor. Almy got in the way of an inshoot and walked, but then Ford and Burt failed to connect for a hit and there was "nothing doing."

After that Attleboro had a turn. Some say the side was never rightfully retired,

because the scorer fainted from exhaustion and the umpires, Tom Catlow and Tomman, gave the visitors the double cross. It was more than hinted that Mills was going for his release, and the way the ind managed to keep out of the way of gro and sizzlers was a sight for the. Before the agony had been declared ially ended nine runs had come over rubber. Three more were annexed and Providence also managed to get the history sayeth not how.

When the game was over the crowd back to the boat, having previously had a picture taken for the enlightenment of future generations. On board there was more to eat and drink and the band played popular and classical selections, George Dover sang tenor solo, a sail about the bay was enjoyed. This brought to a conclusion sufficiently early allow the party to get back to this city time for the out-of-town members to catch the early evening trains.

The affair was under the direction of an executive committee, composed of Frank Reynolds, Charles M. Robbins and H. Cutler, and was voted one of the most successful the organization has ever had.

Creditors Ask That Severe Punishment be Given Morris and Joseph Klein Who Pleaded Guilty of Larceny.

Morris and Joseph Klein, who were partners of Klein Bros. & Co., the bank manufacturing corporation at 51 Maiden Lane, New York, appeared before Judge Rozalsky in the Court of General Sessions of the Peace on Friday of last week for the purpose of receiving sentence on the charge of grand larceny in the second degree which they had pleaded guilty, as related in the issue of June 13. The case was postponed, this time until to-day.

The prisoners had been in court a week before in order to get their sentence, at that time an adjournment was taken at the court desired time to consider statements made by creditors and complainants, some of whom asked for lenient treatment of the defendants, while others asked that the punishment be made severe as a warning to other offenders.

When the case was called Friday, Albert H. Gleason, of Hastings & Gleason, attorney for the Jewelers' Board of Trade, presented to the court a petition asking for exemplary punishment. Accompanying the petition were a number of affidavits from merchants who had sold merchandise to the defendants. The petition, which was signed by the representatives of 74 houses, set forth that the Kleins had failed twice, the first time as a co-partnership and a few months later as a corporation. It was explained that the practices of obtaining large credits on false statements in writing and of converting merchandise obtained on memorandum have grown to be serious evils in the wholesale jewelry district of New York. The petitioners said that if the Kleins were off with a nominal or light punishment it will be an encouragement to others to imitate them.

The acts of the Kleins in pawning large quantities of merchandise and in refusing to answer questions in the bankruptcy court were mentioned as additional reasons

not extending clemency to them. The affidavits of John J. Hayden, the trustee in bankruptcy, said that the liabilities shown in the schedules of Klein Bros. & Co. amount to \$50,621. The total assets which have come into the trustee's hand from the receivers were \$906. At the first failure of the firm they offered the creditors generally 10 per cent., 15 per cent. in cash and the remainder in notes, some of which are said to be still unpaid. It has also been said that several of the creditors have been paid in full.

Affidavits by members of C. F. Wood & D. C. Townsend & Co., I. Hochberger and others related to the Klein statement of their financial condition made in obtaining credit. Mr. Hochberger said that the statement to him indicated assets on August 15, upward of \$23,000, with liabilities less than \$11,000. On the strength of this showing Mr. Hochberger said he sold the Kleins diamonds costing \$675. The corporation went into bankruptcy the next month.

C. F. Wood & Co. received a similar statement from John B. Wood of that firm told, in an affidavit, of a conversation he had with the Kleins when they asked for credit. He refused to sell to them, as they had failed in his firm when they failed before. They said that their first failure was caused by the loss of a quantity of diamonds from them, but that they were then in a prosperous business. They also had a guarantee signed by a Maiden Lane merchant that notes covering the old indebtedness would be paid. Mr. Wood then refused them to run an account until they paid more than \$4,000.

When the Kleins called on D. C. Townsend & Co., besides submitting a statement referred to C. F. Wood & Co. as to their standing. A representative of the firm's house, when called up on the telephone, did not give them much of a recommendation. The brothers then deposited shares of their capital stock with Mr. Townsend, as secretary, for an account which soon exceeded \$2,500.

Affidavits by C. N. Gray, of the Jewelers' Board of Trade, compared the indebtedness due from the Kleins on various dates with the statements which they made in getting credit. Mr. Gray said that his totals were below the actual amounts, as he had obtained a full list of the amounts owed by the brothers.

A member of the firm of Hirsh & Hyman made an affidavit in relation to a claim of \$925 against the Kleins, saying that a part of the amount was due for merchandise trusted on memorandum. A similar affidavit by members of Hirsch & Flashner said that that firm had a claim of \$1,688, partly for merchandise delivered on memorandum. Affidavits also indicated that the Kleins obtained \$25,000 by pledging jewelry and diamonds by Harry Levy, and that they were in the habit of pawning stock with him.

T. P. Judd, a jeweler at East Fayette St., Syracuse, N. Y., notified the police of that city recently that he had been annoyed by the work of a swindler who had been engaging children to sell perfume under the promise that if they sold a certain amount they could obtain a gold ring by calling at T. P. Judd's store.

Important Pearl Suit.

Government Brings Suit to Obtain Sixty Per Cent. Duty on Gems for Necklace Imported at Ten Per Cent.

A string of pearls imported by Bernard Citroen, of Paris and New York, has precipitated legal proceedings and a discussion as to the proper classification and duty of gems which may be used in necklaces. The pearls imported by Mr. Citroen are said to have formed the necklace described in THE JEWELERS' CIRCULAR-WEEKLY of June 13. In that issue was an interview with Maurice Brower, just back from Europe, who told of the sale by the Citroens, at Paris, of a necklace, at a price approximately \$100,000, to Mr. Leeds, of Pittsburg. Mr. Brower told a reporter of this paper that this was the necklace, well known to the trade, as the most costly creation of its kind that has been on the markets in Europe in years. Its value has sometimes been placed as high as \$600,000.

It appears that Mr. Citroen, who is in partnership at Paris with Hugo Citroen under the latter's name, brought the pearls into New York on payment of 10 per cent. ad valorem duty, the rate provided by Par. 436, of the Tariff Law for "pearls in their natural state, not strung or set." At that time there was no evidence before the authorities, it is understood, that the gems had ever formed a necklace.

The Appraiser's office, it is understood, passed the pearls at the 10 per cent. rate and Mr. Citroen took possession on paying this duty. Then there was a complaint, and Collector Stranahan liquidated the entry at 60 per cent., the rate prescribed by Par. 434 of the Tariff Law for jewelry, including "pearls set or strung." A summons was served, last Saturday, on Mr. Citroen in the office of his custom house brokers, on Beaver St., in an action begun, by the Government, in the United States Circuit Court to recover \$110,335 additional duties. This amount represents the difference between 60 and 10 per cent. of the appraised value, which was, therefore, upward of \$200,000, indicated that valuations commonly placed on the necklace were exaggerated.

Mr. Citroen was in Washington one day last week and was heard before Assistant Secretary Reynold, of the Treasury Department. The importer argued that the pearls should be admitted at the 10 per cent. rate, on the ground that they did not compose a complete necklace, as other pearls would be added by the buyer from time to time. According to the Washington dispatch Mr. Citroen said that his sale of the necklace was somewhat conditional, and he might lose the sale if the Government insisted on collecting the 60 per cent. duty.

Since the Government's successive defeats in the Tiffany, Neresheimer and Coolidge cases, all involving duties on the duty on pearls, it has made no effort until now to collect the 60 per cent. rate on gems of this kind. The customs officials had apparently reached the conclusion that under the decisions of the courts it was practically impossible to obtain the classification of pearls under the jewelry, or 60 per cent., clause. It has been said that, even if a necklace were bought in Paris for importation into this country, all that was necessary for the buyer to do in order to bring

in the gems as pearls in their natural condition was to take them off the permanent string and remove the clasp, when all evidence of a necklace would disappear. It has also been said that if this were not sufficient to get the 10 per cent. classification an importer could readily bring in the pearls in different packages, or on different ships, or mix with them other pearls.

A customs official in talking of the case said that, even if the pearls of this necklace came on a temporary string, the courts have held that this method is simply a convenience used in shipping the gems and does not make them in any sense a necklace. Still less is their reason to regard pearls as a necklace when they come in different packages, as decisions have frequently held that the customs officials can only pass on each importation when it is actually before them.

In the case of Mr. Citroen's pearls some of the importers think that this may have been an especially tempting case for the Government to make a new effort toward the collection of the necklace duty. The sale of the necklace in Paris was, of course, known to customs officers. They knew that the necklace was to be delivered in this country to Wm. B. Leeds, president of the Chicago, Rock Island & Pacific Railroad. According to the reports, he had bought the necklace in Paris after some bargaining, and obtained what was regarded as a desirable price. The pearls were intended as a present to his wife. It was a part of the agreement that one of the members of the firm should safely deliver the pearls in this country to Mr. Leeds, who came over with his wife about a week after Mr. Citroen arrived. It was said that the pearls, when entered, were a necklace in every respect, except that they were not on a permanent string and did not have a clasp.

The view taken by the law department of the Custom House seems to be that, as the decisions are conflicting, and as there is in this case direct evidence of the fact that these pearls did constitute a necklace, it is an especially fitting opportunity to obtain a definite decision on some disputed points. In the Tiffany case it was held by the United States Circuit Court of Appeals that the drilled pearls, under the similitude clause, come nearer in condition to natural pearls than to strung pearls, and the duty should be 10 per cent. In that case the pearls were not matched or selected.

In the Neresheimer case the pearls were assorted, assembled and matched as to color, size and quality. The United States Circuit Court of Appeals held, however, that the assembling as to color, size and quality was not such as to bring the collection within the jewelry clause. The court laid down the principle in the Tiffany and Neresheimer cases that when there is such a collocation of pearls that their aggregate value is greater than that of the individual pearls composing it, then the jewelry clause applies.

T. P. Judd, a jeweler at E. Fayette St., strung on cotton cords, but the evidence indicated that they had not been matched or selected, and that their value had not been increased by drilling and stringing. The Board of United States General Appraisers, therefore, held that the bunch of unselected pearls did not partake of the nature of

MY interest is with the buyer. Why? He pays me 2 per cent. for my services. The seller's interest is with me. Why? He is not compelled to divide his profits with me and can afford to make the closest prices to my clients, thus reaching the best American trade on conditions that cannot fail to gain their preference.

The buyer's interest is also with me. Why? By not exacting the usual commission I make it to the seller's interest to favor my clients. Nothing is added to the price. I am content with what the buyer pays me. The buyer's advantage under such circumstances is equally as evident as the seller's. I invite investigation of that point.

complete jewelry in any conceivable for

While these cases were pending it came the practice among New York importers to bring pearls into this country before assorting, and the Government agreed to accept the 10 per cent. duty on such importations. After the victories of the importers in these suits the question was asked if it would not be safe for import to buy the pearls after they were assorted abroad and then import them under the 10 per cent. duty. Several of the attorneys who represented the importers seemed to think that this could be done, but advised that importers proceed cautiously.

One of the lawyers pointed out that with the importation of assorted pearls under the 10 per cent. rate was consistent with the decisions, yet, under some circumstance question might arise as to whether or not the assorting was of a character which would constitute a necklace or article of jewelry dutiable at 60 per cent. Exactly this question has apparently been raised in relation to the Citroen pearls.

It has been given out that Mr. Citroen, in his declaration, described the pearls as follows: One pearl, 52¾ grains; six pearls, 236¼ grains; eight pearls, 239 grains; twelve pearls, 214¾ grains.

To a reporter of THE JEWELERS' CIRCULAR—WEEKLY, Mr. Citroen expressed confidence that he has complied with the law in all respects and that the decision will be in his favor.

Jewelry valued at \$500, which was from the store of Nathan Bachman, Chattanooga, Tenn., a short time ago, has been recovered. The stock was found in the session of a local saloonkeeper, Lyons, who was arrested on a charge of concealing stolen property. The arrest of Lyons and the recovery of the stolen property resulted from a confession made by a negro named Peak, who was convicted and sentenced to six years' imprisonment for stealing the stock from Bachman. Peak confessed that he disposed of the Lyons for \$25.

Connecticut.

Chris Kugel has opened a new store at Temple St., New Haven.

Morris Hirsch & Son, Holyoke, Mass., recently sold out to M. W. Bassett, Hartford.

Lake & Strobel Co., Waterbury, was one of the other concerns that decorated their stores and buildings for the Connecticut Centennial.

Arnold Gwillim, son of T. I. Gwillim, of Hartford, has been appointed assistant manager of the South New England Telephone Co., Stamford.

Eugene Watrus, East Hampton, for 25 years in the employ of the Bradley & Hubbard Mfg. Co., Meriden, died recently at 86 years.

H. Newcomb and wife, Shelton, have returned on a month's vacation which will end at Old Point Comfort, Washington, D. C., and Atlantic City.

John B. Bolling, with Galt & Bro., Wilmington, D. C., and Miss Viola Belden were united in marriage Wednesday evening at the home of the bride's mother.

Suydam Cornell, Jr., of Brooklyn, and Helen Lydia Merriam were united in marriage last week at the home of the bride in Middletown. Mr. Cornell is connected with the Middletown Silver Co.

John C. Clemmence, Terryville, recently celebrated his 88th birthday. Mr. Clemmence was at one time a well-known clock maker, having been associated with H. W. Won & Co., in Terryville, in 1840.

The hammer arm of the clock in the Congregational Church, of Old Saybrook, recently broken, preventing its striking. A new one will be put in at once. The church is one of the oldest in the State. It was organized in 1646.

Thomas L. Weidlich, for several years head of the firm of Weidlich Bros. Mfg. Co., Bridgeport, was killed last week by the overturning of a trolley car which left the track in Fairfield, near Bridgeport. The deceased is survived by a widow and one child.

Notices were posted in the Shelton factory of the International Silver Co., last week, to the effect that the annual Summer vacation will commence Saturday, June 30, and that the factory will reopen Monday, July 16. Extensive improvements will be made in the factory in the interim.

The funeral of Eliza Jaqui, wife of John Spencer, formerly a well-known jeweler of Norwalk, was held on Monday of last week in her home, 55 N. 17th St., East Orange, N. J. The interment was at Norristown. Among those who attended the funeral were Henry F. Coleburn and Frank Under, of Norwalk.

The Davis & Hawley Co. and E. W. Butler & Co., Bridgeport, on June 18 purchased property at the corner of Main and Exchange Sts., known as Exchange Place, in that city, and have incorporated under the name of the Jewelers' Corporation. Exchange Place is one of the best business locations in that city, and the price paid was said to be about \$110,000.

John Ralston, or, as he is better known to the police, "Benny Haines," who was taken into custody a short time ago on a charge of being implicated in the theft of a

diamond pin from the store of the Davis & Hawley Co., Bridgeport, has admitted that he was implicated in the robbery, although he still denies that he actually committed the theft. The accused has promised to make restitution and has been released under \$300 bonds.

Lieut. H. A. Kippen died at the Old People's Home in Hartford last week, of heart disease, aged 79 years. The deceased was at one time engaged in the manufacture of jewelry with his father in Boston. He moved to Houston, Tex., in October, 1853, and became connected with a wholesale house. In 1856 he returned to Hartford. He was first lieutenant of Company K, 25th Volunteers, in the Civil War. Afterward he was for 19 years assistant town clerk of Hartford.

Lancaster, Pa.

Elmer Shertz, with T. Wilson Dubbs, is on a trip to Maryland, his first vacation in 11 years.

Edward Rosenstein was last week elected president of the Minnehaha Social Club, a popular local organization.

Beginning the first Friday of July the Lancaster jewelers will close their stores at noon for a half holiday, continuing this during July and August.

Among the out-of-town jewelers here last week were: C. E. Hinkle, Ephrata; J. H. Sensenig, New Holland; Archie K. May, York; P. G. Diener, Harrisburg.

Walter Geist, who has been in ill health the past two years, has so far recovered that he has been enabled to resume work as foreman of the Lancaster Silver Plate Works.

The Hamilton Watch Co.'s factory will close from July 1 to 10 to give the employees a holiday, and some departments, now ahead with their work, will remain closed a week longer.

Jerome P. Smith, formerly of Lancaster, for the past seven years a jeweler of Louisville, Ky., died in that city Wednesday. He came to Lancaster from Buffalo, N. Y., about 10 years ago.

George R. Weber, of Louis Weber & Son, with his wife, entertained a number of friends at dinner Friday evening in honor of the coming marriage of Mrs. Weber's sister, Miss Anna L. Lintner, and Harry Martin.

D. L. Kauffman, Luray, Va., who was in Philadelphia on a business trip, stopped off in Lancaster last week on his way home to see friends at the Ezra F. Bowman Technical School, where he was once a student. John Gitt has finished a course in engraving at this school and gone to Littlestown, Pa., on a visit to his father, George Z. Gitt, before returning to Charlotte, N. C., where he is employed as a watchmaker by James C. Steer.

Walter A. Perry and Carl G. Aldrich, who recently formed a corporation under the laws of Maine as the Perry-Aldrich Co., with offices at Boston, Mass., are now carrying a full line of jewelry for the trade. Mr. Perry was located for a number of years at 44 Bedford St., and Mr. Aldrich was formerly in the retail jewelry business in Winsted, Conn.

New Stores and Enterprises.

M. S. Rose recently opened a store in Lone, Ore.

R. F. Newman is a new jeweler in Outlook, Wash.

J. R. Clairborne has opened a store in Lewiston, Idaho.

A. E. Shirley will shortly commence business in Myrtle Point, Ore.

Miss Addis will shortly start a retail jewelry business in Topeka, Kans.

S. McPherson will engage in business in Coupeville, Wash., in the near future.

Henry Birkestrand will soon engage in the retail jewelry business at Huxley, Ia.

J. W. McHenry recently opened a retail jewelry establishment in Trolleyway, near Lorelei St., Venice, Cal.

The Kelz-Myers Cut Glass Co. was recently incorporated in Honesdale, Pa., with a capital stock of \$15,000.

George Baer, formerly with D. H. Ahle, Lees Summit, Mo., has begun business for himself in Mound City, Mo.

J. C. LeMasters has gone in the optical business at 350 S. Broadway, Los Angeles, Cal., and has associated with him C. H. Van Breton.

Albrecht Kettnitz, watchmaker, formerly with G. W. Russell, Philadelphia, Pa., opened last week a retail store of his own at 320 W. Girard Ave., that city.

C. Mercury has established a rather unique concern at Buffalo, N. Y. It is in the nature of a combination jewelry and tailor store, probably the only institution of the kind in western New York or the entire State.

The Ives Inventions is the name of a new concern which was recently incorporated in the State of New York to deal in photographic and optical instruments. The directors are W. McLean, H. W. Hayward, New York, and B. H. Rouse, Brooklyn.

The Cambridge Novelty Co. was incorporated last week in Massachusetts with a capital of \$15,000 for the purpose of manufacturing and dealing in jewelry. The officers of the new corporation are: President, Robert Jenkins, 148 Fulton St., Brooklyn, N. Y.; treasurer, Frank J. Lightbody; clerk, Lulu Bethune, 5 Exeter Park, Cambridge, Mass.

A new optical firm under the name of the Dennison & Hallowell Optical Co. has started in business at 1649 Champa St., Denver, Colo. This is the same building which was formerly occupied by the Columbian Optical Co. Mr. Dennison has been connected with the optical business for the last 15 years, and comes from Salida, Colo. He traveled on the road for himself for many years. Mr. Hallowell has been in the optical business for the past nine years, and comes from Kansas City, Mo. The store has been equipped with the latest appliances, and a dark room has been fitted up.

W. F. A. Woodcock has closed his watchmakers' school in Winona, Minn., and left for New York. Mr. Woodcock has not yet determined upon his plans for the future. He opened his school in Winona May 1, 1887. The enterprise prospered from the start and the school was enlarged on several different occasions.

Baltimore.

M. Kohner was in New York last week. The big City Hall clock was worked badly last week, and has been repaired. Superintendent of Public Buildings Joseph expressed the opinion that he thought it would be advisable to place an electric clock in the dome of the hall.

The last meeting of the Old Town Merchants' and Manufacturers' Association before the Summer recess was held last week, completing arrangements for its annual outing to Atlantic City, N. J., June 27, 28, 29. They will stop at the hotels Isleworth and Bothwell.

Miss Grace R. Castelberg, daughter of Henry Castelberg, was married to Henry Kraus, of New York, June 18, at the H. Stafford. The couple left for a wedding journey north, and will reside in New York. The bride's only ornament was a handsome diamond necklace, the present of her father.

The appointment by President Roosevelt of Gen. J. Stuart MacDonald as naval officer for the port of Baltimore, last week, has met with the satisfactory approval of all those out of politics, as Gen. MacDonald's sterling qualities, both in business and political affairs, have been a foregone conclusion. The appointment came to him entirely unsolicited and is a recognition of his worth.

O. G. Fessenden Unanimously Re-elected President of the National Credit Men's Association.

BALTIMORE, June 21.—O. G. Fessenden, of Hayden W. Wheeler & Co., New York, president of the National Credit Men's Association, was re-elected at the annual convention held last week in this city. So enthusiastic was the feeling in favor of Mr. Fessenden's re-election that no formal vote was taken, his election being by acclamation.

The association's Committee on Investigation and Prosecution, in submitting its report on the work of last year, reviewed the case of Arthur M. Felsen, a jeweler, formerly of Gouverneur, N. Y. The committee said that in this case it had the cord support of the Jewelers' Board of Trade, New York. The facts as to the indictment of Felsen and his trial, resulting in a verdict of the jury, were mentioned, and it was added that a determined effort had been made at the second trial to secure conviction.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 23, 1906.

The U. S. Assay Office reports:

Gold bars exchanged for gold coin.....	\$507,614
Gold bars paid depositors.....	57,000

Total\$564,614

Of this the gold bars exchanged for gold coin are reported as follows:

June 18.....	\$163,100
" 19.....	35,800
" 20.....	60,800
" 21.....	118,400
" 22.....	83,100
" 23.....	56,100

Total\$507,614

Edward Morris was recently taken into custody in Sedalia, Mo., on a charge of selling cheap jewelry without a license.

Denver

M. Bently, of Bently & Craig, was a recent visitor in this city.

William Oppenheim has returned from a business trip in Chicago.

loyd E. Gardner, Longmont, Colo., was a visitor in the city last week.

B. King, of W. W. Hamilton & Co., last week for his Summer vacation.

I. M. Ratliff has taken a position as a maker with I. Zeller, Durango, Colo.

A. Syman, of Syman Bros., expects to start on a business trip the first week in July.

S. E. A. Eaves, Idaho Springs, Colo., called upon some of her friends here last week.

C. Bloom & Co. expect to have new fixtures installed in their store by the end of this week.

Rapin, Central City, Colo., called on some of his business acquaintances here during the past week.

L. Bentz, of W. W. Hamilton & Co., returned from a two months' trip through the northwest.

Idor Lederer, representing S. & B. Lederer Co., stopped off in this city on his way to the east last week.

W. H. Hanson, watchmaker for McLean Bros., Lamar, Colo., passed through town on his way home from the east last week.

X. Newburger, formerly watchmaker of the Bohm-Allen Jewelry Co., has started a business for himself in Spokane, Wash.

George Smith, with Joseph I. Schwartz, is back at work again after a three weeks' vacation. Mr. Smith visited friends in Minneapolis and St. Paul.

H. Leppla, of the Bohm-Allen Jewelry Co., with his family, enjoyed a short visit in Shawnee, Colo., during the past week.

Leppla spent most of his time in fishing.

The Bohm-Allen Jewelry Co. is having its store decorated. The walls are being covered with a very pretty olive green, while the ceiling is being tinted with cream white.

Mr. Hogan, representing Rogers & Hamilton Co., Waterbury, Conn., called on the trade last week. Mr. Hogan is in his 50th year, and is always glad to get back to Colorado.

Mr. Miller has opened a new store at 328 1st St., and, judging from the location, is fair to do a good business. Mr. Miller received his preliminary training in several of the leading jewelry stores here.

W. W. Hamilton, of W. W. Hamilton & Co., with his family, has returned from a trip through Los Angeles and San Francisco, Cal. On the way home the party visited the Grand Cañon and Arizona.

J. Reincke, of R. Reincke & Co., who has been sick with inflammatory rheumatism since March, is able to be about again. He has made frequent visits to his store, but has not been actively engaged as yet.

Lee and J. Henry, with E. W. Bailey, of Rocky Ford, Colo., attended the State Sun-school convention held in this city last week. Mr. Bailey has moved to Swink, Colo., where he has opened a new shop.

L. Harrod, of J. C. Bloom & Co., has returned from a business trip through Colorado and western Kansas. S. H. Shef-

fel, of the same firm, has also returned home after a successful trip through Nebraska.

At a meeting of the Denver Press Club last week each member was presented with a gold monogram button, fashioned by the Boyd Park Jewelry Co. out of a \$400 gold bar donated to the club by James F. Burns, Colorado Springs, Colo. The metal was taken from the famous Portland mine in the Cripple Creek district. The design is very unique and neat. The D. P. C. is in monogram, and through the center of the entwined letters are a quill and a sword.

A dance was given in the Elks' rooms, Mining Exchange building, last week, by the Elks' escort team, and Sam Mayer, the well-known 15th St. jeweler, presented three beautiful gifts to the best three teams carrying off dance-hall honors. The first prize was a gold bracelet, and was won by Miss Josie Wallace. The second prize, a Russian leather pocketbook, was won by Mrs. Granger, while the last honors were carried off by Miss Wheeler, in the form of a gold hatpin.

The Boyd Park Jewelry Co. last week supplied a badge which was presented to George W. Curfman, past department commander of the G. A. R. of Greeley, Colo. The badge was given to Mr. Curfman by the comrades from Wyoming and Colorado. The upper bar was of gold and contained two stars set with diamonds, while the lower portion was a five-pointed star, each point containing a solitaire. The badge was made of Roman gold and a very fine quality of enamel.

Harrisburg, Pa.

The jewelry store of Nathan Gross, in Gratz, this county, was entered by burglars recently and jewelry to the value of \$400 was carried away. Mr. Gross offers a reward of \$25 for information that will lead to the detection of the thieves.

Announcement has been made of the various awards for State supplies, etc., for the year ending June 6, 1907, by the Board of Commissioners of Public Grounds and Buildings. P. G. Diener, of this city, was given the contract to care for the various clocks about the capitol building, and for any new clocks that may be requisitioned during the year.

Policeman Charles W. Saum, of this city, was acquitted in court last week of the charge of involuntary manslaughter. Saum shot and killed Harold Hall, a young colored boy, Oct. 18, 1905, while the latter was attempting to enter the jewelry store of Charles Adelstine, 707 N. 3d St., for the purpose of robbery. Saum was first indicted for murder, but the charge was subsequently changed to involuntary manslaughter.

The Freeman-Daughaday Co., Chartley, Mass., is having erected one of the most modern factories for the manufacture of jewelry that has yet been built in this section. The structure will have a 40-foot frontage and will be 250 feet deep. The framework will be of the heaviest timbers and constructed so that a second-story may be added when necessary. The walls as far up as the windows will be of concrete cement, and the floor is of the same material covered with three inches of wood.

Rochester.

Many New York opticians will go to Rochester from the city of New York during the coming convention, which will open July 30, by first sailing to Albany by boat and proceeding thence to Rochester by way of the New York Central, Erie, West Shore or Lehigh Valley railroad. The reduction to the convention will be full fare one way and one-third returning, on the certificate plan. Opticians are advised to ask for a certificate when purchasing their tickets.

When Genesee Falls Lodge 507, F. & A. M., celebrated its 45th anniversary the event was the occasion of much comment on the activity of John T. Fox, the well-known jeweler, who is the only living charter member of the lodge. Mr. Fox, who is 85 years of age, is said to be the oldest charter Mason in the State of New York, and is the only Mason outside of an officer permitted to sit on the rostrum with the master, for which purpose a beautiful mahogany chair bearing a plate inscribed with details of the occasion of its presentation was given to Mr. Fox a year ago. Mr. Fox has been in the jewelry business about 68 years.

Owing to the refusal of about half a dozen firms to sign the agreement, Saturday afternoon closing will not be general in Rochester this Summer. The committee having the matter in charge worked hard for the success of the movement. It is to the credit of the Rochester jewelers that not one of them refused to sign the agreement—in fact, the jewelers were among the strongest advocates of the closing proposition, and Mr. Watkins, of W. H. Glenny & Co., was one of the most ardent and enthusiastic workers for the movement. Following the failure of the general closing, W. H. Glenny & Co. were the first among the uptown merchants to publicly announce Saturday afternoon closing during July and August. Other jewelers and merchants are following their example.

Burglars met a warm reception when they attempted to rob the jewelry store of W. W. Dort, at Belfast, a small village near here. Mr. Dort was awakened one night last week by a noise of somebody moving about the store, which is below his living apartments. Arming himself with a revolver and a shotgun, Mr. Dort quietly went below. He saw a man standing in the entrance door and ordered him to throw up his hands. The man backed away and then attempted to put his hand to his hip pocket. Mr. Dort fired the shotgun at him upon this movement and wounded the man in the hand. A second man then appeared and started for Mr. Dort, who fired his revolver at him. The man fell to the floor and it was afterward found that he had been wounded in the hip. The second burglar had secured quite a little booty, which was found lying beside him. The bullet was removed from his body and he was taken to the Belmont jail. The first burglar had, meanwhile, made his escape, but was captured later a few miles distant. Both men were sentenced to Auburn prison the next day.

Chas. N. Hancher, Wheeling, W. Va., returned recently from his annual purchasing trip to Europe.

Washington, D. C.

Notice has been given by A. D. P.
Harry King, Hattie Harris and Leo
Reizenstein, executors of the estate o
late Reuben Harris, that they have ob
from the Probate Court letters testam
on the estate. All persons having c
against the deceased are advised to e
the same, with the vouchers thereof, l
authenticated, to the executors, on c
fore June 8, 1907, otherwise they m
by law excluded from all benefit e
estate.

The restraining order recently ob
by the McKay Co. against James C
chanan, restraining Buchanan from c
fering with the McKay Co.'s half o
store, 1115 F St., N. W., has been dis
by the Equity Court. A rule issu
quiring Mr. Buchanan to show caus
he should not be held in contempt o
for violating the court order has als
dismissed. The court held that McK
did not sustain the charge. In add
the above the injunction proceedings
tuted by the McKay Co. against Bu
were dismissed. T. H. Hall, lessee o
F St., formerly occupied by the McK
and James C. Buchanan, is now in p
sion of the premises by virtue of a w
restitution which the marshal served
week

San Francisco.

Y. Schussler & Co., who were located in the Spreckles Annex before the fire, are now in Oakland, at 8th and Franklin Sts. A previously published report that J. S. Hiespiel, 2408 Fillmore St., had opened a pawnshop has been denied by Mr. Dinkel.

The Baldwin Jewelry Co. has its store on Van Ness Ave. about ready for occupancy and will be open for business about July 1.

George Greenzweig & Co., who were formerly located in the Spreckles Annex at Market St., are temporarily located at California St.

W. H. Lippman, who were formerly Hammersmith & Field, at 36 Kearny Ave. have branched out for themselves and are now located at 1790 Post St., where they carry a line of clocks, watches and jewelry.

The Bohm Bristol Co. expects to be in its store at Sacramento St. and Van Ness Ave. about Sept. 1. Before that time the firm does not think that much business will be done on Van Ness Ave., owing to confusion of building operations.

The W. K. Vanderslice Co. has not decided as yet just what course it will pursue. At present it is making no attempt to re-open its business, preferring to wait and see if the insurance question is settled. The clearing department at the office at Post and Devisadero Sts. is being kept busy.

W. H. & Co. opened their new store, at Broadway and Van Ness Aves., Saturday, June 23, with a complete stock of jewelry, etc. The firm saved much of its stock from the fire and has done a good business at its Devisadero St. store, many tourists coming there to select articles that were saved from the great San Francisco fire.

The store of Hammerstein & Field, at Broadway and Van Ness Ave., is now nearly in completion and will be ready for occupancy very soon. Part of the office furnishings are now in place, but the shelves and counters for the store have not yet arrived. The store is admirably located for this time of business, being on a prominent corner and just across the street from Tait's Co.

F. Hirsch & Kaiser announce that they have their own factory in operation now and are prepared for all optical work. They report that the sale of colored glasses and goggles of all descriptions has been heavier than ever before, and had it been possible to procure stock immediately after the fire many more could have been disposed of. The fire and lime blown about by the wind in the burned district makes a protection for the eyes almost a necessity.

Although over 80 years old, Col. A. Andrews will enter the active business field again. His life's work, the Diamond Palace, is no more, but he plans to have it replaced on a more splendid scale than before, though it will not be the same old Diamond Palace that has for so many years been one of the sights of San Francisco. As has often been said, "to have visited San Francisco without seeing the Diamond Palace, would be like touring Europe without visiting Paris."

Quite a little colony of manufacturing

jewelers and diamond setters are now located on Buchanan St., near Ellis. Tuckey & Kline, diamond setters, are located at 1514 Buchanan St., in a store erected especially for them and they have rented room to A. L. Lott, a manufacturing jeweler and diamond setter, and to W. E. Robbins, a watchmaker. L. A. Giacobbi, a dealer in precious stones, is having an office fitted up at 1512 Buchanan St., and expects to be open for business by July 1.

Omaha.

H. Fuller, Chicago, has taken a position with Carson & Banks.

J. R. Clairborne, formerly of this city, has opened a store at Lewiston, Idaho.

H. H. Fuer, with the A. F. Smith Co., is spending his vacation with his parents in Chicago.

Oscar Homann, watchmaker for Brown & Borsheim, is visiting his old home in Des Moines, Ia.

Miss Mary Hurst, with Brown & Borsheim, has gone for a two months' vacation in Colorado.

C. L. Shook, of the Shook Mfg. Co., has returned home from a seven weeks' trip to the Pacific northwest.

Mr. Beck, of the Will H. Beck Co., Sioux City, Ia., was in this city attending the Trans-Mississippi Golf Tournament, last week.

There is a movement on foot to close all the leading stores, including the jewelry stores of Omaha, at 5 p. m. during July and August.

R. W. Scott, formerly with Albert Edholm, but at present located in Hot Springs, S. Dak., was called to this city, last week, by the appearance of a brand-new baby boy at his home.

James McRay was taken into custody last week in this city, having in his possession several watches and valuable rings. A search of his room in a cheap hotel disclosed an imitation of a policeman's badge and a loaded revolver.

The following out-of-town jewelers were in this city last week, replenishing their stocks: John Crabill, Plattsmouth; J. M. Graham, Valley; A. H. Lewis, Sutton; John Wehrli, Missouri Valley, Ia., and Fred Gardner, Lincoln, Nebr.

Among the members of the retail jewelry trade who accompanied the second Omaha trade excursion last Wednesday were the A. F. Smith Co., and the Mahwinney & Ryan Co. The route was through southeastern Nebraska, a part of the city which had not been visited lately by the Omaha trade.

A man who gave his name as George Hawkins was arrested in the jewelry store and pawnshop of J. H. Linsky, 1121 Douglas St., this city, last week, while attempting to sell a solid gold watch for \$2.50. The man's general appearance attracted attention and aroused the suspicions of the officers, and they took him to the police station, where, on being searched, they found in his possession six gold watches, four gold rings, a number of fobs, chains, stickpins and other jewelry, some set with diamonds and other valuable stones, also a pawn ticket for still another watch. An unused handkerchief bearing the name C. R.

Holden, and a piece of wrapping paper bearing the name of A. G. Beech, a merchant of Atlanta, Ia., were also found. Three of the watches were women's and three men's. One was engraved with the initials "M. E. A." and another "I. W. to N. R." The man refused to give any information regarding the goods.

Pacific Coast Notes.

W. A. Manson, of Manson & Bay, San Bernardino, Cal., is expected home, this week, from a six weeks' visit in Canada and Indiana with relatives and friends.

B. Van Vranken has purchased an interest in the business of R. Wickman, 1228 Broadway, Oakland, Cal. The firm will be known as Wickman & Van Vranken.

Hoe Minassini, formerly of Santa Barbara, Cal., who for a long time past had been connected with one of the leading San Francisco firms, is visiting in Santa Barbara for a short time.

H. Morton, successor to the A. Steffanoni Co., gold and silver smiths, announces that he is now located in his new store at 1109 Broadway, Oakland. His new goods ordered from the east have not suffered, and it is announced that his stock is complete.

The jewelry misappropriated from La Esmeralda, in the City of Mexico, by a man named Diaz, and which was recovered, has been returned by Lic. Moises Garcia, first judge of instruction. Diaz is still in prison and obstinately refuses to reveal the names of his accomplices.

A. H. Witman is preparing to open a jewelry store at the corner of 2d and Main Sts., Pomona, Cal. The storeroom will be under the process of construction for the next month. The store will be furnished with polished cherry and heavy plate glass, and the walls and ceilings are to be frescoed in delicate tints.

Capt. Frank D. Ely, San Francisco, has received a telegram from his lawyers informing him that they have secured a patent on a rubber ring which is made to fit around the edge of a watch. It is supposed to keep dust out of the watch, to relieve the jar, and to make it harder for the pickpocket to pull watches out of people's pockets.

Charging fraud in the sale of a half interest in a jewelry store at Santa Monica, Cal., D. H. Lucas has filed suit in the Superior Court against W. O. Truax for \$1,000. He formerly owned 347 acres of land in Manitoba, and declares that his former partner, Truax, by valuing the stock of the store too highly, forced him to mortgage his land and later to sell it at a loss of \$1,000.

George Romine, a laborer, was arrested, June 14, at Fresno, Cal., for forging the name of Peter Schaffner, a rancher of Clovis, to a bond that he might secure nearly \$200 worth of diamonds and jewelry from an eastern firm. According to the allegation, he practiced the signature of his master by night and finally signed the bond and sent it off to the firm. The goods arrived and were taken by Romine, who was in Fresno. Constable Parker overhauled the bedroom of Romine and found the jewelry in a bag. It is not known whether any of the articles are missing.

GORHAM WHIPS

A TIMELY HINT

¶ During the months of Summer the demand for Lash Whips and Riding Crops is never-failing and the sagacious Jeweler will therefore see to it that his stock of these is complete and attractive.

¶ Gorham Whips and Crops present in themselves the same recognized standard of excellence as does Gorham Silver. They include Whips of the choicest Holly, with handles in silver-mounted leather or in effectively chased and ornamented silver, as well as Riding Crops of distinctively good "form," whether it be the plain, sturdy, but attractive Man's Crop or the dainty pigskin-covered and horn-handled Crop which is the horse-woman's ideal.

Fraudulent Marks IN sentencing a Canadian silver company to pay fines of \$600 for falsely and fraudulently using the word or stamp "Sheffield" on wares which had been turned out at Niagara Falls, Judge Wells, of the General Sessions Court at St. Catharines, Can., took occasion to make some strong comments upon the practice of using false marks upon articles of merchandise and drew a parallel between such an act on the part of a manufacturing concern and the issuing of counterfeit money by a chartered bank. The concern was indicted upon four charges, one of manufacturing goods for the purpose of defrauding the general public and three of disposing of goods wrongly stamped; the concern pleaded guilty and a fine of \$150 was imposed for each offense. The case against the manager of the concern individually was dismissed.

This is but another indication of the importance to the trade and public of the question of accurate marking and branding of merchandise and will serve to call to the attention of manufacturers and dealers not only in Canada, but also in the United States, the fact that abuses of this kind are not as likely to be tolerated or leniently dealt with as they were some years ago, and that when the laws are such that a prosecution can properly be instituted, the offender cannot count on any undue leniency from judges or juries.

With the new laws protecting the stamping of quality on precious metals, the amendments to the trade-mark law recently passed increasing the penalties for infringement, and the general statutes covering the question of false branding and labeling which are now being agitated in the mercantile world, it looks as if manufacturers, merchants and the public had awakened to the necessity of eliminating this element of unfair competition that has so long existed in all trades, and the result cannot help but be beneficial to all lines of business, and especially to the jewelry and kindred industries.

A Small Form of A NEW system of raising money with which to fit up a jewelry store in a first-class style was recently called to the attention of THE CIRCULAR-WEEKLY. It was said that a jeweler has called on a number of manufacturers and jobbers informing them of the fact that he has leased a store in a highly desirable location, and that it is his intention to fit it up and furnish it handsomely and expensively. Toward the expenses of this enterprise he invited the wholesale merchants to contribute. Whether or not he promised to buy his stock from those who subscribe to his fund has not been revealed, but it would not be unreasonable for the manufacturer or jobber approached in this manner to suppose that a contribution would bring him at least a part of the retailer's business, while on the contrary, a refusal to give up money might mean the loss of such trade. According to the information that was received, a number of those approached found it convenient to contribute sums of \$50 or thereabouts. A retail merchant who has been long in

the business, and who called attention to the subject, was emphatic in his opinion that if this case should establish a precedent or originate a practice in the trade, it would do great harm. He held that asking contributions for such a purpose is nothing more than a species of graft, and there is little doubt that such opinion will be concurred in by a large percentage of merchants and manufacturers. Manufacturers who so contribute simply assist their beneficiaries to compete with others who are now their customers, and it does not seem to be the province of manufacturer or jobber to foster competition in this way. The suggestion is made, and not without reason, that if manufacturers have any funds to give away they might as well give the benefit to their regular customers in reduced prices, treating all alike, as by giving business contributions to particular customers. THE CIRCULAR-WEEKLY would like to hear what manufacturers and importers have to say on this subject.

Business in San Francisco Increasing—Many Wholesale Firms Now Settled in the Kamm Building.

SAN FRANCISCO, Cal., June 20.—There is no complaint among San Francisco wholesale jewelers of business being dull at the present time. The fact is that they really have more trade than they can easily take care of under the chaotic conditions that still prevail here. Without an exception they have been burned out, and it necessarily takes a long time to get old accounts straightened out and new quarters established.

At present, the Kamm building, on Market St., is the center of the wholesale jewelry trade, and will likely remain so, as almost the whole building is now being devoted to this line of trade. The front part of this building was uninjured by the earthquake and fire and, although there is as yet no elevator in operation, the entire seven floors are in use. The first floor is occupied at present by the Morgan & Allen Co., which has its business in operation again and is now able to take care of all orders, both local and from the country.

The Jewelers Relief Committee is making its headquarters with this concern. The third floor will be occupied in its entirety by A. I. Hall & Son and about one-fourth of this space is now in a condition to be used. Workmen are now at work on the offices of Milton Bradley & Co. and those of H. O. Palen on the fourth floor, and business is being carried on during building operations.

Nordman Bros. are located on the fifth floor and will occupy more room when the rest of the building is repaired.

The sixth floor is at present the home of Jos. Fahys & Co., Meyer & Weinschenk, W. E. Graves and W. B. Gilbert, but some of the offices have no fittings as yet, and business is being transacted in places easier of access. The seventh floor is occupied by J. A. Young, J. Whitney, Henry Abrams, Burr W. Freer and the Cahn-Standard Optical Co.

The San Francisco office of the Elgin National Watch Co. is at 2421 Fillmore St., but a downtown location will be sought when the large buildings are ready for occupancy.

LATINUM Lined Arch Crown Mountings

(with *completed bearings*) improve the
color of diamonds more than any
other lined mounting.

TWO REASONS WHY:

1. The bearings and tips are lined, and none of this lining is removed in setting, because no cutting is needed.
2. More light is admitted to the under surface of the stone by the open Arch design.

You will appreciate these exclusive features when you examine the mounting and set up a stone.

If you are not already using the Arch Crown mounting, drop us a postal for a sample, on memo.

Employees of the New York State Watch Co., Jersey City, will give their fourth annual festival next Friday evening in Armbruster's Schützen Park, at Glenville. Arrangements have been made for an elaborate entertainment.

The Matthews Co., 112 Arlington, was incorporated last week for the purpose of manufacturing silverware, with a stock of \$100,000. The incorporators, H. B. Matthews, O. D. M. Jamounan, Newark, N. J.; W. B. Smith, Edgewater.

Fred T. Long, representing Allsopp, underwent an operation for appendicitis Wednesday, at his home, 190 Elwood Dr. Goellet, of New York, performed the operation. Mr. Long is doing as well as could be expected, and his many friends hope for his speedy and complete recovery.

In the Second District Court, Jersey City, a suit was tried last Wednesday which the Puritan Mfg. Co.'s sales of jewelry to retail drug houses were involved. The evidence indicated that in October a representative of the company sold lots of jewelry to a dozen or more druggists, who were led to believe that the jewels would be quickly sold during the days. The druggists signed promissory notes, but said that they did not thoroughly understand their nature, and supposed if the jewelry did not prove satisfactory could be returned. The Puritan Mfg. Co. discounted the notes with the Johnsons Bank, which brought the suits against the druggists. Robert Carey was retained to defend all the suits. He charged the selling company had deceived the druggists. The jury brought in a verdict for the defendants.

Death of William H. McCausland

PHILIPSBURG, Pa., June 20.—William H. McCausland died at his home in Philipsburg, Pa., Thursday night June 20 of a stroke of paralysis. He was the son of Thomas G. McCausland, of this city, and was years ago prominent in the jewelry trade of this section.

Deceased was born 62 years ago in Mercersburg, and as a boy moved to Philadelphia, where he learned the jewelry trade with William Boadenhamer, and later came into business for himself in that town. He moved to Philipsburg in 1866 and remained here until his death.

Mr. McCausland was a veteran of the Civil War, and had also served in the United States Secret Service. He is survived by four sons and four daughters.

It is very probable that a large delegation of Buffalo (N. Y.) opticians, including practically all members of the Buffalo Optical Society, will attend the convention of the American Association of Opticians, to be held in Rochester, N. Y., July 30. The Buffalo Optical Society has appointed a committee, composed of Roan Williams, Wickens and Joseph Schmidt, to secure attendance from Buffalo to large proportions. Mr. Williams has placed his name at the disposal of the Buffalo delegation in making the trip through the Erie Canal. His proffer may be accepted.

New York Notes.

Mrs. Rose Corn, 941 Third Ave., has gone out of business.

Albert H. Gleason, of Hastings & Gleason, attorney for the Jewelers' Board of Trade, will sail to-morrow on *La Provence*, intending to pass two months abroad.

Many of the jewelry stores on Fifth Ave. and in some other parts of the city are now on their Summer time schedule, closing their doors at 5 p. m. daily and at noon on Saturday.

Many friends of General Appraiser T. S. Fretts, who has had special charge of jewelry cases coming on appeal before the Board of United States General Appraisers, sympathize with him in a severe illness which has confined him for several weeks to his old home in Baltimore, Md.

Among the trophies at the annual mid-summer golf tournament in progress at Monticello City this week is a copper, gold-plated mug made by the Gorham Co.

The mug is known as the H. H. Malvern trophy. The N. C. Fownes trophy is a silver loving-cup, gold lined, and of unique design, also made by the Gorham Mfg. Co. Jewels and fixtures of Barney Steinfeld, Sixth Ave., who is in bankruptcy, are being sold by James F. Allen, the receiver, according to a notice issued by the receiver's attorneys, Hastings & Gleason. Sealed bids may be received up to July 2, at noon, and the sale will be subject to the approval of the court. The property may be inspected at the premises Friday and Saturday of this week.

Frank Scott, said by the police to be a street crook, was held last Wednesday in Jefferson Market Police Court in \$300 bail, charged with stealing several watches and a diamond stud valued in all at \$165, from a Sixth Ave. store. In the same court on the same day Max Bellin, who said that he was a waiter, was held in \$500 bail for stealing two tie pins valued at \$30 from another Sixth Ave. store.

An automobile has been provided by the E. Waterman Co., for W. E. Smith, a New Jersey salesman, in order that he may cover his territory quickly and more economically. It is said that because of the bad roads and other causes, the automobile may be used more profitably in going from town to town in New Jersey than in almost any other part of the country. Presently the machine saves miles of railroad travel and much time by short cuts.

Albert Edward Lee, formerly with Julius Young, San Francisco, who has been visiting the trade on the Pacific coast for a number of years, is now in New York, where he will remain until July 1, arranging for new lines to represent in his territory. Mr. Lee's temporary office in San Francisco at the present time is at 1993 Green St. He says that the trade is picking up in that city much better than was expected, and is extremely optimistic as to conditions in the future.

Besides the reduced rates to New York from points on the Trunk Lines mentioned in the last issue of THE JEWELERS' CIRCULAR—WEEKLY, the Merchants' Association of New York has arranged for excursions from other parts of the country. From the territory of the Central Passenger Agents' Association

reduced rates will be effective from July 28 to Aug. 1, inclusive, also from Aug. 18 to 22, inclusive. The rate will be one fare and one-third for a round trip, the return limit on the certificate being 30 days. The association has also been advised that various railroads in Texas have authorized merchants' rates to New York on July 21 to 25, inclusive, and Aug. 4 to 8, inclusive, via the New Orleans gateway. This special fare will also apply from Texas in connection with the water trip from New Orleans over the Southern Pacific passenger steamships.

Jules Franklin, 65 Nassau St., returned last Saturday on the *St. Louis*.

A. Sluizer, with Eduard Van Dam, 27 City Hall Pl., recently resigned, and is now preparing to engage in the diamond business for himself.

Henry Bohm, of the Bohm-Allen Jewelry Co., Denver Col., is in New York making his headquarters with Joseph Frankel's Sons Co., 68 Nassau St.

Leopold H. Herzfelder, with David Mayer, 14 Maiden Lane, will sail Saturday on the *St. Louis* on a five weeks' trip to the diamond markets.

After being with Frederick Kaufman, jobber, at 565 Broadway, for 12 years, Albert Holzinger was recently admitted into partnership, and the firm style is now Frederick Kaufman & Co.

Ashahel Knowlton Eaton, an optician and chemist, died last Thursday at his home in Brooklyn. He was at one time engaged with Charles C. Spencer, of Canastota, in the manufacture of telescopes.

Thomas Kirkpatrick, Fifth Ave. and 33d St., is advertising for a bracelet lost by one of his customers at Coney Island recently. The bracelet is set with one diamond, two emeralds, a topaz, a sapphire and a ruby. A suitable reward will be given to the finder.

An addition to the firm of H. C. Kionka & Bro., precious stone dealers, at 51 Maiden Lane, will be made July 1, when Theodore Wagner, who was for 24 years with F. A. Breidenbach, will be admitted into partnership. The style will be changed to Kionka & Wagner.

Tiffany & Co. last week advertised a reward of \$1,000 for the return of a missing diamond ring. No name was mentioned, but it was learned later that the ring had been found on the lawn of the owner, Mrs. Harry Payne Whitney, near Westbury, L. I., and was returned to her.

A man giving his name as Daniel Tobin, and who said he was a diamond salesman, living at 277 Ave. B, reported to the police of the Tenderloin station last Saturday that diamond pins, brooches and other jewelry to the value of \$1,200 had been stolen from him in Union Sq. Park.

Leon J. Van Gelder, of Van Gelder, Kahn & Co., 170 Broadway, sailed Saturday on the *Finland*, accompanied by his wife and daughter, for a Summer tour to Europe. The trip will be of a social and business character. While abroad Mr. Van Gelder will visit the diamond markets of Antwerp, Amsterdam and Paris.

According to remarks made recently by Magistrate Finn in the Yorkville police court, some of the men who act as professional bondsmen for women of the street also sell jewelry on instalments. It was said that female prisoners are not only

driven into paying high prices for bonds, but also into buying jewelry.

During the convention of the Stationers' and Manufacturers' Association, held in this city last week, the L. E. Waterman Co., 173 Broadway, opened its doors to visitors from all parts of the country. Frank D. Waterman, the president of the company, and the salesmen who had been called in, assisted in entertaining the visitors.

The case of Conrad Schicklerling, the president of Schicklerling Bros. & Co., the bankrupt jewelry manufacturers, at 21 E. 28th St., who is accused of grand larceny, was called in the Tombs Police Court last Thursday, and was adjourned until July 2 at 2 p. m. The examination of Mr. Schicklerling before Referee Pendleton in the bankruptcy proceedings is to begin to-morrow at 2 p. m.

Jos. H. Fink & Co., 65 Nassau St., received a telegram last Saturday from Seattle, Wash., to the effect that Herbert A. Reichman, who travels for the firm in the west, had been robbed of a quantity of diamonds, valued at \$400. A later dispatch says that most of the missing property has been recovered, and that the police have arrested G. M. Meyers, alias Kreber, charged with robbery. Herbert A. Reichman is a brother of Lee Reichman, a member of the firm.

Becker & Co., jewelry importers, at 51 Maiden Lane, will be succeeded, July 1, by Keller, Becker & Co. E. F. Keller, the new active partner, was for 15 years cashier and foreign accountant with Albert Lorseh & Co., and for the last three years has been a silent partner in Becker & Co. Owing to the increasing business of the latter firm, Mr. Keller decided to take an active part in its affairs, and accordingly he resigned his position with Albert Lorseh & Co. As Mr. Keller is slowly recovering from a severe illness, he will pass a couple of months in the Catskills, returning in September.

M. P. & S. Brann, 231½ Eighth Ave., reported to the police recently that on Saturday night, June 9, robbers entered the store and stole diamond jewelry to the value of \$10,000. Mr. Brann said that the men apparently obtained an entrance to an adjoining building, and thence got into a back yard and entered the cellar under the jewelry store. Then they made a hole in the floor, which enabled them to enter the store. Pinkerton's National Detective Agency has sent out a notice, giving a description of the stolen jewelry and announcing a reward of \$1,000 for the conviction of the thief or thieves and the recovery of the property.

A smart colored man, who dresses in style and talks with fluency, is said to have swindled a number of business men on Fulton St. and other parts of Brooklyn by selling them rings set with paste gems which the buyers supposed to be diamonds. The negro's plan is to enter a small store and display a genuine diamond ring which is said to be of considerable value. He says that he is in sad need of ready money, and, therefore, is ready to sacrifice the gem for almost any small amount, such as \$25 or \$30. If the storekeeper decides to buy, the negro cleverly substitutes the imitation diamond ring for the genuine, and later the buyer discovers that he has been deceived.

Ball's Official Standard R.R. Watches

ESTABLISHED RETAIL PRICES

PROFIT GUARANTEED

When competition grows keen, some jeweler will sell watches at jobber's list—sure as fate.

We originated "established prices for complete watches"—always could and always have maintained them.

Why not take an exclusive agency for the Ball watches?—a fair return on your time and capital guaranteed by our system of established and maintained retail prices.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

No. 21.

Chicago Notes.

Charles A. Garlick is in New York.
Charles Kolb is on a trip through Wisconsin.

Robert Kehl, with F. H. Noble & Co., is on a western trip.

T. E. Smith, with Reed & Barton, is on a vacation at Atlantic City.

Frederic H. Carpenter, with the W. & S. McKintion Co., is here from the coast.

J. E. Gepp, watchmaker for the Jeffery Jewelry Co., has accepted a position in Laque, Ia.

John A. Rimkus, 4644 S. Ashland Ave., announces his intention of sailing for Europe in July.

Jack Ryan, with the Stein & Ellbogen Co., is taking a vacation at his native town, Zanesville, O.

Mr. Wietz, jewelry buyer for the Marshall Field Co., has returned from a lengthy European trip.

Maximilian Ellbogen, of the Stein & Ellbogen Co., arrived from Europe last week on the *St. Louis*.

Max Noel, of Despres, Bridges & Noel, is to be married to-day in New York to Miss Ellen Kaufman.

W. J. Willer with William A. Rogers, Esq., was recently married at Quincy, Ill., to Miss Edith Bernbrock.

Ernst Lederer, of the S. & B. Lederer Co., passed through Chicago last week on his way home from the coast.

Gene Goldsoll, daughter of L. C. Goldsoll, is to be married to-day to L. L. Sachs, proprietor of "Lucios," 213 State St.

Robert W. Barlow, with C. H. Knights & Co., is spending his vacation with his wife and daughter, near Biddeford, Me.

W. Nichols is an enthusiastic fisherman, 35 pounds of black bass taken from Lake being his record last Saturday.

After a successful career of over 32 years in the retail jewelry trade N. V. Cole, Chicago City, Ind., has retired from business.

A. Chouffet, with Heintz Bros., of Buffalo, has added Illinois to his territory. Max Gunzburger is no longer with Heintz Bros.

Dave Marshall, of the Fleissner-Marshall Co., San Francisco, Cal., was here last week. The concern now handles men's finishing goods.

Fred A. Ferdinandsen, for nearly seven years with the L. Manasse Co., has opened an optical business at room 602, Columbus Memorial building.

Mr. Schramm, Pacific coast salesman for the Stein & Ellbogen Co., was operated upon last week. He has been suffering with severe neck boils.

The Capital Jewelry Co., consisting of Victor and I. S. Schoenfield, have removed from 41 Maiden Lane, N. Y., to room 71, 163 E. Randolph St., this city.

Richard O. Kandler, accompanied by his wife and two children, sailed for Europe Thursday on the *Kaiserin Auguste Victoria*. They will return about Sept. 1.

All members of Sprochlnue & Co.'s road force are in from their respective territories. They are P. H. Winterberg, C. L. Caliger, J. H. Donnelly and A. Ellbogen.

W. K. Sandberg, president-elect of the Mazdaznan Temple Association, delivered an address before that society last Friday. The subject was "The God of the Living."

Walter King, of the Julius King Optical Co., was here all of last week. Mr. King was the guest of Mr. and Mrs. J. T. Brayton at their Summer cottage at Burlington, Wis.

All members of L. H. Schafer & Co.'s road force, which includes E. A. Kelly, of the firm, and G. P. Robinson, F. C. Strang, Sam Amberg, J. L. Holland and A. Elsner, are at home.

R. L. Clark, O. F. Samuelson, C. F. Haber, A. L. Fuller and E. R. Lusk, of the western traveling force of the Towle Mfg. Co., are on a 10 days' visit to the factory at Newburyport, Mass.

William Dorer, Jr., son of William Dorer, Bellaire, O., and a recent graduate in optics, has taken charge of the optical department of the Victor Jewelry Co.'s new store, 66 State St.

Creditors of Charles A. Port, Portage, Wis., have received a first and final dividend of 76 1-10 per cent. Port mysteriously disappeared. All his creditors would be willing to start him in business again.

Mrs. Mills, formerly jewelry buyer for Hale Bros.' department store, San Francisco, was here last week looking over the market. If conditions are favorable Mrs. Mills will open a jewelry store on her own account in San Francisco.

H. L. Whitmore, formerly at 556 W.

Madison St., has removed to the large double store at 550 in the same street, which was formerly occupied by W. T. Austin. Mr. Whitmore is well pleased with his new store, and reports business as good.

Ed. Alberti, retail jeweler, at 900 Milwaukee Ave., will sail for Europe July 10, accompanied by his wife, on the *Kaiser Wilhelm der Grosse*, and will be absent four months. Ed. Alberti, Jr., will manage the business during the absence of his father, assisted by Alvin Alberti, his brother, who recently graduated from the law school of the University of Michigan.

Sprochlnue & Co. have purchased a gasoline runabout for the use of their city salesman, Homer Bouchard. This is the first automobile to be used in this manner in the Chicago trade, and it is claimed that the rapidity with which customers can be visited more than pays for the expense attached to running it. Three other representatives of Chicago jobbers visit their trade in horse-drawn buggies.

The Sears-Roebuck Co. has been capitalized at \$40,000,000, of which \$10,000,000 is preferred stock and \$30,000,000 common stock. With every 100 shares of preferred stock there was given 50 shares of common stock. Last year's business totaled \$38,000,000, and there was a net profit of \$2,800,000. The preferred shares carry a guarantee of 7 per cent. dividend. Of the profits \$900,000 must be set aside as a surplus fund before anything can be paid on the common shares. If the sales reach \$50,000,000 it is figured that the common stock will pay 6 per cent.

Paul Lackritz, president of the Retail Jewelers Association of Cook Co., will address the Rochester convention. Very many prominent jewelers have signified their intention to go if they can spare the time. A. W. Johanson, Olaf Pearson, B. T. Hoffman, William Lambrecht and W. D. Turner will also go. All of the above, together with many more Chicago jewelers, will go to Springfield to attend the meeting of the Illinois Retail Jewelers' Association, which takes place July 9. From advance information in regard to the question to be discussed the meeting promises to be an interesting one. All Illinois jewelers who can spare the time should attend this meeting. The president, Stanley M. Strain, Nokomis, Ill., or Herman Charles

SHIMAN BROS & CO.

87 MAIDEN LANE, N.Y.

LONDON: 50 HOLBORN VIADUCT.
AMSTERDAM: 2 TULP STRAAT.

FACTORY,
1, 3, 5 GOLD STREET.

Watts, the secretary, Forrest, Ill., in correspondence from all Illinois jewelers who intend going.

A. Hess, retail jeweler, 84 W. Madison St., sails for Europe to-day on the *Norddam*. He will be gone three months, will visit Germany and Switzerland.

Fifty members of the Texas Business Men's Association were here three or four last week. They spent an afternoon at the Elgin National Watch Co.'s plant at Elgin, Ill.

Among the retail jewelers who visited Chicago last week were: Fred Overstreet, Paxton, Ill., accompanied by his son Clinton; Harry Greenblatt, of Harry Greenblatt & Co., Omaha, Nebr.; Charles Hess, Blunt, S. Dak.; Frank Le Bron, Frank, Ia.; Perry Jackson, St. Charles, Mo.; Will Chapman, Benton Harbor, Mich.; L. Orr, Rochester, Minn.; A. H. Mark, of St. Louis Clock & Silverware Co., St. Louis, Mo.; A. J. Glaser, Spring Valley, Ill.; H. E. Baughman, of Baughman & Kinsinger, Roswell, N. M.; Henry J. Linton, Ind.

Minneapolis and St. Paul

W. L. Pettit, of W. L. Pettit & Son, Minneapolis, has been ill for several weeks.

Richard Watson, an aged watchmaker and jeweler at Fifth Ave., S., and 6th St., Minneapolis, died last week of old age, was about 82 years of age.

O. F. Rohwedder has sold his business at Sherburne, Minn., and has begun an engraving business for the trade in Minneapolis, at 1115 Lumber Exchange.

J. B. Hudson & Son have incorporated and admitted W. A. Lawhead as a partner. Mr. Lawhead has been associated with concern in Minneapolis for several years.

John B. Bodfors, Minneapolis, has offered an elaborate silver cup for the best collection of roses presented to the forthcoming meeting of the Minnesota Rose Society.

The E. A. Brown Co., 110 E. 6th St., St. Paul, is preparing to move into new, larger quarters a few doors above their present location, near the corner of Minnesota St., where a room 40x80 feet in size will be fitted up. The change will be made about Sept. 1.

The fire in the Ryan annex, St. Paul, damaged a number of jewelry houses. Lewis Finkelstein, wholesaler, estimates his loss at \$20,000, the insurance aggregate at \$24,000. He has secured new quarters at 521-537 Endicott building, and will fill orders from a new stock. C. F. Yarr, manufacturing jeweler, located on the 1st floor, estimates his loss at \$200, with insurance of \$1,000. W. E. Mowrey, watchmaker for the trade, and goldsmith and assayer, sustained a loss of \$800, insurance amounting to \$1,100. George W. Weller, manufacturer and engraver, had a loss of about \$300, and carried insurance to the amount of \$3,500. Sischo & Beard's estimate of loss on their wholesale manufacturing stock is \$15,000, but this may be cut materially, as their apartments were on the side which escaped the fire. Their insurance is \$44,500. Thomas A. Shirley, manufacturing jeweler, had a loss of \$700, insurance of \$1,500.

L. L. Hinkley, Lake City, Ia., has given bill of sale for \$1,000.

Kansas City.

Ward & Crellin Jewelry Co. has secured the agency for the Dueber Watch Co.

L. Turley, Centralia, Mo., is now a student with the Kansas City Polytechnic Institute.

F. Fasammyer has taken a position as watchmaker with Frank Garnier, Kansas City, Kans.

Montague, traveling for H. F. Hahn, who makes his home here, is in for a summer vacation.

M. Scott, of the Woodstock-Hoefer Watch & Jewelry Co., has just returned from a trip to New York.

H. Snow, traveler for the Woodstock-Hoefer Watch & Jewelry Co., will start on the road next week.

Meyer, president of the Meyer Jewelry Co., spent several days at Excelsior Springs last week, owing to ill health.

N. Murchison, Cheyenne, Wyo., returned to this city last week, and became a student at the Southwestern Optical College.

Hassig & Krieke Jewelry Co. and Meyer Jewelry Co. have both decided to have a Saturday half-holiday during the summer months.

George Edwards, of the Edwards & Sloane Jewelry Co., has gone to Alma, Kans., with his boys, who will spend their vacation on a trip near that point.

Charles Harsch, wife of the manager of the jewelry store of Oppenstein Bros., in this city, left last week for a visit to her mother in Seymour, Ind.

James, who has been a pawnbroker in this city for a number of years, has been invited to the bar, and will discontinue his pawnbroking business.

C. C. Hoefer, wife of C. C. Hoefer, of the Woodstock-Hoefer Watch & Jewelry Co. and daughter, have just returned from a three weeks' visit in the east.

Ludwig, manager of the material department of the Edwards & Sloane Jewelry Co. has just returned from a combined business and pleasure trip to eastern points. M. Burkland, with the Meyer Jewelry Co. was the victim of a hold-up at Swope Park recently. He received a flesh wound on his hand from a revolver shot, and lost \$10 in cash.

P. Kionka, of Kionka & Kionka, has just returned from a three months' trip. He started in the south, and went north as far as Wisconsin. He will be in the house again after July 4.

James Potts, a well-known jewelry auctioneer of this city, has taken a position as traveling salesman with the Edwards & Sloane Jewelry Co., and will cover a territory in northern Missouri and Iowa.

Considerable interest is being manifested in baseball by the young men in the jewelry trade this year, and several of the houses have teams. The Meyer Jewelry Co. has issued a challenge to the teams of other jewelry houses.

Chan Olmstead, who was with the Cady & Olmstead Jewelry Co. for several years, and who has of late been managing a ranch in the Pecos valley, in New Mexico, was in this city last week, paying a visit to his relatives.

A burglar entered the home of Fred C.

Merry, of the C. L. Merry Optical Co., the other night, and the following articles were among the loot: Lady's watch, engraved L. C. M.; lapel watch; lady's watch chain; bonbon box, engraved L. C. M.; lady's bracelet, set with amethysts; locket, engraved L. C. M.; belt buckle; pearl stick-pin; Smith & Wesson 38-calibre revolver, and \$23 in cash.

Tom L. Davies, of Davies & Owen, Falls City, Nebr., was here last week. He began a course in watchmaking at the Kansas City Polytechnic Institute, where he finished a course in engraving some time ago. He has also begun a course at the Southwestern Optical College. He says that his firm is doing a good business, and that the store in Auburn is to be discontinued and the stock consolidated with that in Falls City.

The following out-of-town jewelers were in this market during the past week: E. R. Moses, of the Moses Mercantile Co., Great Bend, Kans.; S. J. Huey, Excelsior Springs, Mo.; J. H. Whiteside, Liberty, Mo.; Otto Burkland, Osawatomie, Kans.; A. D. Ackerman, Fairbury, Nebr.; Roy Smithers, Cameron, Mo.; W. F. Kirkpatrick, St. Joseph, Mo.; F. W. Galer, Nowata, Ind. 1.; J. M. Coffman, Salisbury, Mo.; C. J. Keil, Clinton, Mo.; E. T. Merriman, Guide Rock, Nebr.; Ed Armel, of Armel Bros., Holton, Kans.; Harry Kelly, Erie, Kans.; Isador Eller, Richmond, Mo.

St. Louis.

A. H. Aylesworth, Chicago, president of J. F. Dailey & Co., paid a visit to the store of that firm here, last week.

C. S. Ahle, of the Whelan-Ahle-Hutchinson Jewelry Co., is on a two weeks' fishing trip on the Gaseognade River.

Moses Strauss, veteran salesman with the L. Bauman Jewelry Co., made a short trip into southeast Missouri last week.

Sam H. Bauman, president of the Bauman-Massa Jewelry Co., will sail to-day from Europe for New York on the *Kaiser Wilhelm*.

M. Schinderman, of the L. Bauman Jewelry Co., has gone to Chicago to meet his brother and sister, who have just come from Europe.

Edwin Blosser, for 13 years with J. W. Cary & Co., is now connected with the Reeves Co., the new material house in the Star building.

Charles Ens, 2330 Montgomery St., manager for William Weidlich & Bro., is a father now, a son having been born to Mrs. Ens last week.

J. W. Cary, of J. W. Cary & Co., has gone to Harbor Beach, Mich., where he has a Summer home, to spend the remainder of the heated term.

Meyer Bauman, of the L. Bauman Jewelry Co., with Mrs. Bauman and Miss Bauman, have gone to French Lick Springs, Ind., for a visit of 10 days.

The visiting jewelers here last week were: J. Harvell, Litchfield, Ill.; J. F. Stewart, Albion, Ill.; W. S. Guthrie, Terrell, Tex.; Philip Levy, Henderson, Ky.

L. J. Wick and family, Highland, Ill., were in St. Louis on their way to Iowa last week for an extensive trip made in the interest of Mr. Wick's health.

Goodman King, president of the Mer-

mod, Jaccard & King Jewelry Co., has just returned from his annual Spring buying trip to Europe. He visited Amsterdam, Berlin and Paris.

T. A. Nelsch, 1125 N. Vandeventer Ave., reported to the police Friday that some time Thursday night his place of business was entered and a gold ring and watch valued at \$75 were taken.

Herman Mauch, 507 Franklin Ave., president of the Retail Jewelers' Association of Missouri, spent the latter part of the week on a fishing trip with a party of friends at the Montezuma Hunting and Fishing Club.

L. W. Waldecker, manager of the silverware department of the F. W. Drosten Jewelry Co., goes east next week on a trip which will combine business and pleasure. He will visit New York, Providence, Attleboro and other points.

The Whelan-Ahle-Hutchinson Jewelry Co. is now closing its store at 1 o'clock on Saturdays, and 5 o'clock on week days in the Summer months. The Mermod, Jaccard & King Jewelry Co. begins the early Saturday closing June 30.

F. K. Hatch, of the Mermod, Jaccard & King Jewelry Co., goes July 1 on an extended vacation trip. Lee Schum, Walter Lauman, Jos. Rogers and Henry Eckerman, of this firm, made a week-end fishing trip to Stonewall, Ark., and made quite a record, bringing back 140 fish.

William Weidlich and E. C. Weidlich, of William Weidlich & Bro., and Frank Weidlich, 1022 Hodiamont Ave., were called to Bridgeport, Conn., last week, by the death of their brother, C. E. Weidlich, treasurer of the Weidlich Bros. Mfg. Co., of that place. Mr. Weidlich was killed in a street car accident, the coach having jumped the track and mangled him in a frightful manner, causing instant death.

Columbus, O.

Frank Bonnet and family will go to his Summer cottage at Columbus Beach, Mich., next Sunday. Mr. Bonnet will remain but a week or so, while his family will remain all Summer.

Davidson Bros., who recently bought out the business of T. J. O'Daniels, reported to the police Thursday that a red-headed man with one eye had beaten them out of a glass eye. The man took the eye and promised to pay, but never did so.

A Chicago publishing house with whom the convention committee of the Columbus Board of Trade is co-operating, is back of a movement to organize a State association of jewelers in Ohio, and a meeting has been called, to be held in Columbus, July 17. It is proposed to effect a permanent organization and elect delegates to the national meeting to be held at Rochester later in the Summer.

The Eagle Loan Co., Arkansas City, Kans., is moving to a new location further downtown, next door to the jewelry store of Ralph Wickliffe.

About two weeks ago a severe rainstorm visited Marion, Kans., and the stores of Butcher & Butcher and E. F. Sheldon were both flooded to a depth of two feet. Owing, however, to the fact that they had received warning of the flood their losses were slight.

Cincinnati.

A. M. Plant, Arcade, has greatly improved his store by adding new wall cases. J. Becker, formerly with the Philadelphia Watch Case Co., is back from a visit in Missouri.

A. W. Wahl, watchmaker for George Newstedt, is making an extended stay at the lakes.

The Gustave Fox Co. has secured the contract for all the gold badges of the Order of Owls.

Mr. and Mrs. Albert Sauer, Newport, Ky., are home from a trip to New York and Washington.

Edward Mittendorf, manager for E. & J. Swigert, with his wife, recently toured the eastern cities.

Henry Fox and I. N. Fox, of Fox Bros. & Co., after several weeks at Mt. Clemens, Mich., are home again.

A. J. Thoma, of Thoma Bros., with his wife, has returned from New York and gone to Bowling Green, Ky.

Will Irion and bride, Louisville, Ky., passed through this city last week en route to Niagara Falls and Buffalo.

Herman Keck, of the Herman Keck Mfg. Co., has returned from a long visit to European diamond markets.

E. & J. Swigert have purchased the stock of Joseph Hornback, who recently discontinued his material business in this city.

J. B. Osthoff, of Joseph Noterman & Co., will leave June 29 for Hendersonville, N. C., where he will spend July and August.

Jacob Frohman, of Frohman & Co., and D. Gradison, 29 Emery Arcade, are both again at business after a stay at French Lick Springs.

Ben Kruckemeyer, of Kruckemeyer & Colm, Evansville, Ind., with his bride, passed through here last week en route to Dawson, Ky.

The daughter of Andrew Alich was recently married to Mr. Toohey, Walnut Hills. The couple have gone to the lakes on their honeymoon.

S. Lindenberg, of Lindenberg, Strauss & Co., is again at his desk, after a rest at Atlantic City. Sig Strauss, of this firm, is on a business trip north.

The marriage of Miss Emma Cannon, with Herman E. Promnitz, to Percy Brunner, of Joseph Noterman & Co., is announced to take place to-day.

The Miller Jewelry Co. was awarded the contract for the 75 gold and silver medals given at the open athletic meet of the Cincinnati Gymnasium held at the East End athletic grounds Saturday.

A. Herman, of Herman & Loeb, left Europe yesterday on the *Kaiser Wilhelm II* for home. Clarence Loeb, of this house, was presented last week with a beautiful silver loving cup by his friends in honor of his 21st birthday.

The marriage of Miss Lillian Fox, daughter of Henry Fox, of Fox Bros. & Co., and Sol Wetzstein, of Cincinnati, which took place Monday, was a most brilliant event. Mr. and Mrs. Wetzstein are spending their honeymoon in the east.

Out-of-town dealers who were here during the past week buying stock included: Frank Carey, Lebanon, O.; Charles Schamber, of Meyer & Schamber, Meridian, Miss.; Burgess Bros., Florala, Ala.; F. J. H. Schell, Xenia, O.; J. N. Embrey, North Lewisburg, O.; D. A. Sewoll, Wilmington, O.; J. E. Zimmerman, New Holland, O.

The marriage of Otto Mehmert, son of Joseph Mehmert, and Miss Katherine Fisher took place Thursday morning in St. Henry's Church. On the following evening a reception was held in West Turner Hall, which was attended by about 300 guests. The gifts to the bride and groom were numerous and valuable. Out-of-town guests included Henry Mehmert, an uncle of the groom, a jeweler at Olney, Ill., and his wife, and Vol Lloyd, of St. Louis, Mo. The Cincinnati trade was largely represented. The bride and groom have left for Atlantic City.

Pacific Northwest.

A. E. Shirley has rented the office vacated by Guerin Bros., Myrtle Point, Ore., and will soon open a store with a complete line of jewelry.

W. L. Coppernoll, with J. O. Watts, Eugene, Ore., has gone to Illinois to attend the funeral of his father, who died at Warren, aged 73 years.

Joseph Mayer & Bros., Seattle, Wash., designed and made the handsome gold medal which the business and professional men of Seattle, Wash., have presented to Chief of Police Wappenstein as a mark of appreciation of his well-directed efforts to make Seattle a better and a cleaner town.

Indianapolis.

Gale Burlingame, jeweler and engraver for J. H. Reed, is spending two weeks in northern Michigan.

David S. Gribben, of Gray, Gribben & Gray, is now in Switzerland. He will turn from abroad, with his family, in Fall.

Horace A. Comstock, as an officer of Indianapolis Gun Club, was prominent in the annual meeting of the Great American Handicap, held here last week.

Local jewelers have received announcements of the opening of Martin & Co.'s store, at Evansville. Sol. Martin, Jr., manager.

S. W. Thompson, Sr., Monticello, is making arrangements to move into more commodious quarters.

Among the out-of-town jewelers who visited the local jobbers and manufacturers last week, were: Sol. Pennington, King town; J. A. Meissen, Cicero; D. S. W. taker, Lebanon; J. A. Pickett, New Cass; H. Wheeler, Dana; J. F. Harding, Brownburg, and Aaron Pursel, Noblesville.

Local jewelers rejoice that the jewelry trade's Gold and Silver Stamping bill will become a law. They give unstinted praise to THE CIRCULAR-WEEKLY for inaugurating the movement in favor of the bill and urging its passage by Congress. Merchants here believe that the law will safeguard interests of legitimate jewelers and manufacturers everywhere.

Local detectives have established the fact that William Dawson, of Brooklyn, whose skeleton was found recently, had been murdered. The skull is crushed and the authorities say that the man was killed by a blow on the head. He owned considerable property and was considered wealthy. One morning he did not appear at his store. Search was made, but his whereabouts were never discovered until the recent find.

Pittsburg.

W. Berkley is in Toronto, Can., enjoying a short vacation.

S. F. Sipe will sail July 17 for America to buy diamonds.

S. Cerf, of Sol Cerf & Co., will leave a week for Narragansett Pier, Providence and New York on a business and care trip.

August Loch, Allegheny, has subscribed to the Fourth of July fund on that side of the river. The usual celebration also be held in Pittsburg.

Chris Kingsbacher, of Kingsbacher leaves this week for Narragansett and from there will visit New York business. He will be gone for several

while it will be a week or two before Roberts & Sons will be able to move their new store, already the place is turning much attention, because of the new fixtures being installed. The will be unquestionably the largest and finest in Pittsburg.

Jewelry salesman named Thorp and going for a Pittsburg house reported a week to the police that he had been offered a \$200 diamond ring by a man in a house where he boards. Thorp had the ring on the dresser in his room, when he awoke the next morning the ring was gone, and he has not yet found it.

An itemized account is attached as follows: Ten diamond studs valued at \$35, \$25, 10 at \$15 and 10 at \$10. The plaintiff avers that the account has been overdue, and that the defendants refused to pay any part thereof, wherefore the suit is brought. Munn avers that the jewelry was delivered as ordered upon and he wants his money.

A window thief is again getting busy in Pittsburg. Last week some one threw a look through the show window of the jewelry store of Biggard & Wolf, 5 Smith St., and then reached in and stole a pair of gold-plated chains and other trinkets. The store is in a populous section but no one appears to have heard the tinkling of glass. The first to discover the loss was Robert Biggard when he arrived at the store at 7:30 A. M. The policeman on the beat had not noticed it. Biggard says his loss does not exceed \$75.

Alexander D. Munn, a jeweler at 4409 Broadway St., in the Lawrenceville district, has entered suit against Mayor Hays, former Mayor Bigelow of the Department of Public Works; Assistant City Clerk and others to recover \$850 with interest, which he alleges is due to him for diamond studs sold by him to the men who were in the suit, to be given away as prizes in the athletic events held in Schenley Park by the city July 4, 1904. In his complaint filed in court yesterday Munn avers that it has been the custom of the city for a number of years to hold these celebrations, and that it has been the custom of the Mayor and others to have the jewelry managers of the sporting events which were scheduled at the park.

S. Wiley, secretary of the Pennsylvania Retail Jewelers' Association, has

mailed between 3,000 and 4,000 circulars to the trade in this State, for the call of the convention to organize a State association in this city, July 10. The circular contains the names of 80 jewelers in the State outside of Pittsburg who have signified their intention of joining in the movement. Mr. Wiley said Saturday that replies are coming in and that he had received a dozen from jewelers in McKeesport, Blairsville, Washington, Pa., and other places in Western Pennsylvania, assuring him that they will be in Pittsburg to join in the movement. Replies from the eastern part of the State are expected this week. Mr. Wiley said that practically all of the Pittsburg jewelers had given him assurance that they will become members of the association, and it begins to look as though the organization will be a success.

Providence.

TRADE CONDITIONS.

Although with the advent of the Summer season the jewelers will soon begin their annual exodus to the shore or country, nevertheless business is much brisker than is usual at this time of year, and any number of houses are carrying about all that they can conveniently handle.

C. W. Kelly is now representing Charles Ball on the road. Mr. Kelly was formerly a jeweler in this city, and Mr. Ball is a manufacturer of art metal goods.

The W. J. Feeley Co. has been awarded the contract for providing the tablet to be placed in the State House to the memory of Gen. Sullivan, of Revolutionary fame.

Harvey Huestis, of Hutchison & Huestis, decided recently that a trip "across the pond" would do him good, and left last week for a visit to various points of interest in Europe.

William H. Luther has been visiting his son in Norton, having taken a rest after his confining duties as chairman of the Police Commission during the recent Chief of Police investigation.

Jewelers and buyers visiting the city and stopping at the Crown Hotel will hereafter be greeted by Fred Mansfield, as manager, he having been given the position made vacant by the death of F. L. Porter.

Local jewelers were much interested in the rumors regarding the consolidation of the Union Trust Co. and the Manufacturers' Trust Co., two of the well-known banking institutions of the city. Not only are jewelry interests represented on the board of directors, but many are depositors in the two companies.

A Portuguese salesman named Augusto Cerar left a grip containing a quantity of watches, rings and other jewelry in the care of a friend in Bristol one day last week. The friend tucked it away in what he thought was a secure place. Later he found that it had disappeared. He had a suspicion that an Italian who had been hanging about the place could tell something about the sudden removal of the property. An investigation led to the arrest of the Italian and the swearing out of a warrant for larceny against him. Later the property was found in the home of the prisoner's brother.

C. Van Der Elsen, Centerville, Ia., has sold out to F. F. Wollert.

Boston.

TRADE CONDITIONS.

As the first half of the year draws to a close the jewelers here are disposed to be retrospective, and some of them have good reason to be gratified with the results as they review the situation. Most of the Boston jobbers report that business for the past six months has been excellent. A number of them have surpassed the exceedingly good record made in the first part of 1905. Retailers also report a good run of trade at the outset of the year, and fair business since, with June above the normal in line of gifts and prizes for the midsummer wedding, graduation and outing season. Prospects for the balance of the year everywhere in this vicinity are regarded as promising.

E. W. Stone, salesman for John B. Humphrey, has returned from an outing and business trip to New York.

E. A. Bigelow, treasurer of the E. Howard Clock Co., has gone to Lake Winnetoesaukee for a week of rest and recreation.

The funeral of Michael J. Mahoney, formerly engraver for A. Stowell & Co., whose death occurred on the 17th inst., took place on Wednesday last from his residence at 21 Bailey St., Dorchester.

William J. Anderson, of the clock repairing department of the E. Howard Clock Co.'s Boston office, was married June 20, in Newton, to Miss Franklin, of that city.

George E. Fahys, of Joseph Fahys & Co., was in Boston last week, running over from New York in his automobile and arriving here on Thursday. He remained in town over Friday, visiting the Boston office of the firm, and returning in his touring car Saturday afternoon.

Boston retailers began their Saturday early closing season. It will continue three months. The wholesalers now extend their early closing period over a stretch of practically six months, and some of the most important houses have adopted the 1 o'clock closing rule for Saturday the year round.

The Shreve, Crump & Low Co. has arranged an exhibit of Tiffany glass, which has attracted considerable attention recently. A room in the establishment was fitted up as a studio for the special display of the product, and many very beautiful examples of art work in the line of shades and other objects of home adornment have been shown.

William Metheson, former superintendent at the E. Howard factory, but more recently of the Trenton (N. J.) watch factory, has been in Boston for a short time on a business trip, and was also at Walworth, where he was interviewed by some of the watchmakers regarding the opportunities of profitable employment in the Trenton establishment.

Guy C. Stillings, former secretary and director of the Preferred Mercantile Co., of Boston, the concern that was put out of business several months ago by the United States government, after the conviction of the Stillings brothers on several charges relating to their method of conducting a diamond lottery business, is to be released on June 29, the plea of impaired health being made in his behalf. Last August he was sentenced to a year's imprisonment in the Suffolk Co. (Boston) jail as a result of contempt of court proceedings against him and his brother.

JOHN A. SALMAN & CO.

21A Bromfield St., Boston, Mass.

49 Maiden Lane, New York.

Buffalo, N. Y.

Meyer Brown, 136 Seneca St., returned Saturday, from Angola.

One of the most attractive fronts attracted by local jewelers is being put in by Hammond, 54 Seneca St.

Buffalo jewelers are, this week, having another run on souvenirs, by reason of the Knights of St. John convention, which brought 10,000 visitors to the city.

C. H. Davison, traveling for the Corbin & Heilborn Co., who makes his headquarters in Buffalo, departed, last Monday, on an extended trip up the Great Lakes.

C. J. Fisher, at 251 Main St., in his new location in the Glenny block, has made his interior one of the handsomest in Buffalo. For several months Mr. Fisher has occupied a temporary storeroom across the street, the Glenny block gutted by fire.

Mr. Dickinson, of the T. & E. Dickinson & Co.'s store, 472 Main St., is living in the Summer along the shore of Lake Erie, several miles out of Buffalo, going and coming to the city by the Lake Shore Railroad. Mrs. Dickinson has purchased one of the handsomest houses on Linwood Ave.

Frank A. Sharp, who is said to be a vassal for a Chicago jewelry house, died at a hotel at N. Division, in Oak St., last week. The deceased was 45 years old and had come from Trenton, N. J. He evidently fallen in a fit on his pillow, being unable to rise, died of suffocation.

Frank Hammond, Buffalo's veteran watchmaker, in charge of the watch inspection for the Boston & Maine Railroad, and inspector for several lines, was out Thursday, after a two-weeks' illness, which confined him to his bed. Mrs. Hammond has returned from a visit to St. Louis, which she was accompanied by her mother.

Mrs. Carrie Schlenker, who has been on the Grand Jury on charge of stealing \$1,000 worth of watches and jewelry from the Freeman Jewelry Co.'s store, 84 Seneca St., is preparing to make a strong defense at her trial on the plea of insanity. Her conduct since a prisoner at the County Jail is such as would tend to show that she is insane at the present time. Manager W. H. Foerster, of the Freeman Jewelry Co., says he has proof that the woman has written letters and made statements since her arrest which show conclusively that her mind and reason are in good shape.

Paul Foerster, 134 Seneca St., has received \$700 worth of the diamonds stolen from a tray several weeks ago. The value of the diamond rings stolen was \$1,000, but only a portion of them were recovered. Walter Harrington, who has pleaded guilty in the Supreme Court to stealing jewelry, is, much to the surprise of Mr. Foerster, enjoying his liberty on a \$10,000 bail bond. Harrington is a relative of a man in the Buffalo Police Department Bureau of Identity. This fact is mentioned upon in connection with the fact that of Harrington to receive his sentence, the jewels returned to Mr. Foerster had been in the custody of the police to be used in the trial of Harrington had he not pleaded guilty.

R. Redfield has purchased the business of C. G. Collier, Tonkawa, Okla.

Philadelphia.

Samuel Kind, head of S. Kind & Sons, left last week for Europe. He will return in the Fall.

Col. Sickles, of M. Sickles, returned last week from an extended trip through Pennsylvania and neighboring States.

Wm. N. Todd, a watchmaker well known in this city, established himself in business last week at 36 S. 7th St., as a watchmaker in the trade.

E. Caldwell & Co. are making extensive alterations to their store, 902 Chestnut St. An extension is being made to the art galleries and other improvements are being made in the rear of the first floor.

H. Krehbiel, Mound Bridge, Kans., was a visitor to this city last week. He is making a vacation tour of the east and plans to spend some time at the national hotel and the Atlantic coast resorts.

Among the out-of-town retailers buying during the week were: H. B. MacLeland, East Downingtown, Pa.; George Owen, Bridgeton, N. J.; H. S. Kratz, Dertont, Pa., and Mr. Harper, of Harper Taylor, Saulsbury, Md.

F. Finnegan, a pawnbroker, 9th and Chestnut Sts., accused a Chinaman last week of obtaining a diamond ring, valued at \$125, from his place. He says that the Chinaman intended to want to buy a ring and then take the one he misses. The Chinaman was arrested and is held awaiting trial.

The trade of this city has extended its sympathy to L. P. White, whose brother, Dr. J. William White, one of the best known surgeons of Philadelphia, is under treatment for a serious internal trouble at a Minnesota infirmary. Mr. White's brother, Dr. White himself, is widely known for his activity in the advancement of college sports.

J. B. Bechtel, of J. B. Bechtel & Co., has returned from a canvass of the Schuylkill County. Business in this section is reported by him to be excellent since the mines are again worked and there is no danger of a strike or other industrial disturbance. Ed. Sickles, of the same firm, celebrated quietly last Wednesday, his 15th wedding anniversary. Mrs. Sickles has been ill, and on this account the festivities planned were postponed.

The baseball game which practically decides the championship of the jewelry business of this city, was played Saturday afternoon between teams representing M. Sickles & Sons and Simons, Bro. & Co. The former team had defeated the nine organized by employees of H. O. Hurlburt & Sons, and the one inning ran up 11 runs against the team of I. Bedichimer & Co., when the game was called. The game was played at Farmers Hill, N. J., and was witnessed by many in the trade.

It was reported here, Wednesday, that the Controller of the Treasury at Washington will not support the director at the Mint in Philadelphia, in the latter's attempt to manufacture cases for medals. Heretofore the medals were incased by local jewelers, but owing to the delay in obtaining money the members of the trade here resented to do the work, whereupon the director of the Mint decided to do it himself. The Controller of the Treasury holds that the appropriation for the Mint cannot be

stretched to include mounting and casing of medals.

Justice was swift and relentless in the case of the kidnapping of little Freddie Muth, the seven-year-old son of Charles Muth, retailer, 1632 Columbia Ave. After the kidnapper had been caught, as reported in THE JEWELERS' CIRCULAR—WEEKLY last week, he was immediately placed on trial and "railroaded," in the language of the police. He was identified as John Joseph Kean, a man with a wife and three children. Twenty-four hours after his arrest he was rushed to the penitentiary to serve a 20-years' sentence. His wife and children have removed to New York, from which place they originally came.

The annual midsummer field day of the Jewelers' Club was held yesterday, when a game of baseball was played between the Philadelphia and New York members of the team club. The nines were well chosen, the candidates for the various positions being selected with a view of strengthening both teams. The game was played at the Philadelphia Ball Park, Broad and Huntingdon Sts., and was witnessed by the club members, as well as the wives and other members of the family of the members. It partook, naturally, of a social function, to which zest was added by the match game. After the game was over the members of the club adjourned to the club house at 13th and Chestnut Sts., and later in the evening were treated to a vaudeville show at the Tuxedo Club. There were some lively boxing bouts and many other interesting performances, which are to be more fully and accurately reported in the next issue of THE JEWELERS' CIRCULAR—WEEKLY.

North Attleboro.

George L. Paine was in New York last week.

The H. F. Barrows Co. has been obliged to operate its factory 13 hours a day.

William F. Maintien returned early last week from a fishing trip passed in Maine.

Ira McGavin, salesman for Riley & French, has been at the factory for the past few days.

George S. Semple, New York representative of the W. & S. Blackinton Co., was at the factory this week.

Richard Saunders has left for the west for Paye & Baker Mfg. Co. After a tour of the middle states he will travel through Wisconsin.

Bids for the proposed new jewelry factory have been received, but thus far no contract has been given out nor have the plans been finally adopted.

Jean Theobald, head designer at the factory of Frank M. Whiting Co., has resigned and will enter the employ of the Theo. W. Foster & Bro. Co., Providence.

Donald LeStage, western representative of H. D. Merritt Co., donned his baseball togs last Thursday, and caught for the Brown University alumni in its game with the college team.

Miss Helen M. Gilbert, daughter of F. S. Gilbert, of this town, became the wife of Chas. Fuller, Jr., of Pawtucket, yesterday. Mr. Fuller, the bridegroom, is the son of Chas. H. Fuller, of the Chas. H. Fuller Co., for many years one of the foremost finding houses of the east.

Attleboro.

R. John Marsh, of C. A. Marsh & Co., is at home after a long trip through the west.

Earle F. Bliss, son of Frank W. Bliss, has taken employment with the Electric Chain Co.

Frank A. Chase, salesman for the Chas. M. Robbins Co., has returned from a trip of several weeks' duration.

James W. Matteson, 25 years a skilled employe of the Horton-Angell Co., died last week at his Summer home, Niantic, Conn.

Harold E. Sweet, of the R. F. Simmons Co., attended last week the inauguration of a new president at his alma mater, Tufts College.

Ralph Kingsley, of the chasing department of Reed & Barton's silver works, has become foreman of a North Attleboro jewelry factory.

Lawrence Abbott, who left the employment of the R. F. Simmons Co. to take charge of the factory of S. O. Bigney & Co., has resumed his former place.

Jesse Carpenter, seventh of the name, son of Jesse Carpenter, salesman for the Horton-Angell Co., has taken a position in the office of the D. E. Makepeace Co.

Mr. and Mrs. E. W. Rhodes are guests of their son, Egbert W. Rhodes, formerly of Rhodes Bros. & Rothschild, Attleboro, manufacturing jewelers, now in business at Seattle.

Edwin A. Fargo, of E. A. Fargo & Co., Taunton, sustained a painful laceration of his right index finger last week while experimenting with a new machine in his factory.

P. J. Cummings & Co. celebrated their 10th anniversary Saturday by giving all the employees an outing at Hodge's Grove, in the north end of the town. A clambake was the main feature, and field sports and other picnic fun served to increase the friendly feeling between firm and workers.

Only one topic of conversation prevails in Attleboro—the "Society Circus," June 27 to 30 inclusive, whereby the whole population joins in a four-day fete to raise funds for its public library. While the women of the town have been the principal managers, the business men have been generous givers. The jewelry manufacturers have donated a quantity of desirable jewelry, and it will be sold at a booth presided over by the wife of T. S. Carpenter, of the Horton-Angell Co. Serving on committees for various features are Joseph G. Hutchinson, Harold E. Sweet, Thomas C. Heywood, Fred L. Torrey and other manufacturers and popular traveling salesmen.

P. Girard, East Grand Forks, N. Dak., recently lost a considerable amount of his stock by a fire.

Charles B. Safford, Kingston, N. Y., on July 1, will celebrate the 50th anniversary of his business career in that city. Edward Mathewson has been in his employ for 40 years, and Foster Dunwoody has been associated with him for the past 20 years. Mr. Safford is also assisted by his son, who is an eye specialist. The veteran jeweler visits New York frequently, and is highly esteemed by all who come in contact with him.

FESTOON NECKLACES

WHICH IS CONTAINED A LIST OF THE LATEST PATENTS GRANTED BY THE UNITED STATES AND GREAT BRITAIN, THE UNITED STATES PATENTS THAT HAVE PIRED AND THE REGISTERED TRADE-MARKS.

UNITED STATES PATENTS.

ISSUE OF JUNE 12, 1906.

2,922. WATCH HOLDER. HARRY CLARK, St. Paul, Minn. Filed June 7, 1904. Serial No. 211,478.

A holder of the class set forth, consisting of a telescopic inclosing sections, the end of one tion being closed and arrange obliquely to its

per and lower sides to support the holder in inclined position, and an opening passing through the upper sides of said sections.

2,969. COMBINED BADGE AND WATCH-GUARD. JOHN S. MARTIN and HARRY N. STOCKTON, Snohomish, Wash. Filed April 24, 1905. Serial No. 257,190.

A device of the class described comprising a body having a rearwardly-extending marginal edge provided with a transverse recess at one end therein, a bar extending through said recess

secured to said body and with an eye at one end extending beyond the body, a threaded pin tending rearwardly of said bar at its inner end, and a clamp-nut engaging said pin.

22,970. HANDLE. CHARLES H. MASCHMEYER, Portland, Me. Filed Nov. 18, 1905. Serial No. 287,951.

A handle for receptacles consisting of attachment-sections, a hand-section, insulating-inserts between the adjacent ends of the sections and a

metallic bond having an attenuated body portion and enlarged ends, the body portion passing through the insert and the enlarged ends embedded in the metal of the section.

23,024. BRACELET. ANTHONY H. BLISS, North

Attleboro, Mass. Filed Feb. 23, 1906. Serial No. 302,412.

In a device of the class described, the combination of adjacent hollow link members, a pair of openings in the sides of each link member, a bar in each link member having its ends bent to form coupling-rods which extend through the adjacent openings into the next link member, a spiral spring connecting the ends of said bar and means for supporting said spring centrally therebetween.

823,050. TICKET-HOLDER. GEORGE D. KEMMERER, Wilkes-Barre, and WHEELER B. ARMSTRONG, Plymouth, Pa. Filed Nov. 21, 1905. Serial No. 288,102.

A ticket holder comprising a plate-metal body provided with a longitudinal depression which is concave in cross-section with its side walls round-

ing upwardly and outwardly merging into the top of the body, and a spring-wire having a substantially circular cross-sectional shape lying longitudinally within the open top of the depression with its ends connected to the body and its intermediate portion free from the body and out of contact therewith, the bottom and side walls of the depression being free from projections.

823,133. EYEGLASS-HOLDER. EMIL B. MEYROWITZ, New York, assignor to the Meyrowitz Mfg. Co. Filed Dec. 23, 1901. Serial No. 238,039.

An eyeglass-holder comprising a body portion extending downwardly and outwardly and then downwardly and inwardly, an arm shaped the reverse of the body portion, rigid with and bent over

said body portion, the bend constituting a loop for receiving the spring of a pair of eyeglasses, a pin carried by said body portion, and a keeper for said pin within said loop and constituting an abutment restricting the exit thereof for retaining said spring in place, said loop also constituting a housing for the point of said pin.

823,135. COLLAR-BUTTON. HAROLD T. MURPHY, Springfield, Mass. Filed Sept. 5, 1905. Serial No. 276,934.

In a collar-button, a back having an aperture, a post having a head, a pair of T-shaped levers being capable of being disposed along and at opposite sides of the post having their portions adjacent

the junctions of the levers proper and their cross members extended through said aperture, and having their cross members located behind the back, and a spring reacting behind the back and said cross members, and against which said cross members press on the swinging of the levers.

823,268. SAFETY-PIN. CHARLES W. ENGEL, Pittsburg, Pa. Filed June 7, 1905. Serial No. 264,083.

A safety-pin formed from a single piece of wire bent to form a spring at one end and a substantial D-shaped guard at the other end, the said strand of wire being doubled to form a pin member, and an opposing arm or leg member, the guard being formed integral with said leg or arm member with a part thereof bent downwardly and then inwardly and upwardly at right angles to the pin member, and being crossed over said pin member and then bent downwardly and wrapped around

the leg or arm member, the said downwardly-bent part of said guard thus lying in advance of the

upwardly-bent part and acting as a brace for the same against strain through the pin member.

823,277. CLASP. FRED HIRSH, New York. Filed Aug. 21, 1905. Serial No. 275,098.

A clasp consisting of two hinged members and a spring-tongue attached to one of said members and

having at its outer end an inwardly-projecting stud, the head of which is adapted to snap past and engage with an edge of the other of said members.

823,289. WATCH-HAND REMOVER. ERASTUS N. PARKER, Springfield, Mass. Filed Dec. 21, 1905. Serial No. 292,801.

A watch-hand remover consisting of opposite tweezer-like members having at their free extremities thin inwardly-turned members, and said device comprising an extension which is laterally

offset from the plane of approaching movements of the said members, and the lower bearing extremity of which terminates outside of and approximately level with the lower ends of the tweezer-like members, and adapted to constitute a fulcrum on a watch-dial, remote from the place of engagement of said members, on which the device may be rocked or swung.

823,328. FOUNTAIN-PEN. ALFRED HALL, Chicago. Filed Aug. 18, 1905. Serial No. 274,760.

In a fountain-pen, the combination of an ink-barrel, an annular member adjustably secured to

said ink-barrel, pen-nibs adjustably secured inside of said annular member, and a feeding-tube inside of said nibs.

823,363. BRUSH. SIMEON D. PURDY, Richmond Hill, N. Y. Filed Dec. 4, 1905. Serial No. 290,291.

The combination of a brush-ferrule having in-

ternal shoulders, bristles and plugs within the bristles above and below said shoulders and means to draw the plugs toward each other to grip the surrounding bristles against the shoulders.

823,464. COMBINED TOILET ARTICLE. ANTON C. EGGERS, New York, N. Y. Filed July 14, 1905. Serial No. 269,743.

In a toilet-kit, the combination of a brush provided with a handle, an independent mirror seated

upon the back of said brush and likewise provided with a handle, said mirror and its handle conforming throughout to the contour of said brush and the handle thereof, and a single independent device for detachably retaining said parts in fixed relation.

DESIGNS.

38,066. BACK FOR HAND-MIRRORS, BRUSHES, AND SIMILAR ARTICLES. HENRY B. BEACH and HENRY KAYSER, Meriden, Conn., assignors to the International

Silver Co., Meriden, Co. Filed April 27, 1906. Serial No. 314,101. Term of patent 3½ years.

38,067. BACK FOR HAND-MIRRORS, BRUSHES, AND SIMILAR ARTICLES. HENRY B. BEACH and HENRY KAYSER, Meriden, Conn., assignors to the International

Silver Co., Meriden, Conn. Filed May 8, 1906. Serial No. 315,849. Term of Patent 3½ years.

38,068. HANDLE OF SPOONS, FORKS OR SIMILAR ARTICLES. FREDERICK HABEN-SACK, Sag Harbor, N. Y., assignor to the

Fahys Watch Case Co., New York. Filed May 4, 1906. Serial No. 315,267. Term of patent 7 years.

38,069. HANDLE FOR SPOONS, FORKS, OR SIMILAR ARTICLES. HENRIK HILLBOM, Wallingford, Conn., assignor to R. Wallace

& Sons Mfg. Co., Wallingford, Conn. Filed May 7, 1906. Serial No. 315,089. Term of patent 14 years.

38,070. TEAPOT OR SIMILAR ARTICLE.

HENRIK HILLBOM, Wallingford, Conn., assignor to R. Wallace & Sons Mfg. Co., Wall-

ingford, Conn. Filed May 7, 1906. Serial No. 315,672. Term of patent 14 years.

38,071. BEVERAGE-PERCOLATOR. GEORGE E. SAVAGE, Meriden, Conn., assignor to Man-

ning, Bowman & Co., Meriden, Conn. Filed April 30, 1906. Serial No. 314,609. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

PUBLISHED JUNE 12, 1906

SER. No. **12,946. FOUNTAIN-PENS AND OTHER WRITING-PENS EXCEPT GOLD PENS.** THOMAS DE LA RUE & Co., LTD., London, England. Filed Sept. 25, 1905.

The word "ONOTO" within a border which is shown in the accompanying drawing as of approximately diamond shape with curved corners.

SER. No. **15,464. SPECTACLE AND EYE-GLASS LENSES AND FRAMES.** WILLESTON W. BISSELL, Rochester, N. Y. Filed Dec. 16, 1905.

TOROIDS

The word "TOROIDS."

SER. No. **18,577. PERCOLATORS.** LANDERS,

FRARY & CLARK, New Britain, Conn. Filed April 6, 1906.

The word "UNIVERSAL," followed by the word "PERCOLATOR."

SER. No. **18,604. WATCHES, WATCH CASES AND WATCH MOVEMENTS.** D. GRUEN & Sons, Cincinnati, O. Filed April 7, 1905. Used 10 years.

GRUEN

The word "GRUEN."

TRADE-MARKS REGISTERED JUNE 12, 1906.

53,709. POCKET-KNIVES. SIMMONS HARDWARE Co., St. Louis, Mo.

The words "KEEN CUTTER" and a figure wedge shape having three-sided projections on side and on which said words appear. Used 10 years.

Filed Nov. 23, 1905. Serial No. 14,944. Issued April 17, 1906.

53,733. HAT-PINS. SCOTT-BLAKE Co., Portland, Me.

The arbitrarily-chosen typewritten word "CA ON" printed with quotation-marks, all in G type.

Filed Oct. 2, 1905. Serial No. 13,221. Issued April 17, 1906.

53,794. TEA AND COFFEE POTS. SILVER Co., New York.

The representation of a coffee-pot, the body of which is shown in section with the cover removed and shown in edge view beneath the spout of coffee-pot and with the representation of a nursing-cup held in a woman's hand above the top of the coffee-pot and of boiling water flowing into the said open end from the cup and arising therefrom, together with the words "MARION HARLAND COFFEE POT AND PROCESS COFFEE MAKING" to the left of the hand and Used 10 years.

Filed Jan. 6, 1906. Serial No. 15,941. Issued April 17, 1906.

53,814. TEA AND COFFEE POTS AND COFFEE-URNS. SILVER & Co., New York.

A side-view representation of a tea and coffee pot having in a central position the inscription "THE MARION HARLAND TEA AND COFFEE POT" surrounded by an oval border. Used 10 years.

Filed Jan. 6, 1906. Serial No. 15,942. Issued April 17, 1906.

53,817. ALARM-CLOCKS. THE WM. L. GILLOCK CO., Winsted, Conn.

The letter "G," within which appears the word "BEST."

Filed July 24, 1905. Serial No. 10,754. Issued April 17, 1906.

53,819. GOLD FINGER-RINGS. J. R. WOOD & Sons, New York.

The letter "W" laid on its side, thus "W."

Filed June 20, 1905. Serial No. 8,597. Issued April 17, 1906.

UNITED STATES PATENTS THAT HAVE EXPIRED.

[Reported especially for THE JEWELERS' CIRCULAR-WEEKLY by R. W. Bishop, Patent Attorney, Washington, D. C.]

Issued June 18, 1889.

405,258. CLOCK-MOVEMENT HOLDER. J. W. HARWOOD, Somerville, Mass.

405,339. CARD-CASE. C. J. BUFFUM, Boston, Mass.

405,374. SUSPENDERS. J. R. POLLOCK, Kansas City, Mo.

405,394. ATTACHMENT FOR CLOCKS. F. CHASE, Philadelphia, Pa.

405,458. FOUNTAIN-PEN. J. D. BRAY, Montreal, Canada.

405,514. BUCKLE. W. J. WALTERS, Providence, N. Y.

405,521. LEAD-HOLDER. MARCELLUS BAKER, Washington, D. C., assignor to the F. Pencil Co., New York.

405,529. BUTTON. C. A. BRYANT, Wakefield, Mass.

405,558. SAFETY-PIN. JOEL JENKINS, Melair, N. J.

Design issued June 14, 1892, for 14 years.

21,620. GLASS DISH. BENJAMIN BENNETT,

JEANNETTE and H. S. McKEE, Allegheny, Pa.

Design issued Dec. 16, 1902, for 3½ years.

70. PITCHER. J. W. COLLINS, New Martinsville, W. Va.

BRITISH PATENTS.

(JUDGMENTS OF SPECIFICATIONS. 1905, FROM The Illustrated Official Journal.)

ISSUE OF JUNE 7, 1906.

21. SLEEVE-LINKS. J. W. STOCKER, London. Feb. 6.

The buttons in a sleeve link are connected together by means of metal safety-hooks. To each of the parts is attached a metal hook as shown in FIG. IV. and V., one hook opening outwardly, the movable part being kept in position by means of a spring a, Fig. IV., or a spiral spring, Fig. V.,

the other hook being of the ordinary inwardly-opening kind. The hooks are attached to the buttons by means of small metal loops which are secured to the bases of the former. In a modification, one safety-hook and an enlarged metal loop are caused in the place of two safety-hooks. Reference is made to Specifications No. 7515, A.D. 1885, and No. 7814, A.D. 1891.

257. FOUNTAIN PENS. J. Y. JOHNSON, London.—(Eagle Pencil Co., New York, U. S.) Feb. 7.

A self-filling pen, the collapsible rubber or reservoir E, Fig. 4, is fixed to the pen point and is compressed prior to filling by a presser having a shank engaging a recess j in the handle at the end of the tubular handle A. Sliding

longitudinally in the plug F is a plunger G with head H; the narrowed end g of the plunger is coupled to the bar I by a pin l working in a slot i, by a link, or by other means, in such a manner that the outward movement of the plunger causes the reservoir E to be compressed.

45. CLOCKS. F. A. CHANDLER, Leamington, and B. BONNIKEN, Coventry, both in Warwickshire. Feb. 8.

The effective length of the pendulum, if fast or slow, is varied, say, once in 24 hours, by current in a master-clock. The invention is particularly applicable as a substitute for part of the apparatus described in Specification No. 22,858, A.D. 1903, in which a lever J is raised during the day and is attracted by an electromagnet J² shortly before the moment for regulation, at which instant it is allowed to fall by cessation of the current.

The bar D from which the pendulum is suspended, the curbing-guide below it, rests upon an eccentric F attached to a ratchet-wheel G, which has the teeth on one-half in opposite directions to those on the other. Below this, a fork H is jointed to the electromagnet lever J rests against a guiding pin-lever K, the position of which is determined by a cam L on the hour-arbor. Thus, when the electromagnet lever falls, the fork turns the ratchet-wheel in one direction or the other if the

clock is fast or slow, and so lengthens or shortens the pendulum. If the clock is correct, the fork is directed clear of both sides of the ratchet. The prong H² of the fork is pivotally and yieldingly mounted to allow of its retraction over the ratchet teeth.

2,671. FOUNTAIN PENS. F. DE LA RUE & Co. and E. DE LA RUE, London. Feb. 9.

A pen which can be filled without the use of a separate filler is provided with a piston c, which normally rests at the rear end of the barrel a but can be engaged by the end of a rod b secured to a screw cap b¹. The piston is retained in its normal position by a pin or pins on the barrel which engage bayonet slots c¹. To fill the pen, the cap

b¹ is unscrewed and the rod b drawn out until a pin b² thereon engages a bayonet slot c² in the piston. On rotation of the rod, the piston is freed from the pins a² and can then be pushed along the barrel until it meets a stop a³. On the rod b being again pulled out, ink can be drawn into the pen. A vent a⁴ in the barrel permits the escape of any ink which may pass behind the piston. The head of the rod b forms a valve which co-operates with a seat d to regulate the supply of ink. The feed e has two ink-ducts e¹, one above and one below the nib.

2,678. GOGGLES; EYE-PROTECTORS. A. E. SALT, London. Feb. 9.

To secure the ventilation of goggles, each eye-cup is made with a corrugated edge b, against which the glass c is held by a ring or flange d¹,

which is sprung into place, projections on the ring engaging recesses in the cup. Air passes beneath the ring and enters the cup along the surface of the glass c.

BUYERS' INFORMATION BUREAU

Questions as to the makers of certain lines of goods, where to buy certain lines, where certain kinds of work are done, the owners of certain trade-marks and other matters relating to the buying branch of a jewelry business will be cheerfully answered under this department. All queries are also answered promptly by mail.

WASHBURN, N. Dak., June 15, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Who is the importer of a paper cutter heavily engraved and with a thin, flexible blade which has a magnifying glass in the top? W. A. P.

ANSWER:—John Scheidig & Co., 50 Maiden Lane, New York.

RIVERSIDE, Cal., May 24, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Where can we procure a United Daughters of the Confederacy pin? P. B.

ANSWER:—From J. E. Caldwell & Co., 902 Chestnut St., Philadelphia, Pa., but can only be secured under authority of the officers of this organization.

COLUMBUS, O., May 29, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

I want to purchase three New York Standard electric clocks; who makes these clocks? C. E. R.

ANSWER:—New York Standard Watch Co., 193 Woodward St., Jersey City, N. J.

CHAMPAIGN, Ill., May 28, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Who makes the Nurnberg, Germany, souvenir spoons? We want one which has the Iron Maid on the top of the handle. F. & C.

ANSWER:—A complete set of these spoons is made by the Gorham Mfg. Co., Fifth Ave. and 36th St., New York.

HOMESTEAD, Pa., June 2, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you give me the address of the manufacturer of solder and flux to use in soldering aluminum articles, and the address of parties who make tempered copper or a compound for tempering such? J. N. H.

ANSWER:—Aluminum solder may be secured from the Janney Sternmetz Co., Drexel building, Philadelphia, Pa.; Edward N. Cook Plate Co., 144 Pine St., Providence, R. I.; New Jersey Aluminum Co., Springfield Ave. and 19th St., Jersey City, N. J.; Aluminum White Metal Co., 336 Broadway, New York. Tempered copper may be secured from the Eureka Tempered Copper Co., North East, Pa., and the Mansfield Tempered Copper Co., Mansfield, O.

BOOTHBAY HARBOR, Me., June 3, 1906.

Editor of THE JEWELERS' CIRCULAR-WEEKLY:

Can you tell me who puts miniature photographs on watch cases? Also the address of the manufacturers of the Imperial fountain pen and the Paul E. Wirt fountain pen? W. F. D.

ANSWER:—Goldstein Engraving Co., 45 Maiden Lane; N. J. Felix, 16 John St., and L. A. Cohen, 28 E. 22d St., all of New York, do miniature photography on watch cases. The Imperial fountain pen is made by Aiken, Lambert & Co., 19 Maiden Lane, New York and the Wirt pen by the Paul E. Wirt Fountain Pen Co., Bloomsburg, Pa.

Mainspring Don'ts

Simple Hints for Those Who Handle Mainsprings

Don't fail to provide yourself with the best mainspring winder that can be obtained. See that the hooks on all arbors of the winders are no longer than the thickness of the thinnest spring, and thus avoid kinking, and therefore unnecessary breaking of mainsprings.

Don't use a mainspring that is too long, because it fills the barrel and prevents that part, or the mainwheel, from making the required number of revolutions, with the consequence that the watch will not run as it should after each winding.

Don't use a mainspring that is too strong, because it will set, increase the percentage of breakage and injure the watch.

Don't use a mainspring that is too wide, and be sure that the tip and brace do not extend beyond the limits of the cover and barrel.

Don't forget that a mainspring should not occupy more than one-third the diameter of the barrel, thus leaving two-thirds to be divided between the arbor and winding space, to enable the watch to run about thirty-six hours.

Don't expect a mainspring to be flat if you put it in the barrel with the fingers. This method usually injures the spring, gives it a cylindrical form, and thereby increases the friction in the barrel.

Don't bend the inner or outer end of the mainspring with flat-nosed plyers, but provide yourself with specially made round-nosed pliers which will give a circular form to these parts, prevent short bends, contract the inner coil, and thus secure a closer fit to the barrel arbor without injuring the spring.

Don't expect other than a properly fitted flat mainspring with rounded edges to produce the least friction in the barrel, allow the greatest amount of power to the train, and give the best results as to time, service, etc.

Don't expect a mainspring to always endure extreme changes in temperature, or electrical disturbances, or straightening at full length, or neglect from lack of cleaning and oiling.

Don't expect a watch that needs cleaning or other repairs to run satisfactorily by merely putting in a new mainspring.

Don't expect a mainspring to plough through too much dirt.

Waltham, Mass.

THE HOROLOGICAL REVIEW.

Chimes of Grace Church, New York.

By C. W. COUMBE.

"Ding a ding a dong,

Ding a ding a dong,

Listen to the echo of the bells,

Listen to the chimes on Sunday morn,

Listen to the old church bells."

—Old Southern Refrain.

ALMOST as much prose and verse have been dedicated by literary and poetic talent among the Christian nations to the church bells as to the sacred edifice that contains them. Giving vocal utterance to the religious sentiment of the composer, they ring out to their distant surroundings full-throated melodious expression, they may justly claim all the human sentiment that attaches to the most luminous harmonies of the organ in the world below.

Proclaiming abroad their stately powers the numerous sacred events that fill the ecclesiastical calendar, the deep tones of the church bells enhance in each civilized breast a reverence and respect second only to that felt on witnessing the sacerdotal rites performed in the temple beneath. The reverence accorded these deep-voiced angels of the creed reaches back through the mist of ages to those years of their original usage in sacred rights far dissimilar to the present—to a time far behind the beginning of the Christian era; to the time when in China and other eastern lands the legions of wicked spirits on this earth were driven off

from tormented souls by the resonant voice of the big bell.

And in our present day of boasted enlightenment and culture what can exorcise the perturbed spirit of man from despondent mood better than the merry chimes rung in our American churches or the glad some carillon of European ministers.

"Low at times, and loud at times,
Changing like a poet's rhymes,
Rang out the beautiful wild chimes

From the belfry in the market of the ancient town of Bruges."

The poetic soul of Longfellow was indeed moved to ecstasy when he heard those chimes of Bruges (probably the finest in the world), and they brought to the surface of paper words that go ringing through the years. But if America cannot boast of many perfect chimes containing numerous bells like those of Belgium, France and Germany, at least she has shown progression

in equipping her steeples with some admirable representative sets of six, eight and even 10 melodious metallic songsters that are well able to command respect, even of Europeans.

Prominent, if not excelling among these, can be named the peal of 10 bells located in the steeple of New York's historic Grace Church, the beautiful sacred edifice situated on Broadway, between 10th and 11th Sts.

The centenary of the laying of the foundation stone of the first Grace Church erected on this spot is but a few months past, for that event took place on the 18th of March, 1806. The church was rebuilt and consecrated in 1846. In 1873 the beautiful chime of bells was founded that now ring out daily their lovely notes. They are the famous "Troy Bells," wrought in the Meneely Bell Foundry, of Water-vliet (formerly known as West Troy), N. Y. This maker's bells are pealing all over the United States and Canada, and in South America their melodious sound is heard. For this concern, with

San Francisco Office, 206 Kearny St.

putation second only to those of the ancient foundries of Europe, and itself dating back to 1826, has supplied very many of the best-toned bells in the clock towers and steeples of the New World's continent. When a child is born about the earliest time is to determine on the name it is to carry through life, and to then christen it with that name. When to a church patron the determination is born to donate a bell to add to the peal, the first thing to be thought out is the "inscription" that is to be cast on that bell. This "inscription" is to the founder, together with the order, the bell-founder does the rest. The custom of casting an inscription on every bell comes to us from unrecorded ancient days. And this memorial usage was always carried out in the casting of the bells that constitute the chimes of Grace Church, each bell carrying throughout its long and useful life the name of its munificent donor. Passing through the main entrance to the church, situated under the tower, to left and right, the worship-attending service will find a marble table. The inscription on our left reads:

The Bells in This Tower are Memorial.

No. 1.

The Great Bell
of

The Rev. Thomas House Taylor, D. D.,

longtime Rector of this Parish during whose
rectorship this edifice was erected
and consecrated.

A Faithful and Affectionate Pastor.

A Godly and Well Learned Divine.

A Blameless and Fearless Man.

people to whom he ministered for 33 years
here record their grateful memory of his
labors and his virtues.

and to the right on a similar entablature
read:

The Bells in This Tower
are

Memorial.

No. 2 of John David Wolfe, some-time Senior
Warden of this Church, the Gift of
his Daughter.

No. 3 of George Barclay, some time
a Warden of this Church, the Gift
of his Daughter.

No. 4, Edward Renshaw Jones, some time a
Warden of this Church, and
Edward Jones, some time a
Vestryman of this Church.

No. 5 of Mrs. Mary A. C. McCollum,
the Gift of her Husband.

No. 6 of Wm. Seward Roberts,
the Gift of his Mother.

No. 7 of Julian Broome Livingston,
the Gift of His Parents.

No. 8 of Hy. A. Schermerhorn,
the Gift of his Mother.

No. 9 of Alfred H. Easton,
the Gift of his Widow.

No. 10 The Children's Bell,
the Gift of Sarah Marsh Auchincloss.

The weight of each of these bells separately, starting from No. 1, the "Great," ending at the "Children's" bell, is: 25 pounds, 2,000 pounds, 1,398 pounds, 18 pounds, 873 pounds, 622 pounds, 528 pounds, 433 pounds, 353 pounds and 267 pounds.

Time was, and that not very far back,

when the duty of tolling a single bell fell to the sexton of the church. As the Ingoldsby Legends inform us, on the decease of a church member,

"The Parson told the Sexton
And the Sexton tolled the bell."

And the ringing of the chimes devolved on the "bellringers," who, each in turn, clutched and pulled his individual rope. But those bell-ringing antics, often portrayed by artists of that day on canvas and paper, have passed away except in out-of-the-world villages, where times and customs cling. These strenuous methods have given place to the mechanical devices of (1) striking the bell with a hammer, (2) chim-

Longfellow) and generally in Belgium—work from a "barrel" both in lifting and releasing. The accompanying illustration displays a Meneely chiming "stand" with its levers.

But even the age of machinery is fast passing and is giving place to electric power control. And numerous devices have been invented for the electric ringing of church bells. Experts mostly declare such methods a failure so far. That is to say, with one exception, and this is the Grace Church chime electrification by G. F. Attwood, of Orange, N. J., installed in 1892.

Speaking of electricity makes one's thoughts revert to Thomas Edison, who

A CHIMING STAND, WITH LEVERS.

ing by a carillon machine, (3) chiming through external control and timing also from a master-clock.

In nearly all the later mechanical systems the bells are stationary and struck-labor is saved, precision is gained and time-honored practices are thrown to the winds. But, as usual in such cases, these innovations are at a loss of quality, and one might say quantity, for when a bell is swung its vibrations carry somewhere about twice as far as when struck. Thus, principally on account of the mouth of the bell being directed horizontally, the sound travels uninterrupted. And again there is a richness imparted to the sound of a bell when swung that is largely lost in the striking action.

But "labor saving" is our motto, and these days we are grasping for cheap tones, whereas our ancestors were willing and ready to pay for and listen to and admire the richer melody of the swinging peal. The "carillon" machines more or less in vogue in Europe—the one at Bruges (sung of

some time after listening to the Grace Church chimes declared they were the only chimes that had ever been heard "all over the world." He had had phonography records made and had sent them all over the world to be chimed in every chime.

Miss Bertha Thomass, besides acting as the talented assistant organist of Grace Church, deftly manipulates the chimes keyboard (which is arranged exactly similar to a piano keyboard), located in the small vestibule, on the right as you go into the building through the main office.

The chimes are pitched in E flat and afford three keys to play in. Miss Thomass says she is able to play over 400 hymn tunes on those 10 bells. She rings out each season of the year, besides playing for numerous ceremonies, such as wedding bells, and each Sunday rings the "Grandsire, Triple Changes." By the bye, do you know what it is to "ring the changes" that you read about in older standard works? It is a mathematical problem, and to look over a

THE PUBLIC IS “MUCK RAKING”

Just at present the great American people are in the “Muck-Raking” mood.

They are pondering over the trusts—busy figuring out how and why they pay too much for things.

The public is thinking this about the cost of watches, Mr. Jeweler—and, as a matter of fact, many people are every day finding out that there *is* a point in the price of watches where real watch-service—real time-keeping quality ends.

Our jewelers' sales form a good criterion to this increasing public watch-wisdom, and they show enormous increases for the

New England

The Watch for the Great American People

We are helping this public awakening all we can—with *advertising*. We're talking to the public about watch-cost and real watch-service. This Fall we will tell the New England Watch story to one-third of the entire population of the United States.

Now, Mr. Jeweler, thousands of people are going to be convinced—are now convinced that they want a New England Watch. These people are writing us by thousands. But we don't sell to these people direct. These sales are made wholly through the nearest jeweler who sells our line.

Do you want your share of these sales? Some of your customers are writing us. Some of your competitors' customers are writing us. May we send them into *your* store to buy?

Then write us for details of our plan. Learn how we are planning, with an enormous advertising expenditure, to create Fall and Holiday business for you.

**THE JEWELER WHO HANDLES NEW ENGLAND WATCHES
IS GOING TO HAVE THE LEAD DURING THIS FALL AND
THIS CHRISTMAS SEASON. OUR NATIONAL PUBLICITY
WILL STIR UP THE TRADE.**

Let us be partners and co-operate with you. Write us now for details of how we are planning to work *with you and for you*.

Address

DEPARTMENT OF PUBLICITY

New England Watch Company
WATERBURY, CONN.

on change ringing would remind you of logarithms. As a simple example take a peal of three bells, and it presents six "changes" thus:

1 2-3
2 1-3
2 3-1
3 2-1
3 1-2
1 3-2

Four bells ring 24 changes; five bells ring 120 and so on. It was calculated that it would take 91 years to ring all the changes on five bells, ringing 20 strokes to the minute. And the peculiar technical nomenclature of those changes makes quaint reading. The plain bob, grandsire, triple bob and anchor. The changes rung on five bells are called doubles; on six bells, minor; on seven bells, triples; on eight bells, major; on nine bells, caters; on 10 bells, royal; on 11 bells, enques, and on 12 bells maximus. Many years ago the entire set of Grand-triples was rung out in an English style by bellringers (not machine). It took over three hours to peal. We presume that Thomas limits her Sunday performance to a portion of the changes, or she would suffer and cause suffering to others, simply keeping those 10,500 pounds of ringing melodious metal playing, or must it call it working, all that time.

Experiments Recently Made With a Seconds Pendulum.

As read to members of the Municipal School of Technology by T. D. WRIGHT.)
(Continued from issue of May 30.)

From the beginning of 1905 a more systematic observance of the behavior of the clock was maintained, and an almost unbroken daily record preserved of the change in temperature, the barometric pressure and the arc of vibration. At this time it was noticed how consistently the rate of vibration increased with higher temperatures inside the closed clock case; and now now that with this pendulum an increase in the temperature of 25 deg. F. is always accompanied by an increase of the total arc of from .2 deg. to .25 deg. of my friends suggested that this might be due to changes in the oil, but I do not. I have lubricated the escape with Kelly's oil, with Mobius's oil, with vaseline, with vaseline and oil mixed; I observed the arc with all, and found the same kind of change, with the lubrication fresh or stale. Reid, in his "Treatise on Clock and Watch Making," p. 132 (1875), mentions the phenomenon, and attributes it entirely to the alteration in the elastic resistance of the spring. He says: "Any changes, however small, in the strength of the pendulum spring, will be easily perceived in the extent of the arcs of vibration, whether arising from different temperatures or different thicknesses." I am not sure that Reid was even partly right in his deductions, for I find on referring to the notes of 1904, that with the same spring, which had a much greater rate of movement than the later ones, the total arc of vibration was larger than with the weaker ones. I now considered the effect of temperature on the pressure and density of the atmosphere in the case. Mrs. Baker kindly lent me two aneroids, compensated for temperature, and reliable.

One was placed inside the case, the other was placed, at the same level, outside the case.

Constant observation was taken of the readings, and the places of the two barometers were exchanged from time to time in case of any error in either, but at no time during the three weeks that were spent in this way was a difference of about 25 deg. in temperature during the whole time. The case was not really airtight, and although the heated air inside the case must surely have been less dense than the colder air outside, it registered the same pressure, and was apparently just as susceptible to external barometric changes.

I had hitherto associated pressure and density as necessarily proportional to one another, but, has pressure alone anything at all to do with resistance to the motion of the pendulum? In the experiments on the effects of altered pressures on the vibrations of balances made by Dr. Guillaume and Mr. Ditisheim, in those made by myself, and in those recently made by Dr. Chree at the Kew Observatory, the change of pressure, in every case, was produced by adding to, or subtracting from, the quantity of atmosphere in the airtight receiver. Change of density in these instances must have accompanied change of pressure. In the heated clock case where the higher temperature must drive out some of the air, and leave the remainder less dense, is it of such a nature that in spite of its lessened density it can transmit the same pressure to the same level as before? I am inclined to the opinion that change of density is the main cause of variation of arc.

Whatever the cause, or causes, there is no doubt of the considerable effect on the arc of this pendulum. With an 8 lb. driving weight on a double line, the total arc at a temperature of 63 deg. F. = 4.4 deg. at a temperature of 90 deg. it = 4.65 deg. With a 6 1/4-lb. weight the arc at 63 deg. = 4 deg. barely, at 90 deg. it = 4.2 deg. With a 3 lb. 11 oz. weight the arc at 63 deg. = 3.1 deg. barely, at 90 deg. it = 3.2 deg. fully. These are only approximate arcs, as the degree plate is only divided into tenths of a degree, and I have no telescopic or microscopic means of measuring the arcs; but the changes are so noticeable, and follow the changes of temperature so quickly, that they admit of no doubt.

During this time the temperature errors were being observed, and although the error was not now so large as at the beginning, it was still nine seconds per week faster at 90 deg. F. than at the temperature of the room. The mild steel tube was removed, a new one of half the length substituted, and an equal length of third quality nickel steel tube added. It still gained in the heat about six seconds per week, so the whole of the mild steel tube was removed, and 4.2 in. of the third grade nickel steel substituted. The gain in heat was now barely three seconds per week. On May 30, 1905, there was a storm, whether that had any influence on the pendulum is unknown, but from that time forward it began to lose on its rate in an unaccountable way. Not suspecting any change in the nickel steel we made no

further temperature tests, but kept the clock going at the normal temperature until it appeared to maintain a steady rate. On July 26 the line broke, letting the weight fall about 2 ft. to the bottom of the case. We fitted a new line and found a suddenly developed loss of eight seconds per day on the rate; this was maintained, so we had to screw the nut up nearly half a turn to bring it to time again. The movement was taken to pieces, the condition of the oil examined, and everything carefully overhauled, but nothing could be found in the clock itself to account for the altered rate.

The temperature tests were resumed, and to my astonishment the loss in the higher temperatures was now 22 seconds per week instead of the gain of three seconds. The nickel steel tube was removed, the original mild steel tube 4.2 in. long replaced, and at the present time, under exactly similar conditions to those of about a year ago, the clock is losing three seconds per week in heat, instead of gaining two seconds per day. Whether this condition will be maintained, or whether it will undergo further change, it is impossible to foresee. The observed rates at the commencement of the trials indicate an actual contraction of the nickel steel in heat; the recent ones show a decided expansion. Is there any stage of development where the co-efficient of its expansion will remain constant? If not, it is useless for our purpose.

Three features of these experiments deserve the consideration of the clockmaker. Firstly, the effects of different suspension springs on the isochronism of the vibrations. With the long thick spring we had a loss in the long arcs of six seconds per day, with the shortest of the thin springs we found a gain in the long arcs of six seconds per day. It must therefore be possible to find such a relation between the dimensions of the spring and the weight of the pendulum, as to obtain perfect isochronism for such variations of arc as a regulator pendulum is subject to. No great variation was produced by enlarging the isochronal hole in the spring, either upwards or downwards, but as we started with a large hole that allowed of little extension in either direction, our experiments are indefinite in this respect, and the question deserves further investigation. Secondly, the effect of change of temperature on the arc of vibration in the closed case, and the probable causes of these changes.

In the notes made in August, 1904, when the temperature was raised by heating the whole room, no such increase of arc took place, and I find it noted several times that there appeared to be a small diminution of arc in the higher temperature, certainly at no time during those three days did the arc increase in heat. I am puzzled to account for this curious fact. Had the change of arc been due to alteration in the oil, or in the elasticity of the spring, there appears no reason why the heating of the open room should produce any different effect to the heating of the closed case.

(To be continued.)

SUMMER WATCH-SELLING CAMPAIGNS

MIDSUMMER may witness some falling off in the sales of ordinary lines of Jewelry. Such a staple article as the Watch, however, is less affected by the changing seasons. Is not this, therefore, a good time to emphasize Watches? Opportunity is afforded to appeal, not merely to your regular constituency, but to the great army of tourists and Summer visitors. Such activity paves the way for larger business the coming season.

OPTICAL DEPARTMENT

Useful Information Regarding the Coming Convention of the A. A. O.

KANSAS CITY, Mo., June 20.—The Board of Directors of the American Association of Opticians, in view of the fact that the Physiological or Optometrical section of the Association has heretofore had but little recognition at national conventions, has authorized the officers of this section to take entire charge of the scientific and literary programme of the Rochester convention, under the following conditions:

The programme to occupy the time of three sessions as follows: Afternoon of the first day, and noon and evening of the second day, it being understood that the officers of this section take entire charge of the programme and affairs of the convention during these sessions, and that they carry out the programme in full, as recorded in the attached memorandum, signed by the officers of this section. The expense of the section programme as outlined not to exceed \$50, which the officers of the American Association are hereby authorized to pay into the treasury of the section for use as herein provided.

PHYSIOLOGICAL SECTION'S PROGRAMME.

The following is the programme of the Physiological Section of the A. A. O., submitted for consideration and adoption by the Executive Committee of the American Association of Opticians, to be carried out at the coming Rochester convention:

The session (either morning, afternoon or evening) devoted to a public clinic of practical eye-testing, including the use of optometric instruments and skiascopy in relation thereto.

The session (as above) devoted to a public clinic of practical muscle testing, including the use of optometric instruments in connection therewith.

A room properly fitted, under the charge of a recognized authority to enable visiting optometrists to elucidate any points in practical eyesight and muscle testing which may have been found puzzling in their daily refraction work.

Providing suitable papers of practical scientific interest for the edification of the members generally.

(Signed) SAM'L S. GRANT, B. O. A., President.
W. R. DONOVAN, Vice-President.
ERNEST EIMER, Secretary and Treas.
C. M. JENKINS, Librarian.

RAILROAD TRANSPORTATION.

One and a third fare on the certificate has been granted over all railroads in the United States and Canada. Tickets may be bought any time after July 25, or five days earlier at more remote points. Return tickets may be bought any time within five days after the meeting closes. Extension and stop-over privileges can also be obtained. For further information inquire of your local agent or write the secretary of the A. A. O. When buying tickets, purchase a first-class unlimited ticket to Rochester, and ask for a certificate—not a receipt—and insist upon having it. Turn the certificate in to William E. Huston, secretary of the National Society, immediately

upon arrival at convention hall, Rochester. This certificate will be returned to you, signed by the Central Passenger Association, and entitles you to a one-third return rate.

EXHIBIT SPACE.

No charge will be made for exhibit space, but no exhibit will be allowed unless application be filed with W. W. Bissell, 91 Main St., E., Rochester, N. Y., at least 10 days prior to the convention.

HOTEL AND LOCAL ACCOMMODATIONS.

Those who contemplate spending several days or weeks in Rochester, or who wish hotel accommodations and are not familiar with the hotels, should write to B. B. Clark, president, 5 Triangle building, Rochester, stating the rate and sort of accommodations wanted, and their letters will be turned over to the Entertainment Committee.

DELINQUENT MEMBERS.

Members who wish to participate in the affairs of this meeting should not fail to remit their dues to the secretary before the meeting, as the present Constitution and By-Laws provide that all dues must be paid in full before the member is entitled to the privileges of the floor. And all persons intending to join the Association should send in their applications to Secretary William E. Huston, 1315 Harrison St., Kansas City, Mo., at least two weeks before the convention, as it takes about that time to act upon an application.

SIDE TRIPS, ETC.

In addition to trolley rides to nearby resorts, trips to the lake and Niagara Falls, the R. & O. Navigation Co., operating a line of fine steamers, has planned a number of special trips on which it will make very low round trip rates. There are four trips planned—one to Toronto, one to the Thousand Islands, one to Montreal and one to Quebec.

That the exhibit feature of this eighth annual convention will far surpass that of any previous convention is already assured. Far more space has already been taken by representative firms than has been engaged for any of the former conventions.

While no "official route" has been selected, the Lake Shore & Michigan Southern offers the most advantageous arrangements from the east, west and south. Opticians coming from the west over this route will find the monotony of the trip broken by the boat ride from Cleveland to Buffalo. Stop-over privileges for Niagara Falls may also be had.

The year just drawing to a close has witnessed a wonderful revival of interest in the American Association of Opticians.

This is evidenced in the fact that more new members have joined since the Minneapolis meeting than have affiliated during the entire six previous years. Nine new states have affiliated, and over 600 new members have been added. In addition to this, nearly 100 delinquent members have again renewed their membership.

The following circular which is being sent out will be of interest to opticians visiting Rochester during the convention:

To the Members of the American Association of Opticians:

At the time of your convention in this city, July 30 to Aug. 2, we will offer for yourselves and families a number of very delightful boat trips from this city at very reasonable rates.

TORONTO, \$5.50.

The Queen City of Canada is reached by a night run from Rochester, leaving 11:45 P. M., arriving Toronto 6 A. M. Returning same afternoon boat leaves Toronto 3:30 A. M., arriving Rochester 9:30 P. M. This trip includes berth on the going trip and dinner returning. Ticket unlimited.

PRESOTT, \$6.50.

This trip takes in the Thousand Islands by daylight, and at this time there is no more delightful trip on earth. Boat leaves Rochester 11 P. M., arriving Kingston, Canada, 6 A. M., and until Prescott is reached at 10 A. M., passengers are treated to a panorama of beautiful islands, each the property of some American millionaire and surmounted by castles. This trip takes in Clayton, Thousand Island Park and Alexandria Bay. Returning, boat leaves Prescott 11:55 A. M., arriving Rochester 10:15 P. M. Trip includes berth and meals both ways. Ticket limited to continuous passage.

MONTREAL, \$15.

Same route as Prescott trip, thence through the St. Lawrence River Rapids, shooting the famous Lachine Rapids by daylight. This trip can be made in three days, allowing nearly a day in Montreal for sight seeing. Passengers should not fail to take the carriage drive up Mount Royal. Meals and berth included throughout. Limit, 10 days.

QUEBEC, \$22.

This trip can be made in four days, including one day in Quebec and a half day in Montreal. Meals and berth included throughout. Quebec is the oldest city in Canada and the most interesting. Points of interest are the Citadel, Plains of Abraham, old French quarter, Chateau Frontenac, Montmorency Falls, famous Shrine of St. Ann de Beaufort, and many others. Limit of ticket, 10 days.

SAGUENAY RIVER, \$32.

This is a 48-hours' trip past Quebec, and takes in some of the most beautiful and remarkable scenery in America. Passengers having a week to spend should not fail to take this trip. Meals and berth are included throughout. Limit, 10 days.

Early application should be made for staterooms. Our special representative will be in attendance at the convention to take care of your wants. The above rates are special and open to members of the association and their families only.

Yours very truly,
THE AMSDEN STEAMSHIP TOURIST AGENCY.

Dr. Frederick Stone, formerly with the Bay State Optical Co., Attleboro, Mass., has taken charge of the optical department of the Miner store, Winter St., Boston, Mass.

Optical Department.

The Policy of the American Association of Opticians.

NEW YORK, June 20, 1906.

Editor THE JEWELERS' CIRCULAR—WEEKLY:

A national organization of opticians was effected, in 1898, and called, officially, the American Association of Opticians. This result was not the sudden outcome of a short-lived whim, but a satisfying of a long-felt want, and only achieved by strenuous efforts. It demonstrated that opticians had arrived at that point whence they realized that their interests could be better served by joining forces.

This principle is a sound one, but to obtain the best results from an undertaking of this character—in fact, to gain any benefit whatever—the whole body must move in unison and toward one definite point, and unless uniform action can be commanded confusion and negative results are all that can be expected. In other words, a large, diversified, unwieldy body must move, if it move at all, along the lines of a pre-conceived, definite policy.

The American Association of Opticians, after nearly a decade of existence, has no policy. That is a broad statement, but its breadth and, what is more, its undeniable correctness, should strike every well-wisher of the A. A. O. with sufficient force to wake him up to the facts as they exist, and enlist his energies in an effort to change this state of unsettledness.

Better a second-class policy than none at all, because that may lead, at least, toward a better one, whereas none means a standstill. About all that the American Association has done so far has been to undo each year the work of the previous year, and, judging from the present signs, it is still up to its old tricks, and unless care is exercised all the work that was accomplished at Boston, the banner convention, will be annulled at the coming convention in Rochester.

Two ideas predominate—or, rather, two factions dominate—the workings of the A. A. O. One insists that its aim should be to guard with equal care the interests of each and every branch of the optical industry; that is, its membership should consist of all who, in any way whatever, are interested in optics—the optometrist, the dispenser, the jobber, the wholesaler, the retailer, the manufacturer, the traveling salesman, the clerk, the shopman, the scientist, the author, the journalist, and, alas! the fakir; and, furthermore, that each class should have equal representation. The other faction contends that the interests of such a collection would be so widely diversified that it would be utterly impossible to merge them into an harmonious whole, and that, therefore, as one class of interests are more important than another, provision should be made whereby that class would be properly favored. The interests of the optometrist and the dispensing optician, for instance, are almost diametrically opposed; how, then, can even these two classes be expected to work for a common end, and will not the admittance, on an equal basis, of more classes add to the confusion and contention?

It may be a difficult choice to make, but if the officers wish to see the A. A. O. advance they must adopt some fixed policy and "work it out along those lines if it takes all Summer." "OPTICUS."

Meeting of the Optical Society of the City of New York.

THE regular meeting of the Optical Society of the City of New York was held on Wednesday evening, June 13, 1906, in the optical parlors of A. Martin, at 17 W. 28th St., New York, at 8 p. m. The meeting was called to order by President Offenhauser. Applications for membership were received from the following: Jos. Mantell, Muskogee, Ind. T.; Wallace W. Lent, Peekskill, N. Y.; Chas. C. Kraft, Highwood Park, N. J. (proposed by Mr. Shapero); Henry C. Aurnhammer, Newark, N. J. (proposed by Prof. Lockwood); Austin Soper, Madison, N. J. (proposed by A. Frank); Homer B. Hoyt, Norwalk, Conn. (proposed by A. M. Frankel).

In accordance with the by-laws these names were laid on the table, to be acted upon at the next meeting.

The following, who were proposed at the last meeting, were elected to membership: Walter Carlin, Brooklyn; A. F. Mittacher and H. Schuman, New York.

The secretary read the correspondence, which was of a general nature. A letter was received from the Indiana Optical Society, requesting information and blanks appertaining to the New York society's two-years course.

The fourth paragraph, page 9, of the by-laws was changed to read:

"All members of this section, upon passing examination, shall be presented with a certificate, which will remain the property of this society and shall be subject to forfeiture upon the member breaking any rules of that section."

Mr. Marchant suggested slight changes as follows: "Upon taking examination" instead of "upon passing examination," and "upon demand of the society" instead of "upon breaking any rules of that section."

A lengthy discussion then followed upon the part of Mr. Yarrow, Mr. Meyer and others. Mr. Meyer then introduced Dr. Killilea, who spoke to the members on the subject. His remarks were sound and logical, and to the point, and were received with hearty applause. After the matter was debated *pro* and *con* for some time, and the subject of incorporation of the society discussed as well, Mr. Ryer withdrew his motion.

This ended the business portion of the meeting, and Prof. Lockwood began his quiz on chapters 5, 6 and 7 of Henderson's "Lessons on the Eyes." After the quiz the meeting adjourned until the second Wednesday in September.

QUIZ QUESTIONS.

- Describe the form of a light wave.
- What is a ray of light?
- In what medium does light travel the most rapidly?
- What is meant by the word "refraction"?
- When is light never refracted?
- Passing from an optically rare to an optically dense medium, how is light ray bent?
- Passing from an optically dense to an optically rare medium, how is light ray bent?
- When a ray of light falls perpendicularly on a denser medium, what change takes place?

Describe a prism and the course of a ray of light passing through the same.

In what direction does an object seem to be placed in looking through a prism?

Give the three modern ways of numbering prisms.

What is a lens?

What is the principal axis of a lens?

What is the principal focus of a lens?

What are conjugate foci?

What is a virtual focus?

Name three styles of lenses, all to be of equal power.

Describe a cylindrical lens as used in optometry. What two factors count ordinarily in producing strong lenses?

What is meant by a one diopter lens?

What is necessary for the formation of a clear retinal image?

What is the average width of the pupil of human eye?

Why is 20 feet considered practically the standard for infinity?

To what extent is this supposition incorrect?

Define the term emmetropia.

Are emmetropic eyes normal eyes, and what the reason for your belief?

Define accommodation.

Define action of the ciliary muscle in accommodation.

Define presbyopia.

Define convergence.

What is the field of vision, and what are its limits?

Describe the solar spectrum.

What are the primary colors, and why are they so called?

What is the Young-Helmholtz theory of color perception?

What is color blindness?

Name the different forms of ametropia.

What is hypermetropia and its two fundamental causes?

How is hypermetropia overcome or corrected?

The Optical Trade in San Francisco

The W. R. Johnston Optical Co. is now located at 135 Ellis St., San Francisco, Cal.

The Cahn Standard Optical Co. has opened temporary offices at 1908 Bush St., San Francisco, Cal.

Chas. Proctor and Louis Kuttner, opticians, have opened a store at 2076 O'Farrell St., San Francisco, Cal.

The San Francisco Optical Co., San Francisco, Cal., is now located at 1315 Golden Gate Ave.

Abraham & Roth, formerly with the Standard Optical Co., San Francisco, Cal., have branched out for themselves and are now located at 1002 Fillmore St.

Henry Kahn & Co., San Francisco, Cal., are carrying their usual line of goods. Their store has been leased, recently, at 1309 Van Ness Ave., and this will be ready for occupancy by July 1, at the latest. It is the intention of the firm to operate the store at 2253 Fillmore St. in conjunction with their new one.

Carl E. Strand, Park River, N. Dak., has taken charge of the optical and jewelry departments of Feckler Bros.' drug store at Wimbledon, N. Dak.

RETAIL JEWELERS ADVERTISING

The use of this department is open to every retail jeweler and optician. Forward for criticism your newspaper ads., booklets, catalogues, novelties, circulars, etc. Ask advice and offer suggestions. Replies in these columns are unbiased. Make letters as full and particular as you desire. Every letter and ad. sent will receive full attention, though the publication of the matter may sometimes be delayed several weeks.

How Shall I Begin to Advertise?

HERE are scores of individuals and concerns who are ready to advertise, and not to know *how*, says P. H. Merkle, in *divine Advertising*.

They have read various articles on advertising, they have seen successes made over and over again, they know that advertising is an established principle of success. What they want to know *now* is how to begin. Beginnings in advertising, as well as in most anything, are mighty important, and decide the fate of the whole enterprise sometimes.

A false start, a wasting of precious capital in things that don't have pulling power, is commercial suicide. One might as well start off on the road to Boston, expecting to get to Chicago, as to put the opening energy into the wrong channel. It is more than twice as hard to make a change of policy and plans after once starting—and more than twice as expensive.

Well, then, what is a good start?

A good start is nothing more than a thorough preparation, a carefully thought out campaign, and with a keen eye fixed on the goal ahead and a sufficient stock of the energy, money and brains necessary to reach at goal.

These are the general principles of the thing—now we can come down to a bill of particulars.

Always granting that you have something to sell which people will find worth while buying, the next problem is to decide upon a campaign. Now it ought to be perfectly plain to anyone that the persons who can give the most valuable information upon this matter are the persons who have had the longest and keenest experience in this sort of work; and here is where the first chance for fatal mistake comes in on the part of the smaller advertiser. He gets an idea that he can do it about as well as anybody!

The popular idea of advertising to-day rounds the subject with mystery and strangeness. Advertising is a fairy wand which you need only wave properly and recite the lucky incantations, and lo! the gold flows into your hand! To others it is a sort of hypnotism and magnetic suggestion obeying some occult laws of mind and only mandating that you take large enough space and shout and "suggest" loudly enough. The mere fact that you buy space seems to some people to be reason why an advertising campaign should succeed; and if it doesn't, they question the principle itself of advertising.

Bless you! A Rip Van Winkle who had awakened only yesterday wouldn't need more than a few hours to convince himself that the *principle* of advertising is as unquestionable as the principle of gravity.

Let every new advertiser comprehend that advertising success is only accomplished by analyzing and improving on experience, and he will stand big chances of success. For *then* he will see the logic of putting his advertising into the most competent hands he can find.

In a false spirit of economy, which is the most lamentable, many small advertisers write and place their own advertising, persuading themselves that they know about as much about it as anybody they can hire. Quite often, indeed they slyly get as much information as they can from advertising men and magazines; and tell themselves they are shrewd and wise beyond their generation.

But the sad truth of the matter is that advertising pages are loaded up with this kind of mediocre work, and the *really* wise advertiser's matter skims the cream off the market, and gives to the rest the leavings. While the over-cautious advertiser is engaged in saving pennies and starting with almost the least possible expenditure, the shrewd and wise man is sparing no cost to get the best of the things that are the very vitals, heart, brain and stomach, of his enterprise—a keen campaigning plan and powerful copy. Is it remarkable, then, that he succeeds?

The question of advertising service very frequently worries the beginner in advertising exceedingly. He don't know much about advertising, and he is talked to death by a score of advertising men who fire hot shot at him in rapid succession. They all seem to abound most in the same thing—namely, great willingness to take everything out of the advertiser's hands, large promises, and a great deal of superheated atmosphere in general.

After every representative has his talk all in, the array is enough to confuse the most clear-headed of business men. Each advertising man has said his say so plausibly, and, on the surface at least, all of them seem to be right; yet they all disagree more or less in all but one thing—that he should spend large amounts of money and turn it over freely to them. There is little wonder that many manufacturers and others withdraw and refrain from placing their money in such a rabble of uncertainties as advertising is made to seem to be.

It is always safest to be the guiding pilot of an advertising campaign yourself, if you are an advertiser. That is, you ought to

know whither you are drifting and why you are going and where you are headed. Advertising is not anything remote from business; and if it can't stand being judged on the same principles that apply to business in general, it isn't worth considering at all.

(To be continued.)

What Some Jewelers Say.

NEW additions to our stock of stylish bracelets.—Anticipating the increasing demands for bracelets for Summer wear, we recently placed a large order and are now showing for the first time the most wonderful line of beautiful bracelets in miles around. The collection is extremely versatile in style, showing all of the latest engravings and carvings—many being set with diamonds and other precious stones. It is permissible, even considered correct, to wear more than one bracelet on the arm. Albert Pfeifer & Bro., Little Rock, Ark.

Diamond pride is possessed by every girl who receives an engagement ring from Sipe, because it has the beauty and artistic value not possessed by any other jeweler in Indianapolis. J. C. Sipe, Indianapolis, Ind.

Brass is gaining in popularity for wedding presents. Brass is now worked up into so many useful and artistic things at prices that are not at all high. Brass things have a substantial look to them and bear it out in wear. We have a new consignment of brass goods in the window in the latest designs and finishes. Let us show you some of the prices and surprise you with the low prices. R. Ashby, Colorado Springs, Colo.

The diamond question is easily settled at the jewelry shop of L. W. Lewis. You'll find a magnificent assortment of perfect cut, clear stones, artistically mounted and priced very reasonably for strictly high-grade guaranteed diamonds. See the new attractive pieces for brides and graduates. L. W. Lewis, Columbus, O.

Silverware, cut glass and clocks.—Nothing else seems to combine beauty and usefulness to such a remarkable degree for wedding presents. We have now ready to show you a handsome assortment of both flat and hollow silverware from the best makers and the latest designs. Also cut glass and clocks too numerous to mention. We can supply your silver, cut glass or clock wants at economical prices. Your inspection solicited. M. J. Buechler, Bridgeport, Conn.

Diamonds are the most profitable investment you can make for personal adornment. What else can you realize on at so nearly cost price as a diamond? We can save you money on purchase price, too, and find it makes diamond business, with enough profit to satisfy us. Let us figure with you on any size, best quality. A pleasure to clean your diamonds free and welcome. Morsman & Feagans, St. Paul, Minn.

A betrothal gift for your fiance, or a wedding gift for the June bride, can be selected from our superb stock of diamonds and precious stones of all kinds, watches, earrings and rings, without trouble, as we sell at as low a margin of profit as is possible to live and let live. Jesse Davidson, Montgomery, Ala.

That this department shall prove mutually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

An Original Window Display for Independence Day.

THE window display illustrated herewith is one which can be made without any great expense, and is both attractive and timely, being commemorative of the signing of the Declaration of Independence.

Effective Illusions in Window Dressing.

THE window-dresser in the department store has some advantages over his brother in the more restricted lines of trade. If the former desires a pretty piece of furniture to secure a certain desired effect in setting off some dress models, he

man. It is not always sufficient that should be familiar with the blending a harmonious arrangement of color, but must be endowed with the inspiration painter, the genius of the decorator and deftness of the stage carpenter who adept at the perpetration of all kinds deceptive devices knocked together for

AN ATTRACTIVE FOURTH OF JULY DISPLAY FOR THE JEWELER'S SHOW WINDOW.
(Drawn expressly for THE JEWELERS' CIRCULAR-WEEKLY.)

In the center suspended by hunting is a bell—denoting liberty—studded with jewelry. Against the dark blue star covered background and set off thereby, arrange silverware—candelabras, etc. If convenient, select pieces of Colonial design.

A firecracker border frames in a few choice pieces of jewelry and gives a touch of color to the window. Fobs, watch chains and other stock fill in the sides and back of the bell. The various kinds of decorative paper which may be obtained make the cost of producing displays of this kind very small.

simply sends to the furniture department, and after use it goes back into the stock. So the picture, lamp and other departments may be drawn upon for his materials without expense. The man who happens to be employed in the capacity of dresser for a jewelry store has not these resources at his command and must exercise his ingenuity to secure effects by which his window may be given a fresh appearance at regular intervals without incurring any great expenditure of money.

It is essential that the window-dresser should be a mechanical genius and a handy

materials at hand and which will not excite a breath of suspicion from those unskilled in the shams and deceptions of the world.

Under this head may be classed two schemes which have recently come to notice for obtaining clever effects by the exercise of a little ingenuity and the expenditure of a small amount of money. One consists in the reproduction of a stunning art glass lamp shade for a store window. Upon dissection this proves to be a tissue of fraud and impositions, but when viewed at eye level a short distance it defies scrutiny. The

Storekeeping Department.

A "Realistic" Window Display.

side is of an oblong shape with sloping sides and ends. It is hung by massive chains from the ceiling of the window and gives the glow from a group of four incandescent electric lamps. The sloping ends and sides were semi-transparent, and when they were incorporated the improvised glass effect referred to above. The shade was built upon a square iron frame made by bending a length of bar iron into rectangular shape. The four sloping sides of the shade consist of pieces of wire mesh fastened at the top to a wooden frame. This panel is really the backbone of the shade and contains the hooks which engage with the supporting chains.

The cloth referred to is of a neutral color and is carried in stock only by the larger hardware dealers, as there is not a ready demand for it. If this cannot be readily secured mosquito wire will answer for a fashion. The coloring is applied to the wire in the desired design in the shape of shellac colored with aniline dyes. Great care must be exercised in following this process to see that the meshes of the wire are entirely filled with the coloring matter. It is not necessary to apply it with any great care, as far as the design is concerned, for the inequalities and irregularities add to the effectiveness of the design.

The effect of "leading" between the different masses of color was secured by stripping of plaster of Paris, which may be applied in the same manner as the baker puts his decoration on the top of the wedding cake. He uses a paper cone filled with the material, which is forced from the pointed end by the pressure of the hand. There are rubber bulbs which come for this purpose now, and these are extensively used in the arts and industries. The plaster may be readily colored black or made any tone by mixing a suitable quantity of black or mineral black with the plaster, but the best result can be obtained by cracking the plaster while wet with powdered silver or aluminum. This gives an excellent imitation of lead.

The general effect of this lamp, as it hangs in the window is very effective. The light passing through the wire and colored shellac is just toned down sufficiently to give the desired effect. Such a shade in art glass would cost between \$20 and \$25. The imitation cost about \$1.90.

Another method of imitating stained glass is by the use of strips of paper which are prepared for the purpose and which make quite a new idea. This material can be used with excellent results where there is permanent mirror or plain glass background. The paper is cut into ovals, circles and such other shapes as is generally resorted to in stained and leaded glass signing. The gum is already on the back of the paper so that in its application it is simply necessary to go over the glass surface with a moistened sponge and then to stick on the paper strips as desired.

The attractiveness of this is heightened by the addition of an occasional "jewel" of glass, which is secured to the paper or glass background. The advantage of this method is that it is possible to make frequent changes of design.

COMMERCIALISM is rapidly diminishing the retail merchant's limitations. It is doing so partly by increasing the retail merchant's scope. A pretty contradictory pair of statements! Well, the meaning intended to be conveyed in the first sentence is that the small retailer, as such, is rapidly finding a competition that is growing so oppressive that he will soon have to give up the combat if he is determined to remain a self-respecting citizen, absolutely refusing to live or rather exist on starvation income. Department store methods are encroaching on his custom so that he is often looking prophetically on the era of his dissolution. This applies to the retail merchant who restricts himself to a certain line of wares, legitimately (he calls it) belonging to his craft or guild, and who is determined to bring about his sales on the same plane his father (not to say his grandfather) did before him. Would it be clearer if I say he can no longer run a shop and succeed?

The second sentence, which sounded paradoxical, is based on the sad fact that for the retail merchant to obtain that share of fortune that is due to energetic action, perseverance and deep study of his trade he must be at least a little bit of something else than a retailer. He must buy large lots (speculatively, may be, sometimes,) to get the low quotation needful for a living profit under present competition; and must force larger sales. That is to say, he must be something nearer a wholesale or jobbing buyer. Or he must be just a little something in the importing business. Or as a last alternative he must get out of his craft and besides being, say, a jeweler, he must be something else; anything that will increase his income.

Perhaps we might put the whole thing in a nutshell by another paradoxical sentence: The successful retailer will soon have to be a wholesaler or quit.

This evolutionary phase entails another sad condition which faces the retail merchant of the next few years. It means that you shall be a successful leader ("always room on top"), progressive, aggressive, creative, enjoying that full financial measure of remuneration that is these days called success, or you must be one of the squeezed, multitude, half suffocated pecuniarily with mean, close competition.

It would not be difficult to quote individual concerns in the jewelry trade as examples of the advance towards these conditions, but personal comparisons are odious. Let us exemplify the case in some other line of trade, and you will see the analogy yourselves. Take the dry goods trade, and we find certain retailers feeling the impossibility of selling larger stocks of goods looked for increased profits elsewhere than in the enlarged retailing. A. T. Stewart, having the biggest stores he could handle and those stores well filled with customers, purchased his own Irish linen factories, then his own factories in other lines in England, in France and elsewhere. And his margin of profit included those of the wholesaler, importer and manufacturer.

Now, unfortunately, all this energetic action of these big retailers, ever increasing the number of their sales (and the list of customers of course), does not make my

lady wear more silk dresses nor increase her handkerchief consumption. It only takes away that much trade from the little retailer.

Altogether a pretty sad state of things for the retailer, you will say. Well, both yes and no. Sad for the shopkeeper who wants to drowse through life dividing his time between eating his meals and sleeping behind the counter. He has to go, but then there is Hawaii and the Philippines and other good free American territory open to his restless temperament.

But to the A. T. Stewart type of determined succeders there are openings. Stewart successes or even greater ones. The desperate conditions should surely rouse the lethargic liver and wake the dreamer to 20th century ideas. Shop methods should be bundled neck and crop from retail premises, the arts and wiles of the jeweler merchant princes followed or improved on. And presto! you climb to those same dazzling heights that those grandfathers of ours never dreamed possible in the retail world. The worthy and ambitious American's range of vision should never be short of the President's chair, or he is retrograding from his school training and is no longer the equal of his citizenship's type. He is permitting himself to drift into the cynic or the hypochondriac and is in the wrong country.

But this looks as though the writer were drifting far, far from our show window. As a matter of fact, probably the chief source of strength of the ultra-successful mammoth stores of this city lies in the method of display of their wares. The practical character ruling in these leviathan establishments aids in the resultant sales as much in their way as the graphic and potent methods of expression in their advertising lead the throngs to visit the emporium.

And the process of appeal to the purchasing power of the public is simple in its conception. To perfectly display a bedstead, a bedroom "lay out" is best adapted. To magnetize a desire for a special suit of dining-room furniture the full garniture of the room is most effective. Some plates and dishes resting on fine white napery, the groups of wine glasses posed correctly, and even a cut glass centerpiece with real flowers will bring about satisfactory conclusions quicker than any verbal argument.

Realism is what attacks most forcibly human sentiment, and the "realistic" display of merchandise is what closes the largest number of sales. Whether you claim the public's attention for the delicate flavor of a soup or the simple action of a collar button the "demonstrator's" activity is called into play, and the young ladies who "demonstrate" a hot soup are radiant in the snow white uniform of the chef, the collar stud man works frantically in shirt sleeves and displayed "galluses." Realism is aimed at and attained in most lines of salesmanship these days, but the jeweler does not appear as a very prominent disciple of these practices. With him it is probably more an excess of dignity than a lack of appreciation, but cult must give way to the dominant radicalism. Even the severe refinement of the staid retail jeweler must be torn out of the store and relegated to his domicile, as was long since the case with other trades.

Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1596.—**Current for Stripping.**—Please inform us how we can regulate a 110-volt current so we can use it for stripping solution and plating?
H. & E.

ANSWER.—A current of 110 volts is too strong for either stripping or plating. But a current may be used for stripping with the assistance of a special apparatus, which will cost about \$7.50.

QUESTION No. 1597.—**Acid Burned Diamonds.**—I have made several diamond pieces in which the stones were soldered in beams of platinum, and recently burned some of the stones accidentally. I was told they were "acid burned." As we use a lead pickle for our pickle solution I would like to know whether the lead may have left a ring upon the stones which, after again going through the fire, burned itself upon them.
F. J. M.

ANSWER.—When you state in your letter that you have burned some of the stones you express the thing correctly. Diamonds may be red hot in soldering, but when a certain amount of heat is exceeded the diamond sweats and gets coated, which coating can only be removed by repolishing. While there are some chemical substances which will destroy the polish of the diamond, lead is not one of these. It is not safe to mix a pickle in anything else than porcelain or earthen vessel; lead will destroy the chemical constituents of gold, but will not injure genuine gems.

QUESTION No. 1598.—**Irregular Watch.**—I have a 24-jewel Rockford watch which I bought five months ago. The last 10 days it has lost time. I moved the regulator as far as it would go, and still it lost. I then asked the customer to leave the watch, and I looked it over carefully. The jewels were all tight and well oiled, pivots were straight, the mainspring was in good order, the balance was true and in poise, the hairspring was true in flat and round, regulating pins are the right distance apart, the hairspring the right motion between the jewels. The train is free, for it runs on half time. I have tried the watch for magnetism, tightened up the balance and it is running O. K. now. I have had this trouble before and cannot solve the difficulty.
F. B. J.

ANSWER.—That this 24-jewel Rockford watch should have begun to lose time in an unexplained manner about the time of a change of the season would seem to indicate that thermal changes have something to do with it. Changes from heat to great cold have a decided detrimental effect on the timekeeping qualities of any watch. As a thorough examination and overhauling of the movement has failed to show any defect in the general condition of the watch, molecular disturbances of three factors may

be accountable. These factors are the mainspring, the balance spring and the compensation balance. Admitting that the mainspring may have been made of the best of steel, its elasticity may have been impaired locally in tempering, which is often uneven, as it is generally done by manual and ocular operations. If such is the case, the gradual change in the elasticity of the mainspring in one or several places is often produced by a change of temperature; such change will affect the rate of the watch. A similar change may take place in a balance spring. The drawing of the fine steel wire for the purpose of making balance springs requires frequent annealing. By such frequent annealing the steel wire becomes decarbonized in spots, as such annealing cannot always be done equally throughout the length of the wire. Often these decarbonized spots show themselves in hardening, when some of the coils will stick together. This latter symptom does not show itself unless the spots are not extensive or of an acute nature. The mischief is great enough when of small extent, which will show itself in the running of the watch quite suddenly. Another cause of the disturbance of the erratic running of this watch may be the compensation balance. The melting of the brass on the steel disks leaves air or gas holes of diminutive size which are not closed by external pressure, and these in course of time make the expansion or the contraction of laminae subject to the most surprising changes, which cannot be guarded against, where so many watches are manufactured, as intermittent observations and adjustments would be necessary for the purpose. Marine chronometer makers perform such when rating chronometers, and new balances have often to be furnished.

The Enameling of Jewelry.

By CECIL H. SHERMAN.

(Copyright, 1906, by The Jewelers' Circular Publishing Co.)

(Continued from issue of June 20.)

SOME clover leaves are painted, others are given tints of transparent enamel and afterwards retouched with paint. Since very few kinds of gold will take transparent green enamel, these tinted clover leaves have a coat of fondant or transparent yellow next to the gold, then a coat or two of transparent enamel is painted and coated with the flux afterward. The newest things in enameling are produced along these lines—transparent and opalescent effects—and will probably be in vogue for some time, since the best work is done on the best gold. One firm, known to the writer, uses 14 karat, which is plated with fine gold (roll plate)

on the parts where these effects are desired.

Filigree or pierced work, which has the opening filled with enamel and when held to the light has a stained glass window effect, is gotten by using tinted fluxes, ground somewhat coarser than when used for regular enameling. By holding pierced articles perpendicular and charging in small portions at a time you can fill up the openings by repeated firing and charging. When too large cut a piece of sheet brass (yellow brass) and arrange brass and article to be enameled on one of your plates in such a manner that it will not have to be disturbed until after firing and so that you can proceed as though you had a piece of deeply cut work to charge; after the firing the yellow brass will spring away from the enamel.

Mourning jewelry, from an enameler's standpoint, is dead finished black work. Thin, even coats of black are charged and fired, and when cool are dropped either in white, or hydrofluoric acid, wet brushed and wiped dry with a clean linen cloth. The trouble is to get a good black for this work. Some make this finish grayish in hue and some black that looks bluish when it is being ground will be best.

The little gold ornaments seen on transparent enameled watch cases are made of gold leaf somewhat thicker than that used by sign painters. It may be bought at a first-class jewelers' supply house. This gold leaf is laid on the enameled surface, placed in the furnace and heated until it adheres. About the same amount of heat is used for firing paint; when cool it may be covered either wholly or partially with colored enamel or fondant. It must, however, have a coat of some kind of enamel over this or the paint will not stay on.

The making of enamels is a trade secret, and I have failed to find any one manufacturer who makes a line of colors, all of which are the best of their kind. As near as I can make out every lot differs a little from the other. A Frenchman who had served his apprenticeship with an enamel maker told me that they try to make enamel; if results are successful the product is sold as enamel, and if only fair the product goes for imitation stones, while if the results be bad the product is used for stained-glass windows.

However, it is possible to make a line of enamels that are very good by starting with a good flint glass as a base, first making it as soft or easy flowing as possible, and at the same time allowing it to stand the sulphuric pickle test. Make, first, a transparent flux, which will answer for all the transparent colors, and next an easy flowing white, which will be a base for most all opaque colors.

Flint glass, such as cut glass ware is made of, and sometimes the best kind of lamp chimneys, will answer the purpose. This should be pulverized so that it will sift through a 100-mesh sieve.

(To be continued.)

The clock in the courthouse in Independence, Mo., was put out of order the other day by a heavy wind, the clock tower being moved enough to dislodge one of the heavy pendulums, which fell on the stairway below, and narrowly missed the heads of several persons.

Collection of Greek and Roman Vases in the Metropolitan Museum of Art.*

By GISELA M. A. RICHTER.

THE character of the newly acquired collection, brought together by the Messrs. A. and C. Canessa, is especially adapted to the present needs of the Museum. Hitherto the classical antiquities have been almost confined to the Cesnola collection of Cypriote sculpture and pottery, and these, from the very fact that they are all the fruit of excavations in Cyprus, can give only a one-sided picture of Greek art. Since genuine pieces of Greek sculpture are now difficult to se-

period in the Cesnola Collection, but none that will compare with the large, two-handled cup (Fig. 1). It is a typical example of the later style (1200 B. C.). The clay is of the fine, well-sifted quality, and the shape, with the tall, narrow foot and the finely curved bowl, is a favorite type of the period. The decoration, like most Mycenaean designs, is taken from maritime life, and in this case consists of an octopus.

The Corinthian style is well represented. There are a number of small aryballoi, as well as amphorae and plates belonging to the VIII and VII centuries B. C.; also some examples of the later Corinthian style, when human and mythological sub-

vases with black figures painted on the red clay are fairly typical. The subjects represented are those characteristic of the period. Mythological scenes are common. Herakles is, as usual, the favorite hero; we have Herakles fighting the Cretan bull, Herakles and the Erymanthian boar, Herakles in contest with the Amazons. Among the vases with subjects taken from daily life is an "olpe" on which is represented a man, playing the lyre, surrounded by three female figures (Fig. 3, p. 191). Of all the black-figured vases in the collection, this is the most graceful in composition and the most careful in execution. It must have been made when this style was at its height,

FIG. 1.

FIG. 2.

it is fortunate that in Greek art the "minor antiquities" bear so much the same likeness as the higher arts that original vases or coins convey the Greek spirit better than casts from more noted productions. The acquisition of this new collection is, therefore, a most valuable addition to the whole Greek department. Though it consists only of 300 pieces, its comprehensiveness is one of its chief features, and, although we have no one specimen of extraordinary interest, there are many fine examples, of value both from the artistic and the archaeological point of view. As it is impossible in this short notice even to attempt to describe the collection in detail, all we can do is to make a selection of some of the best examples.

The earliest vases in the collection are of the Menaean style. There are several of this

jects at last gained prevalence over the monotonous friezes of animals, which had hitherto been the main motif of decoration. A rare subject is depicted on a plate of this style (Fig. 2). A poet—at least so we must infer from the accompanying lyre—is lying on his death-bed. The picture is drawn in a simple, naive manner; there are no accessories, except a footstool, which is placed under the bier, and the lyre hanging against the wall. But the very simplicity of the conception offers a pleasing contrast to the later representations of a prothesis, or lying in state, where the death-bed is surrounded with a crowd of people, and where the lamenting women, hired for the purpose, tear their hair and rend their clothes to show the semblance of grief.

Almost one-half of the collection consists of vases of Athenian manufacture, of the black-figured and red-figured styles. It is in these that the chief interest lies. The

about 520 B. C., just before the new method gained ground, in which the figures, left in the red of the clay, stood out against a black background.

An interesting example of the transition period, when the first experiments in this new method were tried, is a krater or mixing-bowl, in which both styles are combined. On the front and back of the vase is painted, between two large eyes, a head of Silenus in the red-figured technique. Below the handles, however, we find winged genii, painted, as of old, in black color.

It is unfortunate that, unlike the Boston Museum of Fine Arts, the Metropolitan Museum owns no examples signed by one of the great masters of Attic vase-painting. The new collection does not supply this deficiency; the only signed vase is a kylix, without decoration, inscribed with the name of the "minor artist" Xenokles. However, in some cases, the style of a great master

be detected. On a cup of the red-figured style are represented two youths in kneeling posture, one holding a kylix, the other a skyphos (Fig. 4). The love of motion suggested in the attitude of the figures, and the lithe, nimble bodies of the youths, recall the splendid compositions of Euphronios. But, though we find in our picture the rush of life and feeling for decorative grouping so characteristic of the master, the execution is too sketchy to allow us to see in it an original work. All

FIG. 3.

we can claim for it is that it came from a workshop in which the influence of Euphronios was strongly felt.

A kylix, also of the early red-figured period, but, unfortunately, much restored, reminds us of the work of another great master, the painter Duris. The interior is decorated with the figure of a youth, singing to the music of the lyre, and on the outside are represented scenes of revelry. Even in the quiet abandonment of the singer and in the somewhat studied action of the revellers, the style of Duris is apparent; but, again, the execution is careless and precludes the possibility of a master's hand.

Of the "fine period" of the red-figured style there are several good examples in the

FIG. 4.

collection. To this period belongs a large kylix of excellent preservation and very fine clay (Fig. 5). The subject consists of three Amazons setting out for battle. Each is fully armed with spear or battle-axe and a shield; one is holding her horse as the other two are advancing on foot. No enemy is in sight, but this determined set can only be directed against a foe. There is all the breeze of action in the figures, and this is combined with careful drawing and minute attention to detail. One feature in the drawing must be noticed—the figure of the Amazon leading her horse is represented full face. This is

rare in Greek vase-painting. As a rule, even when the body is represented front view, the face is in profile or three-quarter view, not only because to depict a face in profile is easier, but because the people represented are generally busied with some oc-

FIG. 5.

cupation which makes them turn to the fellow-actors in the scene.

A shape which was used at all times in Greek vase-painting is the rhyton, or cup terminating in the head of an animal. The purpose of this must have been that the cup should not be set down, but its contents drained at one draught. The specimen in the collection (Fig. 6) terminates in a bull's head, which is finely modeled, and of peculiarly life-like expression.

A beautiful example of the "graceful period" in the red-figured technique is a skyphos, with a toilet scene on one side and an unexplained subject on the other (Fig. 7). The drawing is of unusual refinement, and the figures so gracefully posed that the whole composition has a great charm. The subject represented on our

FIG. 6.

plate is difficult to explain, because the character and purpose of the object on the woman's lap is, as yet, unknown, and since the interest of the scene seems to be centered in it, we cannot find an explanation without it. This object occurs only on a few other vases, and in each case it is

impossible to identify its use. The possibility that it is a musical instrument is excluded by the fact that it rests on a stand and that the strings are placed cross-wise. The most probable solution is that it was used as an incense-burner in some ritual.

As the art of vase-painting declined in Athens, recourse was taken to various devices which should make up for inferior execution. White and gilt were profusely used to enliven the effect of the picture, and often a plastic figure was attached to the vase so as to dispense with painting

FIG. 7.

altogether. The Sphinx (Fig. 8) is a beautiful example of this tendency, and shows that even at the time when decadence was beginning to set in, the Greek feeling for form was slow to die. The dainty pose of the figure and the calm expression of the face still recall the best period of Greek art.

The proportion in which the different styles occur in this collection is seen by the number of cases they severally occupy. The vases of early Greek styles fill two cases out of a total of 21. Twelve cases are taken up by the Athenian black-figured and red-figured ware, including also a number of white funeral lekythoi. The seven remaining cases are occupied partly by the products of Greek colonists of South Italy, partly by Roman ware, and partly by Etruscan vases. The vases of Southern Italy (IV and III centuries B. C.) are mostly

FIG. 8.

painted and of the Apulian style, but there are not a few examples in which figures in the round or in relief form the only decoration. Of Roman ware we have several lamps, dating from early imperial times, and bowls, imitations of the Arretine fabric. The Etruscan vases consist of specimens of the black *Bucchero* ware, of which the museum already owns a number, and some painted vases of the VI century B. C. These are imitations of the black-figured style, but the comparison only brings out the beauty of Greek ware.

SPECIAL NOTICE

BROOKLYN BRISTOL CASE

*"It's the little things in life
that count."*

B 2815

We thought we had considered
every feature when we put the

Brooklyn Bristol Case

on the market to take its place in the
lead of all other 25-year cases—but by
constant study our experts have added
a new feature—

*A Combination of Green and Yellow
Gold Color Effects.*

Can you realize the artistic beauty
of the engine turning all around the
shield in case 2624, being a delicate
green, while the rest of the case carries
a rich yellow gold color?

The contrast is very
marked and the effect adds
more real beauty to the case
than one would imagine
possible.

Made to be sold by live, progressive, American Retail Jewelers who realize the credit to be gained from selling reliable, accurate time pieces.

Protection to the Retail Jeweler is the "watchword" of The Hamilton Watch Co and The Illinois Watch Co., and every effort will be made to restrict the sale of these watches to the Legitimate Retail Jeweler.

THESE Simmons Chains with enameled gold slides made so distinct a hit the first of the year that there isn't any sort of doubt about their being very popular sellers this Fall. ¶ The exquisite color-beauty of the enameled slides can be realized only when you see the line at your jobber's. ¶ This idea originated with us—if you want the original enameled slide chains, be sure to get the **SIMMONS**.

R. F. SIMMONS COMPANY, Main Office and Works, ATTLEBORO, MASS.
Salesrooms, 9-13 Maiden Lane, New York; 42 Madison St., (Heyworth Bldg.), Chicago.

"We never follow the Fashion, the Fashions Follow Us."

MAURICE L. POWERS.

JOSH W. MAYER.

SATISFYING

IF you believe the men with the greater capacity have the power, developed by their master efforts, to insure, for the products with which they begin, benefits beyond the scope of their contemporaries, our Diamond Jewelry must satisfy your every demand. It is made by an organization that produces the highest grade of ready selling Jewelry of the lowest, medium and higher prices, to be found in this market, thus insuring a complete ensemble which is unapproachable.

Our Bracelet stock, which is nearing completion, is a marvel. It is impossible to describe this remarkable assortment and the only way to do it the fullest justice is to have you view our FOURTH ANNUAL EXHIBITION which takes place between August 13th and 18th, inclusive, when you will be fully convinced that whatever is said in these weekly announcements will be verified by what is displayed. If there is a possible chance for you to reach New York during this display, make it convenient to do so. It will repay you in many ways.

Once a visit always a visit.

POWERS and MAYER,

Makers of Diamond Mounted Jewelry THAT SELLS.

258-260 Fifth Avenue,
NEW YORK.

We are always pleased to ship goods on memorandum when satisfactory references are given.

*Our Mr. Richard Friedlander sailed last week on the Oceanic.
The DIAMONDS selected by our Mr. Louis Friedlander, who
has recently returned, have arrived and are now on sale.*

Three New Patterns

OUR SALESMEN are starting on their display trips, and are showing a very large number of new designs in Ladies' and Gentlemen's Card Cases, Photo Frames, Baskets, Jewel Cases and other Novelties, and three new and original patterns in Toilet Sets and Manicure Articles.

For over 45 years we have enjoyed the distinction of originating the handsomest and best selling patterns in sterling toilet ware, flat ware and napkin rings, and in the present offerings we excel all our previous efforts. Our etched effects supersede anything on the market at present.

Determine now to see these new creations; it will pay you well, and an opportunity will be lost if you neglect it.

These entire lines will also be on exhibition at our New York Showrooms.

TRADE  MARK.

ESTABLISHED 1861.

3 MAIDEN LANE, NEW YORK

Factory, North Attleboro, Mass.

No. 927.
24 ⁷/₈ inches high.

FOR SMOKERS' COMFORT

¶ Many a gentleman after a hard day's work desires to enjoy himself by smoking in peace and quietude at his home.

¶ The Sternau Ash-receiver, illustrated here, facilitates the enjoyment.

¶ It is gold-lined and fitted with three rests—two for cigars and one for safety match-box.

¶ Made exceptionally well in Copper, Old and Polished Brass, Nickel and Silver Plate.

¶ Jewelers should have a stock of our ash-receivers and other smokers' articles, which are in demand, because they are both useful and ornamental.

Ask Your Jobber

for the

CLOVERETTE.

A Few Reasons Why **BLACKINTON CHAINS** are best for the Retailer:

Every Blackinton chain bears our trade-mark.

The quality is stamped on every chain.

Blackinton chains are finished by the "Wearbest" hardening process, which toughens and hardens the gold, greatly increasing the wearing qualities of the goods.

Blackinton chains are all soldered with gold solder, making each joint an integral part of the chain.

Retail jewelers get three Globe Filled W. & S. B. ★ $\frac{1}{8}$ chains free for every 100 Blackinton chains they buy; two for 75; one for 40.

Retail jewelers have a chance to win either a Touring Car, a Runabout, a Motorcycle or a Watchmaker's Lathe, all of which we give away next January.

We recognize the rights of the legitimate jewelry trade and we DO NOT SELL DEPARTMENT STORES.

Every innovation we have produced has been flatteringly endorsed by our competitors, who have invariably adopted our methods.

W. & S. Blackinton Co.
NORTH ATTLEBORO, MASS.

THE Bracelet Hit OF THE Season.

THE illustrations, which are exact size, show two of the best selling Bracelets of a big bracelet season.

Made of Rolled Plate, Pierced, Engraved—a neat, strong joint and catch—with and without stones, from $\frac{1}{2}$ to $1\frac{1}{4}$ inches wide.

Our line offers an unsurpassed range of styles.

THE NAME THAT

STANDS FOR QUALITY

Art is everything, and everything is art.

The man who makes the jewelry is as much of an artist as the man who sells it. In our case he is more. With the class of goods our workmen turn out it is no trouble for the salesman to dispose of it. The line if seen will sell itself.

Send for selection package, either mounted or unmounted, and form your own idea of art. Address, Department C.

Mid-Summer Outing

Members of Philadelphia Jewelers' Club Enjoy Baseball Game and Entertainment.

PHILADELPHIA, Pa., June 27.—What a good time really is was shown the guests of the Philadelphia Jewelers' Club yesterday when the club gave its annual midsummer outing. More than 500 jewelers checked like boys at recess at the grounds of the Philadelphia National League baseball team, at Broad and Huntingdon Sts., in the afternoon, while nines representing local and New York members of the club played a game of baseball. Then all the recruits gathered from the trade after the close of the day's business repaired to Tuxedo Hall, 11th and Christian Sts., where they were mightily entertained with a vaudeville show and several well-fought matches between local teams.

This year the club has gone back to its original Summer festival in the nature of a baseball game, followed by a stag smoker, with what success can only well be told to those who enjoyed the club's hospitality. Fully a thousand in the trade are ready to testify that the stag party at the downtown sporting club in the evening was more full of enjoyment than any they have attended in years. With generous hospitality the club provided so well for its guests, both as attractions for the eye and satisfaction to the "inner man," that good fellowship was promoted and sustained until long after midnight, when the remnants of the crowds which attended the baseball game, and later the vaudeville show at the Tuxedo Club, finally disbanded at the clubhouse, where the festivities were ended.

"Lou" White, Warner Hutchins, "Joe" Cadwallader and William Linker are given credit for the success of the Summer field day. It was they who arranged the details, who captained and managed the baseball teams, and they also who provided the talent, much of it novel and refreshing to even the most jaded and blasé New Yorker. On the baseball grounds the guests were entirely unrestrained and abandoned themselves without thought or care to the full enjoyment of the day. Harry Oliver, wearing a fez of brightest crimson and in knickerbockers, which displayed his athletic ordupois to advantage, Fred Barry, W. Hopkins Iszard, Zophia Laird, Emilbacher, A. J. Le Jambre, Joe Cadwallader and Fred Yockel were here, there and everywhere around the baseball field and at the clubhouse and helped much to keep things going at a lively rate. Some of the old-time good spirits of the club were missing this year, notably "Del" Lee, who has entered another line of business in New York, and "Jake" Henderson, who, although a member of the club, has always heretofore been one of its guests on such occasions. Mr. Henderson had succumbed to heart disease only the day previous, and his untimely death was regretfully commented upon by all who knew him.

The club's guests gathered early in the afternoon at the baseball grounds, going there in little parties formed downtown and at the club headquarters, 13th and Chestnut Sts. Here they found the members of both

teams which were to play practising and "limbering up" for the game. Much good-natured sport was had by the arrivals in geying the amateur ball players and in coaching them. Appreciating a long-winded contest, the game was started without delay, the teams representing the two elements of the club being lined up as follows:

PHILADELPHIA—Laird, c.; Riley, p.; White, 1b.; Cadwallader, 2b.; Provan, ss.; Cregar, 3b.; Coates, rf.; Penfold, lf.; Robertson, cf.

NEW YORK—Kirtland, c.; Busch, 2b.; Boyce, ss.; Evans, p.; Collard, 1b.; Spies, 3b.; Oliver, lf.; Barry, cf.; Nellis, rf.

With this line-up the two teams struggled to see who could make the most runs and, while the competition was keen, nothing but the best of feeling prevailed and the umpire, William H. Armstrong, of the "Earle and The Girl Company," and an old-time favorite of the club members, had an easy time of it. Only once was his decision questioned, and this was when Harry Oliver was presented with a base on balls. But it was generally appreciated by the spectators that, unless this decision was made, Mr. Oliver might even yet be waiting to get his eye on the ball. However, when he did reach first, he lost no time in stealing second, and was brought home by a long drive by a team mate.

Between innings there was much resorting to a cool and refreshing spot under the bleachers, where William, the club steward, presided, surrounded by sundry kegs, with big pieces of ice upon them. William had a helper and between them there was no thirst which they could not overcome. The captains of both teams were required to go to the retreat from time to time to call up the next batsman. But there were no disappointments nor long delays until finally six innings had been concluded and Mr. Eckfeldt announced that the score was 13 to 4 in favor of the Philadelphia members. The "Phillies" started out with a rush, making five runs in the first inning. Those who crossed the plate were Laird, White, Cadwallader, Provan and Cregar. In the next two innings the Philadelphia members drew blanks. In the fourth Penfold managed to get home with a long drive. In the fifth all except Riley and White crossed the plate. For the New Yorkers only Kirkland, Collard, Spies and Nellis got in home.

Harry Oliver, despite his venerable appearance, got around in a lively manner, sliding to bases, hitting the ball here and there and fielding with consummate grace and skill. With a red fez and false red whiskers he confronted the pitcher every time he came to bat, and with this outfit managed to get to first every once in a while with bases on balls.

After the game was ended in the sixth inning many of the spectators and nearly all the players went to the clubhouse, where they remained until it was time to go to the vaudeville show, which began shortly after 8 P. M. Those who went to their homes gathered at the Tuxedo Club in the evening. Here there was given an excellent entertainment, varied so as to please all tastes. There were boxing bouts and a free-for-all fight between a half-dozen colored men, who were rewarded by having coins thrown at them and for which they fought together

fiercely. A moving picture apparatus, showing especially how a beautiful woman combs her hair, the singing of ballads, especially by Signor Giannini and William H. Armstrong, and various juggling and sleight-of-hand acts made up the entertainment. Throughout the show, which lasted until after midnight, a band played lively airs.

One room was reserved for refreshments, and here again the club's stewards were kept busy. Not only liquid refreshments were to be had, but tasty sandwiches to stay appetites. It is estimated that fully 1,000 people were crowded into the hall, and by all the evening's entertainment was voted to have been a great success.

More Corporation Reports Filed by Massachusetts Manufacturing Jewelry Concerns.

Boston, Mass., June 29.—The Cohannet Silver Co., Taunton, through Treasurer John J. Nicholas, has filed with the Secretary of the Commonwealth the following annual corporation report: Real estate, \$2,200; cash and debts receivable, \$4,859; manufactures, \$27,526; merchandise, \$2,000; capital stock, \$10,000; accounts payable, \$1,180; floating debt, \$5,955; profit and loss, \$312.

Pittsburg Jewelers Making Preparation for Organization of Pennsylvania Retail Jewelers' Association.

PITTSBURG, Pa., June 29.—A number of prominent Pittsburg jewelers last night had a meeting at the Hotel Henry to come to arrangements for entertaining the delegates to the meeting called for July 10, at the same hotel, when the Retail Jewelers' Association of Pennsylvania will be formally organized. The meeting last night surprised the members of the Pittsburg association.

J. P. Steinmann was appointed chairman of the reception committee, and the remainder of the committee will be announced a few days by him. A press committee consisting of G. A. Spies, Robert Gestrich and A. C. Gaul was also appointed. The committee on meetings and speakers secured the services of Congressman James F. Burke and James W. Wardrop, secretary and general manager of the Merchants' Manufacturers' Association of Pittsburg, two of the city's most gifted orators, to address the convention, which is only expected to be in session one day. Another member of the Pittsburg division has been called for next Thursday night at the same hotel.

The Pittsburg jewelers are taking a great interest in the affair, fully 20 houses being represented at last night's gathering. William Hiner, of Philadelphia, a former president of the defunct retail jewelers' association of this state, has written to temporary Secretary C. S. Wiley, of the new organization, that he will be in Pittsburg to attend the convention. Arrangements are being perfected for the entertainment of about 125 guests. Mr. Wiley is receiving encouraging replies to his circular sent out last week, from all parts of the state.

All retail jewelers in Pittsburg and vicinity are requested to attend next Thursday night's gathering.

Silver Gift Trophy for Automobile Race.

ONE of the pleasing trophies of the present automobile season was a sterling silver bowl, illustrated on the front cover, which was awarded to the winner of a two-gallon efficiency contest conducted under the auspices of the Automobile Club of America. The prize was awarded to a 22-horse-power Franklin Runabout, which traveled a distance of 87 miles. There were 65 starters.

Around the rim of the bowl are six classical heads, suspended between which are festoons of grapes and grape leaves. Pearls and beaded work ornament the rim of the base. The outlines of the bowl and its ornamentation are simple and graceful, while the workmanship shows a rare degree of care and skill. The entire bowl is heavily and handsomely gilded.

The bowl and foot have a height of 10 inches, and the width across the top is 10 inches. In all, 146½ ounces of sterling silver were used in making the cup, which has a capacity of 18 quarts.

This trophy was designed and manufactured by Theodore B. Starr, New York.

The stock of S. A. Watson, Chester, Pa., was damaged slightly by smoke and water during a recent fire at that place.

N. E. A. O. Elects Several Committees for the Advancement of That Association.

Boston, Mass., June 27.—The following committees were appointed at the meeting of the New England Association of Opticians, held here Tuesday of last week: Lecture Committee—W. W. Slade, chairman; E. M. Parks, G. H. Newell, E. A. Fe, W. P. Bullard.

Code of Ethics Committee—W. L. Thomas, chairman; H. C. Doane, H. L. Kn, C. S. Hart, W. D. Ward.

Vigilance Committee—R. Wight, chairman; H. G. Wright, W. L. Bemis, E. G. Wiley, W. H. Wyman.

Examining Committee—F. P. Simmons, chairman; H. C. Doane, H. L. Klein.

Legislation Committee—B. S. Palmer, chairman; A. G. Barber, W. W. Slade, S. C. Witt, F. P. Simmons.

The duties of the Legislative Committee will be to follow up any bills which may be presented to this legislature, and watch the proceedings of other societies which are doing legislation.

The Code of Ethics Committee will draft a code for the governing of the opticians.

The Vigilance Committee will carry out the thought of the president as outlined at the convention last May. The ultimate aim is to raise the standing of the opticians.

The Lecture Committee has been appointed to outline a plan of lectures for the coming year. It is desired they secure sufficient members from the association to lecture on the subjects most interesting to opticians—refraction, physiology, and anatomy. It is the intention to follow the lecture by a "quiz," to assist the members to fix the thoughts of the lectures more firmly in mind.

It has been also recommended that the association change the "ladies' night" from April to January.

Spect Held in New York on Charge of Virginia Jeweler Escapes Before He Is Extradited.

Wheaton B. Despard, alias Dan Stevens, was arrested in New York about the middle of June on a charge of grand larceny made by John F. Kohler, retail jeweler, Richmond, Va., has forfeited the \$1,000 bond which he gave to the police authorities, and skipped. Despatches from Richmond say that Charles Kohler, son of the jeweler, and Detective Wren have called on the governor of Virginia to consult him in relation to the escape. The Virginia authorities expected to extradite Despard, and detectives with the necessary paper came to New York for that purpose only to find that the man had slipped through the hands of the police of the metropolis.

The remarks made by the Richmond officials indicated that they were anything but pleased with the course pursued by the authorities in New York. The Richmond officials were of the opinion that as requisition papers had been made out immediately, and they had come on promptly to get the prisoner, it would have been courtesy for the police in New York to have kept the man in custody a few days, or at least to have required a higher bond than \$1,000.

It is said that the governor of Virginia will communicate with Governor Higgins

on the subject. Despard, according to the charge that had been made, entered Mr. Kohler's store with an accomplice and while examining a tray of diamond rings abstracted two, substituting cheap imitations.

Another Unsuccessful Attempt to Work Forged Order Swindle in New York Jewelry Trade.

An attempt to swindle Charles A. Keene, 180 Broadway, was made last Wednesday. A small boy entered the store and handed to W. P. Talbot, the manager, a letter written on a plain sheet of letter paper as follows:

NEW YORK, June 27, 1906.

Mr. Keene, Esq.:

Dear Sir—Will you please be so kind as to give bearer of this note a 11-karat Tiffany with one-carat diamond, and oblige

C. P. GOLDSMITH & Co.,
33-43 Gold St.

Mr. Talbot was quite certain that the order was a forgery. One reason was that an order from that company would scarcely be written on a sheet of paper of the kind used. However, he called up the company's office and was informed that no order had been sent. Then he gave a "dummy" package to the boy and followed the lad. The boy went to the corner of Cortlandt St. and Broadway, where he stood waiting for a few minutes, and then returned to the store. Mr. Talbot, meantime, had met Detective-Sergeant Nugent, and the two went back to the store and questioned the boy. The lad said that he worked for a financial paper, and had been stopped on the street by a young man who asked him to get a package at the jewelry store and carry it to the corner, promising to pay 10 cents for the service. The boy's story was apparently true.

A similar effort was made several weeks ago to obtain a pair of field glasses from the Julius King Optical Co., on a printed letter head of the company whose name he used. The swindler was foiled in that case also. A year or two ago several firms were made victims of forged orders of this kind, since which time the rule has been in the Maiden Lane district not to give merchandise to unknown boys unless the order is confirmed in some way.

Recent Decisions by General Appraisers as to Metal Ornaments and Similar Articles.

Decisions in cases involving customs duties on metal and millinery ornaments and beaded articles were announced last week by the Board of United States General Appraisers, New York, as follows:

MILLINERY ORNAMENTS.—IMITATION CAMEOS.—Protest of Bamberger-Stern Co. against the assessment of duty by the Collector of Customs at New York. The protest related to millinery ornaments and imitation cameos. As claimed by the importers, the former were held dutiable as manufactures of the component of chief value, and the latter as imitation precious stones under Par. 435, Tariff Act of 1897. Note G. A. 6130 (T. D. 26653).

BEADED ARTICLES.—ORNAMENTS.—BEADS.—CHATELAINES CHAINS.—Protests of Deutsch Bros. against the assessment of duty by the Collector of Customs at New York. The Board held certain beaded leather articles,

ornaments, beads and chains for chatelaine bags to be dutiable as manufactures of the component of chief value, as claimed by the importers. G. A. 6130 (T. D. 26653), G. A. 6322 (T. D. 27239), G. A. 6374 (T. D. 27382), Steinhardt v. United States (113 Fed. Rep., 996), and Tiffany v. United States (131 Fed. Rep., 398; T. D. 25316) followed.

METAL ORNAMENTS.—Protests of Glaenger Frères & Rheinboldt et al. against the assessment of duty by the Collector of Customs at New York. G. A. 6374 (T. D. 27382) followed.

Complainant Again Fails to Start Test Case Under New York Gold Law.

On a summons issued from the Essex Market Court, J. Finkel, of Locketz & Finkel, jewelry manufacturers at 218 E. Houston St., New York, was in that court Tuesday of last week to answer to the charge of violating section 304-J of the Penal Code, the new Gold Law of the State of New York, the complainant being Maurice Blumen and J. Jacobs, of the Brooklyn Watch Chain Co., 275 Bowery. This was the second case brought by the same complainants. The charge which the complainants tried for the second time to press against the defendants was that the latter had sold gold chain slides with the mark of 14 karats, when the gold really assayed below 13 karats. Magistrate Breen was sitting in court when the case was called. Louis Karasik appeared as counsel for the complainants and Sol. L. Youngentob represented the defendants.

As soon as Mr. Karasik had stated the nature of the complaint, Mr. Youngentob interposed two objections. He said that in the first place the case was *res adjudicata*, having been before Magistrate Finn early in June. At that time an hour or more was consumed in taking testimony, and at an adjourned hearing the magistrate dismissed the case. Magistrate Breen intimated that as there was no complaint in the former case another prosecution was not barred.

Mr. Youngentob also objected on the ground that substantially the same issues are involved in a civil suit now pending in the Municipal Court, Seventh District of Brooklyn. In that case his clients have sued the Brooklyn Watch Chain Co. for \$45, the purchase price of the slides. The defense to the suit is that the slides did not conform to the guarantee.

Magistrate Breen, after listening for a few minutes to the arguments of the lawyers, concluded not to hear the case, as it had already been before Magistrate Finn. The complainants were advised to go before the latter magistrate and ask for a re-opening of the case if they so desired. Mr. Karasik said that he would do so.

Pearl Watson, Abingdon, Ill., and Miss Anna Arnold were recently united in marriage at the home of the bride's parents, Mr. and Mrs. C. A. Church, Belle Plaine, Ia. The groom was a clerk in Mr. Church's jewelry store until a few months ago when he moved to Abingdon, buying a stock of jewelry there, and engaging in business on his own account. The bride also has a knowledge of the jewelry business, having been Mr. Church's clerk and assistant during Mr. Watson's absence in Abingdon.

Debate on Watch Industry Renewed in Congress.

Representative Rainey Renews His Attack on Certain Watch Movement and Watch Case Companies and Their Methods, and Is Answered by Representative Boutell.

WASHINGTON, D. C., June 27.—The long expected renewal of the debate between Representatives Rainey and Boutell, both of Illinois, over the situation in the American watch trade, which was begun some time ago in the speech by the former before the House of Representatives, has taken place, Mr. Rainey having renewed his attack Monday night upon those manufacturers of watch movements and cases, he claimed, are in a trust.

In a previous speech Mr. Rainey had severely attacked the so-called "big four" in the watch trade, alleging that the products of these companies were sold cheaper abroad than in the United States, and citing as proof of most of his statements the affidavits and affidavits of a New York dealer, who has claimed for some time that he can sell watches far below the American market price, because he bought watches abroad and reimported them into this country. At that time Mr. Boutell answered Mr. Rainey, introducing letters and statements tending to prove there was no watch "trust" or legal combination in the watch trade, and second, by attacking directly the truth of the statements of Mr. Rainey and the watch dealer, regarding specific instances in which it was claimed the watches had been purchased abroad and sold here under the market price.

When the amendment to the customs administrative act was before the House on a committee of the whole, Monday night, Mr. Rainey again returned to the subject and delivered a long speech, which, in extended form, has just appeared in the *Congressional Record*. In the course of it he not only went over the ground, introducing more evidence in support of his contention that watches were sold abroad cheaper than in this country, but declared that the Treasury Department had helped the manufacturers in the alleged combination by aiding them in preventing the reimportation of such watches. He attacked Secretary Shaw, charging that he had issued orders to the collectors at all ports not to furnish him (Rainey) with any information in regard to the subject; attacked the rules of railroads requiring employees to carry watches up to a certain standard, as an abuse of authority done for the purpose of increasing the business in the products of the "big four"; attacked the officers and management of the watch and watch case companies generally and specifically for the agreements among themselves and between them and their customers under which their product was marketed, claimed that the documentary evidence, letters and other statements which he introduced and with which he supplemented his speech were sufficient to prove a violation of the anti-trust law, and threatened that the whole matter would be laid before the Department of Justice with a request for a special prosecution of the case.

Mr. Rainey began by referring to a

statement in his previous speech to the effect that about 2,400 American watches were held up at the custom house in New York on the claim that they had been improved in condition while abroad, a cheap Swiss dial having been added. He had said that these watches had been bought from foreign dealers in various parts of the world at a fraction of the price at which they were selling in this country. After correcting the statement that he formerly made, that the entire stock of the New York dealer who had imported these watches, had been purchased abroad, he claimed that the statement had been made inadvertently, admitting the proof of the statement by Mr. Boutell that this same dealer had collected rebates on certain watches purchased in this country.

He then took up the statement formerly made by Mr. Boutell, that watch manufacturers were endeavoring to build up a foreign trade and had succeeded in the export business by using a class of very low grade watches for which there was no market in this country, and that these watches were gilt-plate watches and could be sold as cheap in this country as abroad. This Mr. Rainey claimed was false, as the gilt-plate watches were as good or better than the nickel and were wanted abroad for that reason; also that instead of doing an export business in cheap watches, the companies exported their highest grade movements, and this he insisted on despite the statements made on the authority of the companies' books, that but a very small number of high-grade named watches had ever been shipped abroad. In support of his contention Mr. Rainey read from an advertisement in a foreign paper, stating that a complete stock of Keystone-Elgin watches, in every grade from the highest to the lowest, was carried in the London office of the company at all times, and referred to other advertisements in the British jewelry trade papers in which the high-grade movements of the American companies were advertised by name. After referring to a letter of a Pittsburg jobber to the effect that the manufacture of gilt seven-jeweled movements for the American market was never abandoned, and that there was no superiority in the nickel movements, he referred to the export price list of one of the companies which he claimed showed 14 photographs of movements, every movement advertised, except one grade, being nickel.

On the subject of aid being given by the Treasury Department in preventing the reimportation of American movements, Mr. Rainey said that a statement was made in his presence in the office of the Assistant Secretary of the Treasury that the Waltham Watch Co. had filed a protest against the admission of a large consignment of American movements shipped through New York. He wrote the collector of that port for copies of the protest and the affidavits, offering to pay the usual fees if required. To his letter, he claimed,

the collector answered that he had asked instructions from the Secretary of the Treasury; after waiting some time the collector wrote again that he was unable to give the information, because the department did not feel that it could properly authorize him to do so.

However, Rainey had also written to collectors of about 20 ports, and from one of them (at Los Angeles) he received a copy of a letter sent by Robbins & Appleton to the Secretary of the Treasury stating that American watches were being imported bearing foreign dials, and that the attention of the customs officers be called to the fact and that they be notified to hold the consignment of Waltham watches until an opportunity be given to show whether such watch movements went abroad without dials and had work done upon them in foreign countries. The speaker insinuated that the Swiss dials were put upon the watches abroad by the American companies for the purpose of preventing reimportation, and characterized this as a subterfuge to which one of the great departments of the government was being made a party in order that Americans might not get any advantage of the low prices at which these products were sold out of the United States.

The citations and memoranda introduced by Mr. Rainey both in the course of his speech and in the extended remarks as reported in the *Congressional Record* are most numerous, the entire argument taking up nearly 30 pages of the *Record*. The subject of the "trust" in the watch trade, which he touched on to some extent in the course of his speech was amplified by the introduction in the *Record* of copies of letters from about 75 wholesale and retail dealers from whom he had asked information on the subject, the purport of most of these letters being that the "big four," so-called, consists of the Elgin and the Waltham watch companies, the Keystone and the Crescent watch case companies, and that allied with the interests of the latter two were certain other watch and case companies, such as the Philadelphia Watch Case Co., Bates & Bacon, the New York Standard Watch Co., E. Howard Watch Co., etc. Some of the letters were from jobbers who had been cut off the list of those handling the "big four" products, some from retail jewelers, who claimed that they had been discriminated against one way or another, and some from concerns who practically refused to give any information on the subject whatsoever; but all bore more or less on the subject of the existence of a combination of interests within the trade.

Other evidence as to the existence of a so-called "trust" was offered by Mr. Rainey, and published with his speech, including copies of correspondence between W. J. Johnston (of Pittsburg) and various watch and watch case companies and their representatives; a letter from a jobber to President Roosevelt; a copy of a petition signed by retail jewelers asking the Department of Labor to investigate the condition in the watch industry and the correspondence in regard to the same; and an account of the suit brought in New York courts against certain watch and

watch case manufacturers by a New York jobber. In addition Mr. Rainey cited the fact that the price lists of certain independent companies had been dropped by seniors' list, which had for many years supplied retail jewelers with prices of watches and movements, and that none now appear in the same, but the prices of the products of the companies which he alleged formed the trust.

Mr. Rainey also went into detail as to the officers and the management of the various companies. He said that Mr. Zurrugg, the president of the Philadelphia Watch Case Co., is also the president of the Keystone Watch Case Co. and the E. Howard Watch Co., and vice-president of the Crescent Watch Case Co., as well as a stockholder in the Elgin National Watch Co., that Mr. Fogg is the secretary and treasurer of the companies of which Mr. Zurrugg is an officer; that the Keystone Watch Case Co. owns the stock of the E. Howard Watch Co., and that the officers and directors of the two are the same; that the Keystone and Elgin companies have an exporting agreement, and that the Keystone company controls the stock of the Crescent concern, etc., all of which showed an identity of interests which he designated as a "trust."

Mr. Rainey claimed to be in a position to prove that the companies worked together, requiring foreign dealers to agree not to permit the reimportation of American watches, or sell them for any such purpose, and in this connection extended his remarks to include letters from various English dealers, which tended to confirm his statement. On the subject of watch inspection, he said:

"My colleague has inserted in the *Record* the protest of the labor union composed of employes in the Elgin company's works. I have nothing to say in reply to this, except that, in my opinion, it would be better for the railroad employes of the country to raise a fund and pension every "watch trust" employe, paying them as much for doing nothing as they now receive, than submit longer to the outrageous system of watch inspection * * * Any railroad employe knows what the term "watch inspection" means. It is unnecessary for me to dwell on this point. I might, however, call attention to the infamous scheme a short time ago to compel the purchase of 5,000 watches by the employes of the Erie system, which scheme failed on account of the violent protest of the several brotherhoods of railroad employes.

"In most cases where watch inspection is ordered there is some graft in it somewhere. The watch inspector is always on hand when the order for inspection is made, and dictates the conditions of the order. If this order is made, no matter how good a watch may run, it is sure to be condemned if it does not comply with the order. Train men are familiar with the scheme by which a low-grade watch is purchased, and by changing the bridges or the dials the marking of the watch is also changed, so that it reads, "Locomotive firemen's standard," "Locomotive engineers' standard," "Locomotive trainmen's standard," or something of that kind; and the price of this watch, which has been im-

proved in no way, except by the addition of the above name or a similar name, is increased from \$10 to \$15, and the train man is compelled to submit and purchase one of the low-grade watches so fictitiously increased in value or lose his job. In this connection I expect to put in the *Record*, as an appendix to my speech, a certain letter written to the Brotherhood of Locomotive Firemen, and a letter from P. M. Arthur, of the Brotherhood of Locomotive Engineers, and certain other data upon this subject."

Representative Boutell answered Mr. Rainey June 26. He did not go into the detail that had characterized the attack of his antagonist, nor will the extension of his remarks be anything like as long. His treatment of the subject was in a lighter vein, though his telling points lost none of their effectiveness thereby.

Mr. Boutell compared the discussion about the watch tariff and the watch companies to a comedy to which he proposed to give the name of "Government by Advertisement," referring to the New York dealers' advertisements and to the use of them made by Mr. Rainey. Mr. Boutell then cited various other advertisements and humorously characterized them and applied them very wittily to the situation, keeping his audience well amused for half an hour.

The speaker took up a statement made by Mr. Rainey in regard to the picture of the New York dealer's store displayed in the House by Mr. Rainey during the progress of his speech. Having been asked on that occasion as to the origin of the picture, Mr. Rainey stated that the picture was a photograph made for himself and at his expense during February, 1906. Mr. Boutell then produced copies of the *Free Trade Broadside* for January, 1906, on the front page of which appeared the identical photograph. This produced quite a sensation, especially as Mr. Rainey vouchsafed no explanation.

Turning his attention to the New York dealer, Mr. Boutell read two letters written by him in September and November, 1906, to a Texas jobber, asking him to sell Waltham and Elgin movements of various grades in large quantities, and referring to them as "rare goods." Mr. Boutell commented on this letter as indicating the sham nature of this dealer's claim that he was buying all his Waltham and Elgin watches abroad.

Mr. Boutell produced an advertisement which appeared in the *New York Evening Telegram* in March, 1900, which read:

A WALTHAM WATCH CHEAP.—A man on the inside will give confidential wholesale prices. Box 184, Waltham, Mass.

Supposing that this advertisement emanated from some disloyal employe, the company caused a letter to be written in reply to this advertisement, which letter was answered under the letter-head of the New York dealer and signed with the latter's name.

Referring to the watch interests in Massachusetts, he said:

The Waltham Watch Co. has had 50 years of honorable struggle, sometimes facing failure and bankruptcy, which has resulted in final and triumphant success. The Elgin Co. branched off from the Waltham Co. in 1884. In 1864 the tariff on watches had been placed at 25 per cent. ad valorem, where it so remained even under the Wilson-Gorman act, down to the Dingley act of 1897.

when, in addition to the ad valorem duty, certain specific duties were placed upon watches. Under this invigorating tariff the watch industries flourished in this country, so that there are now in the country 12 manufacturers of watch movements and 18 manufacturers of watch cases, or 30 altogether. Their total output is about 3,300,000 watches. According to statistics we have been able to export 300,000 watches, or about nine per cent. of the total product. As against these 75,000 Swiss watches are annually brought into this country. So that in point of the workers and mechanics in the watch factories, there should not only not be any reduction in the duty at this time, but it should be slightly increased, to prevent successful competition of the cheaper made Swiss watches.

I do not represent anybody in this business except the truth, as I can get it, and so far as I can learn there is no better or cleaner industry in this country than the watch industry of to-day—no industry in which there is more perfect rivalry than among these 30 institutions engaged in turning out 3,300,000 timepieces. I do not believe there is another example in the United States where there are great industries engaged in active, healthy rivalry such as in the watch industry.

Replying to the charge of Mr. Rainey that he had received about 100 letters saying that there was a watch "trust," Mr. Boutell said:

I have copies of some letters sent him in reply to his circular letter, and I will insert them in the *Record*, as I don't suppose he will. I here say positively there is no trust, no combination, or anything of that sort in reference to trade, and if there were, they would know it, and the jobbers from whom these came are the men to be affected by any conspiracy.

Referring to Mr. Rainey's statement about John C. Dueber as the first victim of the alleged watch combination, Mr. Boutell showed that the incident referred to took place in 1887; that thereafter Mr. Dueber sued several of the other watch companies in the New York Supreme Court for heavy damages, but failed to win his suit, the jury having disagreed; that he also brought suit in the United States Circuit Court, and that twice demurrers to the suit were sustained, and that finally he discontinued the actions.

Mr. Boutell also produced the minutes of the early meetings of the old association of American watch case manufacturers, organized in 1884, and showed from them that Mr. Dueber was one of the most prominent of the early members, a director and vice-president of that association, and that he was expelled from the association in 1887 upon a charge of breaking the association rules.

Mr. Boutell then closed with an eloquent tribute to the beauties of the Green Valley of Illinois, in which is situated Carrollton, the town of Mr. Rainey's residence, and satirized Mr. Rainey as being the only man from that section who was chronically unhappy and fault-finding, and the only man from Illinois who was not proud of the Elgin National Watch Co.

The Michigan Cut Glass Co., Lansing, Mich., was recently incorporated with a capital stock of \$6,000. The present concern is the outgrowth of the business formerly started by Mauer Bros., former employes of the American Cut Glass Co. The incorporators of the new concern are John J. Matthias, Joseph and Martin Mauer, Thomas Kinney, William E. Holey, August I. Sepanek, T. R. Lyon and Herbert J. Flint. The officers are: President, T. Rogers Lyon; vice-president, Thomas Kinney; secretary and treasurer, Herbert J. Flint; general manager, John J. Mauer. The officers with Matthias Mauer constitute the board of directors.

Fine Fresh Water Pearls Recently Found in Streams of the United States.

Since the warm weather the waters in the western rivers are receding and the pearls that come from the western cities and villages contain numerous paragraphs in relation to the finding of pearls of greater or less beauty and value. The pearl merchants in New York say that nearly all of the reports are exaggerated. A pearl which is hailed at its discovery as a prize that will surely bring hundreds and perhaps thousands of dollars is sometimes sold for \$5 and the finder is glad to get the money. But not all of the discoveries are of the character; some really valuable pearls are being found this season as in past year and several of this class have been received in New York in the last week.

I. E. Anthony, of Comanche, Ia., came to New York about the middle of last week to exhibit a 91-grain pearl of pear shape and pink color, which he offered for \$5,000. Mr. O'Harra, of Memphis, Tenn., who was the first man to exploit the Arkansas pearl fisheries, was among the western men visiting the trade in the last week.

Among the reports which interest the trade was one from Red Wing, Minn., saying that William Bates, a clam fisherman, had found in the Wisconsin channel a pearl weighing 85 grains, absolutely round and perfect in structure and texture. Western papers said that the gem has a beautiful luster and when shaded from the light, almost transparent. The value of the pearl is placed by men along the river who have seen it anywhere from \$5,000 to \$100,000. One of the best authorities in New York remarked that the value will depend largely on the amount of rivalry between wealthy gem collectors. According to the story published, Bates and his wife, had been fishing, and at the close of the day he was tired and ready to go home when his wife induced him to make one more drag on one of the mussels which he then brought to the surface she found the pearl which they believe will make them wealthy.

At Vincennes, Ind., Mr. Fabian is said to have found a pearl weighing 102 grains next to the largest ever found in the West at that point. It brought \$1,500.

At Prairie du Chien, Wis., James Melady is reported to have found a 12-grain pearl, which he sold to John Peacock for \$50 a grain. This gem is said to be the size of a pea, perfectly round and with a pretty pink tinge. A report from that city says that the New York buyers who are there declare this to be as fine a pearl of its size as has ever been found in American waters.

EDUARD VAN DAM

Arthur M. Shaw, Haverhill, Mass., was arrested about a week ago on a charge of peddling without a license. Shaw together with three or four other agents had been visiting places in the vicinity of Manchester, N. H., with cheap jewelry. A dozen cards, which were stick pins, clasp pins, etc., were left with different persons. When the person with whom they were left sold a lot for 10 cents a card, he or she was given the choice of a ring. Complaint was made to the police one day by the mother of a girl with whom some of the bogus jewelry had been left.

Morris and Joseph Klein Withdraw Their Pleas of Guilty to Grand Larceny Charge and Are Held in Heavy Bail.

Another turn was taken last Wednesday in the case of Joseph and Morris Klein, of Klein Bros. & Co., the bankrupt manufacturing corporation, at 51 Maiden Lane, New York, who have been accused of grand larceny in eight indictments. The defendants appeared before Judge Rosalsky in the Court of General Sessions, and withdrew their former pleas of guilty, at the same time demanding a jury trial. Their bail was then increased to \$15,000 for Joseph Klein and \$10,000 for Morris Klein, the old bonds having been for \$5,000 and \$3,000, respectively. Being unable to furnish bonds in the increased amount the defendants were committed to the Tombs.

When the defendants were arraigned it was expected that sentence would be imposed on their plea of guilty of larceny in the second degree in converting diamonds sold to them on memorandum by L. A. Groen & Bro. On the case being called Morris Klein asked leave to address the court. He said that when he and his brother submitted the plea of guilty to the indictment they did so under the impression that sentence would be suspended. Since then they have been informed that they were mistaken in supposing that sentence would be suspended. He said that they were really innocent of the charge made against them in the indictment of which they pleaded guilty, and he demanded a jury trial.

Judge Rosalsky said that he had no knowledge of anything which would lead the defendants to suppose that sentence would be suspended. Certainly no person had any authority to make any promise in behalf of the court, and the question of sentence was purely for the court to decide. The judge said that the court had looked into the subject and believed that, under the plea of guilty, there was nothing to do but to pass a sentence for a number of years' imprisonment. However, the criminal code provides that if, after a plea of guilty, the defendants in open court desire to withdraw such plea and claim to be innocent then it is in the discretion of the court to allow the withdrawal of such plea.

In practice, said the judge, it is almost a matter of right to give a jury trial if the defendants desire it. Under such circumstances the judge said that if the brothers insisted on withdrawing their plea and were afterward convicted on any of the indictments it might have a serious effect on them.

Abraham Levy, attorney for H. A. Groen & Bro., and also for Eduard Van Dam, who made similar charges against the Kleins, based on memorandum transactions, objected to the court allowing the Kleins to withdraw the plea of guilty. And Judge Rosalsky asked Mr. Gleason, of Hastings & Gleason, attorneys for the Jewelers Board of Trade, what was his attitude in the matter.

Mr. Gleason said that if the court was disposed to allow the Kleins to withdraw their plea he had no suggestions to make.

He said that the memorandum indictments had not been obtained by his clients, and that from the first it had been his desire to have the Kleins tried upon one of the indictments based on the charges preferred by his clients. In these indictments, he said, the defendants are accused of obtaining merchandise under false pretenses by means of a written statement. The attorney said that in his judgment a trial, a verdict and a sentence based on one or more of these indictments would be of greater benefit to the trade than the sentence under a plea of guilty of grand larceny in the second degree.

Mr. Gleason said that his clients desired to get the ruling of the court on the question of the criminal responsibility of persons obtaining merchandise on fraudulent representation in writing as to their financial condition. The indictments include charges of this character made by C. F. Wood & Co. and D. C. Townsend & Co., said the attorney, and it had been his desire, from the inception of the proceedings, to have the Kleins tried on one of these two indictments.

Assistant District Attorneys Nott, Hart and Corrigan were present. There was some discussion as to where the Kleins got the impression that sentence would be suspended, and the judge showed some annoyance because such an idea had been conveyed. Mr. Nott denied that any promise had been made in behalf of the District Attorney's office. Mr. Corrigan, who was present at the time the plea was made, said that, as he told the court at the time, he had no suggestion to make in relation to the sentence.

Judge Rosalsky announced that in view of the misunderstanding of the situation on the part of the defendants and their present assertion of innocence, he would allow them to withdraw the plea.

Mr. Nott then said that as there would be some delay, as a result of the change in the situation, the bail of the defendants should be increased, and he suggested \$15,000 for each. This was vigorously opposed by the defendants' counsel, Louis Vorhaus, and finally the amount was fixed at \$25,000 for the two defendants. It is supposed that the Kleins will now be tried on one of the indictments in October.

Counsel for the Jewelers Board of Trade apparently derive much satisfaction from the result of the hearing. It has been almost an unwritten law that where a plea of guilty to one indictment is accepted the defendants are not tried on the other indictments. The Jewelers Board of Trade has been particularly desirous of having a jury trial on the allegations in the Wood or Townsend cases, and the counsel for the board is now hopeful that one of these cases will be selected for trial.

L. C. Mattern, manager of the optical department of the L. C. Henrichsen Co., Portland, Ore., has just perfected the invention of a bifocal eyeglass. Mr. Mattern, after a year's hard work, claims to have produced a perfect bifocal lens. The process of grinding is a professional secret. He claims that it may revolutionize the eyeglass business, as it is claimed the cost of production will be much less than by means of the old process.

The Diamond Markets.

ANTWERP, June 24.—There has been a marked improvement in the diamond business in the past fortnight, and many transactions in m \acute{e} lée of 150 to 200 francs per carat have been made. There have also been several important sales to Italian merchants in light brown roses and six faces. White roses of 70 to 150 francs per carat also find ready buyers. The news of the export tax of 10 per cent. passed by the government of Cape Colony also had a good effect in quickening sales of rough and polished goods here.

A partnership has been formed between Jacques Kryn and August Wauters, under the firm style of Jac. Kryn & Wauters, for the purpose of dealing in diamonds for a period of 10 years.

The following buyers were here during the past fortnight: Messrs. Hekster and Bawly, Amsterdam; Messrs. Kauffman, Bronkherst, Infeld, Gerson and Goldberg, London; Mr. Schetino, Naples; Mr. Michalson Montreal; Messrs. Matheassian, Hendamian, Poliatscheck, B. Rapoport, Ekndysen, Garabistian and M. Slabotsky, Paris; Mr. Bidnowicz, Czernowicz; Mr. D. Acar, Beyruth; Mr. Pines, Warsaw; Messrs. Mounos, Sohn and Kahn, Moscow; Mr. Braum, Vienna; Messrs. Belluschi, Naud, Milan; Messrs. Rosenau and Mach, Munich; Mr. Morrison, Ork; Mr. Samios, Athens; Mr. Breidenbach and Mr. Hirschberg, New York; Mr. Abend, Berlin; Messrs. Frankel and Urbank, Frankfort-on-Main; Mr. Goreth, Rome; Mr. Nocera La Russo, Naples; Mr. Lagowir, St. Petersburg.

AMSTERDAM, June 20.—The month of June has been particularly good for the diamond trade. Several lots of roses have been sold, and brilliants, very small and of good color, find easy sales, as well as ordinary m \acute{e} lée. Several foreign buyers visited the city recently. Work in the diamond shops is quiet.

PARIS, June 21.—The French market is not bad, owing to the fact that a number of foreign buyers have been here. A large jewelry house bought a quantity of old roses which were taken from unsold jewelry, and this somewhat influenced the condition of the market, as these stones were sold at rather low prices, being poor in form and thick in cutting. As far as the color is concerned, they were very good.

Pearls have been sold principally to American merchants. Rubies and emeralds were more or less in demand during the last few days. The demand during July and August is expected to be very much quieter, owing to the fact that many of the merchants will be away.

The old firm of Rambour, 81 Boulevard, Sebastopol, will be managed in the Orient by Mr. Gombault.

The fourth annual meeting of the Texas Optical Association will be held in Waco, Monday and Tuesday, July 9 and 10, in the Business Men's Club. The local opticians are prepared to give the visitors a cordial welcome. The executive committee includes John Wyche, Waco, and B. R. Stocking, secretary and treasurer.

List of Jewelry Said to Have Been Stolen from Store of M. P. & S. Brann, New York.

For the arrest and conviction of burglars who broke into M. P. & S. Brann's jewelry store, at 231 Eighth Ave., New York, and the recovery of the stolen property, a reward of \$1,000 is offered by the firm. Pinkerton's National Detective Agency have sent out a circular announcing the reward and describing the jewelry. The burglary took place between closing time on Saturday, June 9, and the following Monday morning. The circular says:

All the jewelry described herein was stolen from the show window, to which the burglars gained access by entering a cellar next door to the premises in which the jewelry was located, and from there through floor and window floor to show window, viz.: Lady's Tiffany ring, 31 carats; lady's Tiffany ring, 2 1/4 carats; lady's Tiffany ring, 1 1/2 carats; lady's Tiffany ring, 1 carat; lady's Tiffany ring, 1 1/2 carats; lady's Tiffany ring, 1.32 carats; man's 3-stone Gypsy ring, 1/2 carat; lady's 3-stone Tiffany ring, 1 carat; lady's 3-stone Tiffany ring, 1/2 carat; turquoise ring, surrounded by diamonds; man's heavy Belcher ring, 7/8 carats; 12 Tiffany rings, each weighing from 1/4 to 1/2 carat; man's tooth setting ring, 1/2 carat; man's tooth setting ring, 1/4 carat; 6 Belcher rings, from 1/4 to 3/4 carat each; fancy ring, Belcher, 3/4 carat; cluster ring, emerald center, surrounded with diamonds; Tiffany ring, 1 carat; 2 fancy Belchers, about 1/4 carat each; 6 fancy Belchers, 2 plain, from 1/4 carat to 1/2 carat each; 7 rings, fancy setting, Belcher Tiffany, varying from 1/2 to 1 carat each; stone sunburst pendant; stone scroll pendant; stone pendant; stone heart pendant; stone woodpecker bird pendant 1 pair skeleton ear screws, 1/4 carats; lady's Tiffany ring, 3/4 carat; lady's Tiffany ring, 3/4 carat; lady's Tiffany ring, 3/4 carat; lady's Tiffany rings, from 1/4 of a carat to 1/2 carat each; 6 fancy Belcher rings, from 1/4 carat to 1/2 of a carat each; 6 plain Belcher rings, from 1/4 to 1/2 of a carat each; Tiffany ring, 1/2 carat; Belcher ring, weighing 3/4 carat; 2-stone ring, fancy setting, 3/4 carat, set diagonally; 3-stone ring, fancy setting, 3/4 carat, set diagonally; 5 fancy Belcher rings, about 1/2 carat; man's knot scarfpin, 1/2 carat; diamond horseshoe pin with 12 diamonds; diamond horseshoe pin with 9 diamonds; diamond horseshoe pin with 9 diamonds; cluster scarfpin, ruby center, surrounded with diamonds; single scarfpin horseshoe pin, 13 diamonds; 12 pairs lady's bangles, fancy setting, weighing from 1/4 to 1/2 carat; pair diamond screw earrings, 1 1/4 carats; lady's heart locket, with 3 diamonds, 1/4 carat; lady's heart locket, with 1 diamond, 1/4 carat; man's locket, set diamond, 3/4 carat; lady's heart locket with 1 diamond, 1/4 carat; lady's solid gold watch, half Roman, with 1 diamond; lady's solid gold watch, half Roman, with 1 diamond; lady's solid gold watch, fancy, with 9 diamonds; sunburst ring, large diamond in center, surrounded by pearls, about 1 carat; round pin, with 7 small diamonds, about 1-16 carat each; round pin, with 5 small diamonds, about 1-16 carats each; round pin, with 8 small diamonds, about 1/4 carat each; round pin, with 8 small diamonds, about 1/4 carat each; 2 round lockets, head shape, with diamond in center, 1 sunburst, with 30 stones, weighing about 3/4 carat; 2 cluster rings, all diamonds, weighing 1 carat; 1 cluster diamond ring, all diamonds, weighing 1 1/2 carats.

Two detectives were called in a hurry early one morning recently to the store of Chas. Horwitz, 303 Washington Ave., Minneapolis, Minn., where, according to report, a safe had been blown open. The detectives turned out to be the act of a joker.

The jewelry store of Joseph Kops, located at Pittsburg, Pa., was entered some time early Saturday morning and robbed of about \$50 worth of stock. The thief threw two bricks through the plate glass window while a street car was passing. One of the bricks broke the glass in a show case near the store door, causing \$60 damages additional to the value of the goods stolen.

Back of Apprentices to the Jewelry Trades Emphasized in Report of Massachusetts Bureau of Statistics of Labor.

ATTLEBORO, Mass., June 30.—The Attleboro manufacturing jewelers received the first week copies of a report from the State Bureau of Statistics of Labor, containing data which they themselves, to a certain extent, helped to compile. The meat of the whole report is that the all-around workman has vanished from the jewelry and watch-making industries of Massachusetts, and his place has been taken by the worker who knows only his specialty, produces only a small part of the finished product, and is a far less valuable man from some points of view than the old-fashioned all-around man. The jewelry manufacturers of the town, and of the State at large, are shown to be strongly opposed to the introduction of union labor into their factories.

The State bureau in putting its report in form selected the most characteristic and interesting letters from all the employers. The one they chose to show the attitude of the jewelry manufacturers follows:

The trade union has a tendency to lower the standard of mechanics and kill all ambition among laboring classes, as it places the jackass on the same plane as the thoroughbred racer. Its tendency is to pull down the expert to the level of the duffer; and if trade unions are ever successful in accomplishing their ends, there can no longer be such a thing as an all-round old-fashioned workman. Unionism, from a mechanical standpoint, is grading in all its tendencies.

Formerly there were apprentices in nearly all the jewelry trades, but in recent years there have been very few. Possibly one reason for this is, many manufacturers have a specialty; for instance, one manufactures watch-bushings; another, chains; another, goods for ladies' wear, brooches, lace pins, etc., and we, ourselves, make chains and lockets. So if an apprentice should come into one of these factories to learn the thought of learning the jeweler's trade, he would not get an all-round education in the trade; or, in other words, he would have to work for a year or two in one and then change. Of course, the manufacturer naturally would discourage this change. There have been one or two young men in past years who have worked with us for a time, and in that way might be called apprentices, although there was no special agreement, only an understanding that they should be taught some of the rudiments of the business and work up to become journeymen. So you see in the jewelry business there has been a tendency toward the gradual extinction of the old-fashioned all-around workman of which you speak.

We think it would be for the benefit of the trade generally, and for the young man, if he were to thoroughly learn the trade, even if in after years, when he became a journeyman, he should go to work in one of these shops where they make specialties. He would be a more valuable man and could command better wages.

In regard to the trade unions would say that in our town, and in neighboring town, there are no trade unions among the jewelry workers; that is, none of any strength. There is one in each town, but it does not have the endorsement of the great majority of our people, and we doubt if it will in the immediate future.

The attitude of the manufacturer of jewelry watches was demonstrated by the specimen letter, which speaks for the majority who answered:

There is no doubt that the old-fashioned all-around workman is becoming extinct—shops run on the making of particular pieces in quantities—on the "rip them out" principle, generally as job work. Young men, boys even, soon become quite proficient on one thing and one set of operations, at which they are done with that they are nothing else. We have hundreds of applications for

work from men of this kind, and they are not so valuable to us as an apprentice boy would be.

From the figures which the manufacturers furnished in their replies various tables were prepared. It was shown that one plant, making horological goods, has an apprenticeship system, but none of the others in the State, and none of the jewelry plants. This one watch and clock factory apprenticeship is under the control of the employer, who does not believe in placing any restriction upon the number given the advantage of the system, although apprentices are not employed to the exclusion of any journeymen.

The State bureau was impressed by the general character of the reports received with the idea that the State is badly in need of trade schools to teach young people the theory and first steps in all the important industries. This is a matter already agitated widely through the State, and a bill has been passed in the Massachusetts Legislature, which provides an opportunity for such schools to be opened. At Attleboro a school supported in part by the town and in part by the State to teach the young men and women to become all-around jewelers is favored by the manufacturers, and contemplated by the authorities.

To show what such trade schools are able to accomplish the report contains descriptions of the work of several. It has the following to say in regard to the Waltham Horological School:

The need of better and more thoroughly equipped workmen in trade of watchmaking, repairing, etc., led to the establishment of this school in 1870. Under modern conditions in the factories where watches are made, the workmen are kept on special branches of the work, and no one has the opportunity to practise or learn the whole of the trade. When a student has finished his course in this school he is able to make a complete watch, and is also a first class repairer.

The hours of work in the school are eight on every week day except one, when the number of hours is seven. Work is also required during such evenings as may be chosen by the manager. The charge for tuition is \$65 for the first three months, \$50 for the second three months, \$45 for the third three months, and \$40 for each three months thereafter, payable quarterly in advance.

The course of instruction covers the following branches: Plates, wheels, pinions, jewels, balances, staffs, jeweling, springing, screws, stem-winding parts, matching, finishing, adjusting, repairing, tools, ophthalmology and engraving.

Diplomas are given to all who successfully complete the prescribed course. Students are expected to purchase the smaller tools they use in ordinary bench work; the expense need not exceed \$20. Lathes and lathe attachments and the more expensive tools are furnished by the school. The school has four instructors, including a teacher of engraving and a teacher of optics, who is a regular physician and oculist. The annual cost of maintaining the school is \$5,000; this amount is raised from the money received from pupils in fees. The average attendance during 1904-05 was 30.

The marriage of John L. Eaves, of the firm of Edmund Eaves, Ltd., Montreal, one of the oldest jewelry jobbing firms in Canada, took place last week at St. Luke's Church, Montreal. The bride, Miss Florence Ogden, was given away by her father, and Miss Lyla Ogden, sister of the bride, was bridesmaid. Edmund Eaves, of the firm of Eaves Bros., brother of the groom, was best man. Mr. and Mrs. Eaves are spending their honeymoon in the west, and will reside on their return at 417 Mount Stephen Ave.

Plant, Office Fixtures, Etc., of Bankrupt Firm of Schickerling Bros. & Co., Again Offered for Sale.

Machinery, office fixtures, furniture, safes and other chattels of Schickerling Bros. & Co., bankrupt jewelry manufacturers, 28 E. 22d St., New York, are to be sold at public auction under the direction of Robert S. Morris, the trustee in bankruptcy, next Tuesday, at 10:30 A. M., on the premises. The sale will be conducted by an engineer. The property may be inspected between 9 A. M. and 4 P. M. any day until Saturday.

This property was offered for sale before. Mrs. Schroeder, the mother-in-law of Conrad Schickerling, holds a chattel mortgage and, the former effort to sell was made under an arrangement making the sale conditional on her approval. The highest offer was about \$3,000, and instead of approving this offer she suggested the sale to friends for \$100 more than the highest bid. Eph. A. Karelson, who acts as counsel for the trustee, objected to this plan. He said that the machinery had been inventoried at \$28,000, and that he did not intend to allow the Schickerlings to buy back the property for less than its value. As a result a new sale was ordered.

The stock of Schickerling Bros. & Co. was sold some time ago and after deducting expenses there remains about \$10,000 in money in the hands of the trustee. To this will be added whatever is received from the sale next week. The only other assets that are in sight, Mr. Karelson says, are the claims which the trustee has against certain creditors, who are alleged to have received preferences. Mr. Karelson says that after other legal proceedings involving the Schickerlings are out of the way it is his intention to proceed with the cases against the creditors who are alleged to have received preferences.

Pittsburg Jeweler Asks Leniency for Prisoner Who Robbed Him.

PITTSBURG, June 30.—After prosecuting the defendant on four charges and securing a conviction, S. Gallagher, 1200 Penn Ave., appeared in the criminal court to-day and pleaded for leniency for S. Baccario, whom Gallagher brought back from Atlantic City several months ago for swindling him out of \$1,200 worth of goods and for forging several checks. Baccario was arrested by Detective Homer E. Crooks, of this city. Two charges of forgery was made against him, one of larceny by bailee and another for false pretense. He was convicted.

When Baccario was called up for sentence the jeweler asked the court to be lenient on the ground that the prisoner was helping to educate two orphan nieces and that when he committed the crimes charged against him it was for the purpose of getting money to pay for their education. Gallagher had trusted to the honesty of Baccario, giving him many goods to show a prospective customer, principally diamonds.

The court told the prisoner that he could give him 16 years on the charges made against him, but in view of the jeweler's plea sentenced him to two years in the Western Penitentiary.

LETTERS TO THE EDITOR

San Francisco Diamond Dealer T
of His Experience During the Fir

SAN FRANCISCO, June 20, 1906

Editor THE JEWELERS' CIRCULAR—WEEKLY

Your valuable paper of the 6th inst. s
received, and as I see no mention made f
my store I decided to send you the foll
ing:

The A. Andrews Diamond Palace wa
old landmark in San Francisco and
considered by all tourists who visited
city to be one of the sights. Aside f
the beauty of the goods in the cases, w
were only of the best quality, the store
an art gallery, and a sort of wonderlan
account of the arrangement of the inter
which consisted of thousands of incan
cent electric lights and a great numbe
immense mirrors so placed that it was
possible to see just where the real s
ended and the reflections began. The up
ceiling was dome shaped and containe
great number of beautiful oil painting
famous artists.

When the fire was noticed to be cree
towards the store I started my clerks p
ing up all the diamonds; when that
finished the watches; then all gold jew
and so on until by the time the milk
compelled all persons to leave the bloc
had saved nearly all of the stock with
exception of a small amount of silverw
Of course the expensive fixtures w
burned. Had I been able to get wagon
carry the goods away I think I might
saved everything, even to the show case.

My insurance losses were among the
adjusted, and I and my employees rece
Many compliments from the insur
people for the course I adopted to prot
my goods and the immense money v
that was saved. My books were place
the disposal of the adjusters, who went
every item and every piece of stock sa
checked off exactly right up to the da
the fire. The three adjusters, who we
undoubtedly as clever men as any in
business, had only words of praise for
thorough and yet simple manner in w
the records of the stock were kept. Th
cation of my store was such that I tak
it was burned before any of the large v
elry stores, and yet the amount saved
greater than any of the others, which spk
volumes for the bravery and coolness o
men.

I intend building a new Diamond Pal
larger and more beautiful than the old
my aim will be to make it the most be
ful store in the world. No expense was
spared in its construction. I have al
arranged with Edouard Tojetti, the fam
artist, to come to San Francisco for a
work alone. As I am now past 80 year
age I think I am setting an exampl
some of the younger, though more t
business men of this city in a way tha
give them more confidence in themse
and the city and encourage them to be
and doing." Yours respectfully,

A. ANDREWS

A young man found an extraordin
fine pearl near Red Wing, Minn., rec
It is translucent and almost transpa
weighing 85 grains. It is perfectly r
and without a flaw.

Important Points Involved in Suit to Recover 60 Per Cent. on Pearls Imported for a Necklace.

Announcement was made in last week's issue of the fact that the government had begun a suit against Bernard Citroen, of Paris, for the recovery of additional duties on the collection of pearls which he recently imported, and which are said to comprise the most valuable pearl necklace ever has been offered for sale in years. The complaint, drawn by Assistant District Attorney Francis J. Carmody has been served. In it are recited the facts of the importation, June 11, on the steamship *La Touraine* of what the importer described as a package of pearls in their natural condition. Duties on the pearls were liquidated by the collector of port at \$132,102, and the importer paid \$67, so the government now demands a balance, \$110,335.

The contention of the government will be that William B. Leeds, of New York City, Pittsburgh, bought the pearls in Paris for Citroen for the purpose of a necklace. It will be claimed that, although the pearls were placed on a temporary cord for purpose of shipment, Mr. Citroen brought them to this country for the purpose of delivering them in safe condition to the buyer's wife. The law point will be that intent must be considered and the intention of the buyer was to procure a valuable necklace for his wife; that for this use the gems were sold by the jeweler in Paris.

The principle of protection will be invoked. The claim will be made that the jeweler in the United States are entitled to have protection against the jewelers of Paris or other foreign cities, who may import the bringing in at a low duty and that are really jewelry and therefore subject to a duty of 60 per cent.

On bringing in the gems at 10 per cent., pearls in their natural state, the importer, it will be argued, has sought to evade the full duty required under the jewelry clause. If pearls may be removed from their permanent string and then imported at 10 per cent. instead of 60 per cent, it will be claimed, then all kinds of pearls may be removed from their settings and brought here at the same low rate, thereby giving to the jewelers of Europe an opportunity to compete on almost even terms, as to prices, with the jewelers of this country.

The Tiffany, Neresheimer and Coolidge positions will all be quoted. Although in some of those cases the government was defeated, the opinions are relied upon as furnishing strong arguments against the importer in the present case. In the other proceedings the courts pointed out that the pearls, in one or another respect, failed to constitute a necklace. The courts observed in making those decisions that when pearls are assembled, graded, matched and sold as to make a collocation known in the trade as an article of jewelry or jewelry (pearls strung), then they would be subject to the jewelry duty of 60 per cent. One of the tests suggested by the courts was that if the assembling was of such a character that the collection of pearls had a greater value than the indi-

vidual pearls in such collection then it might properly be classified as a necklace or as pearls strung.

In the Citroen case it will be claimed not only do the pearls show all the elements that constitute a necklace under the rulings of the courts, but also the government has positive evidence that they actually were strung as a necklace when the sale was made in Paris, and the intention of the buyer was to get a necklace for his wife to wear. This intention, it is said, will sharply differentiate these pearls from those that may be assembled and matched and assorted for purposes of trade—that is to be sold in this country to be made up into various articles of jewelry.

Mr. Citroen has not indicated the grounds on which he will oppose the suit. He appeared last week for the second time before Assistant Secretary Reynolds of the Treasury Department and asked, this time, that he be allowed to take back the pearls to Paris. The assistant secretary was willing that he should do so, but refused to order the return of the duties already paid. Mr. Citroen was not willing to forfeit the duties which he paid, so it is expected that he will defend the suit now brought against him.

Death of George E. Wilkins.

SYRACUSE, N. Y., July 3.—George E. Wilkins, a well-known jeweler, and one of the oldest in the business in Syracuse, died Thursday afternoon at his residence, corner of Cedar and Almond Sts. He took cold when a new window was being placed in the store, and his illness subsequently developed into pneumonia. His advanced age, 75 years, made his recovery impossible.

Mr. Wilkins was born in New England, and came to Syracuse to live in 1853, working for D. Valentine, a leading jeweler of those days. For 20 years he remained with Mr. Valentine, and came to be known as a superior judge of diamonds and precious stones, gaining a reputation which extended outside of Syracuse. About 25 years ago he went into the business for himself in the Larned block in E. Washington St., and had remained in the same store ever since, building up a business throughout central New York. He made frequent trips to Europe, where he purchased watches and diamonds in London, Germany and Switzerland. Mr. Wilkins had probably sold high-grade watches to more prominent and wealthy men of central New York than had any other man who ever lived in Syracuse. His customers had implicit faith in his judgment, and he was willing at any time to give his opinion, which was usually right.

Mr. Wilkins had a unique experience just prior to the breaking out of the Civil War. In 1861 he was located at Pensacola, Fla., where he dealt largely in ship chronometers and nautical instruments. When the war broke out Mr. Wilkins was ordered by the Confederates to leave Pensacola within 24 hours. He sailed to Cuba and went on foot all over that island. Being without funds, he tried to sell a ship's chronometer, and was arrested and locked up in jail in Havana. He was quickly liberated through the assistance of the American consul, as it was shown that his arrest was due to mistaken identity.

Mr. Wilkins married Miss Morris, of Baldwinsville. He is survived by a widow and two daughters, Frances and Louise Wilkins, of this city.

Simon Robertson, New York, Goes Into Bankruptcy and Creditors Refuse His Offer of Settlement.

A petition in bankruptcy was filed last week against Simon Robertson, who has stores at 1283 Broadway, in Manhattan, and 1029 Broadway, in Brooklyn, New York. It was said that his debts exceed \$5,000. After the filing of the petition a meeting of creditors was held in the office of McBurney & McBurney, who represent a number of the creditors. A settlement on a basis of 25 per cent., of which 10 per cent. was to be in cash and the remainder in notes, was offered in behalf of Mr. Robertson. The creditors appointed a committee who, on Thursday last, held a conference with Marks & Marks, Robertson's attorneys. At that time the offer was increased to 33½ per cent. The committee asked for 40 per cent., but the bankrupt did not advance his offer to that extent, and the meeting adjourned without effecting a settlement.

Friday last Mr. Robertson was examined before the referee in bankruptcy in Brooklyn. His examination was interrupted to enable the attorneys to ask questions of one of the creditors. When the lawyers turned to place Robinson again on the stand he had gone, and they have been busy since trying to serve a subpoena requiring his further attendance.

George W. Minzil is the receiver, and is represented by Walter Kolm as attorney.

Death of Alfred E. Seliger.

ST. PAUL, Minn., June 27.—Alfred E. Seliger, president of the Anchor Silver Plate Co., of this city, died yesterday of apoplexy. Mr. Seliger had been ailing since the fire destroyed the plant of his company last September. He worried considerably over this, and suffered from severe pains in the head. He went to New York early in the year to consult leading specialists, who thought his ailment was not serious. He returned to St. Paul and supervised the extensive preparations for rebuilding and refurbishing the factory. The machinery had all been refinished and the plant completely equipped and ready to start up when Mr. Seliger was stricken.

The deceased started in the manufacture of silver hollow ware in Oswego, N. Y., and, believing the west offered better opportunities, formed the Anchor Silver Plate Co. and located in Muncie, Ind., from which place, on account of the supply of natural gas giving out, the company removed about three years ago to St. Paul, where it met with great success until last September. There, in the middle of the Fall season, with nearly \$50,000 worth of orders on hand, the plant was entirely destroyed.

Mr. Seliger was well known throughout the trade, and his sudden death will be received with great regret by his many friends and acquaintances. His remains were taken to New York, where the funeral services were held. The interment was in Brooklyn. Mr. Seliger is survived by a widow, two sons and one daughter.

Interesting Problems Discussed at cent Convention of the Wisconsin Retail Jewelers' Association.

MILWAUKEE, Wis., June 29.—Wisconsin jewelers in State convention have set the seal of approval upon the law recently enacted by Congress, requiring that jewelry shall be just what it is stamped to be. A resolution was adopted at the closing session, Thursday, commending the action of Congress and providing for the cooperation of the Wisconsin State Retail Jewelers Association with the national organization to be formed next month, in Rochester, N. Y.

The resolution was thoroughly discussed but it met with practically no opposition. The gist of the remarks was contained in the short talk made by George Durne, Milwaukee delegate. "It is the fair thing all around," he said. "It not only protects the public, but it protects the retailer. Many a retailer sells a piece of gold jewelry as 18 karat, honestly believing that goods are as represented. But there have been dishonest retailers, dishonest jobbers and dishonest manufacturers, and when goods come down the line to the consumer it is then that the public gets the worst of it. A retailer will order a lot of plain rings, for instance. He will tell his jobber to shade them to about 16 karat and then 18. The jobber will instruct the manufacturer to make them 14 and then 18, and the manufacturer, not wanting to be outdone, will add from 10 to 25 cents on each ring to his own coffers by putting in only 12 karat metal."

Among the important papers read and discussed were: Wednesday—"Can a jewelry business succeed in the average town under the present conditions or should we add a side line?" T. J. Thompson, Kenosha; "Is it possible or practical to conduct a jewelry store on a strictly cash basis?" John P. Hess, Fond du Lac; "What can be adopted to bring the jewelers in town and neighboring towns to a new understanding that will insure a living and more friendly feeling?" M. M. Leinenweber, Kenosha.

Thursday—"What is the best way to conduct the mail order house customer who comes to get prices and refers to catalogue prices?" F. H. Coburn, East Troy; "Should we handle or push watches of a factory whose line is sold by the mail order house or even if they make a line of watches under special name for mail order concerns?" Arthur C. Wagner, Fond du Lac; "The retailer who cuts prices," Shannon, Montello; "Should the retailer patronize the jobber who furnishes goods to the customers of the retailer, either in sales over the counter or by mail order?" E. L. Feiling, Milwaukee.

Another important question discussed was the sale of silverware in hardware stores. A strong resolution was passed by the manufacturers to refuse to sell to the dealers, and urging some kind of mutual co-operation among the retail jewelers to discipline such manufacturers and continue to sell to them.

Nearly 250 members were enrolled in the Wisconsin organization before the closing of the convention, and every man pledged himself to bring another member.

ld until all the 651 retail jewelers of the ate have come. An address on this sub- et was made by R. B. Watrous, secretary the Citizens' Business League of Mil- ukee. Mr. Watrous spoke on the open- g day of the convention, when the wel- ming addresses were made. A. J. Stoess- l, Milwaukee, gave the delegates the free- om of the city, and a response was made

Gustave Keller, Appleton, in behalf of e organization. At 5.15 o'clock on Wed- sday the Milwaukee Retail Jewelers' ab entertained the visitors. Work of e convention was dropped and forgotten. rom the hall the delegates were marshaled ward the good ship *Chequamegon*, and ter an hour on Lake Michigan in perfect ether were landed at Whitefish Bay Park, ere a banquet was served, and the guests re entertained by Joseph G. Donnelly, a ll-known after-dinner speaker.

At the business session Thursday the fol- lowing officers were elected: President, A. Stoessel, Milwaukee; vice-president, Gus- e Keller, Appleton; secretary, Franklin omson, Milwaukee; treasurer, John Hess, Fond du Lac. Board of Di- ctors: A. J. Stoessel, Franklin Thomson, H. Upmeyer, H. F. Stecher, Gustave ller, John P. Hess, George Durner and H. Coburn.

During the closing session all members re invited to submit designs for an asso- ciation emblem to be adopted at the next onvention. The local committee in charge entertainment, consisting of George rner, Harry Stouthamer, A. J. Stoessel d E. F. Rohn, was given a vote of thanks, id the first annual convention of the Wis- onsin Retail Jewelers' Association came to happy end.

ROSTER OF MEMBERS.

John Armbruster, Cedarburg; T. S. Arthur, d du Lac; Alsted-Kasten Co., Milwaukee; R. Anger & Co., Oshkosh; Charles F. Askins, hosh, F. H. Boehrer, Durand; Bunde & Up- yer, Milwaukee; Birely & Son, Oshkosh; W. Becken, Beaver Dam; A. Bloedel, A. Bringe d Emil Bachman, Milwaukee; H. J. Crook, adison; F. H. Coburn, East Troy; T. J. Dale, enosha; George Durner and Louis Esser, Mil- ukee; Engels & Drusson, Green Bay; Fuchs & entschel and E. L. Feiling, Milwaukee; S. Feur- in, Green Bay; Albert Fuchs, Milwaukee; W. Grunert, Green Bay; Otto Georg, Milwaukee; rry C. Hart, Plainfield; M. M. Huck and L. H. olbrook, Kenosha; John P. Hess, Fond du Lac; . H. Hackleman and Frank C. Hyde & Co., ppleton; H. Hammersmith, Milwaukee; Oscar roehnke, Marathon; K. F. Keller & Son and . A. Kamps Co., Appleton; Paul R. Kohls, Fre- ont; Edward Koenig, Green Bay; C. H. Koch, ilwaukee; H. J. Klee, Kaukauna; A. E. Kaiser, een Bay; Thomas S. Lockhart, Kenosha; Oscar Lentz, Clintonville; J. Liebenow, Green Bay; J. Link, Shiocton; G. Logemann & Sons Co. d Casimir Meller, Milwaukee; Adolf Michael, reen Bay; Andrew McCormick, Greenwood; Otto ueller, Wausau; Victor S. Maurseth, Stoughton; uis A. Manz and O. H. Nehs, Milwaukee; W. Ortscheid, Cassville; Preusser Jewelry Co., Mil- ukee; Rathke & Meiners, Mayville; A. C. adtke, Bangor; R. P. Rassmussen & Co., Racine; . F. Rohn and E. J. Rohn, Milwaukee; Theo. Stecher, Sachs, Stouthamer Bros., A. J. Stoessel, W. & Schmidt Co. and Archie Tegtmeyer, Milwau- ee; T. J. Thompson, Barron; B. W. Thien and W. Teschner, Milwaukee; H. R. Vergerout, onfort; Jacob van der Zanden, Green Bay; D. an Wort, Evansville; W. W. Winchester, mery; Richard Weitlich, Sturgeon Bay; Arthur agner Co., Edgar; Jos. Wellstein and Frank inger, Milwaukee; Joseph T. Wendling, Chilton; P. Wilde, Milwaukee; R. P. Yale, Glenwood.

News Gleanings.

E. C. Sizemore, Albertville, Ala., will shortly move into more commodious quar- ters.

Daniels & Williamson, Newberry, S. C., have enlarged and entirely renovated their quarters.

C. E. Fritts, Sag Harbor, N. Y., is spend- ing a few days with his parents at Ches- ter, N. Y.

Rudolph F. Schubart, Wheeling, W. Va., has left with a party of friends for a short tour of Europe.

Hastings, Doyle & Allum have suc- ceeded to the jewelry business of E. M. Allum, Revelstoke, B. C.

A. C. Wanner, Freeport, Ill., is enlarg- ing his store room by an addition of 25 feet of space and erecting a new front and steel ceiling.

The Portsmouth Loan Co., Portsmouth, N. H., has sold its jewelry and loan busi- ness to the former manager, S. Polimer, who will take possession July 16.

Rudolph C. Eisenbach, Lafayette, Ind., will supply the 1,000 buttons to the Purdu Athletic Society, the contract having re- cently been awarded to him.

In the possession of James T. McCan, Greensburg, Pa., is a unique clock, which is said to be over 100 years old. The old timepiece keeps accurate time.

John Deister, a watchmaker with Jno. Bally & Son, Elmira, N. Y., and Miss G. E. Stevens, were united in marriage at the home of the bride in that city, on Monday, of last week.

A new clock will shortly be installed by the E. Howard Clock Co., in the court house dome at Vinton, Ia. The timepiece is the gift of Paul Correll.

Austin Jones, a retail jeweler, of White- hall, N. Y., was united in marriage June 22 to Miss Margaret E. Miller, a trained nurse, of Montreal, Can., while the latter was dangerously ill with typhoid fever.

The store of F. Wylie, Waverly, Ill., was broken into, recently, by thieves, who stole several watches and a large amount of jewelry. Two shots were fired at the night watchman, but he escaped injury. There is no clue to the thieves.

During a recent fire at Jefferson, O., in which 14 buildings were destroyed, caus- ing a loss of \$75,000, damage amounting to several hundred dollars was done to the stock of Hurbert H. Moses. The loss was covered by \$700 insurance.

James Taylor, a negro porter in the store of the Calhoun Jewelry Co., Birming- ham, Ala., was recently arrested on a charge of grand larceny. When searched, a bundle of silver spoons, a watch and a fob and two fountain pens were found in his possession.

In the show window of the store of H. Frank Peters, Moline, Ill., are to be seen interesting relics of the San Francisco earthquake and fire. The souvenirs of the disaster were picked up in that city by Oscar Severin, of Moline, two days after the fire. The collection comprises chiefly chinaware, including plates, vases, etc. A watch was also found.

At 1 o'clock on the morning of June 25 it was discovered by the night watchman that Jaeger Bros.' jewelry store on Mor-

risson St., between 1th and 5th Sts., Port- land, Ore., had been robbed of about \$2,500 worth of jewelry. The robbers effected entrance through the rear door with a jimmy, broke through a glass door at the rear of the salesroom and abstracted a tray of precious stones which had been locked in a secret drawer under the show case.

A charter has been issued to the Allan Jewelry Co., of Charleston, S. C., and an- other to James Allan & Co., Inc., of the same place. The incorporators of both corporations are James Allan, E. F. Mis- cally, James Allan, Jr., W. S. Allan and Richard H. Allan. The Allan Jewelry Co.'s capital stock is \$75,000, and that of James Allan & Co., Inc., \$50,000. The pur- pose of the corporation is to continue the business of James Allan & Co. and separate the retail from the wholesale and manufacturing parts of the business.

Frederick Bucher & Sons, manufactur- ing jewelers, opened their new retail store at 218 N. Charles St., Baltimore, Md., June 25. The business was established in 1878 by Frederick Bucher at 9-11 E. Bal- timore St., and continued there until the great fire of 1904, when a temporary loca- tion was secured at 12 Clay St. The pres- ent store was purchased early this year, and thoroughly remodeled to suit the needs of the business. It is up to date in every respect, with mahogany furniture, glass cases, racks, etc., the whole blending har- moniously and making a very attractive appearance.

New Stores and Enterprises.

Bernbaum & Polinsky have opened a store in Winnipeg, Man.

J. H. Williams opened a watch and jew- elry repairing shop in Normal, Ill., July 1.

The Empire Jewelry Co. is opening a jewelry store at 49 Queen St., W. Toronto, Ont.

Earl Bates, Hope, R. I., will shortly en- gage in the retail jewelry business in Attle- boro, Mass.

I. M. Buskirk has opened a retail jewelry store in the new Hinkel block, 66 Market St., Corning, N. Y.

H. Greenwald and Fred. Adams will soon start in business in Tucson, Ariz., under the firm name of Greenwald & Adams.

The Norvell Jewelry Co. is the name of a new business about to be started in Stutt- gart, Ark., by Mrs. Frances Norvell.

The Royal Loan & Jewelry Co., Ltd., New Orleans, La., has filed its charter with the Secretary of State, the capital stock of the concern being \$15,000. The officers are: President, P. M. Stein; secretary and treas- urer, A. Hurwitz.

The Kryptok Bifocal Association has just been incorporated in the State of New York with a capital stock of \$10,000. The incor- porators were: J. R. Schwenzer, C. Jessen, A. S. Moore, A. W. Proctor and W. M. Chapin, all of New York.

The Hurel Co. was incorporated a short time ago to manufacture and deal in jew- elry and optical instruments, with a capital stock of \$15,000. The officers are: Presi- dent, Benjamin W. King, Beverly, Mass.; treasurer, Willard E. Munday, Cambridge, Mass.; clerk, D. Hunt, Wakefield, Mass.

Our Traveling Representatives

M. C. Winsor and R. B. Johnson will go the road for the new house of Perry-Aldrich Boston, Mass., this week.

The following traveling representatives call the trade in Kansas City, Mo., during the week: William Moore, Bausch & Lomb Opt. Co.; W. F. Drexmit, Keystone Watch Case Co.

Among the traveling representatives who call on the trade in St. Louis, Mo., recently, were L. Smith, L. B. Bryant & Co.; Arthur H. 1 Abel Bros. & Co.; M. B. Bernstein, Tuttle & Glass Co.

Among the traveling representatives in Lancaster, Pa., recently, were William D. H. A. Whaley & Co.; Mr. Wolf, W. Green & George B. Potter, E. J. Wilkins & Co.; Charles Montgomery, C. F. Rumpp & Sons; H. A. 1 Rees & Yankauer; Max Gunzburger, Freeman.

Among the traveling representatives to Buffalo, N. Y., last week, were: James B. Frank M. Whiting & Co.; Mr. Fein, Henry & Co.; John M. Case, H. T. Carpenter & Charles E. Bride, Bride & Tinckler; M. L. 1 nard, Larier & Sons; J. T. Griffith, Jr., Co. Howe & Co.

Traveling representatives who called on the Cincinnati, O., trade, during the past week, included: E. J. Mayer, Julius King Optical Co.; I. 1 Louis Strasburger's Son & Co.; C. T. McKelley & Steinman; Alberto S. J. Schweizer, 1 sonia Clock Co.; Charles F. Sexton, William Sexton Co.; N. S. Benton, W. F. Upham.

Traveling salesmen visiting Boston, Mass., during the week, included: E. F. Skinner, Rex W. Case Co.; J. W. Sherwood, Solidarity Watch Co.; N. D. Moulds, New Haven Clock Co.; D. Childs, B. A. Ballou & Co.; Mr. Maria, M. Copeland & Co.; Ben Wyman; Fred Nichols, Allen; Louis Barrows, H. F. Barrows Co., Dougherty, Providence Jewelry Co.; Mr. R. L. Tannenbaum & Co.

The Great Gem Mine of Montana.

THE sapphire workings at Yogo Gem Mont., are being gradually developed into a great and permanent mining industry. Taken as a whole, the Yogo dike is perhaps the greatest gem mine in the world. It is about four miles long on the surface, and being a true igneous dike descends to an indefinite depth. It is estimated that the entire contents of workable sapphire-bearing rock would approximate 10,000,000 cubic yards. A mining plant is now being erected here which will quadruple the previous output and make Montana sapphire mining a very important factor in American gem production.

The stones obtained are not of large size. They range from "culls," used for watch jewels and other mechanical purposes, to gems averaging, when cut, from half a carat to 2 or 3 carats and rising up to 5 or 6. As gems they are brilliant, free from flaws and of good color, ranging from light shades to the rich, deep blue of oriental sapphires. The Montana crystals have an advantage for mechanical uses over East Indian stones in that they are largely short prismatic or rhombohedral with flat basal terminations, hence they need much less cutting for mechanical purposes as watch jewels. The gems are sent to Amsterdam for cutting.

Canada Notes.

R. McNaught, Seaforth, Ont., has sold.

J. Gundry, of C. J. Gundry & Co., Aylmer, Ont., died recently.

Henry Ratelle, Cornwall, Ont., has assigned to Daniel Davies.

The death is announced of Michael Murray, Montreal, brother of William Murray.

Hubus Saunders, of H. & A. Saunders, Toronto, Ont., has returned from a European trip.

The American Jewelry & Novelty Co., Montreal, has dissolved, and Elias Auerbach has registered as proprietor.

J. H. Gunther, Listowel, Ont., has removed to a fine new store fitted up in a seldom seen outside the cities.

William Wilson, 170 Queen St. W., Toronto, Ont., is selling off his stock preparatory to retiring from business.

Fred J. Dingwall, of the D. R. Dingwall, Ltd., is in the Winnipeg Hospital, Winnipeg, Man., suffering from appendicitis.

John H. McDougall, for having obtained money by false pretenses from David Spence, Montreal, has been sent to jail for one year.

E. C. Fitch, Jr., manager of the Robbins Appleton Co., Montreal, was in Toronto and Hamilton last week in the interests of the firm.

W. G. Kent, manager of the Toronto Jewelry Mfg. Co., Toronto, Ont., left, June 20, on a purchasing trip to New York and the other jewelry centres.

Frederick Whitehead, for many years with E. M. Murphy, Sons & Co., Toronto, Ont., has opened a jewelry store at 344 George St., recently vacated by Ellis Bros.

A fire occurred at Windsor, June 18, by which a number of stores sustained considerable damage, principally by water, among them being Abel Ashley, whose loss is \$1,000, and Bradley Bros. The latter's loss was small.

Out-of-town buyers calling on the Toronto, Ont., trade last week, included: T. Watson, Newmarket, Ont.; N. F. Babb, Stratford, Ont.; W. W. Ferguson, Niagara, Ont.; E. Smith, Oakville, Ont., and P. Birtwistle, London, Ont.

The staff of Ryrie Bros., Ltd., Toronto, Ont., had a very enjoyable picnic at Toronto Island last Thursday evening, at which about 150 were present. A sumptuous repast was served, and boating, games, foot races and other diversions made up the evening's entertainment.

D. R. Dingwall, of the D. R. Dingwall Co., Ltd., Winnipeg, Man., accompanied by his wife and daughter, returned last week from a protracted European trip. During the course of his travels he visited Rome and had an audience with the Pope. He notes an increasing scarcity of diamonds, as the output of the South African and other sources of supply is diminishing, while the demand from America is steadily on the increase.

William T. Ferguson and Maud Courtney, of St. John, N. B., and A. W. Leroux, Montreal, were arrested recently at Hamilton, Ont., on a charge of shoplifting. The three went into Robert Juner's store and asked to be shown some cut glass, but did not make a purchase. After they left Mr. Juner missed a cut-glass bowl valued at

\$12. He notified the police, the alleged thieves were arrested, and the property was recovered.

Hormidas Spensard, who pleaded guilty to being concerned with another in the theft of diamond rings from the store of Narcisse Beaudry & Sons, Montreal, has been sentenced to three months' imprisonment. He fled from justice, but returned and gave himself up, and his sentence was made light in consequence.

Harry Ryrie, of Ryrie Bros., Ltd., Toronto, Ont., returned home last week from a four months' purchasing tour in Europe, having placed large orders, especially for diamonds and pearls. He reports that fine goods have a marked upward tendency, which is especially noticeable in regard to pearls. Rubies continue to command high prices, the market for really fine goods not being affected by the manufacture of "scientific rubies."

Rochester.

Philip Present is spending the week in New York.

Judgment was obtained by default, last week, in the Municipal Court by Don. I. Danks against Edward Keating for \$7.

Among the out-of-town jewelers visiting Rochester last week were: Mrs. G. A. Taylorson, St. Mary's, Pa.; F. E. Taylor, Bolivar, N. Y.; Charles Peck, Naples, N. Y., and G. D. Macomber, Honeoye Falls, N. Y.

The Rochester Optical Society, at a special meeting, last week, passed the following resolution on the death of the late Charles F. Kern:

Whereas, It has pleased the Divine Providence to take from us our friend and brother, Charles F. Kern, be it

Resolved, We, the members of the Rochester Optical Society, hereby express our profound sympathy to the members of his family in their sad bereavement, and the secretary has been instructed to send them a copy of this resolution and to have the same spread upon the minutes of this society.

H. M. BESTOR, President.

C. I. SUMERISKI, Secretary.

The Sigler Bros. Co., Cleveland, O., recently received a letter from L. M. Sigler, which contained some interesting information in regard to the situation in the diamond trade in Europe at the present time. The letter was dated from London, which Mr. Sigler was then visiting after an absence of 15 years, having gone there from Antwerp and Amsterdam. The writer expressed extreme surprise at the decided scarcity of rough diamonds, it being almost impossible for an outsider to get a "sight" from the syndicate, and even the regular customers being only able to get it by making an appointment many weeks and sometimes months ahead. The cutters have to almost beg to get the rough that they want, and all rough is sold for cash only. The receipts from the South African mines were 10 per cent. less in the week in which Mr. Sigler wrote than a year ago. The Premier mine, which has not been producing much, owing to an accident in the machinery, is reported to be working again. The Jaegersfontein mine, which was flooded during the Boer war, has been pumped out and is again producing its famous blue stones.

Buffalo, N. Y.

A. J. Best, of Best & Co., with his wife, is preparing for a long sojourn in Europe.

R. F. Pickert, manager of the Freeman Jewelry Co.'s store at 84 Seneca St., spent a portion of last week in his old home at London, Ont.

J. H. Ullenbruch, 510 Main St., had in place last week for the first time an immense electric sign. It is unique in design and the only thing of the kind in Buffalo.

Miss Fanny Kirschner, sister of Henry Kirschner, 59 E. Genesee St., goes to New York next week to spend her vacation term with friends. Miss Kirschner assists her brother in conducting the store here.

Frank Sutherland, who recently started a jewelry store at 125 Broadway, was married Thursday to Mrs. Leona Mann. Mr. Sutherland is arranging for the sale of his business here. He will go to Lakeville, N. C.

John W. Schler, for years jewelry engraver in rooms above 379 Main St., has purchased the Plarr plant in Niagara St., and will begin the extensive manufacture of jewelry in a newly fitted-up establishment at 178-80 Ellicott St.

C. B. Henschel, traveling representative for Heintz Bros., wholesale dealers at Swan and Ellicott Sts., has returned from a vacation trip to San Francisco. Mr. Henschel was formerly of Henschel & Frank, who sold out to Philip Present several months ago.

Local jewelers are disappointed in that the convention of the Knights of St. John failed to increase their sales to the extent predicted. The Knights brought 10,000 persons to the city, but the big parade took place on Monday, and a majority of the visitors departed for side trips.

Charles F. Damm, 520 Main St., has a unique advertising scheme in the shape of a rolled one-cent piece. On one side is a picture of Mr. Damm's store building; on the other the elongated Indian head and inscription. Mr. Damm is sending these out to his customers. He has added a number of new fixtures to his salesroom.

Joseph Block, president of the Citizens' National Bank, was, 20 years ago, one of the leading jobbers of jewelry in this city and western New York. He quit the jewelry trade to become a banker, and has been very successful. Last Wednesday Mr. Block, who is nearly 70 years old, was married to Mrs. Leiter, of Cleveland, O.

Harry Roberts was arrested by police detectives last Thursday in Michigan St. as a suspicious person. Roberts, the police say, is one of the best known jewelry thieves in the country. He had in his possession a purse containing 15 pieces of jewelry, including a sapphire ring worth \$50, a cluster scarf pin containing 15 diamonds, several diamond-set locket and rings, and a gold bracelet of fine workmanship. Roberts admitted the jewelry he had with him was worth \$1,200 at wholesale prices. Buffalo jewelers have been asked to inspect the booty to ascertain if any of it belongs to them.

John E. Judge, Ames, Ia., recently sold his store to C. E. Edwards, Watertown, S. Dak., who has sold out to John Keating.

I make a specialty of purchasing for cash, jewelry and all kinds of precious stones which your customers desire to dispose of and which you do not wish to buy yourself.

Entire Stocks and Estates Bought. Bank References Given.

BUNDE & UPMAYER CO.,

Mack Block,

MILWAUKEE, WIS.

Connecticut.

The Bradley & Hubbard Mfg. Co.'s plant, Meriden, will shut down for one day only—day, July 4.

The International Silver Co. recently presented 1,000 flags to the Meriden Boys' Club, in Meriden.

C. B. Sanford, general manager of the Sessions Clock Co., Forestville, has moved from Bristol to Forestville with his family. M. B. Leete recently assigned a patent for a design for a teapot or similar article to the R. Wallace & Sons Mfg. Co., Wallingford.

Edward Ingraham, son of Wm. S. Ingraham, Bristol, was in New York last week ending his final examination for entrance to the next Fall.

W. E. Porter assigned a patent which was recently granted to him on an intermittent alarm clock, to the New Haven Clock Co., New Haven.

Col. C. H. Case, Hartford, attended the wedding of his nephew, Harold Case, in Meriden, Thursday. The groom's father is superintendent of the Gilbert House, in Meriden.

The New Haven Clock Co., New Haven, closed its factory June 30 for the semi-annual shut-down, and will remain closed until July 16. Repairs will be made and inventory taken.

The Sessions Clock Co., Forestville, has closed down the brick storehouse that stood on the side of the old shop, and will use the bricks in the construction of a new storehouse, which is being erected.

W. W. Bigelow, for several years in the employ of Edward Miller & Co.'s factory, Meriden, died at that place Thursday, aged 65 years. The deceased was a member of the 25th Massachusetts Volunteers.

The fourth annual outing of the R. Wallace & Sons Mfg. Co.'s fire brigade was held at Mansfield Grove, Saturday. There were six events and the winner of each was awarded with a handsome silver trophy.

A clock is owned by H. J. Pulver, Lee, Mass., which is claimed to be at least 160 years old. It was made in Winchester, here in the latter part of the 18th century several clockmakers were located. The iron weights on the timepiece weigh 20 pounds.

Frederick H. Mann, for several years foreman of the Parker Clock Co., Meriden, died last week of a complication of diseases at Dr. Johnson's Sanitarium in Hartford, after a long illness. The deceased is survived by a widow and two children. The interment was in Jefferson.

The New England Watch Co., of Watertown, has presented a petition to the city requesting that a sidewalk be constructed on the north side of Dover St., and that the street be paved from S. Main St. to the city. It also asks for the paving of Benedict St. and the north side of Clay St. to Liberty St.

Chas. F. Harwood, a well-known resident of Wallingford, and for a quarter of a century foreman of the plating department of Simpson, Hall, Miller & Co., died on Thursday morning, at his home, 200 Center St., of Bright's disease, aged 73 years. Mr. Harwood is survived by a widow and two daughters. The deceased served in the

Civil War, having been second lieutenant of Company A, in the 15th Connecticut Volunteers.

A. H. Hall & Co., Meriden, a partnership comprising A. J. Hall and J. D. Bergen, will soon be merged into a stock company, a meeting of prospective stockholders having been held recently. The concern, which manufactures decorated glass, was started in 1899 by Arthur J. Hall, who had small quarters in Mill St. The business outgrew its old quarters, and a transfer was made to the present factory on N. George St., in 1902.

Factory "A," International Silver Co., Meriden, closed Saturday and will remain so until July 9. Factory "E" closed for a week beginning July 1. Factory "H" ceased operations June 30, and will reopen July 9. Factory "N" will close for two weeks beginning July 30. The J. D. Bergen Co. is closed for one week; also the plant of Manning, Bowman & Co. for the same length of time. Extensive improvements will be made in several of the above mentioned factories during the shut-down.

John Ralston, who was arrested a short time ago on a charge of larceny preferred against him by the Davis & Hawley Co., Bridgeport, and who was subsequently released under bonds of \$300 after having reimbursed the concern, is believed to be the same man who is wanted in California under the name of John Webb. Webb was arrested in California some time ago on a criminal charge, and held in \$1,000 bail, which was put up by wealthy friends. Webb, however, disappeared, and the sheriff of San Bernardino County is endeavoring to recapture him.

The midsummer shut-down of Wallingford factories will be brief this season, which indicates the general busy and prosperous condition of local manufacturing concerns. Factory "L," International Silver Co., closed Saturday, and will reopen July 9. This is the shortest shut-down for this factory in a number of years at this season. The H. L. Judd Co. closed at the same time, and will also resume operations July 9. R. Wallace & Sons Mfg. Co.'s plant closed Saturday. The duration of the midsummer vacations at this company's factory will vary. Some departments will be closed one week, while others will be closed from 10 days to two weeks.

Jewelers' Gold Bars Withdrawn and Exchanged at New York.

Week Ended June 30, 1906.

The U. S. Assay Office reports:
Gold bars exchanged for gold coin.... \$289,729.43

Total	\$353,664.86
Of this the gold bars exchanged for gold coin are reported as follows:	
June 25.....	\$51,559.59
" 26.....	51,898.72
" 27.....	47,561.70
" 28.....	97,656.88
" 29.....	20,495.40
" 30.....	20,557.14
Total	\$289,729.43

Andrew Wilson, Winfield, Kans., is recovering from a severe illness.

Obed Lyon, Brockton, Mass., recently erected a new Summer residence on the shore of Buzzard's Bay, Mass.

Attleboro.

E. A. Reed, of the traveling force of Reed & Barton, will spend the Summer roughing it on a New Hampshire farm.

Loring Everett Ladd, Mansfield, with J. F. Sturdy & Sons Co., was last week united in marriage to Miss Maud A. Eddy, Attleboro.

The progress on the cement and steel factory going up for the D. F. Briggs Co. gives promise that it will be completed by September.

The James E. Blake Co. and the W. H. Wilmarth Co. last week provided their employes with free tickets to a clam bake, a feature of the "Society Circus," which was Attleboro's main source of interest all last week.

Hon. Sidney O. Bigney, of S. O. Bigney & Co., conducted through his big factory last week an official party, comprising fellow members of the Governor's Executive Council, prominent military men from various parts of the State, and political and personal friends. Among the party was J. C. Sawyer, Boston. After the inspection of the plant and the presentation of handsome jewelry souvenirs to the guests a sumptuous repast followed at Col. Bigney's house.

John M. Fisher, of J. M. Fisher & Co., was last week elected to membership on the State central committee of the Prohibition party. Mr. Fisher was some years ago its candidate for governor. The Prohibitionists of Attleboro are reported to favor Charles E. Bliss, recently retired from Bliss Bros., for representative to the Legislature. He is now one of the aspirants for the Republican nomination.

North Attleboro.

TRADE CONDITIONS.

Business continues to hold out exceptionally well and quite a number of the factories are now compelled to work nights in order to fill the rush orders. There is an unusually brisk demand for experienced help.

Arthur Coddington is spending the Summer at Lake Archer, Wrentham.

W. S. Metcalf, of the Plainville Stock Co., returned last week from the west.

George K. Webster and family will spend the Summer months at Matunuck.

Horace L. Kent, for over 25 years an employee of the T. I. Smith Co., died Wednesday of last week in his 73d year. He observed, last April, his golden wedding anniversary. The funeral was held on Friday afternoon.

Word was received last week of the death in Indianapolis, Ind., of Charles S. Joslin, who for many years conducted the jewelry supply houses that George L. Clafin Co. maintains in North Attleboro and Attleboro. Mr. Joslin has been ill for many years with throat trouble, and this is what caused his death. He is survived by a son.

Harry Norteman, head colorer for J. J. Sommer & Co., was seriously injured Thursday. He was doing some satin finishing when a wire from the brush flew and struck him squarely in the ball of his left eye. The services of an eye specialist in Boston were called in, but there is still some fear that he may lose the sight of the eye.

GORHAM SILVER

SILVER-MOUNTED LEATHER BLACK-JACKS.

¶ The Gorham Company takes pleasure in suggesting to the Jewelry Trade that in its extensive assortment of old English Black-jacks (an exclusive Gorham product) will be found many pieces which cannot fail to appeal to sports committees and others as especially well adapted for presentation as prizes in Athletic and Sporting Contests.

¶ The Beakers, Mugs, Ale Sets and Loving Cups of solid hand-sewn leather, lined with ruddy copper, the rims and shields of Gorham Silver, are now universally accepted as offering an effective equivalent for solid silver at an exceedingly moderate cost.

A Record in Gem Importations. WHILE the importations of precious stones and pearls have been increasing by leaps and bounds in the last two years, as indicated by the reports given out at the Port of New York, from time to time, yet there will be some surprise at the announcement that the total value of these importations in the past fiscal year, ended June 30, has been far ahead of all preceding records, approximating \$40,217,500. The June importations at this port exceed in value those of the corresponding month of last year by a margin of nearly \$400,000.

The nearest approach to the splendid total of the fiscal year now closed was made by the figures for the calendar year ended Dec 31 last, the aggregate for that period being \$37,116,337. It will be seen therefore that the fiscal year exceeds the calendar year by over \$3,000,000.

Comparisons with preceding fiscal years will indicate the extent of the increase in the consumption of precious stones by the American dealers. The largest total since the records of the port have been kept until the present year was made by the preceding 12 months, when the figures were \$33,223,161. The year ended June 30, 1903, was considered marvelous in its day, the value of the imports being \$27,318,642. There was a decline in the year ended June 30, 1904, and then began the upward movement which has since continued.

Organization Going On in the Jewelry Trade. THIS month may truly be considered the season of conventions among the jewelers in all parts of the Union, over 25 meetings being scheduled to take place before the latter end of July. Most of these meetings are for the purpose of forming a State association of retail jewelers to represent the commonwealth in which they are held, and to elect delegates to the convention which is to meet in Rochester, N. Y., in the first part of August, for the purpose of forming a national association that will be truly representative of the retail jewelry trade in every section of the Union.

In some States—and among these may be reckoned one or two of the greatest in population and importance—there does not seem to be an interest taken in the State association which is commensurate with the importance of the project. For instance, in the great commonwealth of New York little comment is heard in the retail trade on the meeting which is to take place in Albany this month, and few of the prominent retail jewelers have done anything toward making this meeting the successful gathering that it ought to be. On the other hand, in the great States of Pennsylvania and Illinois considerable interest is taken by the trade, and there is little doubt that the meetings, which will be held in Pittsburgh and Springfield respectively, will be largely attended, and the delegates sent to the national convention will be truly representative of the States. Jewelers of many smaller States are also showing a deep interest in the subject, and working hard for the success of their local organizations.

The States which already have organizations, some of which have been in existence from one to a dozen years, will, of course,

be represented by delegates which have behind them an organization which properly authorizes them to speak for the jewelry trade of their territory, and for most of these organizations formed recently thanks are due to the members and management of the American Retail Jewelers' Association, under whose auspices they have been formed and with which they are at present affiliated. In fact, it is the American Retail Jewelers' Association, which is distinctly an interstate body and the nearest approach to a national organization in the trade, that is responsible for the convention at Rochester, as it is called practically for the purpose of forming an association more purely national in character than the one now in existence; and there is little doubt that if this association is formed the American Association will be merged into it, and the ties by which this body is linked to the various State associations will be transferred to the new organization.

The time before the dates set for the various State meetings is short, and every jeweler interested in the subject of organizing a State or national association should give heed to the calls which have been sent out for these meetings, and do his best to see that the delegates sent to the Rochester convention are men in his trade who can most ably look after the interests and voice the sentiment of the jewelers whom they will represent.

Resolution of Manufacturing Jewelers' Association of Newark, N. J., Thanking the Circular-Weekly.

NEWARK, N. J., June 28, 1906.
Editor THE JEWELERS' CIRCULAR-WEEKLY:

At a meeting of the board of managers of the Manufacturing Jewelers' Association of Newark, N. J., held June 25, announcement was made that the bill introduced by Representative Vreeland, regarding the stamping of jewelry, etc., had become a law; at which time a resolution was passed requesting the secretary to write, thanking you for your long and persistent advocacy, and congratulating you upon the final success of the measure.

This law will no doubt be of great benefit to the trade and public at large.

Yours respectfully,

HARRY DURAND,

Secretary.

Death of Reginald D. Fogg.

ATTLEBORO, Mass., June 30.—Reginald D. Fogg, traveling salesman for the Watson & Newell Co., died Friday from spotted fever. The malady was contracted several months ago while returning from a tour of the middle west with his sample case and from sources that can never be known.

Mr. Fogg reached Attleboro suffering severely. His case was quickly diagnosed and there followed interminable weeks of exhausting fever, in which he was loyally nursed by his mother, Mrs. Evelyn D. Fogg, with whom he made his home, and had the active sympathy of his employers.

Deceased leaves besides his mother a younger brother and hosts of friends in jewelry, social, athletic and Y. M. C. A. circles. Mr. Fogg was but 10 years out of high school, and apparently at the outset of a successful career.

M. Schussler & Co., Oakland, Cal.

W. B. Sherratt has retired from business at Lake Park, Ia., and will engage in business at Humboldt, Ia.

New York Notes.

I. Sluizer has engaged in the diamond business at 87 Nassau St.

Hugo Glaser is no longer connected with Louis L. Grey & Co., 71 Nassau St.

Henry W. Sowade has taken a position with Adolf J. Grinberg & Son, 8 Maiden Lane.

Simon Merker, who was in business under the style of Mrs. Minnie Merker at 102 Clinton St., has closed the store.

I. Z. Oppenheimer, of H. Z. & H. Oppenheimer, went last week to Maine, where he intends to pass several weeks in fishing.

A. J. Grinberg, of A. J. Grinberg & Son, with his daughter, sailed recently on *La Savoie* for a two months' tour of Europe.

Miss Elizabeth Marshall, who completed her course in art at Pratt Institute in Brooklyn last month, has secured a position with Tiffany & Co.

Reed & Barton are advertising a reward of \$50 for the return of a filigree gold necklace mounted with precious stones, which was lost by a customer.

I. R. Conklin, of Cross & Beguelin, is ending July at Warwick, Orange County, N. Y.

J. G. Townly, of the same house, is using his vacation in the Pocono Mountains.

L. Tannenbaum, of L. Tannenbaum & Co., 52 Nassau St., accompanied by his wife and daughter, sailed recently on the *Kaiser Wilhelm der Grosse* for a two to three months' trip abroad.

William M. Green, late of M. J. Dunn & Co., will remain at the old stand, 11 Maiden Lane, room 1206, as representative of George L. Brown Co., Attleboro, Mass., makers of rolled plate chains.

Mrs. George F. Kunz, whose husband is a member of Tiffany & Co., last week lost a diamond-studded gold belt while on her way to a church dedication in Chappaqua, N. Y. The belt was subsequently found and returned.

Thomas Koch, who recently moved from the second floor to the third floor front of the Persch building, 37 Maiden Lane, has fitted up his new offices, in which he is now comfortably established, with double the floor space that he formerly had.

A certificate of incorporation was filed last day by the International Gem Co., of New York, which is to conduct business with a capital of \$3,000, the directors being A. Dwyer, Brooklyn; D. I. Dreher, New York; Henri Casenobe, Englewood, N. J.; John A. Abel, of Abel Bros. Co., 64 John St., sailed for Europe last Thursday on the *Deutschland*. Mr. Abel will visit Germany, Austria, Bohemia, France, Holland, Belgium and England in search of precious stones and designs, and to get ideas to be used in the coming season's productions.

Oliver M. Hamrick, formerly the manager of a jewelry store, pleaded guilty in the early part of last week to the charge of abduction and paid a fine of \$365. The complaint dates back to 1901. He was indicted in 1902 and thereafter his bail bond of \$2,000 was forfeited by his failure to appear for trial.

The International Pearl Co. is the name of a new corporation which filed a certificate last week. It is authorized to deal in pearls, pearls and precious stones, with a

capital of \$400,000. The incorporators named are: John Bradfute Knox and Frank C. Robertson, 96 Broadway; Jacob Burnet, 50 E. 77th St., New York.

A decision of the Board of United States General Appraisers handed down last week sustained in part a protest of Samstag & Hilder Bros. against an assessment of duty on an importation of metal belts and ornaments of various kinds. The Board divides the article into a number of classes, sustaining the protest as to some and agreeing with the collector as to others.

Eph. A. Karelson, who appears as counsel in various proceedings in which the jewelry trade is interested, was married yesterday to Mrs. Bianca E. Duclose at the residence of the bride's mother, Mrs. Pauline Elsasser, 1030 Lexington Ave., by Justice James A. Blanchard. Mr. and Mrs. Karelson will sail to-morrow on the *Friederich der Grosse* for a three months' trip to Europe.

A new concern, which will offer art glass products to the jewelry trade, has recently engaged in business, at 87 Maiden Lane, under the style of the Tivoli Art Glass Co. The company shares offices with L. Adler & Son, jewelry manufacturers, who are interested in the enterprise. The factory for the production of the glass has been established at Maspeth, and the company has secured the services of George Cook, formerly with the Tiffany Studios. The samples shown in the salesrooms include a wide variety of vases fashioned in conventional and eccentric shapes. The glass comes in antique and iridescent and opalescent hues and the decorations are worked in the material at the time of blowing by chemical processes.

Answers were filed last Friday in the Court of Chancery at Trenton, N. J., in suits instituted several months ago against the International Silver Co. and others by Edward R. Thomas, a banker of New York. The issues have been pending in one form or another for several years. Mr. Thomas, who is one of the leading promoters of the silver company, charges that certain defendants engaged in a plan of transferring stock for the purpose of perpetuating the present management. The answer denies that the transfers of stock were in any respect improper, and say that Mr. Thomas for several years has been trying to start a contest in the hope of forcing out the present directors in order that he might get control for speculative and stock jobbing purposes. At the last annual meeting about 45,000 shares of stock were voted by the present management and 4,300 were voted by opposition. Those named by Mr. Thomas as engaging in the transfers of stock include William E. Noore, Benjamin J. Hill, the Hackensack Trust Co., Home National Bank of Meriden, First National Bank of Meriden, the National City Bank of New York.

Market Price of Silver Bars.

The following are the quotations of silver bars in London and New York, as reported by Zimmerman & Forshay:

June 26.....	\$65	30 1-16d.
" 27.....	.65	30 1-16d.
" 28.....	.65 1/4	30 3-16d.

" 30.....	.65 1/4	30 3-16d.
July 2.....	.65 1/4	30 3-16d.

Trans-Atlantic Voyagers.

TO EUROPE.

P. C. Gillespie, of Gillespie Bros., Pittsburgh, Pa., will sail July 16.

Edward Alberti, Chicago, will sail July 10 on the *Kaiser Wilhelm der Grosse*.

Henry H. Schaul and Harry May, of Schaul & May, Atlanta, Ga., sailed recently.

Samuel Kind, of S. Kind & Sons, Philadelphia, Pa., sailed last week on the *Bremen*.

Leon J. Van Gelder, of Van Gelder, Kahn & Co., New York, sailed recently on the *Finland*.

A. J. Grinberg, of A. J. Grinberg & Son, New York, accompanied by his daughter, sailed recently on *La Savoie*.

A. J. G. Hodenpyl, New York, sailed last Wednesday on the *Noordam*. On the same boat was A. Hess, Chicago, Ill.

L. Tannenbaum, of L. Tannenbaum & Co., New York, with his wife and daughter, sailed recently on the *Kaiser Wilhelm der Grosse*.

Sailing on the *Deutschland* recently were John A. Abel, of Abel Bros. & Co., and N. A. Moore, Jr., of Alfred H. Smith & Co., New York.

Sailing recently on the *Kaiserin Augusta Victoria* were: W. S. Manheimer, of Louis Manheimer & Bro., Chicago, and R. E. Schubart, Wheeling, W. Va.

Leopold H. Herzfelder, with David Mayer, New York, and Henry C. Bergheimer, manager of Galt & Bro., Washington, D.C., sailed Saturday on the *St. Louis*.

Albert H. Gleason, of Hastings & Gleason, attorneys for the Jewelers Board of Trade, New York, sailed last Thursday on *La Provence*, as did also M. H. Berg, of Hyman, Berg & Co., Chicago.

FROM EUROPE.

L. H. Keller, of the Keller Jewelry Co., New York, arrived Friday on the *Baltic*.

H. Thompson Whaler, Miami, Fla., and Narragansett Pier, R. I., returned recently on the *St. Louis*.

B. Hyman, of Hirsh & Hyman, New York, will return this week on the *Kaiser Wilhelm der Grosse*.

Returning last Saturday on the *St. Louis* were Max Ellbogen, of the Stein & Ellbogen Co., Chicago, and Jules Franklin, New York.

Alfred G. Stein, of Patek, Philippe & Co., New York, arrived June 23 on *La Provence*, as did Harry C. Adler, of Charles Adler's Sons, New York.

Death of Delos R. Brown.

Word of the death at his home in Peoria, Ill., Sunday, of Delos R. Brown, reached New York Monday in a telegram to M. B. Bryant, of M. B. Bryant & Co.

Many of the older members of the trade will learn of his death with deep regret. Mr. Brown was born in Cummington, Mass., 66 years ago, and was for several years in business as a jeweler at Elmwood, Ill. Of late years he has lived at Peoria, where he had many interests. A genial, generous man, his death will grieve a large circle of friends in Massachusetts as well as at his last place of residence. He is survived by a widow, two sons and a married daughter.

IMPORTERS OF DIAMONDS

MANUFACTURERS AND JOBBERS OF WATCHES, SILVERWARE
CUT GLASS, ETC. COMPLETE MATERIAL DEPARTMENT

THE continued scarcity of fine Pearls is the conspicuous feature of the day in
European markets.

It not only takes days of hunting, but oftentimes weeks, before one can
find what he actually needs.

American buyers are therefore quite ready to appreciate the value of the
co-operation of a "GEMFINDER" always on the spot.

A word in advance of your coming to Europe and an idea of your wants
would insure the possibility of securing the desired goods and save time.

YOUR MEMO. ORDERS ARE SOLICITED

NEW YORK, 41 Maiden Ln

News From the Optical Trade.

W. W. Spaulding will shortly open an optical department in Ballston Spa, N. Y. J. P. Durfee, optician, is moving into quarters in the new Kent building, Drain, Ore.

The Huteson Optical Co., Omaha, Nebr., has refurbished its optical rooms with attractive oak fixtures.

The Berteling Optical Co. will soon occupy new quarters on Bush St., near Van Ness Ave., San Francisco, Cal.

W. H. Stevenson, Fitchburg, Mass., recently sold his optical business to R. M. Morley, Springfield. E. L. Piper will act as manager of the Fitchburg office.

B. B. Combs, Omaha, Nebr., attended the meeting of officers of the Nebraska State Optical Co., of which he is treasurer, which was held in Lincoln recently, and reports that eight members will attend the meeting of the A. A. O., at Rochester, N. Y., July 2-Aug. 2, inclusive.

John Coburn, who conducted an optical establishment at 215 Main St., Jamestown, N. Y., has closed his office and left Jamestown to become general manager of the Coburn Optical Co., which will open stores in Kansas City, Mo.; Wichita, Kans.; Memphis, Tenn.; and Birmingham, Ala.

T. F. Farrell, formerly an optician of Marysville, Cal., has given up that profession since the San Francisco disaster, and has organized a company with a number of others has organized a contracting firm to assist in the work of rebuilding the city. The company is to be incorporated and will compete for work and all kinds of building contracts.

The California Optical Co., whose principal establishment on Kearny St., San Francisco, Cal., was destroyed in the San Francisco fire, has purchased the lease held

Mrs. Bettie Laymance, of the store at 13 Broadway, Oakland, and will take possession of one-half of the premises Aug. 1, the other half being occupied by a jewelry man.

M. E. O'Neill, optician, Denver, Colo., has just recovered a handsome and valuable gold watch which she lost over a year ago. At the time of her loss she advertised the papers for three months but to no avail. The case was then placed in the hands of the local detectives, and after a long search the missing timepiece was discovered in a pawnshop and returned to its owner.

At the June meeting of the New England Association of Opticians, which was held last week at Young's Hotel, Boston, Mass., supervisory committees of members were appointed to promote educational interests of the organization, to watch for slackery in the trade and to scrutinize the advertising that is done by opticians, with a view of correcting abuses or shortcomings in the trade as a whole.

Abner C. Thomas, jeweler and ophthalmologist, has purchased an established optical business in the Metropolitan Life Insurance building, 29 E. 23d St., New York. He will move there in a short time. His store at Sistersville, W. Va., will be continued under the management of his brother, W. T. Thomas; another brother, W. Thomas, will take charge of the store at 1026 Noble St., Anniston, Ala.

Boston.

The Perry-Aldrich Co., which, as recently noted, was incorporated in Maine, has taken quarters at rooms 709-710 Washington building, 387 Washington St., where a jewelry and art goods jobbing business has been established.

The Waltham Watch Co. will close its factory next week for the usual midsummer period, giving the employees opportunity for a brief vacation while the plant undergoes thorough inspection and whatever changes are necessary.

Buyers in town during the week included: David Robertson, South Framingham; G. Schmidt, Lawrence; Mr. Pettengill, manager for H. N. Noyes, Haverhill; H. W. Darling, Stoughton; Elmer G. Tucker, Worcester; E. Beaudreau, Marlboro.

The John B. Humphrey Co. has just received from the brother of Mr. Humphrey, who is at Diamantina, Brazil, where extensive prospecting is in progress under the direction of the Humphreys, an unusually fine lot of rough specimens, one bunch of the gems averaging about three carats.

Three young men entered the store of B. J. Short, 530 Tremont St., last Friday morning, and one of them broke the glass in the showcase while the other two engaged the attention of the clerk. Each of the trio then seized a tray of emblem pins and other jewelry, all making their escape. The jewelry was valued at nearly \$100.

Montgomery, Ala.

New show cases have been installed in the store of J. A. Weiss & Son for the display of cut glass, silver and china.

The owners of the site of "The Fair," which carries a stock of jewelry, will erect a five-story building in the near future.

Hardwick Ruth, of C. L. Ruth & Son, was a visitor recently at the University of the South, Suwanee, Tenn., of which he is a trustee. The store has been generally overhauled for the Summer trade.

M. E. Pepperman has added a number of new features to his store in the New Exchange building. His father, Jacob Pepperman, has just returned from a trip with the National Editorial Association, of which he was a member from the State of Alabama.

Max Robinson writes from Birmingham that a large attendance of jewelers of the State is anticipated July 10, the day set for the organization of an Alabama association. Signatures to the call indicate much interest in the movement. Mr. Robinson recently added a watch material department in his store at Birmingham.

R. Blackinton & Co., North Attleboro, Mass., are making a feature of combinations in toilet and manicure sets, arranged in silk-lined cases. For the past few years they have met with such success, considering the few patterns which they have made in these goods, that the decision to make an extensive line this year was determined upon. The line on exhibition at the New York office is handsome beyond expression.

Newark.

The Matthews Co., which was incorporated recently at Trenton, N. J., will manufacture silverware, with works and offices at 112 Arlington St., Newark. Harry B. Matthews, who was store manager of the Alvin Mfg. Co. for several years, will be the president of the new corporation. O. D. Jamouneau, who was formerly at the Alvin factory, will be the secretary and treasurer of the company. John Foster will also be associated with the new company.

On the application of Krementz & Co., manufacturing jewelers, at 47 Chestnut St., an order has been issued, returnable July 5, requiring the Empire Varnish Co. to show cause why it should not abate alleged nuisances. It is charged that the smoke from soft coal and fumes from linseed oil enter the jewelry factory, annoying the employees and endangering their health. Another charge is that large quantities of turpentine and benzine are stored in the varnish works without proper protection against fire. The order was granted by Vice-Chancellor Pitner. The jewelers are represented by Chandler W. Riker as attorney.

Sympathy is extended by numerous friends to John M. Cutter, manager of the Trenton Watch Co., Trenton, N. J., whose wife, Mrs. Margie Watson Cutter, died unexpectedly of a blood clot on the brain on Monday of last week at her home, 908 W. State St., in that city. Mrs. Cutter seemed to be in her usual good health until the afternoon before her death, when she complained of a slight illness and her condition grew rapidly worse. Mr. Cutter was in Chicago, and was unable to get back to Trenton until after his wife's death. About two years ago the family moved to Trenton from Elgin, Ill., where Mr. Cutter had been connected with the Elgin Watch Co. Mrs. Cutter leaves, besides her husband, a boy of 13 years.

Bogus checks were offered recently to a number of jewelers in Trenton, and at last one of their number was swindled. A well-dressed young man called at F. W. Rowe's store, 175 S. Broad St., and after buying a ring costing \$5 handed in payment a check for \$15 drawn on a local bank. The jeweler had no suspicion that the check was not all right, and so he handed out \$10 change. Later in the day, when Mr. Rowe went to the bank to cash the check, he was surprised on learning that the order was worthless. Isaac S. Vogel, 446 S. Broad St., had a visit from a young man, probably the same swindler, who tendered a check for \$15 in payment for a \$4.50 ring. The check offered to Mr. Vogel was drawn on the First National Bank in the name of the Prudential Insurance Co., and was indorsed "J. E. Woodland." The jeweler offered to go with the young man in order to ascertain if the check was genuine, and this frightened the fellow, who left in a hurry.

A temporary injunction, which had been granted by Justice E. A. Spenceer at a recent term of the Supreme Court in Schenectady, N. Y., restricting Charles Bickelman from erecting a piazza on his house, at 26 Union St., was vacated June 25, at a special term of the Supreme Court.

Ball's Official Standard R.R. Watches

ESTABLISHED RETAIL PRICES PROFIT GUARANTEED

When competition grows keen, some jeweler will sell watches at jobber's list—sure as fate.

We originated "established prices for complete watches"—always could and always have maintained them.

Why not take an exclusive agency for the Ball watches—a fair return on your time and capital guaranteed by our system of established and maintained retail prices.

Write for booklet, and watch this space.

We want to add a lot of new friends to the Ball family of railroad watch dealers.

VOL. LII.

CHICAGO, WEDNESDAY, JULY 4, 1906.

No. 22.

Chicago Notes.

L. Newhouse has returned from a northern trip.

Harry Miller is on a trip to Pittsburg and Cleveland.

Geo. H. Thomas, with the Mauser Mfg. Co., is now an Odd Fellow.

M. Newhouse has returned from a trip to the Coast.

E. H. Banker, vice-president of the Benedict Mfg. Co., is on a trip east.

C. J. Roehr, representing the Basset Jewelry Co., is on a trip to the factory.

All of the Chicago jobbers are busily at work on their new Fall catalogues.

Frank H. Challen, with the Ohio Cut Glass Co., is on a trip to the northwest.

T. C. Boylan, with Manning, Bowman & Co., left for the Pacific Coast last week.

Frank T. Barton, with the Fontneau & Cook Co., has returned from the Pacific Coast.

Herbert E. Cobb, of the Daggett & Clap Co., will discontinue his regular trips to the Coast.

W. A. Fay, with the John T. Mauran Mfg. Co., has returned from the Pacific Coast.

Mr. and Mrs. W. A. Beckingham have returned from their wedding trip spent in Europe.

H. H. Fruer, with the A. F. Smith Co., Omaha, Nebr., is taking a three weeks' vacation here.

H. C. Rowbotham, with the Schrader-Wittwein Co., has returned from a western and southern trip.

Geo. P. Marshall, manager for E. V. Roddm & Co., has returned from a vacation to the northern lakes.

E. C. Jacob, of Woollett & Jacob, has completed the building of a Summer cottage at McHenry, Ill.

M. R. Wadds, cashier for Wm. A. Rogers, Ltd., is recovering from a severe case of blood poisoning.

Math. Hermestroff, formerly of the Western Jewelry Co., is recovering from an operation for appendicitis.

A. R. Oughton, representing the Jennings Bros. Mfg. Co. and the Van Bergh Silver Plate Co., has returned from a northern trip.

The Star Watch Case Co. removed its plant at Elgin, Ill., to Ludington, Mich., last

week. The move was made in less than six days.

M. H. Berg, of Hyman, Berg & Co., accompanied by his wife, sailed last Thursday on *La Provence* for a three months' European trip.

A. Ellbogen, with Sproehule & Co., is taking a vacation at Lake Harbor, Mich. C. L. Caliger, with the same concern, is at Eagle Grove, Ia.

Julius Schnering, of Otto Young & Co., is the head of a committee appointed to draft a set of by-laws for the new Chicago Jobbers' Association.

Lebolt & Co. have opened a branch store at Saratoga Springs, N. Y. It is located on Broadway between the United States and Grand Union Hotels.

The J. E. Micks Co., retail jewelers of Elkhart, Ind., have entered the jobbing field. Their retail business will still continue. Indiana, Ohio and Michigan will be the field they intend to cover.

F. E. McCullin, western manager for Wm. A. Rogers, Ltd., has returned from a visit to the company's factories at Northampton, Mass.; Oneida, N. Y.; Niagara Falls, N. Y., and to the offices in New York.

J. B. Renker, manufacturers' agent at San Francisco, is here from the coast accompanied by his wife. Mr. and Mrs. Renker lost all their personal property in the San Francisco fire. Mr. Renker will again locate in California.

Among the out-of-town buyers here last week were: A. F. Smith, of the A. F. Smith Co., Omaha, Nebr.; John W. Neasham, Ottumwa, Ia.; A. L. Haman, of A. L. Haman & Co., St. Paul, Minn.; F. W. Hinrichs, Kalamazoo, Mich.; Cliff Sherman, of M. T. Sherman & Sons, Woodstock, Ill.; J. E. Micks, of the J. E. Micks Co., Elkhart, Ind.; Adolph J. Reinhardt, Lincoln, Ill.; John Schmelzer, Centralia, Ill.; Will Fulton, with the Lewis Jewelers' Supply Co., Denver, Colo.; E. H. Carpenter, Burlington, Ia.

What promises to be an interesting discovery was the outcome of a house party given by Mr. and Mrs. J. T. Brayton at their Summer cottage at Lake Kinkenosha, Wis., recently. Among the guests were Walter G. King, of the Julius King Optical Co., and A. G. Larsen, with the same firm. Messrs. King and Larsen, at the request of Mrs. Brayton, removed a large boulder in

front of the house, and as the stone rolled down the lawn a beautiful carved head of an Indian woman was exposed to view. It is a full face carved out of the solid rock. The base of the stone had been squared off and had evidently at one time rested on a pedestal. As the spot where it was found was formerly an old Indian trail, the sculpture had probably marked the last resting place of some former Indian queen.

Cleveland.

J. H. Heiman has placed a new street clock in front of his store, 143 Euclid Ave.

H. S. Hurlbut, of the Scribner & Loehr Co., was married, a few days ago, to a Miss Moore. J. M. Jenks, also a member of the house, was married, last week, to a lady of Dayton, O.

Among the recent visitors to the city were the following: A. E. Kintner, Painesville; E. E. Critz, Elyria; R. R. Moore, Cuyahoga Falls; E. F. Seaman, Monongahela, Pa.; A. J. Heiman, Barberton, and Mrs. E. D. Kindig, Elyria.

A. E. Knight will shortly open a new store on Hough Ave. and is now engaged in purchasing stock and fixtures. Mr. Knight has been a traveling salesman for the Scribner & Loehr Co. and until a short time ago covered a portion of Michigan.

Stephen Touzinsky, a jeweler formerly doing business at 4918 Broadway, was arrested, last week, on a warrant charging him with conversion, issued at the instance of the Bowler & Burdick Co. The warrant charges Touzinsky with converting to his own use the sum of \$207.44. It is alleged that Touzinsky had been selling watches for the firm on a commission; that he collected the sum total named and did not account for it.

The Bowler & Burdick Co., of this city, has filed an intervening petition in the involuntary bankruptcy proceedings brought against the firm of Davis Bros., of Galion, by Freudenheim Bros. & Levy, White, Wile & Warner and West, White & Christy. The company asks to be made one of the petitioners and asserts that the firm is indebted to the house to the amount of \$357.66. Davis Bros. have filed an answer to the original petition, in which they deny the allegations made. The case will probably be interesting because of these facts.

To the Jobbing Trade.

It's Time

Now to look at our complete line of Diamond Mountings, if you have not already done so.

IMPORTERS

SHIMAN BROS & CO.

87 MAIDEN LANE, N.Y.

LONDON: 50 HOLBORN VIADUCT.
AMSTERDAM: 2 TULIP STRAAT.

MANUFACTURERS

FACTORY: 1, 3, 5 GOLD STREET

Kansas City.

TRADE CONDITIONS.

The wholesale optical business is especially good at this time, everyone having plenty to do. Wholesale jewelers are busy getting in their goods and preparing to put their men out on the road. The state, however, for the benefit of the retail trade of this section, that no traveling men on the road before July 5 will have a line of the newest goods to show the trade. Kansas City travelers will be starting out right after July 4.

Isador Eller, Richmond, Kans., was in this city, during the past week, for medical treatment.

Ed. Netzhammer, formerly with the H. Sig & Kricke Jewelry Co., has gone to St. Louis, Mo.

F. H. Stevenson, formerly of Shawnee, Okla., has taken a position with the Edwards & Sloane Jewelry Co.

J. R. Mercer has been superintending the installation of a new elevator in the Hudson building during the past few days.

H. M. Turney, Stockton, Ill., was here last week, on his way to Stilwell, Okla., where he will locate in the jewelry business.

Dr. W. F. Hammond, Manchester, Kan., and Dr. A. E. Howell, Salida, Colo., are taking a post-graduate course in the Southwestern Optical College.

M. H. Hill, Smith Center, Kans., has come to Kansas City to take a course in engraving and watchmaking with the Kansas City Polytechnic Institute.

News has been received from Walter Jaccard, of the Jaccard Jewelry Corporation, who has been making a short diamond buying trip to Europe, that he is on his way home again.

The following out-of-town jewelers elsewhere mentioned were in this city, last week: L. E. Hendrickson, of A. C. Ross & Co., Osage City, Kans., and Cary M. Baldwin, Kans.

Mr. Calder, formerly a watchmaker with F. W. Meyer, but now with the H. Wal Starcke Co., Junction City, Kans., was in this city on business during the early part of the week.

Mrs. Frances Norvell, who had been taking a course with the Kansas City Polytechnic Institute, finished last week, and went to Stuttgart, Ark., where she will engage in business as the Norvell Jewelry Co.

W. E. Huston, secretary of the American Association of Opticians; Fred C. Meyer, of the Merry Optical Co., and Dr. S. Lane and wife, of the Southwestern Optical College, will leave the latter part of July to take in the national convention of the organization.

Morris Klein, 1027 Main St., this city, was fined \$50 in the police court recently on a charge of selling goods at auction for more than they were worth. One woman asserted that she paid \$13 for a watch which Klein claimed was worth \$30 and which was alleged, subsequently proved to be worthless.

V. G. Cuthbert, who covers Kansas, Missouri, Oklahoma, Nebraska and Illinois for Otto Young & Co., and makes his headquarters in this city, has been home several days, on his vacation. He took his family to Excelsior Springs, Mo., and then went on a visit to the house. He will also visit his father, in Ohio, before returning to Excelsior Springs to join his family.

Cincinnati.

Louis Rauch will leave this week on a western trip.

Erwin Herman, of Herman & Loeb, has returned on a western trip.

Wallace Miller, formerly of the Miller Jewelry Co., is visiting friends here.

Joseph Kramer, of Lindner & Co., is visiting at the home of A. H. Beer, Versailles, Ind.

Ernest Gruen, of D. Gruen, Sons & Co., has returned from a 10 days' stay at French Lick Springs, Ind.

Edward P. Lovell, who about a year ago resigned under Kentucky laws, has offered 50 per cent. to his creditors.

G. Radebaugh, Stuttgart, Ark., was here last week purchasing stock for the new store that he has just opened.

Charles and John C. Daller, Jr., of the Omens Oskamp Co., have started on a summer's outing on the Miami river.

Leve Leubuscher, of L. Gutmann & Sons, with his wife, has arrived from Europe, where he visited many jewelry centers.

A glass shelf in one of the windows of the Oskamp Jewelry Co.'s store suddenly broke through the center and dropped, last week, carrying with it about \$200 worth of goods, which were destroyed.

P. Becht, for 19 years with the Clemens Oskamp Co., has severed his connection with this house. The employees of the company presented Mr. Becht with a handsome watch fob on his retirement.

V. T. Eichelberger, of Joseph Noterman & Co., with his family, has gone to his summer home at Clark's Lake, Mich. Edward A. Pflueger, son of William Pflueger, of this house, was lately admitted to the bar.

In the window of George Newstedt's store last week was shown a tray of watch cases which had been through the earthquake and fire at San Francisco. The shape of the cases is still perfect, though the metal has a black and burnt appearance. On some the engraving is still clear and visible.

Adolph Frank Maier, son of Frank Maier, Bowling Green, Ky., died Monday, June 25, from injuries received from a street car at Middletown, O., on Sunday afternoon, June 24. He and a friend were returning from a fishing camp about four miles from Middletown, and were struck by the approaching car. The deceased was 24 years old, and was an employee of Fred C. Wittlinger, of that place. The elder Maier, with C. E. Richter, of Richter & Phillips; a friend of the family, went on to Middletown for the remains. The funeral took place at Bowling Green Wednesday afternoon.

Out-of-town jewelers who bought stock last week included J. G. Irwin and daughter, Harriman, Tenn.; E. Dold, Madison, Ind.; Otto Zoellner, Portsmouth, O.; C. Beer, Sunman, Ind.; William Leive, Aurora, Ind.; Charles R. Brown, Dayton, O.; P. D. Freeman, Ashland, Ky.; Mr. Bowen, of Bowen & Simpson, Winchester, Ky.; John A. Worrell, Washington C. H., Mo.; Mr. Gayman, with the Hofman Jewelry Co., Columbus, O.; A. Wahlrab, Dayton, O.; O. E. McWaters, Somerset, Ky.; Mrs. Kupferschmidt, Lawrenceburg, Ind.; Walter Eisensmith, Charleston, W. Va.; L. Olmsted, North Vernon, Ind.; C. F.

Schlegel, Chillicothe, O.; Mr. Rigdon, of Rigdon & Rigdon, Ohio City, O.; A. E. Axman, Franklin, O.

Two well-dressed men, one tall, the other short, called at the store of the Loring Andrews Co. about noon Wednesday and asked a saleswoman to show them some diamond rings. They described the kind they wanted, and were shown several trays, during which time the shorter man did the talking. The men were businesslike in their manner, displayed a roll of bills as though wanting to purchase, and in no way aroused any suspicion. Many articles were asked for by the shorter man, and he was apparently spending time in trying to make a selection. Finally he said his taller companion would come in later, and left the store with his companion. The clerk, in putting away the diamonds, discovered that one tray containing seven rings, valued at \$600, was missing. The police were immediately notified, and are looking for the two men. The short man wore a gray suit and straw hat, and had a smooth face. His taller companion wore a blue suit and straw hat; also had a heavy sandy mustache.

St. Louis.

Joseph Linz, of Joseph Linz & Bros., Dallas, Tex., was in St. Louis last week.

Miss Eva Pecaut, of the sales staff of the L. Bauman Jewelry Co., returned last Monday from her vacation.

The vacation period of the Mermod, Jaccard & King Jewelry Co. will begin early this month and close about Sept. 1.

The new signs on the windows of the Brooks-Auer Jewelry Co. read "J. J. Burke, President Brooks Jewelry and Optical Company."

Otto G. Steiner, secretary of the Steiner Jewelry Co., 1432A N. Park Pl., left last week for a fortnight's fishing trip at Gilead's Slough, on the Mississippi.

The auction sale of the Mermod, Jaccard & King Jewelry Co. is now being conducted at night until the stock has been sold out. The sale has been very successful.

Among the out-of-town buyers who visited the trade in St. Louis last week were: W. L. Derleth, Centralia, Ill.; J. Hainell, Litchfield, Ill., and E. S. Royer, Bismarck, Mo.

Alvin Bauman, president of the L. Bauman Jewelry Co., is expected back from his European trip about July 20. The vacations of this firm will not begin until after his return.

James W. Behen, of the sales staff of the Hess & Culbertson Jewelry Co., will leave for Seattle, Wash., on his vacation about the first of the month, to be absent all of this month.

The case of Charles E. Pitcher, formerly with J. F. Dailey & Co., charged with embezzlement, came up for trial in the criminal court Wednesday, but was continued on the docket indefinitely, the judge refusing to *nolle prosequere* the case.

Joseph Auer, traveling representative of the Bauman-Massa Jewelry Co., returned last week from his vacation spent in Yellowstone Park. Samuel H. Bauman, president of this firm, has sailed from Europe, and will arrive home about July 6.

William Weidlich, of William Weidlich & Bro., who went to Connecticut several weeks ago, called there by the death of his brother, is expected to return to St. Louis about the middle of this week. Charles Ens, manager of this firm, made a flying business trip to Springfield, Ill., during the past week.

The solid silver tea set presented at the Millers' Convention at Milwaukee has been on exhibition at the Merchants' Exchange, and later will be exhibited in the Hess & Culbertson Jewelry Co.'s windows. The set consists of six pieces and cost \$1,800.

Edgar L. Pike, of Joseph Linz & Bros., Dallas, Tex., and Valentine Hafner, of the Walter-Hafner Jewelry Co., Hillsboro, Tex., were included in a party of Texas business men which visited St. Louis recently on the way home from a tour of Illinois cities.

The jewelers of Franklin Ave. are quite generally joining in the movement of the Franklin Ave. Improvement Association, recently organized to obtain recognition from the city government of the claims of this street, which is said to be the longest retail street in the world.

J. F. Dailey, of J. F. Dailey & Co., who has been in Chicago since the first of June on business connected with the opening of their store in that city, is expected to return to-day. R. W. Wilson, upon his return, will go to Chicago, and while there will take his vacation, visiting many of the lake resorts around Chicago. In the intervals of the visits to Chicago of Mr. Dailey or Mr. Wilson, A. H. Aylesworth will have charge of the Chicago store of J. F. Dailey & Co.

The employees' outing of the Mermod, Jaccard & King Jewelry Co. was held last Saturday at Ramona Park, in St. Louis County, the picnickers going out to the lake in special cars of the Suburban line, which left Broadway and Locust St. at 1.20 p. m. The programme consisted of an address of welcome by J. C. O'Brien, chairman of the committee; baseball between the married and single men's teams, athletic exercises, etc. Music and dancing completed the programme, which lasted from 5 to 10.30 p. m. The officers of the course were: J. C. O'Brien, referee; N. P. Logan, clerk of the course; Charles Stephens, starter; W. A. Boehm, E. C. Eiseman and E. W. Bornmueller, judges.

Quite a number of the most prominent members of the local trade figure in a review printed in last Sunday's *Republic*, of the beginnings of some of the most successful business men of the city. According to the article, George Hess, of the Hess & Culbertson Jewelry Co., began his business career as a telegrapher; F. W. Drosten was a watchmaker's apprentice before finally becoming the head of a large jewelry concern; G. F. W. E. Eggert, of Eggert & Fisher, began as an optician's apprentice in Germany in 1881; A. P. Erker, president of Erker Bros. Optical Co., learned the business in Germany and came to the United States in 1873; Patrick T. Whelan, of the Whelan-Aehle-Hutchison Jewelry Co., began as a salesman for the Eugene Jaccard Jewelry Co., and August Kurtzeborn embarked in the business as an apprentice for L. Bauman.

San Francisco.

TRADE CONDITIONS.

One of the most pleasant surprises that has greeted the retail jewelers who have started in business again since the fire, is the fact that refugees across the bay, as well as many suburban residents are coming in increasing numbers daily to make their purchases in San Francisco. As the retail stores here are, with but a few exceptions, still located in private houses, or in out of the way places, this phase of business is particularly gratifying and is regarded as an index to the activity that will result when the new shopping district is ready for business. The return of the country trade is only second in interest to the loyalty of people around the bay. The large jewelry houses are receiving orders all the time and these without any advertising or soliciting. It has not always been possible to fill these orders here, but each day new stock is arriving and the efficiency of this service is increased. Some of the ideas that were formed immediately after the fire as to the probable drift of trade in San Francisco have been revised considerably since that time. These early deductions, made on a calamity basis, are not being borne out by the actual resulting facts. Instead of the cheapest grades of goods being in universal demand, the reverse is true, and the call is for good substantial goods, much to the dealers' delight. Jewelers are not doing a heavy business in rings or bracelets, but they are selling many watches, clocks and table ware. When the large hotels are again open for business the tourist trade will again assume its old-time proportions and jewelers will commence to move back into the old retail district. Business is rushing with the wholesale jewelers. The country trade is above normal for this time of the year and the city business is heavy, owing to many stores which are just starting up in business again. Almost all the wholesalers who moved across the bay after the fire are now back again, but some of them are experiencing great difficulties in securing suitable offices.

Lichtenstein Bros. are now established on Market St., near 5th.

J. A. Sorensen Co., formerly of 6th St., will open a new retail store, in a few days, at 717 Market St.

G. R. Moss, formerly of G. R. Moss Co., Geary St., will open a restaurant, in a few days, on Market St.

The store of Mr. Alexander, formerly of 852 Market St., will be reopened at Van Ness Ave. and Pine St.

H. M. Abrams is back in the Kamm building, and reports a splendid business. Mr. Plamundurn, one of Mr. Abrams' traveling representatives, is to start out this week, his first trip since the fire.

Among the out-of-town visitors to the local trade last week were: Charles Harris, of Charles Harris & Son, Stockton, Cal.; L. C. Koberg, of Healdsburg and Tonopah; Mr. Mount, of Mount & Ross, Petaluma, and Mr. Frederick, Seattle, Wash.

W. H. Millroy, who was formerly with Hammersmith & Field, and who went to Los Angeles after the fire, is back again in his old position. Mr. Field has just returned from Sacramento, where he has been ever since the disaster. He has been suffering from paralysis for some time, and it is not likely that he will ever be able to resume business again.

A. I. Hall & Son are now receiving some heavy shipments of goods from the East. Mr. Huggins, president of this firm, is now in New York ordering goods for the Fall trade, and large consignments of his selections will soon arrive here. Workmen are busy on the rear of the Kamm building, in which the firm is located, but this portion will not be finished before Jan. 1, as the steel framework has to be removed. As

soon as this section of the building is ready for occupancy the store will be moved there and the part now being occupied will be repaired.

The rapid growth of Van Ness Ave. as a choice shopping district, and the turn that trade has taken for the better, has induced the W. K. Vanderslice Co. to enter the field again, and an admirable store location has been secured on Van Ness Ave. near California St. This location is considered the choicest in the new retail district, and is near the Claus Spreckles mansion, now in ruins. The contract has been awarded for handsome store furnishings, and the store is expected to be ready for occupancy about July 20. A complete line of gold and silver ware and jewelry will be carried as in the former store on Sutter St.

Although the new store of Hammersmith & Field, located at Van Ness Ave. and Eddy St., is as yet unfinished, Mr. Hammersmith states that quite a good business is being done, and, in fact, has been done for the past month. Within the next 10 days the shelving and show cases will be installed and the goods that are now arriving can then be placed on display. This firm is making a specialty of restoring burnt silverware, and has taken some heavy contracts for this class of work. For the big field day that is to be held in Golden Gate Park to-day, the firm has prepared 50 medals and 27 trophies, materials for which came from the east.

Omaha.

Albert Edholm is on a fishing trip to Haywards, Wis.

John F. Mawhinney was at Fairbury, Nebr., on business, last week.

T. J. Bruner, a salesman for the A. F. Smith Co., is spending his vacation at Lake Okoboji.

Charles Ingalls, Lincoln, has sold out the entire stock formerly owned by his brother, J. F. Ingalls.

A. I. Agnew, president of the Columbian Optical Co., Denver, Colo., was a visitor here, during the past week.

W. C. Wheeler, watchmaker for the Mawhinney & Ryan Co., with his family, is spending his vacation at Vermillion, S. Dak.

Mr. Samson, of Farnham & Samson, Blair, Nebr., and Mr. Max Egge, Grand Island, were in the city last week, purchasing stock.

On June 25 Fred Brodegaard, of Fred Brodegaard & Co., was married to Miss Mary Nordin at the Danish Lutheran Church. The couple went immediately to Mr. Brodegaard's Summer home at Benson.

Jack Jennings, alias Kid Clark, and August Martin, alias McGregor, charged with the theft of a \$200 diamond from the jewelry store of M. D. Franks, June 5, were found guilty of grand larceny, after the jury had deliberated 10 minutes. Neither of the men went on the witness stand in his own behalf, and no testimony was offered for them.

Fred Brodegaard, through the death of his uncle, William Beck, at Aeroeskjoberg, Denmark, March 30, has fallen heir to 20,000 crowns, or \$5,000. When Mr. Brodegaard left Denmark 23 years ago, his uncle

promised that he would be remembered his will. Last week Mr. Brodegaard received from the probate court of Denmark papers to be signed in the presence of Theodore Olsen, the Danish consul. As soon as they are returned to Denmark the bequest will be forwarded.

Pacific Coast Notes.

E. R. Sawyer, Santa Rosa, Cal., moved into new quarters on Mendocino.

Fred A. Smith, who has been in Quincy, Cal., for some time, has returned to San Francisco and re-entered the employ of Radke & Co.

M. K. Giant, Vallejo, Cal., has commenced the enlargement of his store at Georgia St., by extending the salesroom to the rear 25 feet and by installing plate glass show cases.

O. Burress, a soldier who stole a diamond ring valued at \$180 from A. Katz, Oakland, Cal., pleaded guilty to grand larceny before Judge Harris last week, and an effort is now being made to have him placed on probation. Sentence has been continued 10 weeks.

Rothschild & Hadenfeldt, long established in San Francisco previous to the earthquake and fire of last April, have begun erection of their future factory at 2800 Pablo Ave. and 38th St., Oakland.

The factory will not only be close to the traction lines, but adjacent to the Santa Fe and Key Route depots.

W. A. Manson, of the firm of Manson Bay, San Bernardino, Cal., has returned from a six weeks' vacation. Mr. Manson made a general tour of Ontario, Can., visiting friends and his former home, Windsor, Toronto and other cities. Returning to New York, he took advantage of the opportunity to buy holiday goods.

A. E. Springborg, Redlands, Cal., recently extended his jewelry store room 20 feet to the rear and added another glass front wall case. He has also built a plate glass enclosure in the rear, to be used exclusively for cut glass, a line to which his firm has always paid much attention. The enclosure is mirror lined, and is rendered very attractive. The ceiling is lighted by a number of electric lights.

Pacific Northwest.

Harvey W. Freeze, Brownville, Ore., will leave, in a few weeks, for the east, where he will take up the study of optometry and engraving for a year.

About a week ago thieves broke into a store in Fraternity block, Colton, O., which contained the bankrupt stock formerly owned by J. S. Keeney, now in charge of J. J. Kennedy, trustee in bankruptcy. A number of fountain pens, some jewelry and other articles were taken, valued in all at about \$100. The authorities were notified and the thieves were caught at Astoria with the loot.

Burglars, about a week ago, broke into the general store of Harrison & Harris, Newark, Tex., and made off with jewelry and other stock aggregating about \$200 in value. The safe of the same concern was blown open by burglars last year and looted of nearly \$1,000 in cash.

New York

Philadelphia.

R. Bolte, 1801 Market St., has returned from a trip to Niagara Falls.

George Stoll, Lebanon, is complaining the loss of a valuable English bulldog. Max Einhorn, of M. Sickles & Sons, on Sunday at Anglesea, N. J., fishing. J. S. Fitch, Shamokin, returned, last week, to business after a four weeks' illness.

B. Wallem, Camden, N. J., has returned from a short vacation to Wildwood.

John Geist and David Gutekunst, of J. Bechtel & Co., have departed on their vacations.

John Smyth, formerly of 1711 South St., opened his new retail store at 521 and Baltimore Ave.

J. T. Whaler, Miami, Fla., was in Philadelphia last week purchasing goods to the store which he is about to open at Narragansett Pier, R. I.

The widow of Malcolm Graham, who died about a year ago, and who formerly conducted a store on N. Front St., was married last week to a neighboring drug-store.

Charles Schwartz, formerly a retailer on Chestnut St., near Chestnut St., but who for the last two years has been in the south, has returned to this city, and will probably open a jewelry store here.

Out-of-town retailers buying of the local wholesale trade last week included C. F. John, Cape May, N. J.; D. H. Krause, North Wales, Pa.; George Ware, Atlantic City, M. Friedberg, Atlantic City, and S. Hart, Kennett Square.

Thomas Campbell, western salesman for M. Sickles & Sons, has resigned his position to go with the Koshland & Italie Co. Mr. Campbell is well known in the trade, before going to M. Sickles & Sons was with the B. F. Williams Co.

H. Gantt, of Wm. H. Gantt & Son, Newport, Pa., is making extensive alterations and additions to his store and remodeling it along the latest lines. Mr. Gantt was in this city last week arranging the details of the renovation of his store. A. J. Le Jambre, William Williams and Jacob Mann were among those who attended the funeral services Thursday over the body of Jacob F. Henderson. Mr. Henderson was especially well known to jewelers, whom he has entertained often and well on occasions of their festive celebrations.

Walter Hazelton, with Charles H. Bryon, 735 Sansom St., was made the victim of a clever practical joke at the jewelers' Club vaudeville show last week, when from the stage it was stentoriously announced that he was urgently wanted at home. This announcement came officially first as Mr. Hazelton was enjoying himself most, but as might have been expected from a man married and with a family he departed at once for home only to find that it was all a hoax.

The officers of the Koshland & Italie Co., the new corporation which succeeded the partnership of Koshland & Italie, the successors of Wm. Morris & Co., are: Charles Koshland, president; Bernard Italie, secretary and treasurer, and George E. Donald-

son, director. Mr. Koshland, the president, started, just nine years ago, with the late firm of Wm. Morris & Co., and Mr. Italie started 12 years ago with the same house; both were admitted to the firm exactly five years ago. Mr. Donaldson was with the late concern for eight years.

Simons, Bro. & Co.'s baseball nine administered last week the first defeat to the nine representing M. Sickles & Sons. The score was 5 to 1 in favor of the Simons' representatives. M. Sickles & Sons struggled hard for victory, appreciating that upon the result of this match depended largely the championship of the wholesale trade. The game was played at North Cramers' Hill, N. J., but since this is the first game the house of Simons has won this season the nine of M. Sickles & Sons proposes to continue playing other nines until its reputation is re-established. Then a return game may be sought with the team of Simons, Bro. & Co. The nine of M. Sickles & Sons met the one of L. P. White Saturday, at Logan, and Simons, Bro. & Co.'s team have yet to meet teams defeated by the nine of M. Sickles & Sons.

Lancaster, Pa.

M. Dattelbaum, of Dattelbaum & Friedman, visited this city last week.

John J. Bowman, of Ezra F. Bowman's Sons, visited Philadelphia last week.

F. A. Peters, of the H. S. Meiskey Co., is home from a trip through central Pennsylvania.

A. F. Hutchler, missionary for the Hamilton Watch Co., has gone to his home in Wilkes-Barre on his vacation.

At last week's High School Alumni Association reunion and reception John B. Roth, Jr., conducted the instrumental musical exercises.

Among the jewelers visiting here last week were F. H. Ewald, Coatesville; E. P. Zane, Ephrata; J. H. Andrews, Strasburg; J. H. Senenig, New Holland; C. E. Hinkle, Ephrata.

W. E. Dudley, who came to the Hamilton Watch Co.'s factory last March from South Bend, Ind., to prepare for the manufacture of an O-sized movement, has been made assistant superintendent of the Hamilton factory.

Alfred W. Moyer, manager of the Non-Retailing Co., and Milo B. Herr, secretary of the company, with their wives, returned home last week from a four weeks' trip to the West, on which they visited Chicago, Milwaukee, Denver, Colorado Springs, Pike's Peak and the Yellowstone Park, the Great Lakes, Buffalo and Niagara Falls.

The jewelers of Haverhill, Mass., have decided to close their stores, Mondays, at 6 p. m. and on Wednesdays at 12 m., during the months of July and August and in September until the 12th inclusive.

The business heretofore conducted in Fresno, Cal., at 1119 J St., in the name of H. B. Oberlin, was recently changed to the name of Oberlin Bros., consisting of H. B. Oberlin and C. S. Oberlin, who are equal partners therein, and who are each liable as partners for all indebtedness against the business heretofore conducted by H. B. Oberlin.

Pittsburg.

P. C. Gillespie, of Gillespie Bros., sails July 16 for Europe. He will be gone two months.

Unless something unforeseen happens, E. P. Roberts & Sons expect to begin moving into their new store this week.

Harry Heeren is taking a leading part in the ball of the Washington Infantry, to be given at Luna Park, early next month.

W. R. Hill, Fayette City; P. J. Manson, Jeannette; J. F. Murphy, Dawson; Frank Bloser, New Kensington, were among the out-of-town merchants who visited Pittsburg last week.

J. R. Reed & Co. will next week begin their semi-annual inspection of the watches of the Pennsylvania Railroad lines west of Pittsburg. The inspection will require several weeks, as hundreds of watches will be examined.

Ira E. Reidenbach, 205 Federal St., Allegheny, in the suit against the Burgess and the Town Council of Ben Avon, where he lives, has secured an injunction against them, restraining the defendants from removing trees in front of his property.

Miss Esther M. Keggler, employed at Gillespie Bros., celebrated her birthday last Saturday, and in honor of the occasion she was presented with a candy cane, six feet in length, it having been ordered especially for the occasion by the clerks in the store.

W. J. Johnston, of the W. J. Johnston Co., who has been in Washington for some time, attending the sessions of Congress and listening to the debate in the House of Representatives, regarding the alleged watch combination, has returned to Pittsburg.

The Merchants and Manufacturers' Association and the Chamber of Commerce gave a joint dinner last week at the Hotel Annex, which was attended by 400 business men, some of whom were local jewelers. The dinner was held in the interest of improving local waterways. A number of visiting Congressmen were present.

Sam F. Sipe, last week, nearly lost a \$2,500 diamond ring, which had been thoughtlessly taken by a customer, who put the ring in his pocket and walked out of the store. Mr. Sipe did not discover that the ring was missing until the man had gone several minutes, and then there was a hasty chase to bring him back. The customer had called at the store to exchange a ring with one stone for one with three gems, and was in a big hurry. The bargain, for this reason, was not struck. The man laid his ring on the counter and put the three-stone ring in his pocket, and Mr. Sipe put the one-stone ring in the case. When he discovered it was missing, he sent his own son after the man, who was found a half block away. The man returned, asked what was wanted, and Mr. Sipe told him he had a \$2,500 ring which he desired. The man appeared to be greatly surprised and, after feeling in his pocket, handed it over. Mr. Sipe is, however, satisfied that the man was not attempting to steal it, "but still I feel better satisfied with the ring in the case," said Mr. Sipe.

Mr. Gates, formerly of St. Louis, Mo., has taken charge of the jewelry department of F. H. Merritt & Co., Milford, Ia.

Bigalke & Eckert Co.

UNITED STATES PATENTS.

ISSUE OF JUNE 19, 1906.

503. STEM-WINDING WATCH. NUMA BEQUELIN, Solothurn, Switzerland. Filed Sept. 16, 1904. Serial No. 224,704.
winding and hand-setting mechanism for watches comprising a longitudinally-movable operating stem, a pinion rotatable by the said stem, a series of gear-wheels driven by the said pinion,

rotated lever carrying said gear-wheels, spring-winding mechanism and hand-setting mechanism adapted to be engaged respectively by said gear-wheel in accordance with the position of the said lever, a second pivoted lever actuated by said operating-stem, two projections on said lever, one of which is adapted to engage the side of the first lever, a spring acting upon the other projection of the second spring acting in the opposite direction against the side of the said first lever.

517. SAFETY-LOCK FOR BROOCHES, SCARF-PINS AND THE LIKE. FREDERICK DRISSLER, New York. Filed Aug. 26, 1905. Serial No. 275,869.

a device of the class described, a loop-shaped hook member open at one side and adapted to receive the pointed end of a pin, a locking-arm pivoted in the base of the hook member by means

of a shank connected therewith and passing through a base, said shank being provided on the side of the base of the hook member opposite the locking-arm with a locking-finger adapted to be thrown into approximate engagement with the end of the hook member so as to complete the loop formed thereby, and means whereby the locking-arm may be engaged with the hook member when said arm and finger are in their operative positions.

555. COMB-FASTENER. GEORGE H. SMITH and JACOB STIEGLITZ, Yonkers, N. Y. Filed Feb. 18, 1905. Serial No. 246,353.
improved comb herein described having a pivot between the ends thereof, near the

edge and movable in a plane parallel with the plane of the series of comb-teeth, said hook being a finger-piece or part movable therewith in a parallel plane and adapted to lie either at the back in parallel relation therewith or to project above said edge.

570. TEA STRAINER AND INFUSER. FRANCIS N. DENISON, Victoria, Can. Filed April 21, 1905. Serial No. 256,762.
a tea infuser and strainer, the combination

with the pot and the lid having an opening therein, of a perforated tea-receptacle and a divided stem having a lower portion connected to the receptacle

and an upper lifting portion pivotally connected to the lower portion and having lateral resiliency.
823,682. SYNCHRONIZING MECHANISM FOR TIMEPIECES. AUGUSTUS L. HALL, Chicago. Filed Sept. 26, 1903. Serial No. 174,777.

The combination with a timepiece, of an escape-mechanism comprising an escape-wheel fixed upon the seconds-hand shaft and a co-operating anchor, an axially-movable shaft upon which the anchor is mounted, a radial finger fixed upon the seconds-

hand shaft, a pin fixed upon the anchor-shaft, and means for axially moving said anchor-shaft and thereby locating the anchor in a plane out of the path of movement of the escape-wheel and simultaneously locating the fixed pin on the anchor-shaft in the path of the movement of the radial finger on the seconds-hand shaft.

823,704. NAPKIN-HOLDER. JAMES SIMPSON, Crookston, Minn. Filed March 9, 1905. Serial No. 249,313.

The herein-described napkin-holder made of a single piece of resilient wire doubled to form a hook having a downwardly-directed bill, vertical spaced portions 6 at the inner end of the bill, lateral oppositely-extending jaws 3 having the

inner side portions 7 bent outwardly from the lower ends of the portions 6 and extending at right angles to said portions 6 and the outer side portions 8 bent reversely with reference to and converging inwardly toward and coming in contact with the sides 7, and the outwardly-curved finger-piece 4 connecting the ends of the outer side portions 8 of said jaws.

823,743. SAFETY ATTACHMENT FOR SCARF-PINS. ELIAS L. SCHREIBER, New York, assignor of one-half to DENIZEN H. PHILLIPS, New York. Filed Dec. 5, 1905. Serial No. 290,344.

A safety-attachment for scarf and other pins, comprising a screw provided with a head having transversely therethrough an opening through

which the pin may be passed, and a nut mounted on said screw and provided at one side with a projection or hub member having a recess adapted to receive a part of the head of the screw, the rim of the projection or hub member being adapted to bear on the pin.

823,778. DISPLAY-CHEST FOR SILVERWARE, ETC. EMIL HERBECK, Philadelphia, Pa. Filed Jan. 10, 1906. Serial No. 295,381.
A chest having a body, a lid and a swinging tray.

one of the walls of said body having an upward

extension and said swinging tray being pivotally connected with the side of said extension.

823,798. DESK UTENSIL. JOSEPH N. MAIN-GOR, Trinidad, British West Indies. Filed Oct. 3, 1905. Serial No. 281,163.

An article of the kind described comprising a tubular casing forming a handle, said casing having two compartments at the ends thereof and

being separable at a point below the upper compartment, an absorbent pad at the end of one compartment, and means as the perforated spring-pressed disks adapted to turn in relation to each other for regulating the flow to said pad.

823,894. INTERMITTENT-ALARM CLOCK. WILSON E. PORTER, New Haven, Conn., assignor to the New Haven Clock Co., New

Haven, Conn. Filed Jan. 8, 1906. Serial No. 295,067.

In an intermittent-alarm clock, the combination with a wheel of the alarm-train, of a pin carried thereby, a vibratory alarm-lever having a stop-finger for engagement by the said pin, a coupling-hook carried by the said lever, and a wheel of the time-train engaged by the said hook, whereby the lever is coupled with the said wheel.

823,905. SAFETY-PIN. JOHN C. TRAILL, Malvern, Victoria, Australia. Filed June 26, 1905. Serial No. 267,065.

A double safety-pin formed of a single piece of wire bent upon itself to form a central pocket portion and having its extremities extended into opposite pin portions, the free ends or points of

the pin portions being directed toward the pocket portion and adapted to be engaged therewith and be closed thereby, and the wire in each of the two pin portions being bent one and a half times to form springs H, H, at that end of the pin portion farthest removed from the pin-point.

823,975. DEVICE FOR FILLING FOUNTAIN-PENS. HARRY B. SMITH, Janesville, Wis. Filed Aug. 7, 1905. Serial No. 273,073.

In a fountain-pen, the combination with a handle inclosing a laterally-compressible ink-reservoir

THE WESTERN CLOCK MFG. CO.

AT YOUR JOBBER

provided with a pen-point and a lateral opening a compressible strip located within the handle having a threaded stem projected through the lateral opening thereof, and a pressure-knob mounted upon the projecting end of the stem to be as a clamp-nut, or an adjustable stop and a pressure-piece according to the position of the knob reference to the handle, threaded stem and compression-strip.

1,023. CIGAR-CUTTING PAPER-KNIFE. HENRY H. JAMES, New York. Filed Jan. 15, 1903. Serial No. 139,101.

a cigar-cutting paper-knife comprising a solid member composed of a single piece of metal having a longitudinal recess near one end, and an extended handle tapering outwardly at the opposite

a finger-pivoted in said recess having a notch at its forward end, a pressure-surface near said finger, a cigar-end cutter mounted on said finger, a spring to hold said finger outwardly, and a catch at one end of the recess to engage the finger when closed, said pressure-surface and catch being disposed in position to be actuated by the holder's thumb; a side aperture communicating with said recess whereat to enter a cigar to be cut, and an exit-opening provided below the cutter.

1,058. CONDIMENT-HOLDER. WILLIAM J. BAIN, Pierce City, Mo. Filed Oct. 20, 1905. Serial No. 283,684.

a condiment-holder comprising a receptacle, a cover mounted to rotate therein, a removable de-

vice mounted within the receptacle, and inwardly-projected arms upon said device and adapted to operate with the beater.

1,072. BRACELET. THEODORE W. FOSTER, Providence, R. I. Filed Jan. 6, 1906. Serial No. 294,933.

a hinged bracelet, a concealed hinge comprising a member having a solid body portion at the end of which extends a central arm having an end in the concave face of which is a

member forming at one end a stop-shoulder, and a member having a solid body portion from which extend two side arms supporting a cross-bar having on its convex face a stamped-up stop-teat adapted to enter the groove and engage with the stop-shoulder in the first member to limit the opening movement of the hinge.

1,073. BRACELET. THEODORE W. FOSTER, Providence, R. I. Filed Jan. 6, 1906. Serial No. 294,934.

In a bracelet, a concealed hinge comprising two interlocking members each member having a solid end from which extends a rigid arm

to be moved away to form an arm having on its inner face a groove, a lip, a raised and a depressed portion intermediate the groove and the lip, and a ring side arm parallel with the central arm and forming an intermediate space.

1,074. BRACELET. THEODORE W. FOSTER, Providence, R. I. Filed Jan. 6, 1906. Serial No. 294,935.

In a bracelet, a concealed hinge comprising a member having a solid body portion from one end of which extends a central arm having a curved portion merging into a hook-shaped end, the inner concave face and the outer convex face of the curved portion being struck from a center which is concentric with the center on which the hinge opens, and a tubular member having a hollow body portion, an open end, a closed end in which

is a rectangular opening into which the central arm of the solid hinge member extends, and a stop-pin which extends across the inner concave face of the central arm on the solid member and is secured in the tubular member.

DESIGNS.

38,087. BADGE. DAVID L. Z. MERCHANT, Portsmouth, Va. Filed March 23, 1906. Serial

No. 307,725. Term of patent 3½ years.

38,090. BACK OF BRUSHES. WILLIAM C. CODMAN, Providence, R. I., assignor to the Gor-

ham Mfg. Co., Providence, R. I. Filed May 16, 1906. Serial No. 317,250. Term of patent 14 years.

38,091. BACK OF BRUSHES. WILLIAM C. CODMAN, Providence, R. I., assignor to the Gorham Mfg. Co., Providence, R. I. Filed

May 16, 1906. Serial No. 317,251. Term of patent 14 years.

38,092. HANDLE OF SPOONS, FORKS, OR SIMILAR ARTICLES. SIDNEY A. KELLER, New York, assignor to R. Blackinton & Co.,

North Attleboro, Mass. Filed May 16, 1906. Serial No. 317,249. Term of patent 7 years.

38,093. TEAPOT OR SIMILAR ARTICLE. MURRAY B. LEETE, Wallingford, Conn., assignor to R. Wallace & Sons Mfg. Co., Wal-

lingford, Conn. Filed May 9, 1906. Serial No. 316,041. Term of patent 14 years.

UNITED STATES TRADE-MARKS.

[The following trade-marks have been adjudged entitled to registration under the Act of Feb. 20, 1905, and are published by the Patent Office in compliance with Sec. 6, of said act, which provides: "Any person who believes he would be damaged by the registration of a mark may oppose the same by filing notice of opposition, stating the grounds therefor, in the Patent Office, within 30 days after the publication of the mark sought to be registered, which said notice of opposition shall be verified by the person filing the same before one of the officers mentioned in Sec. 2, of this act. If no notice of opposition is filed within said time the Commissioner shall issue a certificate of registration therefor, as hereinafter provided for."]

(ABRIDGMENTS OF SPECIFICATIONS, 1905, FROM THE Illustrated Official Journal.)

ISSUE OF JUNE 14, 1906.

2,790. CLOCKS. C. F. STAHLER, Newington, Middlesex. Feb. 10.

Striking-Mechanism; Chimes.—The main arbor *b* of the striking-train is prolonged beyond the rear plate, and carries the locking-wheel *c* and two pins

wheels *d*, which carry pins on each face for tripping the tails *e* of four hammers *f*. A lever *a* for operating the hour-hammer *m* is lifted and dropped by a pin on the locking-wheel.

2,975. MATCH STANDS. J. A. BRANDER, Sittertal, near Bischofzell, Switzerland. Feb. 13.

Match stands have bodies grooved for the reception of the matches, which are held in place by resilient plates, friction surfaces being placed between the plates and the matches, which are ignited on withdrawal. The matches *c*, Fig. 2, placed in the grooves *b* are held in place by steel plates *f* fixed to holders *h* mounted on longitudinal

axes *f*, catches *m* being fixed to secure the holders in position. The paper *k*, provided with a friction surface, is held against the matches, and the recess *u* receives ash, cigar ends, and the like. In the modification, of which Fig. 4 is a back view, there is only one row of matches, and the steel plate is fixed to a support *p* hinged to the body of the stand and kept in position by a lug on the catch *x* fitting into a recess between the back of the support *p* and a plate *s* screwed to it. If desired, a cigar-cutter may be combined with the match stand.

3,046. BELTS FOR PERSONAL WEAR. F. SALMON, London. April 12.

The belt *a*, Fig. 1, having a buckle *b*, is threaded through slots *g*, *h*, *i*, *j* in the plates *c*, *d*, Figs. 3 and 4, and is fastened by means of pointed

tongues *l*, *k* or by sewing. The plates *c*, *d* are provided with pins *e*, *f*, *o* to hold down the blouse or bodice, and with hooks *m*, *n* which engage the skirt-band and hold up the skirt. In a modification, the plates are sewn to the inside of the skirt-band, the hook being dispensed with.

3,052. UMBRELLAS, WALKING-STICKS, ETC. E. A. MITCHELL, Sussex. Feb. 14.

The sticks of umbrellas, parasols, sunshades and

the like are provided with detachable end-parts *c*, *d*, which are secured by the threaded tubes *e*

screwing upon the extensions *b*. Walking-sticks may be made similarly in three or more pieces.

[Reference has been directed under Patents Act, 1902, to Specification No. 21,147, A.D. 1894.]

3,059. CALENDARS. J. BALLANTYNE, Boston, Mass., U. S. Feb. 14.

In a clock-driven calendar, three annual discs carrying days of the month, months and days of the week are respectively connected to three gear-wheels, *a*, *b*, *c*, Fig. 2, by coaxial spindles. These gear-wheels have 31, 12 and 7 radial slots, separated by curved recesses, and are driven intermittently by pins on a clock-driven shaft *d* rotating once in 24 hours. The week-wheel *a* is driven directly from the clock-shaft, but the year and month wheel *b*, *c*, engage alternatively with pins 23 on a sleeve 25 which rotates with the shaft *d* but can slide along it. The month-wheel *c* carries an ear on each side, these ears 33, 34 engaging at different times with disk cams 31, 32 on the sliding sleeve 25, and throwing this sleeve into or out of engagement with the year-wheel *b*. A segmental flange 52 on the month-wheel prevents this from occurring prematurely. These fixed ears act for the months of 31 days. When the year-wheel *b* is being driven, a projection 29

on the sleeve meets another projection 30 on the month-wheel *c* and moves this wheel forward until the first day of the month is indicated. For short months, a swinging ear 37 on the month-wheel *c* is provided, which is locked by a lug 40 on the year-wheel *b* at the end of each 30-day month, and acts like a fixed ear. For the month of February, a movable lug 41, Fig. 5, is provided on the year-wheel, this lug being attached to a lever 43 pivoted to the axle of the wheel. The other end of this lever 43 has a pin engaging in a cam-groove of a gear-wheel pivoted to the year-wheel and engaging a fixed central gear with a different number of teeth. By this arrangement, the movable lug is made to lock the swinging ear a day late every four years.

3,134. BRACELET FASTENINGS. T. WILCOX (trading as M. Wilcox & Son), Birmingham. Feb. 15.

GENEVA, SWITZERLAND.

If You Know the Marks

you are not confined to the limitations of your stock, but will be able to supply any goods desired. Frequently a resident of a town or city will return from a visit to a larger city, bringing back an attractive novelty or piece of jewelry that is greatly admired by her friends, who will probably want to obtain others like it. They will first call on the local jeweler and if he is not an up-to-date jeweler he will turn them away disappointed because he has not the articles in stock. If, however, he is a progressive dealer, he will examine the trade-mark on the article, identify the maker and send for a line on memorandum. He will tell his prospective customers that he has not the goods in stock just at present, but will have them in a few days. He will make a sale, and ever sale counts. But more than this, he will agreeably surprise and please his patrons and will convince them that it is not necessary to go out-of-town to obtain the latest and best productions of the jeweler and silversmith.

"TRADE-MARKS OF THE JEWELRY AND KINDRED TRADES"

(Second Edition)

will enable the jeweler to identify the maker of any article embraced in the jewelry and kindred trades. It illustrates 4,000 marks and covers every branch of the trade. It also contains much interesting and valuable reading matter on the subject of trade-marks in general.

One jeweler, after having the book for a while, wrote: "This book has been invaluable to me upon many occasions. Like the cowboy's pistol 'tis not required every day, but when needed it is wanted quite bad."

Amendments to Trade-Mark Law Which Went Into Effect July 1.

WASHINGTON, D. C., June 30.—The act for the amendment of the trade-mark laws will become operative July 1. Under its provisions it is amended so that the act reads:

That the owner of a trade-mark used in commerce with foreign nations, or among the several States, or with Indian tribes, provided such owner shall be domiciled within the territory of the United States, or resides or is located in any foreign country which, by treaty convention, or law affords similar provisions to citizens of the United States, may obtain registration for such trade-mark by complying with the following requirements: First, by filing in the Patent Office an application therefor, in writing, addressed to the Commissioner of Patents, signed by the applicant, specifying his name, domicile, location and citizenship; the class of merchandise and the particular description of goods comprised in such class to which the trade-mark is appropriated; a description of the trade-mark itself, only when needed to express colors not shown in the drawing, and a statement of the mode in which the same is applied and affixed to goods, and the length of time during which the trade-mark has been used. With this statement shall be filed a drawing of the trade-mark, signed by the applicant, or his attorney, and such number of specimens of the trade-mark as actually used as may be required by the Commissioner of Patents. Second, by paying into the treasury of the United States the sum of \$10 and otherwise complying with the requirements of this act and such regulations as may be prescribed by the Commissioner of Patents.

The second section provides that the Commissioner of Patents shall establish classes of merchandise for the purpose of trade-mark registration, and shall determine the particular description of goods described in each class. On a single application for registration of a trade-mark the trade-mark may be registered at the option of the applicant for any or all goods upon which the mark has actually been used comprised in a single class of merchandise, provided the particular description of goods be stated.

It is further provided that any owner of a trade-mark who shall have a manufacturing establishment within the territory of the United States shall be accorded, so far as the registration and protection of trade-marks used on the products of such establishment are concerned, the same rights and

privileges that are accorded to owners of trade-marks living within the territory of the United States.

The following are the classifications of interest to the trade:

- Class 2. Mineral raw materials.
- Class 4. Abrasive and polishing materials.
- Class 59. Horological instruments.
- Class 61. Jewelry, solid and plated precious metal ware, and fine cutlery.
- Class 64. Optical instruments.
- Class 66. Objects of art and ornament.
- Class 72. Merchandise not otherwise classified.

Jewelry, Silverware, Clocks, Watches and Kindred Lines Exported from New York.

WASHINGTON, D. C., June 27.—The following were the exports of jewelry, silverware and optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

- Berlin: 1 package jewelers' sweepings, \$200.
- Bombay: 13 packages clocks, \$406; 39 packages clocks, \$525; 1 package watches, \$102.
- Bremen: 2 packages watches, \$915; 1 package clocks, \$107.
- Brisbane: 4 packages plated ware, \$136; 29 packages clocks, \$799.
- Buenos Ayres: 8 packages plated ware, \$735; 1 package watches, \$2,233; 3 packages clocks, \$295.
- Calcutta: 45 packages clocks, \$1,552; 1 package watches, \$270; 1 package jewelry, \$166.
- Callao: 2 packages jewelry, \$130.
- Colon: 2 packages watches, \$140.
- Genoa: 1 package jewelry, 500.
- Glasgow: 52 packages clocks, \$420.
- Hamburg: 3 packages clocks, \$456; 12 packages jewelry, \$199; 5 packages optical goods, \$856; 1 package optical goods, \$180.
- Havana: 63 packages clocks, \$607; 2 packages plated ware, \$145; 9 packages clocks, \$212.
- Havre: 3 packages optical goods, \$10,400; 2 packages jewelry, \$500.
- Launceston: 10 packages plated ware, \$643.
- Liverpool: 1 package plated ware, \$1,110; 1 package watches, \$1,000; 1 package jewelry, \$165; 3 packages plated ware, \$441; 70 packages clocks, \$1,901; 2 packages watches, \$600; 2 packages jewelry, \$1,021; 4 packages thermometers, \$195.
- London: 6 packages optical goods, \$2,246; 37 packages watches, \$6,457; 1 package jewelry, \$185; 3 packages scopes and views, \$527; 344 packages clocks, \$3,912; 62 packages clocks, \$1,692.
- Manchester: 28 packages clocks, \$189.
- Melbourne: 87 packages plated ware, \$5,899; 817 packages clocks, \$11,253; 6 packages optical goods, \$591; 7 packages scopes and views, \$1,050; 11 packages watches, \$1,390.
- Rio de Janeiro: 67 packages clocks, \$874; 1 package optical goods, \$100.
- Southampton: 1 package watches, \$660.
- Valparaiso: 1 package jewelry, \$257; 16 packages clocks, \$672; 4 packages plated ware, \$309; 3 packages watches, \$858.
- Vera Cruz: 6 packages plated ware, \$595.

A. E. Sipe, importer of diamonds, Buffalo, N. Y., takes great pride in devising new and novel advertising methods. He has attracted much local attention by his clever designs, the latest of which is well in line with his previous efforts. It is in the form of a match box for hanging on a wall, bearing these most pertinent inscriptions:

Rings That Make Matches.

If You Have the Girl, We Have the Ring.

Get Busy!
Strike a Match and Buy Your Diamonds, Watches and Jewelry at Our Store.

Mainspring Don'ts

Simple Hints for Those Who Handle Mainsprings

Don't fail to provide yourself with the best mainspring winder that can be obtained. See that the hooks on all arbors of the winders are no longer than the thickness of the thinnest spring, and thus avoid kinking, and therefore unnecessary breaking of mainsprings.

Don't use a mainspring that is too long, because it fills the barrel and prevents that part, or the mainwheel, from making the required number of revolutions, with the consequence that the watch will not run as it should after each winding.

Don't use a mainspring that is too strong, because it will set, increase the percentage of breakage and injure the watch.

Don't use a mainspring that is too wide, and be sure that the tip and brace do not extend beyond the limits of the cover and barrel.

Don't forget that a mainspring should not occupy more than one-third the diameter of the barrel, thus leaving two-thirds to be divided between the arbor and winding space, to enable the watch to run about thirty-six hours.

Don't expect a mainspring to be flat if you put it in the barrel with the fingers. This method usually injures the spring, gives it a cylindrical form, and thereby increases the friction in the barrel.

Don't bend the inner or outer end of the mainspring with flat-nosed plyers, but provide yourself with specially made round-nosed plyers which will give a circular form to these parts, prevent short bends, contract the inner coil, and thus secure a closer fit to the barrel arbor without injuring the spring.

Don't expect other than a properly fitted flat mainspring with rounded edges to produce the least friction in the barrel, allow the greatest amount of power to the train, and give the best results as to time, service, etc.

Don't expect a mainspring to always endure extreme changes in temperature, or electrical disturbances, or straightening at full length, or neglect from lack of cleaning and oiling.

Don't expect a watch that needs cleaning or other repairs to run satisfactorily by merely putting in a new mainspring.

Don't expect a mainspring to plough through too much dirt.

Waltham Watch Company

Waltham, Mass.

THE HOROLOGICAL REVIEW.

Some Key Watches Which Have Been Converted Into Stem Winders.

Translated expressly for THE JEWELERS' CIRCULAR-WEEKLY from the *Deutsche Uhrmacher Zeitung*.)

EVEN a cursory glance at the key watches converted into stem winders, illustrated herewith, will make it evident that all the competitors for the prizes which were offered have made use of the rocking bar. In fact, if we have to select a winding mechanism as nearly universally applicable as possible for the conversion of key watches, it will be difficult to find one better adapted to the various types of the latter. Whether

kind have often been described, and if we select one or two of Mr. Verinda's conversions, we do so principally because they are representative of types of watches frequently met with, viz., an ordinary gentleman's cylinder watch and a lady's watch by Vacheron and Constantin.

With both watches, there being no seconds hand, it was possible to turn the work in the case so as to obtain a favorable position for the barrel core or collet. In the

latter is provided underneath with a projecting, turned boss, which serves as a pivot for the wheel, b. In the lady's watch this steel plate (c, in Fig. 3) covers the entire barrel bridge, as well as the large, flat winding wheel, a, which, therefore, needs no washer. In Fig. 1, a new click spring, d, is inserted; in the lady's watch the old click work has been retained.

Both these conversions are very simple and very good, but, as we have said before, this winding system can only be applied in special cases; as a rule, especially when, in order that the seconds-hand may be kept in the right place, the work must not be turned in the case or when the barrel lies too close to the new winding arbor which is to be inserted, the rocking bar mechanism must be used. This, for instance, is al-

FIG. 1.

FIG. 2.

watch shown in Figs. 1 and 2, the plate on the dial side had to be provided with two recesses to receive the two set-hands wheels, d and e, and the curved slot for the click spring, f. The adjustment of these parts was still more easy with the Vacheron watch, because in this watch, as is known, the plate is recessed on the dial-plate side; accordingly Fig. 4, which shows the dial-plate side of this watch, scarcely allows it to be seen that a transformation has been made. To obviate a lateral movement of the spring, f, a small steel plate is inserted in a small cavity at g (Fig. 2), while a stop-screw, a', fulfils the same purpose in Fig. 4.

Let us now consider the arrangement of the winding wheels on the upper side of the work. In both watches the winding wheel, b, is placed between the bridges of the barrel and the center wheel (the two bridges are slightly recessed for this purpose), and kept in position by the steel plate, c. The

FIG. 3.

ways the case with the well-known Vacheron watches. In the latter, the barrel is almost exactly under the crown, and it would be impossible to find room for the movable set-hands pinion without previously turning the work in the case.

A perfectly successful transformation of this kind is shown in Figs. 5 and 6. It was designed and very neatly executed by H. Veringa, eldest son of the M. Veringa mentioned at the beginning of this article. As the action of this mechanism is made sufficiently clear in illustrations, we will merely make a few remarks on some details of the work.

To give a secure position to the winding wheel, a, the space between the barrel bridge and the rim of the case was filled by a suit-

the necessary space for the winding and set-hand wheels is found on the dial side or the reverse of the work; whether the barrel center is close to, or at a distance from, the winding arbor, the rocking bar can always be made of such a shape as to be easily adjustable to the existing arrangement. It would, however, be an error to conclude that recourse must always be had to the rocking bar in these conversions.

Every one who has had practical experience in this kind of work and with different kinds of watches, will be convinced that it will not do rigidly to adhere to one system. Where space and the situation of the barrel center allow, the result will be more quickly and better arrived at with a Bréguet winding device. Transformations of this

SAN FRANCISCO OFFICE, 206 Kearny St.

the steel bridge, k (Fig. 5), recessed underneath. It should be noticed that the click spring has been discarded. The steel bridge, therefore, immediately joins on to the barrel bridge. The wheel, b (Fig. 5) is mounted on the upper end, and the center wheel, c (Fig. 6) of the rocking bar on the lower (front) end of the arbor, e. The construction of this arbor was by no means an easy task; on the careful and scrupulously accurate manner in which this was done mainly

FIG. 4.

depends the durability and the value of the mechanism.

The click work is now on the dial side. To make room for the wheel, e, and the motion of the rocking-bar, the barrel cover is turned down a little and the stop-work dispensed with. This arrangement of the winding mechanism was intended to give a secure support to the barrel-core, also on the dial side; for this purpose, Mr. Veringa

FIG. 5.

applied the large, flat steel bridge, f (Fig. 6), in which runs the pivoted shoulder of the ratchet, e. The click spring, g, is supported laterally by this bridge. To connect the push piece of the set hands work and the rocking bar, w (Fig. 6), the steel lever, i, pivoted on the stop screw, i, is inserted. Finally a specially unique conversion may be noticed. Although the idea on which the construction shown in Figs. 7 and 8 is based

is an old one, its application to the conversion of key watches into stem winders may be regarded as one of the most recent novelties. As this arrangement may be unknown to many younger watchmakers, a few words of explanation may not be out of place.

The chief part of this mechanism consists of the rocking bar, a b (Fig. 7), having its center of motion at e and carrying the double-toothed wheel, e f. The outer teeth, e, of this wheel, have the usual epicycloidal form and engage with the wheel, h; the latter is fixed to an arbor, which carries the wheel, k, on the dial side (Fig. 8). The inner teeth, f, are pointed, like those of a ratchet wheel, and are geared with the ratchet, g, which is screwed on to the barrel core.

Both these ratchet teeth systems are cut somewhat conically; by this means the rocking bar is continually moved a little toward the barrel bridge during the winding. By this method of toothing, not only the reverse turning of the button, but also the construction of the inner teeth (which in this case had to be made by hand) are facilitated. The spring, d, which is filed out of one

FIG. 6.

piece, like the rocking bar, keeps the two systems of ratchet teeth in gear.

This connection can only be broken by pressing the push-piece; the rocking bar, with the double-toothed wheel, e f, is then made to turn and the outer teeth engage with the pinion, i, fixed on the set-hands arbor. With the arrangement shown in the illustration, the push-piece had to be placed somewhat obliquely (see Figs. 7 and 8), so as to prevent any undue strain on the rocking bar, which is bent a little at b (Fig. 7), in order to give a proper surface for the push-piece to work upon. A small steel bridge is screwed in at l to receive the pivot of the winding arbor.

Although the drawbacks of the winding arrangement with inner teeth have long been known, and Mr. Veringa in applying it to the watches which we have described was principally actuated by the desire to produce something new, it must be confessed that when the watch is opened, the click work presents a most interesting appearance and works surprisingly well, and moreover, ensures a smooth winding, which is the essential feature sought.

Some Experiments Recently Made With a Seconds Pendulum.

(A paper read to members of the Municipal School of Technology by T. D. WRIGHT.)

(Continued from issue of June 27.)

It would also appear reasonable to suppose that the density of the atmosphere would change similarly in each case when the temperature was raised, unless the

FIG. 7.

room, being more open to external barometric influence, maintained its density in spite of the higher temperature. It does not seem probable, and I am not well enough acquainted with this branch of physics to give a reliable opinion.

Only one other natural cause suggests itself to me. The case is heated by hot water, and although there is no leakage, the air in the case may be much more humid than that outside.

FIG. 8.

Some time after I had completed the experiments that caused me to contribute an article to the *Horological Journal* of July, 1904, on the behavior of watches in Southern Nigeria, and the curiously consistent gain on their rates of all the watches while in Africa, I was informed by the military officer conducting the survey, that at no time had those watches been any great distance above the sea level, that it was a

SUMMER WATCH-SELLING CAMPAIGNS

MIDSUMMER may witness some falling off in the sales of ordinary lines of Jewelry. Such a staple article as the Watch, however, is less affected by the changing seasons. Is not this, therefore, a good time to emphasize Watches? Opportunity is afforded to appeal, not merely to your regular constituency, but to the great army of tourists and Summer visitors. Such activity paves the way for larger business the coming season.

where very little barometric change occurred, and that for all practical purposes I might assume the pressure to have been constant. The only information I could obtain of any difference of climate that might have a bearing on the subject was that it was a very moist atmosphere, where one lived in a perennial vapor bath.

Does increased humidity decrease the resistance to the motion of a balance or pendulum through the atmosphere? If so, and the alteration in the arc of my pendulum solely due to this cause, a pendulum in a room heated by some dry method will not move in the same way. Reid observed the changes as I noticed, but he does not know how he obtained the higher temperature, nor does he say he obtained them by special means at all.

Finally, the change that time has brought about in the expansion of the nickel steel. I have this matter has been troubling Dr. Laume. My rod had undergone some annealing process of annealing, but I went and from Mr. Baugh that a more elaborate system of "artificially ageing" the material is now found necessary. Can we be sure that any such system can permanently keep it? At what "artificial age" may we consider the material "grown up?" Further processes of preparation may delay the inevitable, but no one dare yet say that the process will permanently cure the unfortunate tendency to change.

It is a matter that concerns us very closely. A large number of high class watches and chronometers have been made with "in" balances and have obtained high positions in the official trials. Will these balances in the course of a year or two undergo the same sort of changes and prove to be under-compensated? Will they need re-adjusting for temperature every year or until the superior expansion has dwindled so far that they fail to compensate at all? I trust not, but can any one be quite sure? The balances have been in use long enough for some evidence to be forthcoming.

All the watches obtaining high marks in compensation two or three years ago obtain equally high marks now without frequent adjustment for temperature error? This question should be easily answered.

It is expected that within the course of a few months there will either be a new clock in the tower of the City Hall, Chester, Pa., or the one which is now there will be replaced. The matter is now in the hands of the Public Property Committee of City Councils and bids will be asked, both for repairs to the present clock and for a new clock for the tower. The present clock has been in service for the past 40 years. It was installed by Joseph Ladomus and he told the city solons that it would require about \$125 to make the necessary repairs and then he could not guarantee that it would run for more than three or four years at the most. A new clock, he estimated, would cost about \$500. Advertisements have been issued and proposals received for both repairs and a new clock, and it was believed they would be in readiness for the consideration of Councils at the meeting which was held on Monday evening July 2.

The Little Things That Stop Watches.

(By CHARLES PECK, Ottumwa, Ia., before the recent convention of the Iowa Retail Jewelers' Association, in Des Moines, Ia.)

IT is not the large objects which cause a watch to stop, that are hard to locate, but, rather, as the subject would indicate, the little things, which give watch repairers the most trouble. I will start from the barrel and work toward the escapement. Very often the stoppage of the watch may be due to mainsprings having a T end, which is so long that it extends both beyond the barrel and barrel cover, coming in contact with various parts of the movement as the barrel makes its revolution. We have all noticed, no doubt, the endeavor some genius of the craft has made to shorten a T end after the mainspring was in place; usually the barrel received most of the filing. A mainspring that is too narrow will in time either work up or down, leaving one of the T ends project through, while a mainspring which is too wide will be unable to uncoil properly, causing the watch to stop.

My attention was recently called to a barrel hook which had worked outward until it came in contact with the center pinion, completely stopping the watch. Some watches are caused to stop by the fact that the barrel arbor has no end shake. The barrel being out of upright, thus causing the barrel to drag at some particular place, is sometimes found to be the cause of stopping. A mainspring which has been wound in with the fingers instead of a mainspring winder will sometimes present the appearance of a funnel, causing great pressure on both bottom of barrel and cap, undue friction in uncoiling, great loss of power, and unsteady power.

Passing on to the center wheel, we may find some things which will cause the watch to stop. The center wheel may not be true in the flat or the center staff that projects through the bottom plate may be bent, in which case the minute hand will rub on the glass in one place and on the dial in another, causing friction and catching of the hands.

Passing on to the fourth wheel, we sometimes find too much end shake due to various causes. This will give the second hand quite a degree of play, causing it either to drag on the dial or project up far enough to come in contact with the other hands. We will occasionally find a train wheel which is out of round, destroying the proper depth of wheel and pinion.

As we get to the escapement we can find a great many things which will cause the watch to stop. For instance, we take off the dial so we can observe the action of the escapement through the peep holes in the bottom plate. The escapement may seem to have plenty of lock while in full motion, but if we hold the balance and very slowly let the scape wheel drop, we may discover there is practically no lock at all and the safe appearance of the action, while the watch was in full motion, was due to the run on the pallet after the tooth had dropped. Now, if the guard pin is slightly back, giving great freedom between guard pin and roller, and through some jolt or jar the lever was slightly moved from the banking screw, the lock would not be suffi-

cient to hold safely. The result would be the overbanking of the watch.

We sometimes find one escape wheel tooth slightly longer than the other. The watch will escape on all teeth except this one. If a watch is banked up very close, so it will just escape without any run to mention, it may sometimes stop on account of the banking screws being bent toward the lever instead of being turned by the thread. For instance, if there is just enough freedom between lever and banking screws for the watch to escape and the watch was turned over, there being excessive shake to the lever, the points of the banking screws being bent in toward the lever, it would stop the fork from having the latitude of motion which it had before, so the tooth of the escape wheel would not leave the pallet stone.

A roller jewel which is slightly loose, just firm enough to stay in place when the watch is in one position, will sometimes cause difficulty in discovering the cause of stopping.

A watch came under my notice the other day which was caused to stop in a peculiar manner. This movement was an 18 size lever set; the screw which held the lever in place was slightly loose, which caused the lever to raise up enough to allow the spring which holds the lever in place, when not in use, to come in contact with the minute wheel, which would carry this spring up as far as the yolk and stop the watch.

Oil under the minute wheel causes a loss of power, as this wheel is very hard to remove when there is oil between it and the plate. Another thing which is a great source of trouble is a shifting dial which will allow it to shift enough to rub on the bit of the second hand. Sometimes a dust band will drag on the barrel, causing the watch to stop.

Horological Notes.

A "GRANDFATHER'S clock," made in Boston, Mass., nearly 200 years ago and an heirloom in the family of Robert T. Murphy, of 82 Alexander St., has been sent by Mr. Murphy to a niece as a wedding present. The clock is over seven feet high and is one of the best specimens of its kind in existence.

W. E. Howard has discontinued business at Chatham, N. Y., and purchased a store in Philmont, in the same State.

It frequently happens, especially during long tours that automobilists are troubled with accumulation of fine dust and grit that find their way in some manner to the working parts of their watches, says an exchange. A good way to avoid this annoyance is to open the front case of the watch and with a match, cut chisel-shaped at one end, apply a thin coat of vaseline all about the seat of the case where the lid fits. When this is done treat the back lid of the case in the same manner. Only a small quantity of vaseline is required, just enough to make an unbroken film of it all the way round, and it will make the watch dustproof at these points. At the end of a month or six weeks open the cases and you will be surprised at the amount of dirt that has collected at the edges of the case. This removed, the treatment as outlined above can be repeated.

OPTICAL DEPARTMENT

Myopia.

MYOPIA, according to its nature, may be very dangerous or merely inconvenient. If of the progressive type it constitutes the worst form of ametropia; if it causes blurred distant vision, but no myopic effects, and presents a number of stages for close work. The myope, for instance, will be able to read, or perform close work, for hours without the least sign of fatigue appearing; if he be a myopic he sees with his naked eye as well as many emmetropes or hypermetropes would see with an average power of vision. This apparent magnification perceived by a myopic eye, is due to the size of its retinal image, which is much larger than in emmetropic or hypermetropic vision on account of the necessary nearness of the eye to the object, and of the dioptric power of the refractive media.

A trustworthy rule for regulating the correction of myopia has never been established. That is, there is still doubt as to whether we should give myopic cases the use of a partial correction. There is also doubt as to the real cause of progressive myopia. Some believe that it is hereditary, the sufferer having inherited a weak ocular coat, which is unable to withstand many intraocular pressure and which, therefore, keeps stretching, causing an increase in the length of the eyeball, with the accompanying myopia. Others claim that an unusually wide pupillary distance often causes progressive myopia because of the inefficiency of the converging power that would naturally accompany a wide pupillary separation.

There be any truth in the theory that a lack of converging power causes myopia to progress, optometrists will have given a boost to mankind (that part of it, at any rate which is myopic), in the perfection of which they are carrying prismatic exercises, for the ocular muscle. Thus, if lack of converging power be a cause of progressive myopia, the proper exercise of the internal recti will, by developing them, produce the necessary converging power and eliminate, thereby, the danger from increasing myopia.

It is not safe to assume, however, that developing the interni would in itself suffice to check the myopia; it would be necessary to wear the minus correction, not only while exercising the muscles, but at all times.

The query at once arises, how shall we select myopic cases—shall we give full or partial corrections? It is generally conceded that there is no universal rule, as

even in cases where conditions seem precisely similar one patient will stand full and the other only partial correction. Others claim that the higher cases should be fully corrected, while the lower cases should be advised to get along as well as possible without glasses.

One thing seems settled, namely, that should any myopic astigmatism exist in connection with the myopia, both should be fully corrected if the patient can possibly tolerate it.

If the effort at converging causes an increase in myopia, it is no less certain that by means of a concave lens the far-point is made to recede, in which case there is less convergence called for, and less chance, therefore, of the myopia increasing through this cause.

The writer's practice is to give as full a correction as tolerable in all cases for distance rise, but in high cases, above 6.00 dioptries, to order a weaker correction for reading use if deemed necessary. The older the patient the more apt is this weaker reading lens to be needed. For reading a -3.00 D. is usually deducted from the distance, unless presbyopia is present, in which case 1.00 D. more, in addition to the 3.00 D., is deducted for reading from the full distance correction.

In a case where the patient is over 40 years of age, has never worn distance correction, and whose error is less than 1.00 D., it is safe to give no distance correction. In younger cases, if you are sure it is real myopia, it seems wisest to correct any and all errors.

Optical Notes and Briefs

Cross & McCullough, Fargo, N. Dak., will soon start the manufacture of optical goods in Crookston, Minn.

E. E. Thomas, representing the Milwaukee Optical Mfg. Co., Milwaukee, Wis., was a visitor in Omaha, Nebr., during the past week.

Frank Dalton and wife, superintendent of the Columbian Optical Co., Kansas City, Mo., paid the branch in Denver, Colo., a visit recently.

A correspondent informs us that John Wimmer, of Indianapolis, Ind., has improved the Kryptok invisible bifocal lens. The new form, instead of being cemented, is welded so as to make it practically solid, with none of the disadvantages of the old form of solid bifocal. It is claimed that the new lens is absolutely achromatic, and is the only one with but two curves that possesses all these advantages.

Squint.

Speaking editorially in the *Ophthalmic Record*, Francis Valk states that the treatment of squint by oculists stands to-day where it did 20 or 30 years ago. That is, that the surgical treatment for squint is the same to-day as it was formerly by reason of the fact that all surgical procedures seem to be based on the principle that the case presents certain deviations of the optic axes, and an operation is advised merely for the purpose of correcting this deviation, regardless of the visual acuity, the rotation of the eyes in the field of vision, and the presence of acquired or congenital amblyopia.

To illustrate, it is still advised in a case of squint to perform tenotomy on one of the internal recti, and should this fail to give parallelism, then to cut the internal rectus of the other eye and so on indefinitely until the optic axes become parallel, with or without binocular vision as may happen. Then if an over-correction is produced, why just operate again and put it back. Valk sums up as follows: That every case of convergent or divergent squint must be studied from the standpoint of what may be the conditions of that particular case, and no operation performed until those points are settled. He does not think every case of squint must be subjected to operation, but that the visual acuity, the prospect of obtaining binocular vision, the field of vision and the mobility of the eyes, the degree of squint, and the age of the patient must be considered in all their bearings on the case, and then suitable operative procedure may be advanced with much greater prospect of securing that most desirable condition, true binocular vision and fixation.

It is edifying to optometrists to note that operative treatment in cases of squint is gradually falling into disuse and that such cases are being more successfully dealt with by means of lenses and prisms.

Of course with the passing away of tenotomy, passes one of the choice methods of oculists for extracting high fees, but there are a sufficient number of scrupulous men in the profession, it is to be hoped, to set a pace wherein the patient's welfare will come before the doctor's fee, and surely far too many ocular muscles are made useless by this wholesale operation idea now in vogue. The best results are at best only temporary in most cases, because to cut a muscle, nerves must necessarily be cut, which means that though all may seem well at first, the muscle so cut will in the course of a few years show signs of paralysis, and this

ans the same squint or worse, and only spoiled muscle left with which to com-

Some remarks made by Dr. H. F. Hansell led to throw light upon this subject, wherein he admits that above 75 per cent. the cases of functional internal squint due to uncorrected hyperopia, and in a portion of these cases, if seen early in life, the squint may be cured by the rest of the ciliary muscle obtained by wearing proper hyperopic correction.

This being the case, the advocates of uncorrected tenotomy will find it rather difficult to reconcile their practices to true scientific and optometrists may feel justified in warning any cases of squint with which they come in contact, to insist on having the dangerous methods employed and proven useless, before submitting to operative treatment.

A New Invisible Bifocal and the Old.

It is reported that an improved form of invisible bifocal lens is about to be placed upon the market. Perhaps the form of invisible bifocal best known at present is that made under the Boršch patent and named the "Kryptok." This lens consists of three parts, cemented together with Canada balsam; there is no ridge, as the segment is a lens of a higher refractive index, between the two larger pieces. It is claimed, however, that a recent improvement made in these lenses will make them almost perfect in many respects.

There is also the invisible bifocal called the "Kantseum," which, it is claimed, is made by an entirely new process. Cement is used, but only over the area covered by the segment, whereas in the "Kryptok" the entire lens area, both "distance" and "near" is covered with cement. Thirdly, the "Bisight," claimed to be the only invisible bifocal ground in one piece, and in which the upper and lower each perfectly centered.

The new invisible form will have no cement, and will consist of only two pieces of glass. Not being a one piece bifocal, it has none of the bad features found in the usual form of "solid" bifocal, and not being a "cement" bifocal another disagreeable feature is also eliminated.

It consists of a disc or segment of high-refracting flint glass set into the main lens of crown glass, and secured so as to become, virtually, a part thereof. It has the smooth and uniform surface of the single lens.

Many improvements along the line of invisible bifocals may be naturally looked for, as much as bifocals are coming into much more general use. A belief was prevalent that bifocals were not good for the eyes, but this is not so and the public is learning the truth rapidly. But while you may convince a patient that the bifocal is not injurious to his eyes, you cannot convince him (or, more particularly, her) that the regular visible bifocal is not unsightly. Again, as bifocals are properly associated with advanced years, people do not care to wear them and thereby advertise the fact that they are past the prime of life.

E. L. R.

Thus, both pride and utility call for invisible bifocals and in view of the vast strides made in the last few years, one might almost say months, it is safe to predict that this form of lens is destined to be brought to a high state of perfection. It will behoove optometrists to keep "up-to-date," in the strictest sense of the term, on the subject of invisible bifocals. R. Y. U.

Anatomy of the Nervous System.

(Lecture recently delivered before the Rochester Optical Society by DR. RALPH H. WILLIAMS.)

(Continued from issue of June 20.)

THE secretory nerves are those which cause secretion in the glands to which they are distributed, such as the salivary glands, pancreas, gastric, sweat glands, etc.

Trophia nerves, which accompany every nerve trunk in the body, control the nutrition of the part which they supply.

The function of nerves has been studied by a system of section and stimulation. Divide a nerve at both its central and peripheral end, if it be a motor nerve, stimulation of the central end will cause no result, whereas stimulation of the distant end will result in the usual muscle contractions governed by that nerve. If a sensory nerve be severed and the distant end be stimulated nothing will ensue, but if the central end be stimulated there will result pain, referred to the termination of that nerve and perhaps the normal reflex muscular action that would be brought about by the stimulation of that nerve. It is in the same manner that the other varieties of afferent nerves have been discovered.

Another aid in studying nerve paths and tracts is degeneration. When a nerve is severed it immediately begins to degenerate on the side away from the center or cell from which it originated. No matter how far the end of a nerve may be from the cell from which it originated, it still receives its nourishment to a considerable degree from that source and, if separated from it, will die and degenerate. Thus when a nerve is cut, both the brain and spinal cord remaining healthy, the peripheral end of the nerve loses its function at once and within two or three days degeneration of the distant portion of the nerve begins to progress. It does not begin to disintegrate at one end, but it commences simultaneously in all portions of the nerve at one time. Fatty degeneration of the nerve ensues.

Such a nerve will become regenerated; it is practically a new nerve, however, and is of slow development. It will require four weeks after it has been severed before it will begin to grow out again. The process is not complete and sensation will not be restored to the part affected for a period of about three months. This process can be materially hastened in the case of large nerves by the surgeon's suturing them together. It seems to make it easier for the new nerve to follow out along the path of the old one.

Nerves are spoken of as irritable. This is not in an abnormal sense at all, for a nerve must possess a certain irritability to maintain its function and any increase or diminution of that irritability will cause pathological changes in the parts affected. This irritability is controlled by two things.

First, by the continuity of the nerve, that is, the absence of any mechanical interference with the passage of impulses along the nerve, and second, by its nutrition.

There is one important fact which should be brought out and which is so outrageously ignored in the general consideration and treatment of diseases. The first effect of a diminution in the nutrition of the nerve or its center is to increase the irritability of that nerve, thereby increasing the activity of its function. The logical method of restoring such nerve tissue to its normal activity would be to endeavor to restore its normal nutrition, either by restorative remedies or by such means as will improve the blood supply to the affected point. Only the ignorant would use depressing measures. And yet we see it indulged in about us every day.

A slight interference with the nourishment of a nerve center or group of centers will, as stated, first cause an increase in its irritability, or a periodical increase in its irritability. For instance, there are many forms of neuralgic headaches, due solely to the fact that the center of the nerve involved is not being properly supplied with blood. The violence of the headache is often accompanied by a reflex muscular effort on the part of nature to restore the normal circulation. If left alone it will usually succeed, though it may leave conditions which may make a recurrence possible. The logical thing to do in a case of that kind is to restore the normal circulation, or nutrition, and yet the usual method employed to secure relief is either to resort to a nerve sedative which will temporarily paralyze the nerve so that it will no longer be capable of conducting painful impressions or by the use of a cardiac depressant, such as phenacetine acetanilid and the like which so far reduces the amount of blood to the nerve that its irritability is entirely destroyed or at least benumbed.

The actual form that the transmission of a nervous impulse by a nerve takes may come up in your mind and require a little explanation. So far as can be learned by the most delicate instruments there is no change of form or of temperature in a nerve while in action. When not in action it is non-electrical, but when in action a wave of negative electricity passes over the nerve at the same rate as the nerve impulse. This can be readily measured. A nervous impulse is not electrical, however. It is much slower than electricity, infinitely slower. In man it is estimated that a nervous impulse only travels about 105 feet per second.

In order to give you some impression of the method of the transmission of a nerve impulse to and from the brain we will take up some of the tracts of the brain showing the direction in which they transmit impulses and their relationship to the rest of the nervous structures. I will first show you a diagrammatic illustration of the course of nerve fibres. You will bear in mind the point made regarding sensory and motor nerve when dealing with the anatomy. Remember the motor nerves pass downward through the anterior columns of the cord while the sensory nerves pass upward in the posterior columns. This is a general division which will be further explained later.

(To be continued.)

A "Realistic" Window Display.

(Continued from issue of June 27.)

SOME readers of THE CIRCULAR-WEEKLY will question the adaptability of the jeweler's stock to stage realism. Already the writer has stolen a few advance steps within that province by suggesting the display of the watch chain on actual vests (see issue April 18), but a slight straining of the thinking faculty will show that most, if not all, the details of the jeweler's equipment are amenable to this extension.

Suppose we take as an example a ring display. It is not necessary that a ring should be attached to the center of a piece of white cardboard because we have always seen them so accommodated. Rings were not born that way.

A REALISTIC RING DISPLAY.

Rings are built to adorn the fingers, toes, ankles, wrists, etc. Then why should they not be displayed that way in your show window? Being designed for such purposes they display their charms more entrancingly on the human member for which they are formed. And the above mentioned parts of the "human form divine" are by no means impossible of imitation. The wig-maker exposes the product of his skill on a waxen image of a human face; so does the milliner. And the human face is by far the most difficult portion of God's work represented in the genus homo.

The man's and woman's hand is easy to counterfeit in wax, plaster, papier-mâché and numerous other plastic materials. A dozen or so of such casts with rings attached to them (if necessary several on one finger), will set off the design and the gems far better than a piece of white cardboard. Wax is very soft and easily injured and scratched in passing a ring over it. But if the size of the fingers be such that the rings fit loose on adjusting they can be wedged tight with cotton batting from the under, unseen side and thereby display no visible looseness of fit. Other harder substances, such as plaster, can have a wax coating, if the question of cost is to enter into consideration.

To differentiate substantially between the male and female digits the former should lean toward the spatulate and the latter be strongly exemplifying the tapering "idealistic" of palmistry science, with almond-shaped nails.

So much for the "realistic" setting. If it is desired to maintain the entire window space in ring display, some ring history or

interesting facts can be interspersed among the casts. A beautiful centerpiece for a ring display would be a replica of the Franklin Pierce ring, presented to the President of that name in 1852 by the citizens of California, especially interesting while the earthquake disaster is still within recent memory. This ring is in our museum. It weighs a pound and is probably the most characteristic ring in the history of American gold and silver smithing. It is a signet with engraved illustrations of Cabinet history. The arms of the State, surmounted by banner and stars of U. S. A. in gold, form a lid which, when lifted, displays in nine compartments specimens of ores native to California. A picture of this masterpiece is to be found on page 43 of "History and Poetry of Finger Rings," published in 1855 by Redfield, 110 Nassau St., this city. The larger public libraries would probably produce a copy if you inquire.

A few cards similar to the following would add interest to the ring window:

Ring Ornaments
Date Back to the Time When Woman Got Vain
and Man Conceited.
Nearer Adam's Day Than Ours.

Among Ancient Hindoos, Persians, Egyptians,
a Ring Denoted Eternity.
A Seamless Metal Ring Eternal Bondage.

The Ancient Roman Wedding Ring Was of Iron
and Meant Slavery of Wife.
Have Customs Changed Any?

One or two European "Gimmel" rings should figure in this display. If not quickly available they are easily made, being but two loose interlinked plain gold bands. A card might read:

"Gimmel" Rings.
A Love Token (Truth).
His Finger in One, Her's in the Other.
"Yoked" Together.

Display a few spiral serpent and plain rings with this card alongside:

Spiral Band Rings
Date Back to the Ancient Saxons.

That this department shall prove usually beneficial to our readers, it is desirable that the members of the trade generally communicate with THE JEWELERS' CIRCULAR-WEEKLY regarding any advantageous device or plan which they are utilizing in connection with their business.

Add a few serpent rings with tail mouth to this card: :

This Design Derived From Egypt's Priests
Some Found in Temple of Phihia.
They Represented the Recurring Years, at
Soon Became Popular.

Put a ring broken into two parts in the display and a card reading:

Old Betrothal Custom.
Two Lovers Break a Ring in Two
Each Retains a Part.

Another card might read:

Which Finger?
First the Greek and Romans Made the Ring Finger.
Pliny Says: "Gauls and Romans Wore Ring Middle Finger."
Ancient Egyptian Ladies Used Left Hand, at
Most Rings Figured on Third Finger.

Have some mourning rings in your window:

An Ancient Custom.
"Memorial" or "Mortuary" Rings Were
Bequeathed by Will.

And one more card, which, properly backed up by a few attractive exhibits should be conducive to sales:

The "Posy" Ring (Posie) Dates Back to 16th Century.
"About a hoop of gold, a paltry ring
That she did give me, whose power was
Love me and leave me not"
—"Merchant of Venice," Act 3, Scene 1
"Is this a prologue, or the posy of a ring"
—"Hamlet" Act 3, Scene 1
"You are full of pretty answers. Have
not been acquainted with goldsmiths wives
couldn't them out of rings?"
—"As You Like It," Act 3, Scene 1

And right alongside this with an assortment of engagement rings have the joined posy list, or better or more, as get them.

Have a small card stating that you engrave any of these or other mottoes side engagement rings free of charge may and should bring you the more customers your industry and energy in

Storekeeping Department.

ing the window display together so richly deserves

Old "Posy" or Engagement Ring Mottoes.

"The gift is small, but love is all."
 "In God and thee my joy shall be."
 "Let not absence banish love."
 "Let us love, like turtle dove."
 "God did decree this unite."
 "I have obtained whom God ordained."
 "Virtue passeth riches."
 "United hartes death only partes."
 "The love is true that I O U."
 "God thought fitt this knott to knitt."
 "True love is the bond of peace."

Displays of this character affect passers-by rather psychologically by putting the mind in a mood to buy—which mood is often momentary and impulsive. The trick is to catch the prospective buyer while he is in the mood. C. W. C.

[THE END.]

The Advertising Value of the Jeweler's Show Window.

Paper read at the recent convention in Des Moines of the Iowa Retail Jewelers' Association, by L. E. SMITH, member of the executive committee, Oskaloosa, Ia.)

MY subject, "The Advertising Value of the Jeweler's Show Window," is a broad subject, and worthy of much time and thought. I have had ample opportunity to note the effect of window work on the part of the retail trade, and the result, generally speaking, justifies the belief that the window when properly used is one of the most profitable of the several known advertising mediums.

The window is the eye of the store. You form your opinion of man very largely from the expression of his eye. The customer forms his judgment of a merchant very largely from the appearance of his window. The window itself, as you know, is nothing more or less than the outside sign of a store's interior. When goods are artistically grouped they unconsciously impress the passer-by that the store stock throughout is carefully selected.

The first essential of a window is freshness. The well-dressed window is the window that is always fresh. The finest suit of clothes in the world won't make a man look very well if he has worn them night and day for four or five days, and the best planned window decoration loses its effect after the dust has begun to settle on the goods and the glass gets a little dim. There is no fixed moment at which you can say that a window decoration has begun to lose its effectiveness any more than there is a definite moment when you can say that the rose has begun to fade. The deterioration is as gradual as it is certain.

The way to be on the safe side is to give the window a fresh dressing at regular intervals, whether it seems to need it or not. Every new window displays its advertising value. The window is so much space that we have to pay for, whether we use it to the best advantage or not. It is said a

good window dresser can make the window pay the rent of the whole store.

When seasonable goods are shown in their proper seasons, it equally impresses people that the store behind the window is filled with new and seasonable goods, and it will afford suggestions to the wavering public. Between seasons it will act as a temptation. Human nature is weak, and people want what they see.

Make the window tell the news of your store. We could not afford to get out a daily newspaper telling about the progress of our business and the changes in our stock, but we can get this matter before the public just as effectively because our window display can show real things and has a great advantage over print which can only tell about things.

But don't crowd your window. It is a poor place for the storage of merchandise which is not usually improved by strong sunshine or exposure to dust. Moreover, crowding the window makes too many things to be handled, and adds to the temptation to postpone rearrangement.

Most important of all, the window well arranged with a few articles commands attention and gives the passing crowd some-

A Brilliantly Lighted Show Window.

ONE of the best-lighted show windows to be seen in any of the jewelry stores in Brooklyn, N. Y., is that of M. M. Freund, 725 Broadway; at least, that is the way it seemed to a reporter of THE CIRCULAR-WEEKLY, who recently visited the store just after the lights were turned on at night. There is also an expert's word to the same effect, for in a recent issue of the *Brooklyn Edison* is an article on the subject sustaining a tribute to the attractiveness of Mr. Freund's window.

Surely the electrical experts know when a window is well lighted, and this is what they say of Mr. Freund's display: "He has a most beautifully, lavishly-lighted store. He has more brilliancy to the square inch than two average stores, and he finds it profitable. Mr. Freund's establishment is located in one of the busiest parts of Broadway. It's a very small store, and being in juxtaposition with much larger establishments, might have remained insignificant and have been lost in the shuffle, but it isn't. It stands out at night with a bright persistence, like a diamond in a silver setting, and that brightness attracts

ILLUMINATED SHOW WINDOW OF M. M. FREUND, BROOKLYN, N. Y.

thing to stop and look at when that same space crowded with a variety of objects is passed unnoticed.

Aside from that fundamental work, however, the window can be used effectively as a direct seller of goods and many houses employ it for that purpose. Direct sales are made by displaying certain lines or companion pieces with window cards quoting price and brief text matter. Displays of that order, particularly in the case of stores on main business streets, almost invariably attract attention and, if the goods and prices are right, attract trade as well.

The window also is a splendid help to newspaper and similar advertising, and will confirm the printed statement. We have positive proof of the great "Advertising Value of the Jeweler's Show Window" in the inducements offered by the large manufacturers in the sums of money donated as prizes and expended on window fixtures with which you are all familiar.

It takes study and it takes time to arrange artistic displays but artistic displays are effective and pay. The time devoted in accomplishing such results can safely be considered as well spent.

trade and brings the small store customers."

The writer adds that Mr. Freund believes that money expended in a striking illumination is an investment, not an expense. He turns on his electric lights at night earlier than most stores. He does not turn them on in instalments, but flashes them all at once.

The lighting is both direct and reflected. The ceiling over the show window is studded with rows of bulbs, and there are similar rows down the sides and at the back. Along the bottom, close to the street, is another row, placed like the footlights on a stage. Vertical rows of lights are placed on the window frames.

F. W. Bromberg, Birmingham, Ala., has filed a bill for injunction and a suit for damages against the Eugenotto Construction Co., engaged in the erection of the 15-story Brown-Marx building, because, he alleges, that company has reduced, by about 18 inches each way, the floor space which was leased to him. Mr. Bromberg claims that he has expended \$5,500 in purchasing fixtures which will not fit, on account of the reduction of the space for which they were intended.

[Answers are also solicited from our readers to the questions published on this page.]

QUESTION No. 1599.—Photos on Watch Cases.—Will you kindly give us in detail the process of reproducing photos on watch cases and watch case cups? P. T.

ANSWER:—Photographs can be reproduced on watch cases just as easily as the inster pictures which children reproduce on lamp shades, etc. The photographs are mounted on collodion paper, which, after having been dipped in luke warm water, is applied to the case or dial and pressed on evenly, with the picture side against the object which is to receive the impression. It is necessary, first, to apply a gelatine solution to the dial or watch cap, in order to insure good adhesion. After the collodion photo is fastened by gently rubbing the back, allow it to dry, then soak the covered object in water. This loosens the paper and leaves the picture adhering to the dial. The photo may be colored and then protected by good varnish.

QUESTION No. 1600.—Mercurial Pendulum.—In setting up a regulator with a mercurial pendulum we understand there is one way to prepare it so that the mercury will remain bright instead of turning dull. Could you tell us what we could do to avoid this? G. & H. Co.

ANSWER:—In filling the glass jar of a mercurial pendulum you need a long funnel which reaches to the bottom of the jar. This funnel is made of foolscap writing paper, having a very fine hole at the lower end, not much larger than a pinhole. Through this funnel the mercury must be filtered. It will come out clean and without air bubbles, and the local impurities will be retained in the funnel.

QUESTION No. 1601.—Broken Porcelain Case.—I have a large Japanese porcelain case with broken top. I want to cut off the broken top and leave a clean cut edge. What is the best and easiest way to do it? What metal can I use in hard soldering brass so that the joint will not show? B. M. M.

ANSWER:—The broken part of a porcelain case may be cut off smoothly by a disk of smooth tin, the edge of which is charged with corundum or diamond powder, and which is revolving with its edge in water for the purpose of keeping its edge clean. Brass may be hard soldered with spelter or brass containing more zinc than the brass to be soldered; the latter is called high brass, while the better quality of brass is called low brass.

QUESTION No. 1602.—Cement for Marble.—I have a marble clock which has a piece broken from the base. Kindly give the directions for making a suitable cement for the above? C. M.

ANSWER:—A cement suitable for marble

is made by using 12 parts of Portland cement, six parts of slacked lime, six parts of fine sand and one part of infusorial earth, worked into a thick paste with sodium silicate. The cement is to be applied cold, and the fractures or surfaces are closely fitted together. It will harden in 24 hours, and the cemented place will be stronger than the rest of the marble, it being impossible to break it at that point.

The Enameling of Jewelry.

By CECIL H. SHERMAN.

(Copyright, 1906, by The Jewelers' Circular Publishing Co.)

(Continued from issue of June 27.)

SINCE glass is made by melting silica and mixing with it readily fusible material, oxide of lead (litharge), borax, potash, etc., the way to make it flow more easily is to add more of these materials. To five ounces of powdered glass add two ounces of litharge and one-half ounce of borax (powdered) and one-half ounce of nitrate of potash; mix very thoroughly and place in a sand crucible so large that the powdered mixture will only fill it half full; cover with a lid or any inverted crucible and place in a furnace that will generate enough heat to melt the same quantity of pure copper; heat it until the mass is molten and has stopped boiling or bubbling. Then pour on an iron slab or in an iron ladle. When cool grind a piece of it and try it in the manner described for testing enamels. It is a pretty good plan to try two or three colors with it and to fire over an alcohol lamp or bunsen burner flame.

If this flux flows or melts at about the same heat as enamels which you have found satisfactory, all is well; if it is too hard make another lot, decreasing the amount of glass until you have just what you want; if too soft, that is, will not stand the pickle test, add more glass to the formula. But should you find that when you make the enamel flow at the desired degree of heat it will not stand pickle, then the quality of your glass is not good enough, and a new kind will have to be used. One enamel maker of my acquaintance was so disgusted with the general run of glass that he studied glass making and was soon able to make his colors direct from powdered flints. The result was an improvement in his colors as well as the satisfaction of being pretty sure of producing the color which he started out to make.

The colors are produced by the oxides of metals. Black oxide of cobalt will make blue; a very small amount will produce a dark blue, but for some reason if an extra dark transparent effect is desired one must

add a little black oxide of copper. Black oxide of iron will sometimes make a dark blue very transparent.

Black oxide of copper, which you can make yourself by heating pure copper to a red heat and grinding the black scale formed on the surface, colors glass a light bluish green and is often used in the form of nitrate of copper, which will color opaque enamel a pretty baby blue or light turquoise.

Red oxide of copper, it is said, will make fine red enamel, but the color which I obtained was always green. Manganese, the black oxide, will produce reddish purple; combined with red oxide of iron it will make a brown; permanganate of potash with cobalt gives a fine purple.

In using any of the salts of metals with large quantities of oxide, the proportion of glass must be increased, because all the oxides of metal are fluxes and tend to soften enamels. Yellow oxide of uranium will produce yellow in transparent enamel and cream color in opaque.

Glass of antimony acts similar to uranium, but is not as strong a color.

Oxide of chromium is an especially strong color and a little seems to go a long ways. Used in the form of oxide it has a tendency to make enamel hard, but if bichromate of potash be used this is overcome to a certain extent. It colors opaque enamel a very light pea green, and transparent a yellowish green. When mixed with black oxide of copper in the proper proportions a very fine grass green is produced.

Gold is used for making red, and because of this fact red commands an extra high price, but the fact of the matter is that the cost of making a very good red is not as great as is that of black.

White arsenic will make a good white, which can be used as a base for opaque colors. Take five ounces of powdered glass, one and one-half ounces of lead, one-half an ounce each of borax and nitrate of potash and add three-fourths of an ounce of white arsenic. Mix well and melt as in the case of transparent enamel, testing it in fusible and pickle; increase the amount of arsenic for opacity, and about one-half of what will make white will make an opal. The making of opaque yellow is a difficult process at which very few makers are a success. The old-time recipe, which can be found in most any encyclopedia, will, if the directions are followed, make a fine color.

In making enamels start first on a transparent flux, and then get some oxide of cobalt (black), oxide of copper (black), black oxide of manganese, yellow oxide of uranium, green oxide of chromium, red oxide of iron, black oxide of iron, nitrate of copper, permanganate of potash, glass of antimony and 15 grains of chloride of gold. Make a pot of flux colored with a small quantity of each oxide, mark down in a book the proportions used, and number the formula; have a box for the enamel with a corresponding number. When you have at least a dozen colors, make a test of them on silver and oxide; by keeping track of your results you will soon be able to make any color which you want, or at least a good assortment.

(To be continued.)

The Origin of English Bone Porcelain.

ARTHUR VEEL ROSE, in the *American Pottery Gazette*.)

THE somewhat complex question, "When did bone porcelain first come into general use, and by whom was it first introduced?" is frequently asked, not only by amateurs, but by collectors and connoisseurs alike. It is generally acknowledged that bone porcelain existed as long ago as 1760, and this is evidenced by Sprimont's introduction of bone-ash into the body of Chelsea porcelain, but no factory was making it commercially in any quantity until the year 1800. In that year Josiah Spode II., who succeeded his father, the founder of the old Spode factory, perfected a new porcelain body which was composed of china clay, china stone or feldspar, and bone-ash which was obtained from calcined bones. This porcelain surpassed in quality of paste, translucency and brilliancy of glaze anything hitherto attempted.

This same body is used to-day by practically every English porcelain manufacturer, and is known as "English bone china," or porcelain, in contradistinction to "true" or hard porcelain, such as the Chinese, French or German product. William Burton, F. C. S., in his recent valuable work, "A History and Description of English Porcelain," in referring to this typical body of English porcelain, says:

"This paste may be taken as consisting of 6 parts of bone ash, 4 parts of china stone (petuntse or feldspar), and $3\frac{1}{2}$ parts of china clay (kaolin) finely ground and mixed. So far as composition goes, it is to all intents and purposes the body of "true porcelain" with a large proportion of added bone ash. Here, however, all resemblance to true porcelain ends. The pieces are first fired to a temperature of about 1,200 to 1,250 degrees C., at which temperature they become beautifully white and translucent. The glaze, which is also of the same type as the glaze of hard porcelain, consists essentially of petuntse or feldspar, and china clay, but rendered more easily fusible by the addition of boracic acid, alkalies and oxide of lead, is subsequently fired on the biscuit body at a lower temperature."

To sum up this portion of the subject we may tabulate the materials and methods of the three main species of porcelain thus:

True porcelain (Chinese, Dresden, Bristol, etc.).—Body, or paste, petuntse and kaolin. Glaze: petuntse, sometimes softened by addition of lime. Body and glaze fired at one operation, so that the glaze receives the fiercest heat given.

Glassy or fritted porcelain (St. Cloud,

Vieux Sèvres, Bow and Chelsea).—Body, or paste: Largely glass or frit, with a small proportion of white clay. Glaze: A very fusible glass made from red lead, nitre, sand, etc. The first operation was the preparation of the glass or frit. Some of the later English frits were not very glassy, and contained bone ash. The body was fired to what is known as the "biscuit" condition, and the glaze was fired subsequently at a lower temperature.

English bone porcelain (practically all English factories of the 19th century).

—Body, or paste: Bone ash, china stone, china clay. Glaze: China stone and china clay, with boracic acid, alkalies and lead oxide. The body is fired first to what is known as the "biscuit" condition, and the glaze is fired subsequently at a lower temperature.

It will be evident that from such differences of material and treatment there must be equally striking differences in the appearance and qualities of the different kinds of porcelain.

Josiah Spode met with such commercial success, owing partly to the fact that this new method of manufacture was considerably less costly than the old, and, in addition, the quality was greatly improved, not only in the whiteness and translucency of the paste, but also in the lusciousness of the glaze, that his competitors were compelled to adopt his methods, and Worcester, Derby, Coalport and all the later porcelain manufacturers began making "bone porcelain," which is the typical English porcelain of to-day.

Large Amount of Silver Used in the Arts.

THE heavy demand for silver in India and in the Orient generally is having, with other influences, a marked effect on its price. There has been an advance in the price of silver of 20 cents in three years. This advance is expected to continue, and it will have a good effect on the trade in Eastern markets by increasing the purchasing power of the money now used in the Orient. In the first four months of the current year Great Britain exported to India \$30,000,000 worth of silver.

The use of silver in the arts is rapidly increasing, it being estimated that fully 50,000,000 ounces are consumed in that way annually. The United States and Mexico combined yield more than 82 per cent. of the world's output of silver, and they both derive a large advantage from its increase in price.

W. T. Peters, Eureka, Kans., was married June 27.

How Newark Stands First in the Manufacture of Fine Jewelry.

(From *New Jersey Commerce and Finance*.)

THE jewelry industry in the State of New Jersey is confined exclusively to the city of Newark and nearly 100 classified industries within the State, compiled according to the total amount of capital invested, it ranks not far from the top of the list. Jewelry makers have recently closed a year of unequaled prosperity, and at present are feeling no respite in the demand for their product. Orders are coming to manufacturers from all parts of the country and keeping factories running on full time. Compared with other years, when business usually lagged at this season of the year, it gives evidence of remarkable activity, and manufacturers feel confident the fruits of this year's work will give ample evidence of the country's growth in wealth.

The jewelry business is a barometer of the whole business of the country. Jewelry is a luxury, pure and simple. It is the first business to feel depression, and the last to revive after depression. It is the general business public who indulge their taste for dainty and costly articles of this manufacture, the majority of whom cannot afford to do so under any but the most favorable conditions. The mild Winter past was regarded as propitious for a large Spring trade, and with the receipt of a large number of orders since the holidays many factories have had as much as they can do.

FIRST JEWELRY FACTORY.

The first jewelry factory was established in Newark in the year 1830 by Taylor & Baldwin, who manufactured fine gold jewelry. A few years later the firm name was changed to Baldwin & Co. Thomas G. Brown was a member of this firm, which was later changed to his name and afterward to Thomas G. Brown & Sons.

While there are many other cities in the United States that manufactured jewelry long before this city, Newark has outstripped them all in the manufactured product of fine jewelry.

The city has acquired a high reputation for the production of fine jewelry and is without a rival in this respect. The product of the factories of New York City is probably its nearest approach, but it does not equal that of Newark. For many years the industry was of large proportions in Philadelphia, but it has not grown so rapidly as here.

The goods made in Newark have been the standard of excellence in all lines of fine jewelry, and the products of the city's

LIBBEY

THE WORLD'S BEST.

The cut glass world is sharply divided into two classes.

All the other cut glass tries to look like Libbey.

Sometimes it sells for less—but the lower price can't bring it up to the Libbey standard.

Quality considered, Libbey is not only the world's best—it is the world's best value.

R. W. BISHOP,
ATTORNEY AT LAW,

908 G Street N.W., Washington, D. C.

Manufactories are the best and finest known in the trade all over this country. In the manufacture of plated goods New Jersey's products are exceeded in value by those of Massachusetts, New York and Rhode Island. Providence, R. I., and the Helderbergs, Mass., produce the largest amount of plated goods of any cities in the country. They are considered leaders in the production of the lower grade of goods made especially for department stores.

ABOUT 100 JEWELRY CONCERNS.

There are about 90 to 100 jewelry establishments in the city and every article known to the jewelry trade is made by them. The method of manufacture in recent years has been revolutionized by the introduction of labor-saving machinery, the use of which has given Newark its wonderful lead in the business of jewelry manufacturing in so comparatively short a time. The finest goods, however, are had-made throughout and cannot be produced in any other way. The regular lines of jewelry, such as rings, brooches, lockets, etc., are made in presses especially designed for this purpose, and are afterward finished by hand.

The only product that compares favorably with that of Newark in artistic work is that of France, but the goods manufactured in that country are much more costly. A great deal of jewelry is also manufactured in Germany, but they have never been able to turn out the high grade of goods manufactured either here or in France.

It is estimated that the selling value of the output of high-grade jewelry in this city for last year was in the neighborhood of \$10,000,000, an increase of about 15 per cent. over the previous year. Manufacturers would have been well pleased had the business proved equal to that of 1904, but it greatly exceeded their expectations. The factories vary greatly in size, and employ the aggregate about 3,000 persons, more than 20 per cent. of whom are women.

The total capital invested in this industry in 1902 was almost \$4,000,000. In 1903 it was over \$4,500,000, and in 1904 it had grown to over \$6,500,000. The cost value of stock used in 1902 was just over the 4,000,000 mark; in 1903 it was \$4,248,360 and in 1904 it reached \$4,363,270.

The selling value at manufactory of goods made in 1902 amounted to a trifle over \$8,000,000; in 1903 it was \$8,378,649; in 1904 it totaled \$8,676,987, and in 1905 it is estimated to have been \$10,000,000. The total amount paid in wages was \$1,672,917 in 1902, \$1,753,002 in 1903 and \$1,689,932 in 1904.

Closely allied to the jewelry trade is that of the silversmith, and some of the largest factories in the city are engaged in both trades. In fact, large quantities of high-grade silverware are manufactured here, most of which is distributed without having the stamp of the maker.

The majority of the manufactories are large, and employ a number of operatives, ranging from 10 to several hundred to the establishment.

None but the best of material is used by the factories in the manufacture of their products, the greater portion of which consists of goods of 10, 14 and 18 karat gold.

Manufacturers are working in the standard of values all the time. The larger concerns buy their gold from the Government in gold bricks weighing about 20 pounds and costing from \$5,000 to \$6,000, dependent upon the exact weight. The Government will not sell less than \$5,000 worth at one time.

The majority of the smaller jewelers buy their gold through local banks, several of whom keep a supply on hand for them all the time, and to whom as broker they pay a small commission.

Sterling silver is used exclusively in the manufacture of solid silverware. This is bought by the silversmiths in bars and is melted down and rolled to the required thickness. Some of it is also bought through brokers, but this is usually in small quantities. The local refineries also sell both gold and silver to the jewelry trade in small quantities.

Considerable of the product that is now being made is for the purpose of having stock on hand when the busiest season arrives. There are, of course, changes in style and fashion taking place constantly in the trade, and the question of design is the problem for all the leading houses in the trade. The American public is exceedingly fickle in its taste, and new designs for gold work frequently have to be decided upon from European and American patterns. To guard against loss in this respect as much as possible the larger manufacturers employ expert designers at a cost of many thousands of dollars.

All the precious and semi-precious stones are used by the manufacturers in making jewelry. This was one of the features of the season just closed, and in consequence of the large demand from all sources for this character of product the prices of many of the precious stones have advanced considerably. While these advances are in many cases attributed to the growing scarcity of stones, it is due mainly to the increasing demand which has prevailed for them for several years.

QUANTITIES OF DIAMONDS EMPLOYED.

Diamonds are employed in great quantities either separately or in combination with other stones. There seems to be much craving for stones with color, and every stone that can be cut into pretty shapes or that has brilliancy or strength or delicacy of color is being employed. This demand is not only a craze, but is widespread, and lapidaries are kept busy in order to provide the supply required by the jewelry manufacturers. There has also been a heavy call for sapphires, amethysts, garnets and aquamarines. The demand for all of these has been of the richest designs, finest materials and the best workmanship.

The bulk of the product is consumed in the United States, and there is comparatively little in gold jewelry exported by Newark manufacturers. In the majority of cases goods are sold by the manufacturers directly to the retail trade, and the larger concerns have a force of salesmen traveling all year. The character of the goods is too fine to admit of placing them in the hands of middlemen for disposition. The largest trade perhaps is through the west and in the south, and through these sections immense quantities of goods are distributed.

HANDSOME EFFECTS IN DOMESTIC POTTERY

CRYSTALLINE glazes on a porcelain body, from the Clifton Art Pottery Co., Newark, N. J., are being shown in the salesrooms of W. H. Dunn & Co., 54 Murray St., New York, and are quite generally admired. Many pleasing effects are produced in variations of the glazes. The Patina line, resembling antique wares, is proving especially popular. An excellent collection of pottery which Mr. Dunn has received from the same works includes vases, bowls, jugs and other articles finished in robin's egg blue. There is also a fine collection of jardinières, which come in graceful shapes and ornamented with figures and designs in relief. Quite a large variety of pottery bases for lamps are shown. W. H. Dunn, of this company, was formerly New York representative of the J. B. Owens Pottery Co., Zanesville, O. Since establishing his present business he has taken the selling agency of a number of companies, including the Clifton Art Pottery Co., Newark, N. J.; J. J. Niland & Co., Meriden, Conn.; Burgun Decorating Co., Brooklyn, N. Y.; Colonial Co., East Liverpool, O.; Cartwright Bros. Co., East Liverpool, O.; Cook Pottery Co., Trenton, N. J.; Excelsior Pottery Co., Trenton, N. J.; A. Radford Pottery Co., Clarksburg, W. Va.; Ransbottom Bros., Roseville, O.; General Mfg. & Supply Co., Trenton, N. J.

NEW LAMP SHADES AND ELECTROLIERS.

SAMPLES of new lamp shades and electroliers have recently been received in the New York salesrooms of the Pairpoint Corporation, 28 Murray St. There is an increasing variety in shapes and decorations in floral, leaded and mosaic designs, and buyers will find many attractive designs. The company has been operating its glass cutting works and its decorating plant full time, and expects to continue this activity all through the Summer. The orders that have been arriving preclude the idea of a dull spell, which is not unusual at this time of the year. For some weeks the company has been advertising in New York for glass cutters and decorators for the purpose of strengthening its force with experienced men.

THE RAMBLER.

T. Gumlich, 18 years old, and C. W. Wilson, 17 years old, were sentenced by Judge Gainer in Sioux City, Ia., a short time ago, to six and five months, respectively, in the penitentiary at Anamosa, for breaking and entering the store of A. F. Rockwell, 4th St., Sioux City. When taken into custody the accused had in their possession 36 watches and cases and a number of chains.

WADSWORTH

14-Karat Solid Gold Cases

THE EXCELLENCES which have given pre-eminence to **WADSWORTH WATCH CASES** reach their highest development in these Solid Gold Cases. Here the standard of the purchaser can be no higher than that of the manufacturer. A Case of Highest Quality.

THE PATTERNS and Models of the **WADSWORTH 14-KARAT SOLID GOLD WATCH CASES** are fine examples, embodying the Shapes and Designs most in line with prevailing phases of popular taste. They have strong, salable qualities, especially in view of reasonable prices.

Do the retail jewelers appreciate what they were paying for 12 Size movements before our 12 Size was on the market?

Do the retail jewelers appreciate what they were paying for O Size movements before our O Size was on the market?

Do the retail jewelers stop to consider what they would be paying for movements if there was not an independent watch company manufacturing a complete line of superior watches?

ILLINOIS WATCH COMPANY
SPRINGFIELD

SILVERWARE destined for the general service and adornment of the table should, in order to be wholly satisfying, possess not only a markedly decorative effect, but an opulent dignity and a well defined individuality of design.

¶ It is the belief of the Whiting Company that in their new Louis Quatorze pattern, which has been applied to every article suitable for table use, these essentials of success are very prominently displayed.

¶ With the confidence born of this belief, therefore, they beg to call attention to their novel and original treatment of one of the most popular, as it is one of the most effective, of historical styles.

WHITING MFG. CO., SILVERSMITHS
Broadway and 19th Street, New York.

Dueber Watch Cases

Hampden Watch Movements

“Dueber-Hampden” stands for honesty, integrity and consistency. Added to these qualities the talent and energy devoted to the development of

DUEBER-HAMPDEN WATCHES

have earned for them the enviable reputation of

The Leading American Watch

Made in all sizes and sold only as complete watches in 3/0 size and 12 size, cased in solid gold and gold filled cases of the most artistic designs.

The W. J. JOHNSTON COMPANY,

Hamilton Watches

Illinois Watches

Made to be sold by live, progressive, American Retail Jewelers who realize the credit to be gained from selling reliable, accurate time pieces.

Protection to the Retail Jeweler is the "watchword" of The Hamilton Watch Co. and The Illinois Watch Co., and every effort will be made to restrict the sale of these watches to the Legitimate Retail Jeweler.

WE direct attention to our new Fall lines of Toilet and Hollow Ware in sterling silver, which in artistic conception and expert craftsmanship surpass any previous display.

Owing to the novel character of our Toilet Sets we will be unable to show same until about July 20, but we are sure you will agree that these sets are a radical departure from anything heretofore attempted. They will be illustrated shortly on this page.

Woodside Sterling Co.

Silversmiths

192 Broadway, New York

Three New Patterns

OUR SALESMEN are starting on their display trips, and are showing a very large number of new designs in Ladies' and Gentlemen's Card Cases, Photo Frames, Baskets, Jewel Cases and other Novelties, and *three new and original patterns in Toilet Sets and Manicure Articles.*

For over 45 years we have enjoyed the distinction of originating the most handsome and best selling patterns in our several lines, including flat ware and napkin rings, but in the present offerings we excel all our previous efforts. Our etched effects supersede anything on the market at present.

We can supply Combinations in Toilet and Manicure Sets, arranged in handsome silk-lined cases. These combinations are beyond anything ever shown in the past.

Determine now to see these new creations; it will pay you well, and an opportunity will be lost if you neglect it.

These entire lines will also be on exhibition at our New York Showrooms.

TRADE  MARK.

MAURICE L. POWERS.

JOSH W. MAYER.

GRADUALLY

OUR stock is assuming immense proportions. We are gradually approaching the opening of our FOURTH ANNUAL EXHIBITION, which takes place in our offices between August 13th and 18th, inclusive.

We desire to make this display the most impressive of any heretofore given by us, for the reason that the prosperity everywhere is at its fullest and this has encouraged us to give full scope to the production of a remarkable display of Jewels. The reason we feel that this coming exhibition will be a remarkable one is that we have articles in Diamond Jewelry from twenty-five dollars up to thousands of dollars, so that a Jeweler from the smallest town or the largest city will find this display most interesting.

We have made this exhibition a little later than the preceding ones, so that it will be more convenient for most Jewelers to be with us around this date.

We can positively state from what is now finished that, by the time we are ready to open our display, it will be the most remarkable line of Diamond Jewelry ever shown in this country.

Once a visit always a visit.

ZIMMERMAN'S ELK MASTERPIECE

Ever on the alert to improve our already most popular line of Elk emblems, we have added what we consider the

Most Wonderful Reproduction of an ELK Head

in gold ever attempted. This is known as the Zimmerman Masterpiece of an Elk.

This Elk head is an exact reproduction in gold of Zimmerman's Masterpiece, "The Elk," which is world famous, receiving

Prizes at Every Exhibition Where Shown

Every line in the painting has been faithfully reproduced by us in the emblem.

We are making this head in 3 sizes (medium, small and midget) in both gold and silver, and in various finishes, also combining it with the dial, with and without diamonds and other precious stones. If your jobber does not handle our line, send for a selection package. Our phenomenal success has inspired many imitators. There is but one line of FOX Emblems, and all goods of our make are stamped with this trade-mark  A quantity or low price may sell the first bill, but quality as well is required to get succeeding orders. Our goods are of the highest standard of quality.

CHAINS

are sold only to the legitimate jewelry trade. Jewelers who handle them do not have to meet the competition of Department Stores or Retail Mail Order Houses.

The adoption of this policy is the result of a vote of the directors of the W. & S. Blackinton Co. to protect the rights of the retail and jobbing jewelry trade. In declining the trade of department stores we close many large accounts. However, we are convinced that this policy of protection to the retail jeweler and jobber will work to their best interests, as well as our own.

Over \$40,223,000 in Gems.

Diamonds, Pearls and Other Precious Stones Imported at New York During Fiscal Year of 1906 Break All Records.

In the last issue attention was called to the prosperity of the precious stone and pearl trade as indicated by the fiscal year's importations at New York, which, for the first time, passed in valuation the \$40,000,000 mark, an advance of 20 per cent. over the total for the preceding year.

The exact figures for the year ended June 30, 1906, are \$40,217,542.78, of which \$29,196,69 was in cut precious stones and pearls, while \$10,698,346.09 was in uncut precious stones, chiefly diamonds. In the preceding year the cut precious stones and pearls amounted to \$22,942,522.36, and the uncut precious stones to \$10,289,642.33, a total of \$33,232,164.69.

For three years there has been a steadily increasing importation of gems, and the last two fiscal years have each exceeded all predecessors in the aggregate of imports. How the figures of the fiscal year just past compare with those of former fiscal years may be seen from the following table showing the year by importations at New York, as compiled by Gen. George W. Mindil, the jewelry examiner at the Public Stores:

Year ended June 30, 1906.....	\$40,217,542.78
" " " " 1905.....	33,232,164.59
" " " " 1904.....	21,843,119.17
" " " " 1903.....	27,318,642.13
" " " " 1902.....	22,938,531.62
" " " " 1901.....	21,919,053.86
" " " " 1900.....	14,984,110.57
" " " " 1899.....	18,035,801.94

The gains in the last year, it will be observed, have been almost entirely in cut stones and pearls. The importers of rough diamonds say that they would import in larger quantities if the selling syndicate at London would sell supplies up to the requirements of the American trade. It is not possible to figure what is the extent to which the importation of cut stones is swelled by the inability of American diamond manufacturers to obtain all the rough stock that they desire for the home trade.

Only in each of the last two years has the importation of rough stones exceeded \$10,000,000 in valuation. In the fiscal year ended June 30, 1904, the total was \$7,957,266, and that was said to be the highest up to that time. That was the year of the European diamond workers' strike, which was supposed to have added to the demand upon the cutting industry in the United States. Those who feared that after the foreign strike the American lapidaries would have less to do have been agreeably disappointed by the annual totals since then, showing gains and not losses.

Every month of the last fiscal year has exceeded in the valuation of precious stones and pearls that were imported, the figures of the corresponding month of the year before, with the exception of November and January. This is shown in the following table, in which cents are omitted:

1904.	1905.
July \$2,179,948	July \$3,992,831
August 2,021,295	August 2,275,873
September ... 2,192,603	September ... 3,250,880
October 3,045,355	October 3,509,390
November ... 2,825,118	November ... 2,467,093
December ... 2,941,950	December ... 3,633,379

1905.	1906.
January \$2,831,212	January \$2,706,997
February 2,407,089	February 3,067,036
March 3,673,383	March 3,789,825
April 2,429,338	April 3,614,932
May 3,233,825	May 4,021,405
June 3,442,043	June 3,887,893

The total value of gems imported during June showed a handsome increase, more than \$400,000 over the total of the corresponding month of 1905, which was the greatest up to that time. A comparison of the figures showing the importation for June during the last nine years may be made from the following table:

1906.....	\$632,007	\$3,255,886	\$3,887,893
1905.....	834,537	2,607,505	3,442,043
1904.....	950,766	1,053,682	2,004,448
1903.....	781,190	1,879,486	2,660,676
1902.....	568,899	1,786,626	2,355,026
1901.....	149,097	1,943,922	2,093,019
1900.....	390,849	1,081,375	1,472,224
1899.....	576,732	1,523,718	2,100,450
1898.....	265,549	421,191	686,740

Assets and Liabilities of Bernard Steinfeld as Shown by His Schedules.

Schedules in bankruptcy of Bernard Steinfeld, 504 Sixth Ave., were filed last week, and showed total liabilities of \$5,951 with nominal assets. The creditors included: Frank Walker, \$2,134 (note); Isaac Levinson, \$385 (note); R. L. & M. Friedlander, \$756 (note); L. Beilenson, \$384 (note); Louis Grey, \$367 (note); E. G. Rochat, \$160 (note); Eliassof Bros. & Co., \$125; J. Rosenberg, \$104 (note), and the New Haven Clock Co., \$114. J. Sherman Moulton prepared the schedules as attorney for the bankrupt.

Several weeks ago Mr. Steinfeld reported that he had been robbed while on his way to a railroad station in New Haven, Conn., and that his sample case containing jewelry to the value of \$4,000 had been stolen from him. Directly afterward he made an offer of settlement at 30 per cent. to his creditors, who did not accept, and the involuntary bankruptcy proceedings were then begun. His assets, consisting of fixtures and a small amount of stock, were sold last week under the direction of Wm. Allen, the referee in bankruptcy, and brought less than \$300, which will not be sufficient to meet the legal expenses, so that there is nothing for the creditors.

Death of Peyton Dearborn.

ALEXANDRIA, Va., July 4.—The sudden death Saturday of Peyton Dearborn, of the firm of Dearborn & Son, this city, was a distinct shock as well as a cause of profound sorrow to his many friends in this city, Baltimore and Washington. Mr. Dearborn had been in the best of health up to Saturday morning, but on that day complained of a pain in his head and went to his room in his residence, 621 King St., to rest. While reclining on a couch he suddenly called his wife and told her he was dying. Before a physician could be summoned Mr. Dearborn passed away.

The deceased was about 28 years old, and was born in Amherst. Like his father, George W. Dearborn, who edited the *Amherst New Era*, he was engaged in newspaper work before entering the jewelry business here. He was prominent in fraternal circles, particularly in the Elks, being a member of the Amherst Lodge of

that order. He is survived by a widow and one child.

Mr. Dearborn's remains were shipped to his former home in Amherst, Sunday morning, for interment, and were accompanied by a delegation from the local lodges of Elks and Heptasophs, who participated in the services.

Secretary of the Treasury to Act on Alleged Improper Seizure of Jewelry from Toledo Merchant.

Commissioner Thomas Alexander, having completed taking of testimony in relation to the diamond brooch imported by Norman C. Hascall, of Jacob J. Freeman & Co., Toledo, O., last week sent his findings to the Secretary of the Treasury at Washington. The Secretary will now pass on the petition of Mr. Hascall, who asked that the brooch and certain other property taken from him on his arrival on the *Oceanic* on May 31 of last year be returned. The Commissioner's findings are a rehearsal of the facts brought out in Mr. Hascall's behalf by his attorney, Julius J. Frank, and also of the facts presented by Arthur M. King, Assistant District-Attorney, appearing for the Government.

The findings indicate that on March 28 of last year, when Mr. Hascall sailed for Europe, he carried a brooch containing nine diamonds, which had been the property of his wife for 14 years. While abroad he paid \$65 for repairing and resetting the brooch. On his return he had, besides the brooch, a gentleman's watch valued at \$60. It was shown that this watch had been imported some time before by his firm and the duty had been paid at the time of importation. The watch was sent back to Europe in order that a defect might be remedied, and for convenience he carried the timepiece on his return trip. He carried also two ladies' watches, costing \$30 each.

In his declaration Mr. Hascall gave the value of the articles which he was carrying as \$100. He did not believe that the brooch or the gentleman's watch was subject to duty, and the value of the other articles was about \$100, corresponding to his declaration.

Evidence was presented that Mr. Hascall had been a member of the Toledo firm for a number of years, and that neither he nor his firm had ever before hand any question with the Government in relation to customs duty. While abroad he made purchases for his firm, which were imported in the usual way through Powers & Mayer, New York, the appropriate duty being paid. After the brooch and other articles were taken by the customs inspector, Mr. Hascall prepared the petition to the Secretary of the Treasury, asking that the property be returned.

The Secretary of the Treasury last week sent to collectors of all ports of customs in the country a circular letter calling their attention to the Gold and Silver Stamping Law recently passed by Congress, and pointing out that the Act forbids the importation or exploitation of spuriously stamped articles of merchandise or the carriage in interstate commerce of the same. The circular was accompanied by a full text of the law, which was the same as published in this journal June 20, 1906.

PUSH BALL.

In the game of push ball you must have pushing ability and strength to push the ball at the right time in order to win. This is just exactly our idea of increasing our business, for we are pushing it by having more new and original ideas in all lines for Fall Trade than in all of the 40 years of our existence.

Our travelers can prove this assertion if you will but give them the chance.

LARTER & SONS,
21-23 Maiden Lane, NEW YORK.

Handsome Gold Vase Presented to Dr. Edward Brooks.

IN the show window of their store, 902 Chestnut St., Philadelphia, Pa., J. E. Caldwell & Co. recently exhibited a solid gold vase which, for chasteness of design and simplicity of lines, is regarded in the trade as showing exceptional beauty. Besides its intrinsic value, which is great, the vase has been regarded as a noteworthy example of the goldsmith's art. It was presented as a testimonial by the teachers of the schools of Philadelphia to Dr. Edward Brooks, who some weeks ago retired as superintendent of the schools after 15 years service.

The vase weighs 625 dwts. and is of 14-karat gold throughout. It is 14½ inches high and 5½ inches in diameter, with a spread to the extremes of the handles of 8¾ inches. It rests upon a beautiful green onyx plinth. The classical outlines of the vase especially engage attention. For the borders of the vase, the Egyptian lotus is used for decorative purposes, as well as the laurel of the walls of Troy. In the central portion of the body is the seal of the city and above the national and city flags crossed.

The engraving of the inscription is most cleverly done in lettering appropriate to the simplicity of the general design.

M. A. Mead & Co., wholesale jeweler and jobbers of Chicago and Pittsburg, have sent their customers a new price list of the watch movements and cases which they handle, which will no doubt be found very valuable to all jewelers into whose hands it may come. The list is a small booklet of 12 pages neatly bound, in which the various movements and cases are listed in a distinctly original way in the form of a table concisely arranged, which shows at a glance the price of each movement and case as well as the complete watches, 25-year case being printed in black ink, 20-year in red ink. The availability of the list lies both in its compact form and the facility with which the jeweler can get the information which he wants with a minimum amount of trouble.

The Canadian Gold and Silver Stamp- ing Bill Approved by Banking and Commerce Committee.

OTTAWA, Ont., July 6.—Yesterday the Banking and Commerce Committee of the House of Commons approved of the provisions of the bill respecting the sale and marking of manufactures of gold and silver. On behalf of the promoters of the bill W. K. McNaught, of the American Watch Case Co., explained that there was much misrepresentation as to goods made of gold and silver. The purpose of the bill was to prevent this, and wholesale firms and manufacturers of jewelry, as well as retail dealers, Mr. McNaught said, were generally in favor of the bill, which applies to imported goods as well as to those manufactured in Canada.

Mr. Rosenthal, of Ottawa, spoke in favor of the bill from the retailers' point of view, while H. & A. Saunders, manufacturers, wrote asking for a postponement until further inquiry could be made. As one reason for passing the bill as early as possible, it was stated that it was a custom with some of the trade to stamp watch cases as being of a higher quality than they actually were, and Mr. McNaught produced a watch case which was "guaranteed for 20 years," but of gold on which, he said, would wear off in three years. Mr. McNaught said there were 200,000 of such watch cases in Canada today, although the firm that made them had gone out of business.

The example of England and the United States in this matter was approvingly referred to, and Mr. Fielding, Minister of Finance, finally declared himself in favor of the bill, which was ordered to be reported to the House.

The bill provides that 12 months after the passing of the bill:

It shall not be lawful to make or sell, or to import or attempt to import into Canada, any article composed either in whole or in part of gold or of silver, or of any alloy of gold or of silver, if to such article there is applied any mark other than:

(a) Trademarks registered in accordance with the Trade-marks and Design Act, Chapter 63 of the Revised Statutes of Canada; and

(b) Such letter as is, by schedule required to indicate the period of time during which such article was manufactured; and

(c) Marks truly and correctly indicating the quality of the gold or silver, or alloy of gold or of silver, used in the construction of such article.

The marks referred to shall state the fineness of the gold in karats. The number of karats so stated shall bear the same proportion to "24 K" as the gold in the alloy bears to pure gold. The actual fineness of the gold or alloy of gold of which the article is composed shall not be less than the said proportion by more than one-half of a karat, if solder is used, or by more than one-quarter of a karat if solder is not used.

Every one, being a dealer, is guilty of an indictable offence and liable to the penalty, who makes or sells, or imports or attempts to import into Canada, any article purporting to be wholly or partly composed of gold or of any alloy of gold, if the article when made or sold, has thereto applied any mark (a) indicating the gold in the article to be of less than 10 karats in fineness; or, (b), bearing the words "gold," "solid gold," "pure gold," "U. S. assay," or other words purporting to describe the gold or alloy of which the article is composed.

Every dealer is guilty of an indictable offence and is liable to penalty who makes, or sells, or imports or attempts to import into Canada, any article which has applied thereto any mark indicating, or purporting to indicate, or leading to a reasonable belief, that the metal or alloy of which such article is composed is sterling silver, if the metal or alloy of which such article is actually composed contains silver in less proportion than

National Monthly Import and Export Statistics.

WASHINGTON, D. C., July 9.—The records of the Treasury Department contain the following comparative statistics, of interest to the jewelry trade, for May, 1905 and 1906-06 and for the 11 months ending April, 1906:

	IMPORTS			
	May, 1905.	May, 1906.	11 Months Ending—	
	May, 1905.	May, 1906.	May, 1905.	May, 1906.

Plated ware.....	64,584	654,482
EXPORTS OF FOREIGN MERCHANDISE.				
Clocks and parts.....	\$192	\$1,795	\$924
Watches, materials and movements.....	\$1,835	15,935	3,916
Diamonds, rough, including miners', glaziers', etc.	185	2,954
Diamonds, n. e. s. (dutiable).....	1,282	21,266
Other precious stones, rough or uncut (free)....	217
Other precious stones, cut but not set.....	1,590	219	336,176	4,466
Jewelry and manufactures of gold and silver....	2,880	96	33,135	5,810

925 parts of pure silver in every 1,000 parts of such metal or alloy by more than 25 parts in 1,000 when solder is used, or by more than 10 parts in 1,000 when solder is not used.

The provisions shall not apply to any article of gold less than 10 karats in fineness, or of silver, or of any alloy of gold or silver, to which is applied any hall-mark lawfully applied according to the laws of the United Kingdom of Great Britain and Ireland; or any mark indicating the quality of the gold or of the silver or of the alloy and applied by the government of any foreign country, if with respect to such article all the other provisions of the bill have been complied with.

In the case of articles made in whole or in part of an inferior metal, which has deposited or plated thereon, or brazed or otherwise affixed thereto, a plating, covering or sheet composed of gold or silver, or of an alloy of gold or of silver, and known in the trade as rolled gold plate, gold filled, gold plate, silver plate, silver filled, or gold or silver electroplate, or by any similar designation, and in the case of articles of like nature brought under the provisions of this section by regulation made by the Governor-in-Council, it is required that the quality and nature shall be clearly marked.

Schedule "A" referred to in the bill is as follows:

A indicates the period of time from June 30, 1906, to July 1, 1910.

B indicates the period of time from June 30, 1910, to July 1, 1915.

C indicates the period of time from June 30, 1915, to July 1, 1920.

D indicates the period of time from June 30, 1920, to July 1, 1925.

E indicates the period of time from June 30, 1925, to July 1, 1930.

F indicates the period of time from June 30, 1930, to July 1, 1935.

G indicates the period of time from June, 1935, to July 1, 1940.

H indicates the period of time from June 30, 1940, to July 1, 1945.

I indicates the period of time from June 30, 1945, to July 1, 1950.

Jewelry, Clocks, Optical Goods and Kindred Lines Exported from New York.

WASHINGTON, D. C., July 4.—The following were the exports of jewelry, silverware, optical goods, clocks, watches and kindred lines from the Port of New York for the week just ended:

Bahia: 12 packages optical goods, \$1,130.
Bergen: 4 packages engravers' machinery, \$298.
Bremen: 1 package plated ware, \$300.
Buenos: 13 packages plated ware, \$1,400; 34 packages clocks, \$578; 167 packages clocks, \$1,769;

3 packages watches, \$1,174; 3 packages plated ware, \$358; 1 package optical goods, \$289.

Calcutta: 28 packages clocks, \$532; 5 packages plated ware, \$616.

Copenhagen: 5 packages engravers' machinery, \$325; 11 packages clocks, \$305.

Ecuador: 1 package jewelry, \$238.

Glasgow: 23 packages clocks, \$240; 1 package optical goods, \$50.

Gothenburg: 1 package engravers' machinery, \$120.

Hamburg: 1 package silverware, \$750; 1 package optical goods, \$250; 3 packages optical goods, \$376; 2 packages jewelry, \$605; 1 package watches, \$1,975.

Havana: 25 packages clocks, \$216.

Havre: 2 packages watches, \$500 2 packages jewelry, \$500.

Hong Kong: 4 packages scopes and views, \$675; 50 packages clocks, \$790.

Jeremie: 1 package silverware, \$100.

Kingston: 1 package clocks, \$129.

Liverpool: 8 packages clocks, \$305; 205 packages clocks, \$21,169 1 package watches, \$200; 1 package silverware, \$735; 1 package jewelry, \$500.

London: 82 packages clocks, \$3,130; 4 packages plated ware, \$358; 1 package silverware, \$200; 7 packages optical goods, \$1,461; 14 packages watches, \$2,413; 2 packages jewelry, \$100; 23 packages clocks, \$288.

Manila: 21 packages scopes and views, \$2,050.

Nassau: 1 package plated ware, \$162.

Oporto: 26 packages clocks, \$291.

Panama: 1 package jewelers' supplies, \$149.

Parana: 4 packages jewelry, \$302; 12 packages clocks, \$267; 2 packages jewelers' machinery, \$123.

Pernambuco: 3 packages watches, \$200; 4 packages jewelry, \$868; 4 packages optical goods, \$378.

Shanghai: 173 packages clocks, \$2,468.

Singapore: 4 packages jewelers' supplies, \$491; 1 package watches, \$707; 3 packages plated ware, \$295.

Southampton: 2 packages optical goods, \$150; 2 packages watches, \$1,175.

St. Johns: 16 packages clocks, \$157.

Sydney: 3 packages optical goods, \$119; 5 packages plated ware, \$389; 105 packages clocks, \$2,075.

Vera Cruz: 6 packages plated ware, \$1,302; 26 packages clocks, \$289.

Yokohama: 37 packages clocks, \$914; 1 package silverware, \$1,150.

Zanzibar: 12 packages clocks, \$185.

Calvin Clauer, who recently purchased the business of Alfred Hossick, Elkhart, Ind., is a member of the retail jewelry firm of Cleis & Clauer, 105 Michigan St., South Bend, Ind. A. Kishler will be the manager of Mr. Clauer's establishment in Elkhart. Mr. Hossick will go to Detroit, where he conducts a wholesale business.

New Jersey Court Refuses to Restrain Wm. H. Rogers from Using His Name on Silverware.

In the suit of the International Silver Co. against William H. Rogers, of Plainfield, N. J., Vice-Chancellor Stevens in court of Chancery, Trenton, N. J., last Thursday filed a decision which denied the plaintiff's application for an injunction restraining the defendant from stamping silverware with his own name. This is another step in litigation that has extended through a number of years.

The defendant was formerly a member of the William H. Rogers Corporation, which had a factory at Plainfield. The International Silver Co. through its attorneys, Brownell, Mitchell & Bartlett, brought proceedings to compel the Plainfield corporation to cease the use of the name of Rogers. The plaintiff claimed that when this name was used as a trade-mark on silverware the public was deceived into supposing that the articles had been manufactured by the original Rogers, whose trade-marks are now the plaintiff's property. It was set forth in that case that the Rogers whose name had been used by the corporation was formerly a bicycle repairer. The plaintiff claimed that it was only on the account of the similarity of the name that Rogers was brought by others into the silverware business. The courts sustained the plaintiff company's claims and granted the injunction that was sought.

After the courts granted the injunction against the William H. Rogers Corporation the name was changed to the Plainfield Silver Co., but the corporation was soon dissolved and the business went on under the individual style of William H. Rogers.

The International Silver Co. then began the present proceedings and asked for an injunction to restrain Mr. Rogers from using his name or any similar name as a trade-mark or stamp on silverware. It was argued on the plaintiff's behalf that it would be most unfortunate for men who had built up a profitable trade if another, who by accident of birth happened to have the same or a similar name, could engage in the same line of business and win patronage solely by reason of the similarity of name.

Evidence was introduced in the case to indicate that Mr. Rogers and the company which he succeeded had printed on some of the boxes and labels notices to the effect that he was not the original Rogers. On the plaintiff's behalf it was argued that this notice would reach nobody's attention except that of the jobbers, who all know that William H. Rogers of Plainfield was not the original Rogers. The public, it was argued, in buying the silver see only the stamp in the metal, and if the word Rogers is used such stamp deception may result. Mr. Bartlett, as attorney for the plaintiff, urged that if the word Rogers was stamped in the metal the words "not original Rogers" should also be stamped on the metal. For the purpose of this argument the attorney said that he waived questions as to whether or not Mr. Rogers is in good faith the sole owner of the business, or is only a blind for a corporation.

The Vice-Chancellor holds that Mr. Rogers has a right to use his own name

provided he does not affirmatively make it appear that his wares are those of the original Rogers. It is likely that the appeal to the Supreme Court will not be heard until Fall.

How a New York Diamond Salesman Was Robbed in Oregon—Thief Captured and Sentenced to Prison.

Herbert A. Reichman, of Jos. H. Fink & Co., 65 Nassau St., New York, returned this week from his western trip after having been robbed of a quantity of diamonds, recovering most of them, arresting the robber and seeing him sent to prison for one year. He is thoroughly satisfied with the result of his experience, and believes that he has assisted in putting out of the way for a time a man who was a real danger to diamond salesmen.

Mr. Reichman arrived in Portland, Ore., June 18. Mr. Jaeger, of Jaeger Bros., local jeweler, gave him a card bearing the name of "K. Reber, jeweler, San Diego, Cal." It was said that the San Diego man was looking for diamonds, and was prepared to pay cash for them. Reber, whose real name is said to be G. M. Meyers, had been in Portland for a few days, and had introduced himself to Jaeger Bros., who had been led to suppose that he was a reputable merchant.

It happens that there is in San Diego a jeweler named G. Reber. The latter knew nothing of the man who was going about the country passing under a similar name.

A couple of days after reaching Portland Mr. Reichman went to Seattle, Wash., where he met Fred Davis, of Nordman Bros., San Francisco. Meyers had called on Davis, who, however, had no loose diamonds, and so informed Mr. Reichman that here was a prospective purchaser. At the hotel Meyers introduced himself to Mr. Reichman, saying that he had about \$5,000 in cash with which he wished to buy diamonds. They went to Reichman's room to examine his stock, the salesman taking the precaution of having a friend present, but the friend was called away before Meyers finished his examination of the stones.

Meyers spent a good deal of time looking over the stones on a table. With a lead pencil and a pair of tweezers he turned them about and handled them for inspection. After poking about in one lot of stones he would call abruptly for the salesman to push another lot toward him. Just at this point he abstracted stones from groups of m \acute{e} lée. The little stones stuck to his pencil and tweezers, on which, as he afterwards said, he had placed "dope," a kind of grease. The pencil or tweezers being replaced in his pocket at the time that Mr. Reichman was reaching for the new package of diamonds, the act was not noticed. It was easy for Meyers to give the pencil or tweezers a twist in his pocket, and this would loosen the stones, after which he was ready to begin again.

Only one large stone was taken. This Meyers said he took with his tongue. He did this while breathing on a number of the stones, and the action must have been performed quickly to escape the salesman's attention, as Mr. Reichman was watching

carefully every movement that he made.

Meyers put aside diamonds to the value of about \$8,000, asking the salesman to hold them for him until 2 o'clock the next day. Mr. Reichman then placed his diamonds in the safe. The next morning, feeling a little uneasy, he weighed the stones and saw that there was a shortage, one brilliant having been taken and several of the packages of the m \acute{e} lée being short. In all, the missing stones cost about \$500. The chief of police and the Jewelers' Protective Union were at once notified, and Pinkerton detectives went to work on the case.

Meyers did not call at the appointed time, but telephoned that he was busy and would call the next day. He did not do so. Mr. Reichman suspected that the man would go to the races, and the salesman went to the track to look after him. The salesman saw Meyers coming down the steps of the grand stand, and, taking him by the hand, remarked: "How are they coming?" Meyers showed the salesman a bet he had just made, and seemed anxious to get away. Reichman drew his revolver and held Meyers until the police arrived and handcuffed the man, taking him to the city jail.

At the jail the prisoner confessed that he had taken 21 small stones, and had sold them to the Goldwater Jewelry Co., who in turn sold them to Mayer Bros. These stones were afterwards recovered. A couple of days later the prisoner confessed the stealing of the brilliant, which weighed 1 5/32 of a carat, but this was not recovered. Before Mr. Reichman left Seattle Meyers was sentenced to one year's imprisonment and began to serve his sentence. The slight loss to Jos. H. Fink & Co. is covered by insurance.

According to the western police, Meyers attempted to steal from a number of salesmen and jewelry firms in Seattle, but did not succeed. Mr. Reichman believes, however, that the man had been working a game similar to the one now exposed on various diamond merchants. The man's operations were conducted so cleverly that in ordinary cases it would be difficult for a merchant to prove the theft, and because of this it is likely that complaints may have been withheld.

Death of Chas. E. Sherwood.

Charles E. Sherwood, who for many years had been a wholesale dealer and importer of diamonds and jewelry in New York, died July 5 at Asbury Park. He had been ailing since he returned from a western trip a number of months ago, and had been confined to his home, 135 Hamilton Place, for several weeks.

Mr. Sherwood was a native of Kentucky. He first engaged in business as a member of Kelly & Sherwood, at San Francisco. In 1886, having sold out his western business, he came to New York, and had since been located successively at 25 and 21 Maiden Lane. He is survived by a widow. The funeral took place from his home, and was private.

An unknown man, supposed to have been a jewelry peddler, fell from a passenger train near Fisher, Minn., a short time ago and was instantly killed.

Funeral of the Late Max J. Lissauer, Who Died in Amsterdam, Held in New York.

The funeral of Max J. Lissauer, head of Lissauer & Co., 12 Maiden Lane, New York, who died June 18 in Amsterdam, Holland, took place last Thursday at his home, 61 E. 83d St., New York. There was a large attendance of friends of the family and of business men who had been associated with Mr. Lissauer and desired to show the high regard in which he was held. There were present representatives of the Columbia Bank, the Hudson Realty Co., the Jewelers' Board of Trade and other organizations. Although the family discouraged the sending of flowers, yet quite a number of pieces were sent by friends who could not refrain from showing this last mark of esteem, and there were particularly handsome pieces from the Columbia Bank and the Hudson Realty Co.

It was Mr. Lissauer's wish that his funeral should be conducted with as little ostentation as was possible, and the services were arranged in keeping with this purpose. He had asked that the addresses be limited to remarks by one or two friends and accordingly John L. Shepherd, of the Keystone Watch Case Co., and Hugo Adams, vice-president of the Freundschaft Club, were invited to speak.

Col. Shepherd, who had been for many years closely associated with Mr. Lissauer in commercial, social and political affairs, spoke eloquently of the sterling qualities of his friend, saying in part:

"We are assembled here as business men and friends to pay the last sad tribute of respect to a gentleman who, by his integrity and ability, won the respect and esteem of all with whom he came in contact, but who now lies here in that last, endless sleep of death. I can say of him most truthfully that which I wish most sincerely could be said of every man at the end of his life's journey—that by example he has shown life to be worth the living. I know of nothing more grand and beautiful that can be said of any man than after his death he will be missed by mankind, missed for his virtues, missed for his charity, missed for his ability. All these qualities Mr. Lissauer had."

He was deeply interested in any movement in the trade and especially those that he thought would bring the greatest good to the greatest number. He was an earnest worker for the Jewelers' League. In the years of the great panic he organized the Jewelers' Relief Association and was its president until his death. By his integrity and ability he built up a business that so long as it lasts will reflect honor and credit upon his name and character.

But this is not the time or place to speak of his commercial achievements. They are known to the business world. A member of a long persecuted race, yet he was a patriotic American citizen in the truest and noblest sense of the word, professing no religious belief other than that of the broad plane of humanity. In his charity he knew no sect or creed, he hated sham and hypocrisy, he despised wrong-doing in public or private life, and never varied in any movement that he thought for the best.

Ever ready with advice and assistance to those who sought it, his career should be an example to all young men who wish to make life worth living, so that when their fitful journey is over, it may be said of them as we can say here of Mr. Lissauer to-day, that he has left a name and reputation which time will not tarnish and which in each passing year will grow brighter and brighter. We know that he will be long remembered by those he loved and by the business men of Maiden Lane.

It is by the life of such men as Mr. Lissauer that we learn that great lesson of mankind, the true lesson of humanity, that one touch of nature makes the world kin. This inspires us with a new courage again to take up the burden of life,

refreshed and strengthened and elevated to a nobler and loftier plane where all the passions and prejudices are forgotten, where self and selfishness are remembered no more in our desire to assist the poor and lowly. By reason of this lesson we become men in the truest, noblest and gentlest sense of the word.

The house of our memory can be furnished alone by our own acts and deeds. If these acts and deeds have been like those of Mr. Lissauer, noble and unselfish, if we have assisted the poor and lowly, if we have spoken words of cheer to those to whom life is a hard and cruel burden, then our memory, like that of our dead friend lying here, will be full of beauty and peace and joy, with more sunshine than shadow, more pleasure than pain and more laughter than tears.

Mr. Adams's remarks, which were in German, were largely in relation to Mr. Lissauer's social qualities which endeared him to those who knew him best. Mr. Lissauer was formerly president of the Freundschaft Club, and the intense interest shown by him in the beneficent works of the organization was recalled by the speaker as illustrative of the character of their departed friend, who, during his career, had in many ways extended a helping hand to those about him.

The body, in accordance with wishes expressed by Mr. Lissauer before his death, was cremated in the Freshpond Cemetery, and the urn containing his remains will rest in the family mausoleum.

At the regular meeting of the directors of Columbia Bank, held on Wednesday, June 20, 1906, the president announced the death of their colleague, Max J. Lissauer. The following resolution was passed:

"Whereas, It having pleased Almighty Providence to suddenly take from our midst our valued and beloved colleague, Max J. Lissauer, we feel that this bank has sustained a great loss in his death. Mr. Lissauer was a member of this board for 17 years (since January, 1889), during which period he faithfully attended the meetings and councils of the board and always had the welfare of the bank at heart. It is further

Resolved, That the sympathy of this board be extended to his bereaved family, and it is ordered that this resolution be entered upon the records of this bank, and that an engrossed copy thereof be submitted to his sorrowing family.

JOSEPH FOX, President.

W. S. GRIFFITH, Cashier.

At the regular meeting which the directors of the Jewelers' Board of Trade will hold to-morrow, appropriate action will be taken on Mr. Lissauer's death.

Creditors of David Hartstein, New York, Considering His Offer to Compromise.

Creditors of David Hartstein, 4 Avenue C, have recently held several meetings for the purpose of considering a composition which he offered. Mr. Hartstein had been in business at that address for several years and enjoyed considerable credit. Part of his business was of the installment character, and his trouble has apparently been hastened by slow payments on these accounts. His first offer to his creditors was 30 cents on the dollar. The creditors at a conference held one day last week in the office of Samuel E. Koehig asked for a larger percentage, and he then offered 40 per cent., proposing to pay 10 per cent. in cash, 10 per cent. in indorsed notes due in six months, 10 per cent. in indorsed notes due in nine months, and 10 per cent. in notes that are not indorsed, due in 12 months.

The committee which had been looking

over Mr. Hartstein's books reported that the merchandise and fixtures, at a conservative valuation, were worth \$8,080, cash on hand amounted to \$370, and there was merchandise out on memorandum to the value of \$1,521, making a total of \$9,971. Out of \$20,000 due to Mr. Hartstein on accounts, about \$6,000 will be collected, the committee believes, if he continues in business. He claims that by continuing he can collect nearly all outstanding accounts. His liabilities amount to \$32,000.

Most of the creditors represented at the meeting were inclined to accept the offer of 10 per cent., although two or three expressed dissatisfaction. The proposition is now being circulated among the creditors for signature.

Mr. Hartstein has been in business altogether about 15 years. He started by selling to private trade from his home and about 1902 he opened a store at 413 E. Houston St. The next year he moved to his present address.

All Indications Point to Success of Pennsylvania Retail Jewelers' Association Formed at Pittsburg.

PITTSBURG, Pa., July 10.—All arrangements have been completed for organizing the Pennsylvania Retail Jewelers' Association, which meets in convention in this city to-day. Jewelers from Pittsburg, Allegheny, Blairsville, Butler and surrounding towns met Thursday night at the Hotel Henry, where all the details were finally arranged and the various committees appointed. J. P. Steinman, chairman of the Reception Committee, completed his committee, the members including local and out-of-town jewelers. C. S. Wiley, who is the temporary secretary of the organization, believes that about 125 from all parts of the State will be in attendance.

At Thursday night's gathering a constitution and by-laws was presented and discussed, both being somewhat different than those of similar organizations in other States. They will be presented to the convention for ratification. There is no plan for the election of officers, and this will be left entirely to the convention.

Already the formation of the organization is attracting considerable attention among the wholesale dealers of this city, and especially those who do a retail as well as a wholesale business. Some of the wholesalers who retail do not look kindly on the project, and sort of resent what they term to be an interference on the part of the retailers. There, however, appears to be little doubt about the success of the movement, as those who have already arrived speak enthusiastically of the project. It has been decided to not hold a banquet. Delegates will be chosen to attend the first meeting of the national organization to be held in Rochester, N. Y., Aug. 3.

Congressman James Francis Burke and J. W. Wardrop, secretary of the Merchants and Manufacturers' Association, will address the convention to-day.

M. B. Lichtenstein, Salt Lake City, Utah, recently transferred to Charles H. Deer a parcel of real estate on State St., at that place, between 2d and 3d Sts., for \$30,600.

Diamonds Set Without Cost

Means a lot of money saved during the year. This you can do very easily if you have your settings done by a first-class setter. Your diamonds will improve in value more than three times the money you pay for setting them. At the same time your mountings improve greatly. Your customers are satisfied with all the orders you turn out. You can compete with all others who are slow in grasping the importance of these facts, by giving me all your settings. I am sure you will make no mistake as I will prove these facts.

I make a specialty of setting fine Platinum Mountings, Watch Cases, Lockets and Gypsy Settings.

Designs Selected for Silver Service to be Presented to Battleship "Louisiana."

NEW ORLEANS, La., July 7.—Coleman E. Adler was awarded the contract for the making of the silver service for the battleship *Louisiana* a few days ago. The service is to cost \$10,000, and Mr. Adler hopes to have it ready for presentation in at least four months. The award of the contract was made at the meeting of the Silver Service Committee. The committee carefully considered the four designs presented, and finally Mr. Adler's design was adopted as being the most appropriate and beautiful. According to the design offered by Mr. Adler, the ornamentation of the piece will symbolize the State of Louisiana, the battleship *Louisiana* and the United States Navy. The rim of the bowl will suggest agriculture, clusters of fruit forming a wreath around it. The State seal will appear on one side of the bowl encircled by the magnolia, which is the State flower. On the reverse side will be engraved examples of cypress and long leaf yellow pine, two of the trees prominent in the State.

The scroll work will be of the *Louis le Grande* period, as it was during the reign of *Le Grande Monarque* that the State's story began.

In the bowl proper and on a central panel will be an engraving of the famous Cabildo building flanked on either side by medallions showing La Salle at the mouth of the Mississippi and the transfer of Louisiana to the United States by France. Cotton and design showing the tobacco plant will be added with effect around the grouping. The other side of the bowl will show the State Capitol at Baton Rouge, and the City Hall, New Orleans, and both will be flanked by medallions showing the progress of the city and State in commercial lines.

The base of the bowl will contain a large seal of the United States Navy.

The large silver tray on which the bowl is to be set will be typical of the battleship *Louisiana*. On one side the new ship will be shown, and on the other the old ram *Louisiana*. The seal of the Navy will appear at each end of the tray. The bowl will be gold lined, and the complete center piece, which includes the large tray, will weigh 22,000 ounces.

A smaller tray will have two massive scrolls at each end, forming handles, and the State seal, the Navy seal and designs showing cane, cotton, tobacco, rice, cypress, pine and the magnolia flower will appear with artistic profusion. The piece will weigh 300 ounces.

The two fruit baskets will have both the State and Navy seals and the magnolia flower interwoven with Louis XIV scroll work. The bodies of the baskets will represent trellis work with entwined grape vines. The two cake baskets will be similar to the fruit baskets, but will be solid instead of open worked. The two ladles will be very beautiful, the bowls formed by an open magnolia blossom and the handles bearing the State and Navy seals, each surmounted by an eagle.

There will be 58 goblets, one for each parish in the State. On each goblet the seal of the State will appear with the

name of the parish presenting it on the reverse side. The magnolia blossom will form the socket for the cup and continue to the base in the shape of a stem. The edge of the goblet will be festooned with garlands of fruit. Each goblet will weigh from 15 to 20 ounces.

The decorative mounts, including the figures shown in the panels, medallions, etc., are to be modeled, carved, and applied after being carefully finished by hand chasing. The silver to be used will be .935 fine.

Corporation Reports Filed by Jewelry Manufacturers of North Attleboro, Mass.

NORTH ATTLEBORO, Mass., July 7.—A number of the local concerns have filed their annual corporation reports. C. Ray Randall, treasurer for C. Ray Randall & Co., presents the following figures: Machinery, \$10,970; cash and debts receivable, \$36,963; manufactures and merchandise, \$15,338; total, \$2,371. Capital stock, \$12,000; accounts payable, \$2,865; profit and loss, \$47,506; total, \$62,371.

Alton H. Riley, treasurer of G. C. Hudson & Co., presents this report: Machinery, \$16,845; cash and debts receivable, \$36,458; manufactures and merchandise, \$15,000; total, \$68,303. Capital stock, \$25,000; accounts payable, \$1,867; profit and loss, \$41,436; total, \$68,303.

William W. Sherman's report as treasurer of the H. D. Merritt Co. is: Machinery, \$18,330; cash and debts receivable, \$54,673; merchandise, \$28,390; good will, \$24,900; total, \$126,293. Capital stock, \$100,000; accounts payable, \$8,817; surplus, \$12,593; profit and loss, \$5,073; total, \$126,293.

The annual statement of the W. & S. Blackinton Co., as shown by the report of its treasurer, G. Herbert French, is: Machinery, \$30,905; cash and debts receivable, \$95,492; manufactures and merchandise, \$35,698; total, \$162,095; capital stock, \$150,000; accounts payable, \$2,079; profit and loss, \$10,016; total, \$162,095.

William H. Saxton, Middletown, N. Y., Files Bankruptcy Petition in New York.

William H. Saxton, a jeweler and optician, at 67 North St., Middletown, N. Y., last Friday filed a voluntary petition in bankruptcy in the United States District Court in New York. The liabilities, given in the schedules, amount to \$9,524. The nominal value of the assets is \$4,906, comprising stock, \$3,000; fixtures, \$1,050; tools, \$250; accounts, \$666. Judge Holt, of the United States District Court, appointed Russell M. Vernon, of Middletown, receiver of the assets.

Among the local creditors are: Ditt & Cox, Middletown, \$180; Annie L. Saxton, Middletown, \$5,850; Arnstein Bros. & Co., New Stivers Printing Co., Middletown, \$100; Merchants' National Bank, Middletown, \$113.

Mr. Saxton bought out his present business in 1903. He formerly carried quite a large stock, but this he reduced some time ago by conducting an auction sale for a month. He is a young man about 36 years of age, and is married. It had been supposed by his creditors that he had other means outside of his business.

Bold Thief Robs Brooklyn Jeweler at the Point of a Revolver and Escapes.

At the point of a revolver a thief at noon Monday robbed P. Friedrich, 1131 Broadway, Brooklyn. The robber, who was a tall young man apparently 22 or 23 years of age, after entering the store, said that he wished to buy an engagement ring.

Mr. Friedrich, who was about to go to lunch when the stranger entered, called a salesman, Charles Kuehnle, to show the stranger some rings. The visitor said that he desired a ring to cost \$25 or \$30. Mr. Kuehnle took from the show case a tray containing a number of rings, ranging in value up to \$150. The supposed buyer handled several of the rings, remarking on the beauty of several stones. Then he took a revolver from an inside pocket and, pointing it at the clerk, said in a low tone and with much deliberation: "If you move or shout for help I will shoot a hole through you."

Kuehnle was so stunned that he did not utter a word. Keeping the revolver pointed at the clerk, the stranger picked up the tray of rings, placed it under his coat, which he buttoned, and then he moved backward toward the outer door. As he reached the street the thief ran up Broadway and down Kosciusko St.

When the robber dashed into the street Mr. Kuehnle for the first time shouted, and other attendants in the back room came hurrying out, but they did not succeed in capturing the thief. The police of the Ralph Ave. station were notified of the robbery.

The jeweler was robbed in a similar way a number of years ago.

Pittsburg Police Arrest Men Believed to Have Robbed Kansas City, Mo., Jewelry Store.

PITTSBURG, July 9.—The police of this city to-day arrested on suspicion Hugo Roman and Fred Decker, both of Brooklyn, New York, and it is believed that both were implicated in the robbery of a jewelry store committed on July 4 in Kansas City. Many articles of jewelry were found in two suit cases which were deposited by the men in the baggage room of the Union Station.

Hugo, who is 22 years old, had a great deal of jewelry with him for which he could not give a satisfactory account. Later his accomplice, Decker, was arrested, and he confessed that on the night of July 4 both broke the window of a jewelry store in Kansas City and made off with plunder valued at \$5,000. One pin alone is said to be worth \$1,000.

Decker, who claims to have worked for the Title Guarantee and Trust Co., New York, said that he struck the window with a torpedo cane while the other fellow threw a brick through it. They did this during the noise of the celebration of Independence Day, and were not detected.

The burglar alarm in the store of Egermann & Son, Aurora, Ill., attracted the attention of Capt. Wells and Policeman Strong at that place, about a week ago, but an investigation failed to discover anything irregular in the establishment. A thorough search was made of the store, but no thieves were in sight.

Omaha.

Fritz E. Sandwall, South Omaha, is back from a visit to Denver.

Joseph P. Frenzer has returned from a pleasure trip to Blue Lake, Ia.

A. W. Taylor, Oakland, Ia., was in this city last week, purchasing stock.

Joseph P. Frenzer has been beautifying his store by elaborate decorations and fresco work.

Walter Mandelberg, son of A. Mandelberg, is confined to his home on account of illness.

George W. Ryan, of the Mawhinney & Ryan Co., is traveling through Wyoming on business.

P. E. Flodman and J. L. Jacobson were elected delegates to the State Senatorial convention, which meets in Lincoln August.

Fred Brodegaard and wife gave a house warming at their new country home at Benson, July 3 and 4. Over 500 people called during the two days.

H. J. Penfold, president of the H. J. Penfold Co., has returned home from Philadelphia, Pa., where he attended the meeting of the American Surgical Association.

J. L. Jacobson supplied the gold medal set with diamonds which was presented by the A. Hospe Co. to E. Val Kamp, who has been in the employ of Mr. Hospe for over 25 years.

Jack Jennings and Angus Martin, the two men who were convicted of grand larceny for stealing a diamond at M. D. Frank's jewelry store, were both sentenced to seven and five years respectively in the penitentiary last week.

Mae Hayes, convicted of swallowing a diamond belonging to T. L. Combs & Co. has been sentenced to five years in the penitentiary by Judge Sutton. Her attorney, W. W. Dodge, gave notice that error proceedings would be carried to the Supreme Court, and a hard fight for her liberty would be made before that body.

Jewelers Gold Bars Withdrawn and Exchanged at New York.

E. E. Howendabler, Perry, Okla., expects to discontinue his jewelry business.

Providence.

TRADE CONDITIONS.

In spite of the fact that it is the vacation season the shops are unusually busy, some of them running way into the night. Such a condition of affairs at this time of year is unusual to say the least.

Henry G. Thresher, of the Waite, Thresher Co., is spending his vacation in Maine.

Jewelers were well represented in the list of jurors drawn by the Board of Aldermen at its session last Thursday.

A number of concerns took advantage of the fact that there was a holiday last week and closed their shops for the week, to make needed repairs.

On June 30 the factory of the Gorham Mfg. Co. shut down for two weeks, in order that the annual repairs, inspection of boilers, etc., might be made.

A movement is on foot to purchase a new service for the battleship *Rhode Island* and about \$4,000 already having been contributed for the purpose.

The Castiglioni & Capaldi Co. is the firm in the line of the concern which has succeeded the T. F. Greenwood Co. at 9 Calender St.

Castiglioni is president; J. Capaldi, treasurer, and R. C. Castiglioni is secretary. The present concern is making a patented watch bracelet.

The Wm. J. Feeley Co. has been awarded the contract for the tablet to be placed in the State House to the memory of Maj.-Gen. John Sullivan by members of the local branch of a well-known Irish society. The material will be of bronze and the design particularly neat and artistic.

The commercial travelers are expecting to hold their annual Summer outing soon, and are making promises that they will put out the jewelers in nattiness of attire and general good looks in the parade they expect to make. All wagers that have been recorded seem to lean toward the jewelers, however.

Articles of incorporation of the Cornell & Andrews Co. have been taken out, following the death of William O. Cornell. The officers of the new concern are Frank O. Andrews, president; Frederick W. Andrews, vice-president; Reuben J. Rice (the latter of Meriden, Conn.), treasurer. The amount of capital stock is \$90,000.

North Attleboro.

The Codding & Heilborn Co.'s factory closed for 10 days while repairs are being made.

Percy Clapp and Fred Cook intend, on July 15, to go on an extended fishing trip through Maine.

There is an agitation to have all jewelry shops that intend giving their employees a week's vacation to do so the week commencing July 28.

Frank Whiting, of Whiting & Davis; Percy Clap, of Daggett & Clap Co.; C. Forrest, of Frank M. Whiting & Co., and Frank Kennedy, of the Paye & Baker Mfg. Co., were in town during the past week.

The Plainville Stock Co. gave its employees an outing down the Providence river Saturday. The party left town in the morning on a special car for Providence. Arriving in that city the boat was taken to

Field's Point, where a shore dinner was enjoyed. Thence the party went to Crescent Park and passed a pleasant afternoon.

James Danielson Lincoln's will was admitted to probate at Fall River, Friday. It shows many liberal bequests to public charities. The Children's Aid Society of Boston receives \$1,000; the Children's Hospital of Boston secures \$2,000; the Boston Children's Aid Society, \$1,000; the Gwynne Temporary Home for Children of Boston, \$2,000; Nickerson Home for Children of Boston, \$2,000; New England Peabody Home for Crippled Children of Weston, Mass., \$2,000; town of Brimfield, Mass., for the maintenance of the Danielson Lincoln Memorial Library, \$3,500. This latter amount will be raised to \$6,000 if \$5,000 is secured from other sources. Woodbury Melcher and Fred Williams, of Brookline, are the executors.

Attleboro.

The Attleboro Mfg. Co. and Attleboro Chain Co. will close July 21 to 30 for stock taking.

July 14 is the date selected for the annual shore outing of the employees of the Watson & Newell Co.

Fred Uhlig has been added to the Watson & Newell Co. force of traveling salesmen, to show samples in the Middle West.

Clarence A. Fisher, for years Attleboro representative of George L. Claflin Co., chemicals and jewelers' supplies, has been promoted to the general agency of the business.

The funeral of Reginald D. Fogg, salesman for the Watson & Newell Co., was held at his home last week. The Standard Button Co. sent a floral tribute. Among the bearers was Walter B. Marble, salesman for Marble, Forester & Co.

Charles E. Bliss, recently retired from Bliss Bros., and his son, Chester, a member of the present Bliss Bros. Co., narrowly missed death last week. In an auto they were riding from Taunton to Attleboro, when the machine stuck fast on a railroad grade crossing in the country. They had barely time to get out before an express train reduced the auto to splinters, beyond all repair. The escape of the two men was a matter of seconds.

A large number of the Attleboro jewelry factories are now closed, some for stock taking, more because of a lapse of business, and the bulk of those whose doors are shut will remain closed for a fortnight or more. The employers and employees are embracing the opportunity to get away for vacations. J. Lyman Sweet, of the R. F. Simons Co., with Mrs. Sweet, left last week for England. The voyage is taken solely for Mr. Sweet's health, and eight weeks will be spent in rest and practical seclusion in some English town. Continental sight-seeing is forbidden by his physician. James E. Blake, of the James E. Blake Co., and John C. Cummings, of J. C. Cummings & Co., with their wives, and Harold S. Blake, son of the former, as chauffeur, made a trip last week to Old Orchard, Me., in Mr. Blake's big touring car. Frank H. Sadler, of F. H. Sadler & Co., has opened his Summer place at Cottage City, Mass., and installed his family there. Lawrence Robbins, son of Charles M. Robbins, takes his

vacation in the form of a walking trip to Montreal. The elder Mr. Robbins is spending his vacation at Greenwood Lake, Mass. Arthur B. Cummings and Fred E. King, of Cummings & King, are engaged in a yachting cruise off the Massachusetts "north shore." Charles P. Keeler, of McRae & Keeler, with his family, has started for an auto tour in New Hampshire, of a week's duration. Miles Carter, of Carter, Qvarnstrom & Remington, has made his Summer home at Westport. N. Justin Smith and family are at Touisset, R. I.

Boston.

August Sweetland, of the firm of C. W. Sweetland, is at Friendship, Me., for an outing.

John M. Cutter, of the Trenton Watch Co., was among the visitors to the trade during the week.

Eugene Sanger, buyer for the house of Harwood Bros., is at Amherst, N. H., for a couple of weeks.

E. A. Cowan, who has been in Europe during the past month, sailed for home on July 5, much improved in health.

Carl D. Smith, of the Smith, Patterson Co., has opened his Summer camp at Munsonville, N. H., this month, and is enjoying a brief vacation there.

William J. Dron, formerly with Joseph A. Williams, of this city, but for the past three years in business in Brantford, Conn., has sold out his place at Brantford, and returned to the employ of Mr. Williams.

A. M. Mossman, jewelry jobber at 77 Summer St., this city, has taken a retail store on Washington St., near the corner of West St., and will shortly remove his jobbing department to the same building.

Lawrence F. Percival, of D. C. Percival & Co., who is one of the best known yachtsmen in Massachusetts, sailed his new craft, the *Sally VIII*, to victory on July 4 in the Eastern Yacht Club regatta at Marblehead.

The midsummer outing of the Jewelers' Association of Boston took the form of an auto trip through the suburbs, 25 members participating, with six automobiles in line. The party took dinner at the Woodlawn Hotel in Auburndale.

Buyers in town during the week included: William Senter, Portland, Me.; E. F. Welch, Westboro; E. I. Thomas, Leominster; W. C. Smith, Haverhill; G. F. P. Mayher, Holyoke; A. E. Baudette, Woonsocket; H. S. Hewitt, Brockton; W. A. G. Smith, Rockland.

A number of additions to the employees of Henry Cowan are announced this week. Herbert N. Libbey, for a number of years with Charles May & Son, becomes the head of the material department, and Charles A. Pass, also from the May concern, enters Mr. Cowan's employ. The house will be represented on the road in Massachusetts by Martin Tishler, and William Crowley will have other New England territory, while William O'Leary will be outside city salesman. L. Watson is to take charge of the repair department. Other new employees are Mrs. M. Davis, bookkeeper, and Henry Casey and John Buckley.

J. L. Prince, Ensley, Ala., has sold out to J. H. Waters, Brookwood, and W. K. Thaxter, Birmingham, Ala.

ADDISON W. WOODHULL, President.
FRANK K. HUFF, Vice-President.

GILBERT T. WOODHULL, Treasurer.
WILLIAM J. McQUILLIN, Secretary.

Recent Publications.

TALKS BY AN OLD STOREKEEPER. A book for merchants, by FRANK FARRINGTON. 16mo, 150 pages, profusely illustrated. Published by the Merchant Helps Pub. Co., Delhi, N. Y. Price, postpaid, cents.

THIS book of talks by an old storekeeper was aptly termed by one of its readers as a "business man's fiction founded on fact." It purports to be a series of interviews with an old-time storekeeper, who speaks of various things that come up in the course of a merchant's career and gives his views thereon, but the matter is brought out in connection with some incidents connected with the characters spoken of in the book in such a way as to make it vitally interesting, even if the book is read purely for amusement. The storekeeper, Tobias Jenkins, who retired from business and sold out his store to a young man, John Ballou, discourses on a few natural mistakes made by the latter, and his words of advice and his shrewd, hard-headed philosophy may be found distinctly profitable to the ordinary merchant who reads the book.

The old storekeeper's views on store management, advertising, window display, special sales, treatment of clerks, as well as his general hints, are not only based on common sense, but are the fruit of the author's many years' experience in actual storekeeping, and, in fact, the ring of actual experience seems to be manifest throughout the volume.

The book is neatly bound in cloth and illustrated with half-tones and sketches made by Maud Thurston.

Philadelphia.

William Boyard, Manayunk, removed today, with his family, to Rehobath Beach, Del., for the Summer.

J. E. Caldwell & Co. were awarded, last week, the contract for the prizes for the Ocean City Yacht Club regatta.

Charles Diesinger, the diamond dealer, has closed his town house and taken a cottage at Atlantic City for the Summer.

Abe Sickles, of Morris Sickles & Sons, removed, with his family, to the Royal Palace Hotel, Atlantic City, for the balance of the Summer.

Charles H. Dean, 715 Sansom St., is in this season summering at Atlantic City, where he is almost always to be seen on the Boardwalk in a rolling chair.

Joseph Bradley, a silver plater, 1130 S. Second St., and William Bachman, Jr., a dealer 2428 Turner St., were, last week, sworn for service on the July Grand Jury. Weber & Bros.' jewelry store, 2209 N. 5th St., caught fire, last week, from defective insulation of an electric light wire and was quickly put out, with a loss of only \$5.

Fred Barry, with S. O. Bigney & Co., and R. H. Woodrow, with Cross & Begue, two former Philadelphians, spent the first of July holidays visiting their families in this city.

J. Warner Hinchins, J. Clifford Wilson and Isaac Elliott, of the Jewelers' Club, were the guests of Mr. Wilson last week on his yacht, cruising for several days from Cape May to Beach Haven.

Wm. H. Moore, 1708 Ridge Ave., has engaged his Summer cottage at Pitman, N. J., to which place he has removed with his family. Wm. H. Moore, Jr., has just returned from a honeymoon trip.

The only 4th of July accident sustained in any in the trade is that reported to have happened to William H. Waltz, Perkasio, Pa., whose thumb was torn and shattered by the premature explosion of a cannon racker.

The stock and fixtures of the retail store of Louis Gwirtz, 1034 N. 2d St., recently adjudged a bankrupt, were disposed of at auction at the Freeman building, last week. Bernard Italie, of the Koshland & Italie Co., Inc., has been appointed receiver.

Harry Barry, with M. Sickles & Sons, as removed, with his family, to Lansdowne, Pa., for the Summer. Samuel Chestnut is spending his holidays at Atlantic City. Burroughs Robertson was at Greenwood over the 4th, and Elmer Horn at Easton.

Walter Hazelton, with Charles H. O'Bryon, 735 Sansom St., suffered painful injuries last week by falling during an attack of vertigo after leaving his business. His scalp was severely lacerated and he was removed to his home, to which he has since been confined.

The wholesale district was to a large extent alarmed Thursday night by a fire which started at 107 S. 8th St. Fortunately it was speedily controlled and prevented from spreading to the Sansom St. establishments, which are regarded as mere tinder boxes. The only one in the trade to suffer material loss was J. Myers, diamond broker, 107 S. 8th St. His place was flooded with

water. The loss has not yet been determined.

Morris Sickles & Sons' baseball team defeated, last week, the nine representing L. P. White, by a score of 22 to 21. In the last inning Sickles' team let loose in a Garrison finish and making 11 runs, won out. The only team which has so far defeated Sickles' nine is that of Simons, Bro. & Co., which won by a 5 to 1 score. There is talk of a return match, but the trade is inclined to award the laurels to Simons' nine.

Martin Mayer, an uptown retailer, formerly of the firm of Mayer Bros., with stores on 8th St. and in Atlantic City, was adjudged an involuntary bankrupt last week. The creditors and the amounts claimed are reported to be as follows: B. J. Cooke's Sons, \$158,37; Elias Weinmann, \$183; and Adelaide L. Piersich & Co., \$199.13. Elias Weinmann has been appointed receiver and fixed yesterday for the sale of the stock of diamonds, watches, rings, pins, etc., fixtures and cut glass at 1229 Chestnut St.

Lancaster, Pa.

Fred J. Stoner, a jeweler, died last Friday at Steelton.

Mr. and Mrs. Wilson Drobs have gone to Atlantic City for two weeks.

J. H. Sensesing, New Holland, Pa., has entered a Philadelphia optical college.

Johann Obermyer, a diamond cutter, of Amsterdam, Holland, spent last week in Lancaster with relatives.

Charles L. Evans, of this city, lately watchmaker for Charles J. Kinzer, Bluefields, W. Va., has gone to Mexico City, Mex.

Jacob Esch, Intercourse; A. S. Beiler, Leola, and G. F. Frymyer, Groffs Store, were among the few jewelers visiting here recently.

John J. Bowman, of Ezra F. Bowman's Sons, made a trip last week through the Cumberland Valley in an automobile with several friends.

Harry Lichtenstem, lately in the jewelry business at Lebanon, a brother of Benjamin Lichtenstein, of this city, has engaged in business at Williamsport.

J. H. McKechnie, department superintendent of the Hamilton Watch Co.'s factory, has gone on a visit to his old home, Springfield, Mass., accompanied by his wife and George Daniels, another department superintendent. W. H. Wanby, also a department head, has gone to Reading, Pa., with his wife, and M. J. Bolger, another head of department, is visiting Oklahoma.

Baltimore.

The City Hall clock was out of order again last week, owing to the grounding of an electric wire, and is being repaired.

Gen. J. Stuart MacDonald, president of the J. S. MacDonald Co., took the oath of office June 30 as naval officer of the port at Baltimore. Speeches and flowers were much in evidence.

The Old Town Merchants and Manufacturers' Association returned last week from their outing to Atlantic City and all pronounced it very successful. J. George Gehring, Jr., was on the committee of arrangements.

Fred Bucher, of Fred Bucher & Sons, who recently moved into their handsomely equipped new home at 218 N. Charles St., has combined his two stores at 12 Clay St. and 219 S. Broadway and moved them into his new place.

H. Bealmeier & Co. have leased the building at 25 W. Baltimore St., now occupied as a ticket office by the Western Maryland Railroad Co., and will conduct their establishment there. The firm is temporarily located at 231 and 236 Park Ave. The building has a very handsome front and is centrally located, being between Charles and Hanover Sts.

Pittsburg.

A number of the local wholesale houses are taking stock.

The Hunter block at Turtle Creek, Pa., in which several jewelry stores are located, was last week sold for \$100,000.

A number of jewelers are out of the city on their vacation. W. E. Schmitt is at Atlantic City, W. A. Rudolph at Turkey Foot Lake and A. M. Bailey at Grove City.

Only one traveling salesman visited Pittsburg last week—Alberta S. J. Schweizer, of the Ansonia Clock Co. E. P. Shattuck took the road for the George P. Barrett Co.

S. Davis & Co., who were burned out several weeks ago, are remodeling their store. The painters are now at work. The firm will carry a much larger line than formerly.

The following out-of-town merchants visited this city last week: H. Zilliken, Wellsburg; C. H. Bauer, Blairsville; L. L. Swan, New Castle; R. A. Noble, Wellsville; P. J. Manson, Jeanette.

P. S. Gillespie, of Gillespie Bros., who had intended sailing for Europe July 10, left for New York Sunday night, and will sail this week. His brother, A. A. Gillespie, spent last week at Lancaster, Pa., with relatives.

The firm of E. P. Roberts & Sons, Inc., began moving last Thursday night into its new store at 233 Fifth Ave. and continued moving Friday and Saturday. It will be a week or two before the firm finally gets settled. The new fixtures have been installed.

A. Larney & Co., who at present have quarters in the Bessemer building, will shortly move to a ground floor store room in the new Fulton building, being erected at Sixth street and Duquesne Way, one of the latest modern skyscrapers built in Pittsburg by Henry Phipps. The firm will largely increase their stock.

The mystery surrounding the disappearance of a diamond ring worth \$200 from Mrs. Robert A. Tress, 1420 Washington Ave., Allegheny, Pa., was cleared Friday night of last week, by the arrest of a diamond salesman of 128 Moultrie St. The ring was found under a rug, and at the time of its disappearance the salesman is said to have been in the house. He was held on a charge of larceny and later released in \$500 bail.

The August Bruder Co. was incorporated Monday, of last week, in the State of Indiana, with a capital stock of \$40,000, the main offices being in Fort Wayne. The directors are: August Bruder, J. A. and Nora Calhoun.

THE BOSTON DIAMOND HOUSE

JOHN B. HUMPHREY CO.

387 Washington St., Boston, Mass.

We are receiving Monthly Shipments of Diamonds from our Brazilian Mines,
which are on exhibition at our Boston Office.

Pacific Northwest.

The marriage of George G. Hedger and Miss Myra Gregory took place last week at Walla Walla, Wash.

The store of A. N. Johnson, Estacada, Ore., was broken into last week, and about \$100 worth of watches and jewelry was taken.

E. B. Lecky, formerly of Iowa, has purchased the store of A. Schindeler, North Yakima, Wash., and is now in possession. Mr. Lecky is an experienced jeweler and will carry about the same stock and class of goods formerly carried by Mr. Schindeler.

From Jaeger Bros.' establishment, 29 Morrison St., Portland, Ore., which was robbed June 24, plunder aggregating over \$3,000 in value was stolen. The thieves entered from the back of the store by breaking a pane of glass out of the rear window and prying the steel bars apart guarding the opening. A large quantity of diamond doublets were taken and trays containing rubies, emeralds and sapphires were emptied and gold collars studded with precious stones also went into the pockets of the burglars. No trace of the latter has been found.

Newark.

A report comes from Totenville that about seven acres of land have been purchased on the bluff near Brown's shipyard by a large watch manufacturing company which is to establish works there.

Proceedings are to be begun against the watch manufacturing company in Greenville, N. J., for the abatement of the smoke nuisance, according to a statement made last week by the corporation counsel of Jersey City.

A story was published in one of the Newark papers several days ago to the effect that two manufacturing jewelers who have shops on Canfield St., recently underwent a disagreeable experience. The one arose early one morning and went to the building in which they have their shops in order to get tackle stored there the day before for a fishing trip on which they were about to start. A manufacturer of leather belting in the same building had reported to the police a few days before that pieces of leather were being stolen from his factory. When the jewelers entered the building the detective who was watching summoned a patrolman and placed the two would-be fishermen under arrest. They were taken to the First Precinct police station in the police patrol wagon, and it was some time before they succeeded in convincing the officers that a mistake had been made. They were released in time to go rejoicing on their fishing trip.

Samuel Silverstone, for some time engaged in the optical business in Peoria, Ill., died recently at his home at the corner of Sixth Ave. and Monson St., that place aged 58 years. The deceased was a member of the Masonic fraternity and of the Order of Modern Woodmen, deputations from both of which organizations attended the funeral. Mr. Silverstone is survived by two sons and one daughter, his wife having died two years ago.

Connecticut.

Mrs. W. Irving Wilcox and Roy Wilcox left Meriden recently for Fishers' Island.

John B. Kirby, New Haven, is spending the Summer months with his family at Silver Sands.

William Sparks, traveling representative of the Seth Thomas Clock Co., Thomaston, recently spent a few days at his home in Thomaston.

Joseph H. Lamb was recently appointed to the position of general superintendent of both factories of the Landers, Frary & Clark Co., New Britain.

Walter A. Ingraham, of the E. Ingraham Co., Bristol, accompanied by his family, left July 6 for Cottage City, where they will spend the Summer.

The William L. Gilbert Clock Co., Wind-
ed, June 30, closed its factory for the annual inventory of two weeks, during which time repairs will be made.

C. B. Sanford, who, about a year ago, was appointed superintendent of the office force of the Sessions Clock Co., Forestville, has just moved his family to that place.

Clayton H. Case & Co., Hartford, have an exhibition the three shields in bronze and silver to be competed for at the regimental shooting contest this year in Hartford.

The Ford building, New Haven, owned by Gen. George H. Ford, president of the Ford Co., New Haven, has been sold to the New York, New Haven & Hartford Railroad Co.

William S. Ingraham, of the E. Ingraham Co., Bristol, July 3, was elected a director of the Bristol National Bank to succeed William E. Sessions, who resigned from the board some time ago.

Clarence E. Breckenridge, Jr., Wallingford, son of C. E. Breckenridge, director of the International Silver Co., and Miss Bertha L. Backes, also of Wallingford, have announced their engagement.

The new water wheel of the International Silver Co.'s Shelton factory was placed in position Monday, and the work was completed in time for the turning of the water in the canal Thursday morning, July 5.

Abraham Silverthau, of S. Silverthau & Sons, New Haven, is rapidly recovering from severe injuries sustained during a collision with a wagon while riding his bicycle a short time ago.

G. T. Higginbotham, who was assistant superintendent in the clock factory of the Seth Thomas Clock Co., several years ago, was a recent visitor to old friends in Thomaston. Mr. Higginbotham is superintendent of the South Bend Watch Co.

L. Tunick, of Tunick & Shalett, Torrington, and Miss Rose Rosenfeld, were recently united in marriage in New York. The couple spent their honeymoon at Atlantic City, N. J., returning home July 4.

David P. Snow, who died recently at the age of 65 years, had been in the employ of the Meriden Britannia Co., Meriden, for a period of 40 years. The deceased was born in Westbrook, but had spent much of his life in Meriden.

Thomas C. Lewis, Jr., treasurer of the Ford Co., New Haven, and Miss Lillian Viola Proctor, daughter of Mr. and Mrs. Sanford Proctor, New York, were married

recently in New York. The couple will reside in Westville, Conn., after Oct. 1.

Passers-by have recently been attracted to the show window in the store of S. Kronholtz, Stamford, by a display of the silver trowel with which Bishop Turney laid the corner stone of St. John's Parochial School at that place. The trowel was supplied by Mr. Kronholtz.

Mrs. Cora Northrup was arrested a short time ago in Bridgeport on a charge of stealing a ring valued at \$14 from Max Wittstem, 1162 Main St., at that place. The jeweler agreed not to prosecute the woman provided the gem was recovered. Upon surrendering the ring the woman was advised to leave the city at once.

Joseph W. Beach, for several years engaged in the manufacture of bronze metal goods, died, July 2, after an illness of several weeks' duration, at his residence, 1427 Fairfield Ave., Bridgeport. The deceased was born in Derby 64 years ago. He was of a kindly disposition, and admired and respected by all who knew him. He is survived by a widow.

A night watchman at the silver shop of the E. H. H. Smith Silver Co., Bridgeport, accidentally overheard a conversation between four supposed yeggmen in the vicinity of the factory shortly before midnight July 7. He followed the men to a rendezvous and there heard enough to convince him that they were planning to extend their depredations to the silver plant. The watchman telephoned General Manager Parks of the concern, and also a deputy sheriff, who went post haste to the factory, arriving just in time to see the would-be burglars effecting a hasty retreat, before completing their plans.

Buffalo, N. Y.

Berthold Block, of Berthold Block & Co., ring manufacturers, and his wife go to their country place near Melland, Ont., next week to spend the balance of the Summer.

Heintz Bros., manufacturing jewelers, have donated a beautiful silver cup which will be given as one of the prizes at the Skat tournament to be held here next week.

Adolph Block, of the Queen City Ring Mfg. Co., Ellicott and N. Division Sts., has purchased a large auto touring car, one of the most expensive that has been shipped to this city.

T. & E. Dickinson & Co., retailers, close their store at noon on Saturday during July and August, to give the firm members and employes a half holiday. This fact is unusual, in that not another Buffalo jewelry store closed on Saturday afternoon. All of the optical stores in Main St., however, do so under a signed agreement.

Mrs. Carrie Schlenker, a saleswoman, charged with robbing the store of the Freeman Jewelry Co., 84 Seneca St., was released from jail on bail last week. It is understood she is now in Batavia at the home of friends, who are working to prove at the trial that Mrs. Schlenker was insane at the time she committed the alleged thefts. About \$150 of the \$1,500 worth of jewelry stolen has been recovered.

Benjamin Summer, 24 years old, an employe of King & Eurele, wholesale jewelers,

is under arrest here on the charge of stealing gold rings, brooches and pins of a total value of \$200. The thefts are alleged to have covered a period of two weeks. Summer came here from Cleveland, O., about three weeks ago. The firm missed the jewelry and located some of it in a Niagara Falls pawnshop. Then followed the identity of the alleged thief, who, at the Falls, had pawned the goods under the name of Robert W. Strong. Summers has been held for the Grand Jury.

Cleveland, .

Capt. R. E. Burdick sailed for Europe July 4, where he will spend six weeks in the diamond markets.

Among the jewelers visiting in this city in the past week were: W. J. Higgins, Shelby; E. N. Davis, Kent, and George F. High; Medina.

All the jewelry stores in the downtown section of the city will close at noon on Saturday during July and August. Some of those in other portions may not observe this rule strictly.

C. P. Coyne, 37 Bond St., commenced an auction sale Monday morning in order to clear out a lot of stock that has accumulated in the wholesale department, which is to be discontinued.

The Taylor building, where the Webb C. Ball Watch Co. will locate when completed, is progressing nicely now. The outside walls are all up and the front finished. Workmen are now engaged on the floors and the inside work.

Herbert W. Burdick, of the Bowler & Burdick Co., returned a few days ago from a buying trip to New York and other eastern points. Mr. Burdick states that business so far this year has been better than for the same time last year, and that the fiscal year ended a short time since was the best in the history of his house.

Some months ago two men entered the cigar store of Isaac Rosenblatt and offered to sell him five diamonds cheap. He had them examined and they were declared to be well worth the price asked. Rosenblatt bought five jewels the next day, paying \$250 for them, but later he says they were found to be paste. Last week on a warrant sworn out by Rosenblatt, Sam Richmond, a salesman, was arrested. He was later released on bail.

In an item published in THE CIRCULAR-WEEKLY last week, referring to the issuance of a charter to the Allan Jewelry Co., Charleston, S. C., and another to the James Allan Co., of the same place, the firm name of the latter was given as James Allan & Co. The Allan Jewelry Co. will conduct the wholesale business and the James Allan Co. the retail business. The officers of the retail firm are: President, James Allan; vice-president and treasurer, W. S. Allan; secretary, R. H. Allan. The following are the officers of the wholesale concern: President, James Allan, Jr.; vice-president, E. F. Miscally; secretary, C. F. Steinmeyer, Jr. As previously reported, the Allan Jewelry Co.'s capital stock is \$75,000, and that of the James Allan Co. is \$50,000.

New Stores and Enterprises.

J. A. Wolfe is a new jeweler in Sidney, Nebr.

Wm. Kaiser will shortly begin business in Millbank, S. Dak.

C. L. Hoffman, Minneapolis, Minn., is about to add a line of jewelry to his gent's furnishing business.

A Mr. Walker has completed arrangements to open a retail jewelry store in Strasburg, Sask., Can.

Cooper & Borsheim recently started the jewelry manufacturing and engraving business in the Paxton Block, Omaha, Nebr.

J. R. Jenkel will shortly open a retail jewelry store in Van Ness Ave., near Sutter St., San Francisco, Cal. He will also conduct an optical department.

Emil Zielke will start a school of instruction in the manufacture of jewelry, in conjunction with his watchmaking school, Omaha, Nebr., in the near future.

David Perreault, formerly watchmaker for the Grant Jewelry Co., Lowell, Mass., has started in business on his own account at 260 Merrimac St., in that city.

J. Hirsh & Co. is the firm name of a general store which recently began business at West Berkeley, Cal. The concern will carry a line of jewelry and novelties.

T. S. Weekley has opened a store in the Otten building, on Oak St., Hood River, Ore. Mr. Weekley will carry a line of silverware and jewelers' notions, and will make a specialty of fine watch repairing.

Articles of incorporation were granted in Camden, N. J., last week to the Larney-Barr Jewelry Co., with a capital of \$75,000. The incorporators are Anthony Larney, F. C. Barr and Henry A. Davis. The company is to do both a wholesale and retail business.

Canada Notes.

The assets of Henry Ratelle, Cornwall, Ont., insolvent, are offered for sale by tender.

A. W. Meyers, of the Canadian Jewellers & Importing Co., and T. J. Perte, both of Winnipeg, Man., have returned to that city from extended purchasing trips in the east.

Out-of-town buyers calling on the Toronto, Ont., trade last week included J. Park, Bradford, Ont.; F. R. Clark, Warkworth, Ont.; J. E. Mulligan, Omamee, Ont.; James Johnston, of Johnston Bros., Montreal, and W. T. Wherly, Harriston, Ont.

George H. Lees & Co., Ltd., have been incorporated under the laws of Ontario as manufacturing jewelers, etc., with headquarters at Hamilton, Ont., and a capital of \$100,000. The provisional directors are William Lees, George H. Lees, Stuart H. Lees, Elizabeth Lees and Herbert S. Lees.

Edgar Tripp, Canadian commercial agent for Trinidad and Tobago, West Indies, reports that Canadian jewelry is being introduced. The souvenir jewelry is pronounced better than any other that comes there, the designs being chaste and the workmanship excellent. A larger trade in ordinary silver goods would be done, but the purchasers are not satisfied with the word "sterling." The hall mark Lion is always looked for, and the people will not accept anything not so stamped as genuine.

News Gleanings.

R. I. Campbell, Golden, Colo., has sold out.

W. M. Loftus has purchased the store of Monnen Bros., Tucson, Ariz.

Chas. E. Barker, Peterson, Ia., has sold his business to S. A. St. Cyr.

G. L. Sande, Larimore, N. Dak., sustained a slight fire loss recently.

The store of Ernest Bowden, Ripley, Tenn., was recently destroyed by fire.

A. G. Lietsch, Mt. Union, Ia., has bought the stock of H. L. Tucker, New London, Ia.

Edgar Levy has succeeded to the business of Levy & L'Herisson, Natchitoches, La.

Ludwig Bondy, Davenport, Ia., has gone to Vienna, owing to the severe illness of his father.

A new plate glass front is being added to the store of Harry D. Beresford, Fort Dodge, Ia.

The wife of Henry Elbelt, St. Joseph, Mo., has gone to Germany, to pay a visit to relatives.

Paul Berens, West Hope, N. Dak., is about to erect a new building for his jewelry business.

F. C. Roder, formerly in business in Rosedale, Kans., has permanently located in Higginsville, Mo.

The jewelers of Gloversville, N. Y., are closing their stores every night in the week except Saturday during the months of July and August.

The Fred. Frick Clock Co., Waynesboro, Pa., recently shipped a large program clock to Altoona, in the same state, for the new \$300,000 Altoona high school.

L. L. Powell, formerly of 1939 Broadway, Denver, Colo., has moved to 1423 Fremont St., where, in addition to his regular retail business, he will make a specialty of fine repair work.

The retail jewelry store of Geo. A. Sites, Lake View, O., was entered July 2, by thieves, who escaped with a large amount of miscellaneous jewelry. Thus far no clue has been obtained.

From Tuesday to Saturday last week the Reed & Barton silver works, Taunton, Mass., were closed for stock taking and vacations. A large number of the employees migrated to Lakeville, Mass.

S. A. Asquith, of the retail firm of S. A. Asquith & Bro., Waterloo, Ia., has put in an equipment for polishing stones for his retail trade, having learned the business while on a trip to California.

A burglar was caught in the act of prying open the front door in the store of G. L. Shirmman, Bellingham, Wash., a short time ago, by a police officer who gave chase to the intruder, but failed to catch him.

John L. Green, proprietor of the Junction City Jewelry & Novelty Co., Junction City, Ark., has purchased the business of Constantine & Fuller, Eldorado, Ark., and will take personal charge of the latter store.

A trustee's sale of the stock of P. L. Lowenthal, Bradford, Pa., was held on Monday, July 2, and the stock of the bankrupt was sold for \$1,407.75. The first dividend will probably be declared at an early date.

Edwin F. Lilley, Milford, Mass., whose

store was burned recently, is having repair and reconstruction work pushed rapidly to completion, and will shortly have a more attractive establishment than before the blaze.

C. F. Miller, Cairo, Ill., is about to make extensive improvements in the interior and exterior of his store. A new front of gray pressed brick with a marble base will be erected and the interior will be entirely renovated.

Jerome Flannery, who has been acting as Denver correspondent of THE JEWELERS' CIRCULAR—WEEKLY since Jan. 1, 1906, left there, July 1, for New York en route for England, where he will spend the balance of the summer on a vacation trip.

E. H. Freeman, Blairstown, N. J., has sold out to John Knox, until recently in the employ of David Couse, Newton, N. J. Mr. Freeman, who had conducted the business at Blairstown for the past 25 years, will retire from active work.

At the sale of the stock of Roy R. Spencer & Co., Newark, N. Y., now in bankruptcy, about \$700 was realized. The sale was under the direction of T. Davis Prescott, trustee in bankruptcy. The claims against the estate amounted to more than \$6,000.

The store of A. M. Greer, Iowa City, Ia., was broken into recently by thieves. The exact amount of the loss is unknown. The proprietor was unable to open the safe after the robbery, owing to the fact that the thieves had tampered with the combination.

John S. Lockwood, who lived with his sister in Kansas City, Mo., took an overdose of laudanum July 4, and was removed to the general hospital. He called his sister at 1 o'clock and told her he had taken the poison. She then called for assistance. Lockwood is a jeweler, 35 years old.

B. Gerson, of Pensacola, Fla., has moved into the Brent Block, having taken two of the new stores. In addition to the present business of china, cut glass and bric-a-brac a full line of diamonds, watches, gold jewelry and silverware will be added, of which Ed Sharp, of Philadelphia, Pa., will have charge.

The P. J. Cummings Co., Attleboro, through Treasurer P. Joseph Cummings, has filed with the secretary of the Commonwealth of Massachusetts the following annual corporation report: Merchandise, \$28,661; machinery, \$20,407; cash and debts receivable, \$23,384; manufactures, \$5,612; good will, \$55,000; stock, \$100,000; accounts payable, \$736; floating debt, \$20,736; profit and loss, \$576.

Miss Emma Marguerite Girardet, the daughter of the late John Girardet, for many years a well-known jeweler of Louisville, Ky., died of asphyxiation recently at 629 E. Broadway, Louisville. It is believed that she committed suicide, and that the act was the result of unbalanced mental condition produced by continual grieving over the death of her parents. Miss Girardet was a graduate of the Louisville High School and was the niece of Matt Irion.

The charter of A. B. Griswold & Co., Ltd., New Orleans, La., granted last month, has been published in full. The capital stock of the corporation is fixed at \$150,000 (divided into 1,500 shares) of which

\$100,000 have been subscribed. Of this H. Ginder holds 996 shares and Geo. P. Griswold, A. G. Palfrey, E. L. Roane and William B. Young hold one share each. The officers are: H. Ginder, president; Geo. P. Griswold, first vice-president and manager; A. G. Palfrey, second vice-president and assistant manager; Edgar L. Roane, treasurer, and William B. Young, secretary.

Utica.

Henry Greenman, Richfield Springs, who recently went into voluntary bankruptcy, has filed an application for a final discharge and it is returnable before Judge Ray at Norwich, N. Y., July 17, at 10 A. M.

Local jewelers have signed an agreement to close their stores evenings during July and August. The stores will close at 6.30 o'clock each evening except on Mondays and Saturdays. The latter evenings have always been particularly busy ones, and the jewelers unanimously decided to keep open until the customary hour.

Abraham Hermann, an optician at 15 Court St., Watertown, has been placed under bail in proceedings begun against him to recover damages for slander. The plaintiff in the suit against him to recover \$5,000 damages is Miss Bidah Nellis, a former employe. The latter sued Hermann to recover wages she alleged were due her, and it is over this action that the alleged slanderous statements were made. The woman secured a judgment against Hermann. Then he brought a suit against her to recover a ring, and also started an action for slander against Miss Nellis' father. Hermann is also a defendant in other legal proceedings. He formerly lived in Ohio, where his wife secured a decree of divorce against him and an allowance of \$5,000 alimony. Hermann left Ohio and located in Watertown, and now Mrs. Hermann has brought suit to make the judgment of the Ohio courts against her husband the judgment of the New York State courts. The latter litigation has been noticed for trial.

Savannah, Ga.

R. Van Keuren, of R. Van Keuren & Co., was a member of the June term Grand Jury of Chatham County.

S. E. Theus, of Theus & Co., was a winner of a prize at a recent shooting contest held by the Savannah Rifle Association.

On Saturday afternoon Alexander & Edwards, attorneys, filed in the office of the Clerk of the United States Court at Savannah a schedule of the liabilities and assets of Sternberg & Co., involuntary bankrupts.

An attractive catalogue of 32 pages, bound in a green cover, has been issued by L. W. Rubenstein, 54 Maiden Lane, New York. The catalogue contains illustrations and descriptions of the emblem rings made by Mr. Rubenstein of 10-karat gold enameled in appropriate colors. He is ready to furnish electrotypes of the patterns to retailers who desire such cuts for advertising purposes. It is also announced that he is ready to furnish estimates on special patterns and to quote prices on application. If desired, the rings may be made in 14 instead of 10 karat gold.

GORHAM SILVER

SOME NOTABLE ACCESSIONS.

¶ It is now generally recognized by discerning Jewelers that there is an increasing demand on the part of the average purchaser for such small articles of silverware as, by reason of their practical utility, their decorative appearance and their moderate cost, may be regarded as suitable for gifts.

¶ The Gorham Company, therefore, have taken pains to largely, but discriminatingly, increase their line of small wares despite the fact that this has always been notable for the complete and varied nature of its character.

¶ It will now be found that for diversity of range, attractiveness of design, and excellence of workmanship it is without parallel.

Dr. Kunz's Report on Precious Stones.

THE annual report of Dr. Geo. F. Kunz, giving in detail the production of precious stones for the year just past, has just been published by the United States Geological Survey, through whose courtesy we are enabled to again give the full text of the same, the first installment commencing in the issue of July 18. This report, which will eventually form part of the Government publication known as "Mineral Resources of the United States for 1905," is somewhat smaller in form than the report of last year, but at the same time is as replete in all details in connection with the finding of precious stones throughout the world for the 12 months which it covers, as any of Dr. Kunz's previous compilations, and will be as distinctly interesting to jewelers who follow the subjects covered.

In the introduction the salient features of the report are noted in general terms, and jewelers who may have neither the time nor inclination to follow in detail all the subjects covered by the government expert will do well to read carefully this part of his work, if nothing else. On the other hand the many members of the trade who have in former years taken a deep interest in the report will find a careful perusal of the entire text will prove both instructive and profitable to them in their study of gems, as from it can be had a general review of all departments of the precious stone industry, and a collection of facts relating to gems, their discovery and use in all parts of the world that can be had from no other source.

Retail Jewelers Now AS THE CIRCULAR-WEEKLY goes Organizing.

to press, meetings are being held at many places for the purpose of forming State associations of jewelers which in turn will elect delegates to participate in the convention to form a national association, which will be held in Rochester, N. Y., Aug. 3 and 4. Among the principal State associations to be formed yesterday are those of Pennsylvania, for which a meeting was held in Pittsburg; New York, at Albany; Connecticut, at Hartford; West Virginia, at Parkersburg; Oklahoma, at El Reno, and South Carolina, at Charleston. The meeting of the State association of Illinois will be held to-day at Springfield. The opticians of Michigan will meet to-day at Detroit and the jewelers of the State begin their meeting to-morrow in the same city, while the meeting of the Ohio jewelers is scheduled for the 17th. As it is impossible to obtain reports of most of these meetings in time for this issue, the accounts will have to be deferred until the issue of July 18.

To the jewelers of all the aforesaid States, as well as those of Missouri, Massachusetts, Iowa, Wisconsin, North Dakota, Minnesota, South Dakota and Nebraska, who have already formed associations, THE CIRCULAR-WEEKLY extends best wishes for success, and hopes that the movement for organization now manifest throughout the entire trade will be given by retail jewelers generally the serious and careful consideration which a subject of this importance naturally deserves.

Retail Jewelry Business in San Francisco Continues to Increase.

SAN FRANCISCO, Cal., July 5.—Within the next three weeks many large retail jewelry stores will resume business again, and clerks and watchmakers who have been out of employment will be able to get back to their old occupations. Many of these have for the time being been engaged in other lines of work, while others have sought positions in different parts of the State.

The retail stores that have been doing business report a volume of business much in excess of the anticipations of two months ago. There is also a large amount of repair work, especially on watches and clocks, for these were thrown around quite promiscuously on the morning of April 18. There is a great deal of work being done in restoring silver tableware that has been damaged, most of this being for jewelers who kept such articles in vaults, which afforded a measure of protection.

This week will witness quite an exodus of traveling salesmen to the country districts. There are many jewelers in the interior of the State who have the interests of San Francisco so much at heart that they refuse to patronize houses in other cities, preferring to let their stock run short and wait for the establishments here to get on their feet once more in a business way. The large wholesale houses here are now all ready for trade with a fair stock of goods on hand for immediate shipment and plenty on the way.

the H. A. Kirby Co.

Archie Rutherford, who has been for a number of years a stockholder and sales manager of the H. A. Kirby Co., 13 Maiden Lane, New York, recently began a proceeding in the United States Circuit Court at Providence, R. I., where the factory is located, asking for an injunction restraining Mr. Kirby from continuing the business in a way that would violate his rights, and also asking for appointment of a receiver. Jacob Fromme, of New York, acted as Mr. Rutherford's attorney, and Mr. Kirby was represented in court by a Providence lawyer. A temporary restraining order was granted, and to-day a hearing is to take place in Providence on the motion for the appointment of a receiver.

Mr. Rutherford charges that he is the owner of one-fifth of the shares of the company's capital stock, and that Mr. Kirby has assumed absolute control of the business in violation of his rights as a minority stockholder. When Mr. Rutherford began his association with the company, it is said, its capital stock was \$150,000, and he took \$30,000 worth. Since then, it is said, the undivided profits have been used in increasing the capital stock until it amounts to \$300,000. Mr. Rutherford claims one-fifth interest in the whole.

The New York office so long in charge of Mr. Rutherford was in personal control of Mr. Kirby in the last week, and Mr. Rutherford's name was taken off the door. Mr. Kirby did not desire to make any statement further than to say that several people who had been with him for several years have seen fit to go elsewhere.

Diamonds Wanted!

He swore by the bright stars
above her.
(You know how a lover can
swear.)
How he'd love her and love her
and love her;
And the stars twinkled down at
the pair.
(You know how a star can
twinkle
When maidens to lovers confess.)
They want just one thing—A
DIAMOND RING,
"Shipped by the next express."
An assortment of precious
stones, loose or mounted; pins,
rings, brooches, etc., will be
sent to any jeweler on mem.

17 Maiden Lane, NEW YORK

In these days of high priced diamonds and close competition, a mounting that will increase the attractiveness of your diamonds is worthy of your most careful consideration, and the Arch Crown Mounting does this to the letter.

The importance of having the gem securely and perfectly set is a matter that concerns you vitally. The Complete Bearing, which alone is found on the Arch Crown Mounting, has been brought to such a state of perfection that the work of the setter is practically done in advance for him so accurately that perfect results in stone setting are always insured.

You should mount your Fall stock of diamonds in Arch Crowns, carrying an assortment for remounting customers' gems, all of which will be profitable.

Order from your jobber if more convenient, or direct from us.

Samples cheerfully sent for inspection.

Arch Crown Mfg. Co.

**ARCH CROWN MOUNTINGS
IMPROVE DIAMONDS**

New York Notes.

Elias Gordon, 401 Broadway, has gone out of business.

L. W. Sweet & Co., 37 Maiden Lane, are making alterations in their store.

A. F. Lowenthal, 37 Maiden Lane, returned from Europe this week on the *Kaiser Wilhelm II.*

Frank S. Sherry, Boston representative of Joseph Fahys & Co., has been in New York during the past week.

Jerome M. Lissauer, with R. L. & M. Friedlander, after a pleasant vacation, has resumed his trip on the road.

Max G. Ernest, 558 Columbus Ave., is a member of the July Grand Jury for New York County, sworn in last week.

Albert F. Strasburger, manager of Wanamaker's New York jewelry store, sailed Saturday for Paris on the *Philadelphia*.

Among the prominent singers at the Sangerfest, held last week in Newark, N. J., was William Hoffman, with R. L. & M. Friedlander.

John Frankel, formerly of Joseph Frankel's Sons Co., 68 Nassau St., sailed recently on a pleasure trip to Europe on *La Provence*.

Andrew Irons, formerly with the Rogers, Lunt & Bowlen Co., Greenfield, Mass., is now with his father, Joseph Irons, 16 John St., New York.

Emanuel Arnstein, of Arnstein Bros. & Co., 65 Nassau St., accompanied by his wife, left last week for a brief stay in Europe, sailing on the *Kronprinz Wilhelm*.

Herbert Cooper, of the Cooper Diamond Co., 49 Maiden Lane, accompanied by his wife and daughter, will sail July 21 on the *Campania* for a six weeks' tour of Europe.

Christian Dorflinger, senior member of C. Dorflinger & Sons, 36 Murray St., sailed June 30 on the *St. Louis* for Europe, accompanied by his grandson, Dwight C. Dorflinger.

E. Goldschmidt, of the Steel & Taylor Co., 31 E. 17th St., accompanied by his wife, is in Europe on a combined pleasure and business trip, having sailed recently on *La Provence*.

Mr. and Mrs. Alfred E. La Vigne, of Mathey Bros., Mathez & Co., announce the marriage of their daughter, Stella, to Edward Freytag on Monday, July 2, at St. George's Church, E. 16th St.

Several representatives of watch manufacturing companies who were seen this week say that they have no knowledge as to a report from Tottenville, to the effect that a new watch factory is to be established there.

Eugene A. Kennedy, of the Kennedy-Carey Co., 198 Broadway, is favorably mentioned in a syndicate letter sent out from New York by "Macaulay," in which he speaks of former newspaper men who are now succeeding in other occupations.

An interlocutory decree of divorce was granted last Thursday to Mrs. M. Mayer from her husband, D. Mayer, by Supreme Court Justice Blanchard. The Mayers were married in 1900, and separated last year. The case was tried before a referee.

Tiffany & Co. are advertising this week a reward of \$100 for the return of a circular brooch in which baroque pearls alternate with diamonds, the article having been

st, June 17, by a patron of the house while automobilizing between Tarrytown and New York.

J. Bernstein sailed Saturday on the *Roanland*, and will return Sept. 8.

Dr. George F. Kunz, of Tiffany & Co., returned Monday after a 10 days' vacation in the country.

Charles Danziger is no longer with Henry Freund & Bro., 71 Nassau St., and his trade will be looked after by Louis Freund, Leo Goldschmitt and L. M. Heymann.

The Mercantile National Bank is sending out circulars announcing its removal to the new quarters in the Western Union building, 195 Broadway, corner of Dey St.

Herman Stein, 210 Eldridge St., sent out this week an announcement that the business will be conducted after this by a co-partnership under the name of Braumstein Stein.

Lambert Bros., 968 Third Ave., are to furnish two diamond-studded watches which will be awarded by the *Daily News* in New York in a popular voting contest confined to officers of Irish societies.

Harry Rosensweig, a Brooklyn jeweler, was brought into the Adams St. Court last Friday on the charge of stealing three diamond rings from his wife Sadie, who lives at 92 Orange St. He was paroled for a hearing of the case.

Erle R. Sheppard, formerly traveling representative with Schickerling Bros. & Co., is now with the Dreyfus Mfg. Co., 89ulton St., makers of rings and gold jewelry, as its representative in Pennsylvania, New York and the middle west. He will start to-morrow on his first trip.

Henry Bohm, of the Bohm-Bristol Co., San Francisco, Cal., and the Bohm-Allen Co., Denver, Colo., who has been in New York for a week or two, making his headquarters with Joseph Frankel's Sons Co., 68 Nassau St., has returned to Denver and expects to reach San Francisco about Aug. 1.

A truck of the Tiffany Studios, while laden with antiques and stained glass, was struck last Friday by a trolley car in Long Island City, and the contents were practically demolished. The truck was returning to Manhattan from the repair factory at Corona. The street car company is expected to pay for the damages, which were considerable.

Samuel Hochhaus, well known in the diamond trade, who had been representing Valhiet & Maxwell on the road, started in business for himself Monday as a diamond importer with temporary quarters at 14 Maiden Lane. Mr. Hochhaus will make his first trip to Europe for his own business in the latter part of the month, and will sail from New York, July 28, on the *Vaderland*.

John Scheidig & Co. was last week incorporated to conduct the optical manufacturing business carried on by a co-partnership under the same style at 50 Maiden Lane. The first meeting of the incorporators will be held this week when officers will be elected. The incorporators are: S. and J. Scheidig, New York; W. A. Wirth, of New Jersey. The authorized capital stock is \$10,000.

Six scarf pins, a diamond brooch, two gold neck chains and three ladies' watches to the value of \$500 were among the arti-

cles seized by a customs inspector from the baggage of Wm. Hoffman, treasurer of the United Brewing Companies, Cincinnati, O., who was a passenger on the *Grosser Kurfuerst*, which docked in New York last Tuesday. He said that the articles were intended as presents for friends.

Early on the morning of July 4 a bullet from a revolver in the hands of a reckless celebrant struck Nathan Gans, a jewelry peddler of 241 Clinton St., while he was standing in front of his home, and was embedded in his skull. Gans, who was 63 years old, was able to walk to the Beth Israel Hospital, where the surgeon extracted the bullet, and congratulated him on his narrow escape from death.

Harry Levinson, 30 years old, a jewelry salesman employed by Louis Sonnabend, 15 Elm St., Boston, Mass., was arrested Thursday at 74 Mill St., Astoria, L. I., where he had been living with relatives. He was taken to the Tombs Police Court in New York and arraigned on the charge of grand larceny made by his employer, who accuses the salesman of taking jewelry valued at \$1,200. Levinson said that most of the jewelry had been returned to the Boston man. The salesman was held to await extradition papers.

A report from Comanche, Ia., says that L. E. Anthony, of that place, was the buyer of the large pearl recently found at Red Wing, Minn., by Wm. Bates. It was later announced, however, that Maurice Brower, 16 John St., had bought the Bates pearl, the weight being 68 grams, and not 86 grains as was reported in the western papers. Mr. Brower said that some of the stories told in the western papers of the circumstances under which the pearl was found were not quite accurate. He was informed that the shell containing this pearl was one of a bunch sold to Mr. Bates for 75 cents. The exact price that Mr. Brower will put on the pearl is not yet announced, but it is intimated that something like \$15,000 may be required to take the gem from him.

According to figures given out by New York banking corporations, which are selling the new stock of Sears-Roebuck & Co., the western mail order concern sold during the year 1905 jewelry and silverware to the value of \$1,454,452. The circulars sent out by the bankers indicate large gains in the sales of various kinds of merchandise. The object of the recent \$40,000,000 incorporation under the laws of New York, it is said, is to give the concern certain advantages in organizing subsidiary companies that cannot be had under the Illinois laws, but it is said that there is no intention of conducting business from this State as a center. According to reports, organizations of business men in several lines of trade are investigating certain phases of the mail order business with a view of blocking legislation which might give further advantages to companies of this kind.

The committee having charge of the fifth annual outing of the 24 Karat Club, which will be held Saturday, Sept. 8, has decided to hold a clam bake at Porto Peck Hotel, Long Branch, N. J., after which the usual programme of athletic sports will be engaged in. The members and guests of the club will leave New York on that date at 10 A. M., taking the Sandy Hook boat

from Pier 10, at the foot of Cedar St., and going directly to Long Branch. The military band of the First Regiment, N. G., S. N. J., has been engaged for the day, and will accompany the members down in the boat, then to the hotel, and will return with them in the evening. The usual prizes for athletic sports will be awarded and the sub-committees on the various events will be announced in the near future. Altogether about 150 members and guests are expected to participate. The committee in charge of the arrangements are John B. Wood, chairman; E. R. Crippen, Alfred Krower, James R. Gleason and Percy Savory, to whom all applications for tickets should be addressed.

Members of the Jewelers' Bowling League of New York met Monday evening of last week in order to make arrangements for the coming tournament. President C. F. Brinck was in the chair and there was a representative attendance. The time set for the several clubs to send in their applications was July 1, and Secretary A. C. Capouilliez reported the receipt of application from all the teams which participated in last year's games, with the exception of the Elgin team, which has been withdrawn, the members having decided to combine with the Cooper Diamond team, which will be entered under that name. There will, therefore, be 15 teams, the same number as last year. A committee was appointed to make up the schedules for the coming season, and this with the names of the bowlers will be issued about Sept. 1. It is expected that games will start about the middle of September. The Albion Alleys at Sixth Ave. and 23d St., New York, were selected for this seasons' tournament, and it is believed that the location will meet with general approval.

A representative of the house of Boucheron, one of the leading jewelry firms of Paris, was in New York recently and obtained a lease for a long term of years of a new building now being constructed at 590 Fifth Ave., between 47th and 48th Sts. The building, which will be a six-story marble structure, is to be ready for occupancy by Sept. 1. Boucheron is to occupy the store and basement, and will probably lease the upper floors. The structure has a frontage of 27.6 by 100 feet. It is owned by R. M. Haan, proprietor of the St. Regis Hotel. On the same block are the homes of Charles T. Cook, the president of Tiffany & Co., and Perry Belmont, while on the opposite side of the street are the residences of Helen M. Gould and the Golet family, also the Frederick Roosevelt house recently acquired by Charles A. Gardiner. On the southwest corner of Fifth Ave. and 47th St. Simon Frankel, of Joseph Frankel's Sons, is putting up a new building into which a number of jewelry houses are to move. Jewelers say that the accession of Boucheron to the Fifth Ave. colony will add to its strength as a jewelry center. The store in this city is to be a branch of the Paris establishment, and it is understood that some manufacturing will also be conducted here. While Boucheron's representative was in the city he supervised the manufacture of several special pieces of jewelry for which, it was said, he had orders from some of the Vanderbilts.

CHICAGO, WEDNESDAY, JULY 11, 1906.

No. 23.

Chicago Notes.

Reuben W. Cohen is on a trip to Minneapolis.

W. A. Fay is taking a vacation at Charlevoix, Mich.

James W. Clark spent July 4 at his native town of Haddam, Conn.

J. A. Lucas is taking a vacation at the northern Wisconsin lakes.

Miss Leila Eudaley, formerly with Loftis Bros. & Co., is now with J. F. Dailey & Co.

W. S. Sparrow, western manager for Stern Bros. & Co., is back from the Pacific coast.

A. P. Du Puis, representing E. E. Stanger, left last Saturday for the Providence territory.

Elmer A. Rich, in addition to his diamond business, is handling the Cantlose eyeglass holder.

J. A. Cunningham, with Regnell, Bigney & Co., celebrated the 25th anniversary of his marriage last Tuesday.

Creditors of the estate of the late Geo. F. Schmitt, Battle Creek, Mich., have received their first dividend of 15 cents.

J. F. Dailey & Co. have erected over their store the largest watch sign in Chicago. It is five feet high and weighs 300 pounds.

George and Fred Pettee and "Tom" Hoefer left last Saturday for a tour of the Great Lakes in a motor boat, owned by the Pettee brothers.

Ed. Fishman, for many years with the F. E. Morse Co., has severed his connection with that firm. Mr. Fishman contemplates going into business on his own account.

Harry J. Mayers, with the Emporium, San Francisco, was here last week buying goods. Mr. Mayers is general manager and has also taken Harry Jehlinger's place as buyer for the concern.

A. E. Madsen, of Rettig, Hess & Madsen, is again at his Minneapolis office after a three weeks' vacation spent at Clear Lake. J. Mark and A. Cohen, with the same firm, are on a northern trip.

Frank Behrendt, diamond buyer for Otto Young & Co., will sever his connection with that concern Aug. 1. Mr. Behrendt will thereafter represent several eastern manufacturers of gold jewelry.

Racine (Wis.) celebrated the Fourth of July by holding a reunion of the Spanish-American War veterans. A large industrial

parade, in charge of J. W. Spence, was one of the features of the day.

All of Sproenble & Co.'s salesmen have started on their Fall trips: C. L. Caliger for Michigan and Minnesota, A. Ellbogen for Indiana, J. Donnelley for the Pacific Coast and P. H. Winterberg for the east.

C. P. Kryhl, of C. P. Kryhl & Son, Santa Ana, Cal., passed through here last week on his way home after an eight weeks' tour of all the principal cities of the United States. Mrs. Kryhl accompanied him.

A Masonic silver trowel which is to travel around the earth as a symbol of brotherly love was presented to a local lodge here last week. It was on exhibition for two days at the retail jewelry store of H. W. Gilmore & Co., 504 W. 63d St.

H. C. Barker, for the past nine years with Mandeville, Carrow & Crane, will hereafter represent the western selling agency for Omega watches for which A. Max Holzheimer is the general manager. Mr. Barker starts on his first trip through his old territory Aug. 14.

Mrs. Henry Hyman, 308 W. 63d St., who has been conducting the jewelry store at that address since the death of her husband, has been appointed watch inspector for the L. S. & M. S. Railroad. Mrs. Hyman recently graduated from the Northern Illinois College of Optometry.

H. S. Aicher and F. J. Aicher, who represent the Alvin Mfg. Co., were here last week, F. J. Aicher coming from New York. H. S. Aicher was in charge of the Chicago office during the absence of W. E. Hayward, the resident Chicago manager. Both the Aicher brothers are now on their respective western trips.

H. W. Gilmore, formerly of H. W. Gilmore & Co., 455 W. 63d St., who recently sold his interest in that establishment to S. C. McKnight, has opened a new store at 504 W. 63d St., which is said to be one of the most attractive jewelry establishments in Chicago. The new concern, H. W. Gilmore & Co., is a corporation, Mr. Gilmore being president.

Charles E. Reeve leaped or fell from a window on the 12th floor of the Stewart building, Tuesday, July 3, and was instantly killed by striking a skylight on the third floor. The skylight forms the roof of the mailing department of Loftis Bros. & Co., and a panic was caused among the 200

employees at work there when they saw the man's head and shoulders protruding through the glass. S. Lindhagen was struck by a piece of iron, and Miss Emma Tiark was hurt by falling glass.

The diamond jewelry which Mr. and Mrs. Berg obtained on memorandum from Elmer A. Rich, and which was pawned with the Bauman Loan Co., has been redeemed. In addition to principal and interest the loan company received \$350 for their trouble in engaging counsel in the proceedings brought by Mr. Rich. Bauman's suit against Mr. Rich for \$50,000 damages has been dropped. All of the pawned goods have been redeemed except those secured by Mr. and Mrs. Berg from A. Lipman.

Among the buyers in Chicago last week were: R. E. Lincoln, Plano, Ill.; "Sam" Diamond, of Maas, Hirschberg and Diamond, Sterling, Ill.; Jas. G. Mines, Wayne, Nebr.; Harry J. Mayers, with the Emporium, San Francisco, Cal.; N. V. Cole, Michigan City, Ind., recently retired; Albert Brown, of Downey & Brown, Lincoln, Ill.; Will Haseltine, of Haseltine Bros., Kokomo, Ind.; M. E. Barnes, of Barnes & Foster, Spencer, Ind.; J. W. Spence, Racine, Wis.; C. P. Kryhl, of C. P. Kryhl & Son, Santa Ana, Cal.; Mr. and Mrs. John M. Bigwood, Terre Haute, Ind., and David Goldman, Milwaukee, Wis.

The delegates of opticians and jewelers from Chicago and surrounding territory will leave over the Grand Trunk Railroad at 11.05 Sunday morning, July 29, for the Rochester convention. The round trip fare is \$18.80 with the privilege of return in from Buffalo to Detroit by boat and stop-over privileges at Buffalo and Niagara Falls. Those purchasing tickets from points west of Chicago will see that their tickets read from Chicago, east over the Grand Trunk Railroad, and should not fail to ask for a certificate before leaving home. Those desiring to go with the Chicago party and who wish to engage a berth for the trip should write to A. G. Larsen, care of the Julius King Optical Co., Chicago Savings Bank building, this city.

Frank Killgore, Caldwell, Kans., contemplates selling out and moving to Washington, to be near his parents, who live in that State.

To the Jobbing Trade.

A WINNING COMBINATION

Direct Importers of Diamonds
and Manufacturers of Diamond
Mountings of every description

San Francisco.

The California Watch Case Co. is now located on O'Farrell St., near Larkin St.

The Golden West Jewelry Store, located before the fire at 8½ Stockton St., is now established at 1645 O'Farrell St.

J. R. Jenkel will open a jewelry store on Van Ness Ave., near Sutter St., within a few days and will also conduct an optical department.

Henry Bohm, of the Bohm-Bristol Co. San Francisco, and the Bohm-Allen Co. Denver, Colo., has returned to Denver and will be here about Aug. 1.

Paul V. Garin has just moved into a handsome store on Fillmore St., near Geary St., and although the fittings are not all in place he is already doing considerable business.

Ralph Friedman now has an office with Carran & Green, at 1510 Buchanan St. Quite a colony of jewelers has sprung up here, and this section is becoming known as a jewelry center.

S. Sternheim & Son, formerly located on Market St., where they carried on both retail and a wholesale business, are now on Sutter St., near Van Ness Ave., where a full line of silverware is being carried.

William Glindemann, formerly located in the Examiner building, at 3d and Market Sts., is now at 1532 Fillmore St., where he is carrying his usual high grade goods, and in addition has a well-fitted optical department.

The handsome new store of Hammett & Field, at Eddy St. and Van Ness Ave., was formally opened to the public last week, the first store of this kind in the new retail district. A large stock of goods is now on display, and this firm is carrying the same high grade lines as before and finds that the demand is for the best. The manufacturing department supplies the trophies and medals for the Fourth of July field meet in Golden Gate Park.

Rothschild & Hadenfeldt, formerly located on Sutter St., this city, are now in Oakland. They have secured a satisfactory site for a factory there, at 28 San Pablo Ave., and have a large amount of machinery, tools, etc., coming from the East. When completed this factory will be by far the largest and best equipped of any establishment of its kind on the Coast, and Rothschild & Hadenfeldt will be in a better position than ever to carry on the manufacturing business.

Work is progressing rapidly on Shreve & Co.'s new store, at Van Ness Ave. and California St., but it will be several weeks before it can be finished and ready for occupancy. There is also a stock of goods on hand in the building at Post St. and Grant Ave., and the place is becoming quite a rendezvous for tourists. The lease for this building is now being taken down and as soon as insurance matters are settled the structure will be put in shape once for occupancy.

The Missouri, Kansas & Texas Railway Co., of Texas, has sent out notice announcing that Webb C. Ball, Cleveland, O., has been appointed general time inspector, with headquarters at Dallas, Tex. The appointment dates from July 1.

Kansas City.

Prof. M. M. Thomas, Medford, Okla., has enrolled with the Southwestern Optical College.

J. H. Whitney, with the Edwards & Sloane Jewelry Co., has just returned from a fishing and hunting trip to Fargo, N. Dak.

C. E. Banta, Pittsburg, Kans., and wife, were visitors at the home of E. S. Villmoare, traveler for the C. B. Norton Jewelry Co., last week.

J. C. Davis, a Florida optician, who took an optical course in this city, three years ago, is back here on a visit for a couple of months.

J. F. Hibbard, Amsterdam, Mo., was in the city last week, and announces that he will move to Mound City, Mo., where he will engage in the same line of business.

W. M. Jaccard, of the Jaccard Jewelry Corporation, has just returned from his buying trip to Europe, and states that the company expects to move into the new location by Sept. 15.

George Krieke, of the manufacturing firm of the Hassig & Krieke Jewelry Co., has just returned from Emporia, Kans., where he and a large party of friends went on a Fourth of July fishing trip, as the guests of the local jewelers.

Samuel M. Bannister, at one time engaged in the retail jewelry business, and also for several years connected with his brother in the publication of the *Saturday Herald* in this city, died recently in Los Angeles, Cal. He leaves a widow and one son.

Travelers who have called on the jewelry trade all over the west state that there is a heavy demand for young men who are good manufacturing jewelers and watch-makers. Retailers, it is said, are unable to find enough competent men in this line of work.

L. E. Atterbury, Marshall, Okla.; A. J. Roberts, Chanute, Kans., and George Casper, Kansas City, Mo., have enrolled with the Kansas City Polytechnic Institute. Ed. Levin, who has been taking a course there, has finished and gone to St. Joseph, Mo., where he takes a position in his father's store.

E. H. Hemenway, formerly of Stoneham, Mass., who took a course in optics at the Southwestern Optical College a few years ago, and has since that time located in western Kansas, was in this city last week, on his way back to Massachusetts, where he will locate permanently in his profession.

The front window in the retail jewelry store of Grim & Smith was broken one night last week, and jewelry and diamonds valued at about \$1,000 were taken. In the rush of closing the store the night before one of the proprietors overlooked the goods in the window, and they proved too big a temptation to the outsider before morning.

The following out-of-town jewelers were in this city last week: E. R. Moses, of E. R. Moses Mercantile Co., Great Bend, Kans.; I. Eller, Richmond, Mo.; George A. Young, Moberly, Mo.; E. C. Banta, Pittsburg, Kans.; F. W. Galer, Nowata, Okla.; A. R. Kane, Baxter Springs, Kans.; E. A. Durlinger, Burrton, Kans.; C. B. Libby,

Weir City, Kans.; C. A. Clement, Springfield, Mo.; F. C. Roder, Higginsville, Mo.; M. B. Gordon, Braymer, Mo.; Mr. Pettit, of Kelly & Pettit, Bonner Springs, Mo.; W. A. Currant, Nickerson, Kans.; J. A. Allison, Rolla, Mo.; F. S. Hester, Lawrence, Kans.; E. M. Crelin, Chillicothe, Mo.

C. P. Kionka, of the firm of Kionka & Kionka, has just returned from his trip through Minnesota and Wisconsin. Coming home he stopped off in Waterloo, Ia., long enough to make a fishing trip with O. J. Ludwig, the local jeweler, in his launch. He was also entertained, while in Omaha, by the Ak-Sar-Ben aggregation, in their club rooms.

Indianapolis.

J. H. B. Ness has opened a repair shop in North Indianapolis. He is located at the corner of Clifton and 27th Sts.

A peculiarly constructed clock in the display window of F. M. Herron, North Pennsylvania St., drew scores of passers-by to the show window last week.

While in Portland, Ore., recently, Charles Bernloehr, of Chris. Bernloehr & Bros., visited the store of Yeager Bros., who formerly had a store at La Porte, Ind., and were frequent visitors to this city.

Berne B. Cohen, of H. Cohen & Sons, was a candidate before the Marion County legislative convention recently for the nomination of representative, but was defeated. Harry E. Cohen, of the same firm, will go to New York, about Aug. 1, to purchase Fall and holiday goods.

Charles Mayer & Co. recently had a display of cut glass made by the Wright Rich Cut Glass Co., of Anderson. Glass was shown in four different stages, beginning with the plain or blank glass, and ending with the finished and polished piece. The display attracted marked attention.

J. H. Reed has been appointed official watch inspector for the Pennsylvania lines. He holds this position with the Vandalia also. Mr. Wilcox, saleswoman for Mr. Reed, has returned from a three weeks' visit in New York. Harry J. Reed is in Georgia, where he may accept a position.

Charles B. Dyer recently turned out a handsome loving cup for the Indiana High School Athletic Association. The cup was 13½ inches high and was beautifully engraved. John A. Dyer, manager of the repairing department of Charles Mayer & Co., is building a handsome home in North Alabama.

Henry A. Winn, who has had a store in Brightwood for several years, has opened a new store in the Pembroke Arcade. Mr. Winn has just been appointed official watch inspector for the Indianapolis Southern, a new railroad just opened up for traffic by the Illinois Central. He will continue his Brightwood store.

A local paper had an extended article recently on the hunting experiences of J. C. Sipe and Mrs. Sipe, who have just returned from a protracted stay in Mexico and Colorado. As trophies of the chase to add to his already large collection Mr. Sipe brought home the skins of one lion, seven bears, eight wildcats, a snowshoe lynx, and other wild animals. The largest bear skin was nine feet long. Mr. Sipe has had the wildcat skins made into a sleigh robe.

St. Louis.

Mr. Crompton returned to St. Louis July 5 from a week's visit to Chicago.

J. Boydsen, Albia, Ia., accompanied by his wife, was in this city last week on business.

Mr. Ahle, of the Whelen-Ahle-Hutchinson Jewelry Co., returned last Friday from a fortnight's fishing trip on the Gasconade River, in Missouri.

S. H. Bauman, of the Bauman-Massa Jewelry Co., returned from Europe last week, having arrived at New York Friday. The salesmen of this firm are preparing to go out on the road next week.

Moses Strauss, of the L. Bauman Jewelry Co., attended the funeral of August Fister, a young jeweler of St. Charles, Mo., who died at the age of 30, July 2, and was buried July 6 at St. Charles.

Mark Eisman, traveling representative of the L. Bauman Jewelry Co., started for a six months' tour of the south July 9, going from St. Louis direct to Birmingham, Ala., which he is making his headquarters.

Edwin Hale, traveling representative for William Weidlich & Bro., returned last week from a business trip and will leave for his regular tour of the south this week. E. S. Gregory, also a traveling salesman for this firm, will leave this week for Kansas and Nebraska. William Weidlich was expected to return from Connecticut yesterday.

A party of employes of the Mermod, Jaccard & King Jewelry Co. left Saturday night for a fishing trip on the Cass River, at Stonewall, Ark. In the party were Lee Schumm, Walter Lauman, Jos. Rodgers and Elmer Puellman. They brought four tents with them and several of the members of the party were accompanied by members of their families.

Among the visiting jewelers who called on the trade here last week were: H. W. Foerste, Okawville, Ill.; A. P. Linn, Carbondale, Ill.; Enno Dick, New Baden, Ill.; J. J. Lysakowski, Lebanon, Ill.; Mr. Anderson, of the firm of Bransford & Anderson, Union City, Tenn.; W. H. John, Pacific, Mo.; Fred Simon, Collinsville, Ill.; J. Beilenson, Helena, Ark.; C. F. Gardner, Sorrento, Ill.

The employes of the Mermod, Jaccard & King Jewelry Co. gave a successful picnic at Ramona Lake, June 30. Special cars brought the picnickers to the grounds, and the afternoon's programme consisted of a speech, athletic events and a baseball game between the married and the single men. The athletic events were won by the following: Fifty-yard dash for boys, Edward Pentz first, George Hazzard second; 50-yard dash for men, Albert Riesen; 50-yard dash for girls, Bertha Burkel; egg and spoon race, Miss Lilly Wonderley; 100-yard dash for men, Albert Riesen, who made it in 11 flat; 75-yard dash for men, Frank Hassner first, Thos. Kinsella second, Mr. Kinsella's weight being 250 pounds; nail-driving contest, Miss Gussie Starr; three-legged race, Fred Harnagel and Gus Schuerman. The prizes were umbrellas, military brushes, cuff links and bracelets. Owing to the delayed state of alterations in this store the auction sale has been continued until the improvements have been completed.

Cincinnati.

Edgar Fox, of Lindenberg & Fox, has left on his regular trip north.

Frank Herschede, of the Frank Herschede Co., is ill with typhoid fever.

S. Lindenberg, of Lindenberg, Strauss & Co., leaves this week on a business trip east.

E. T. Thompson, formerly of Tiffin, O., is now with Joseph Mehmert as watchmaker.

J. C. Miller, of the Miller Jewelry Co., has started on a trip through Pennsylvania and New York.

A. Herman, of Herman & Loeb, has returned from a stay in Germany, greatly improved in health.

Edward Albert, of the firm of Albert Bros., left this week for a three weeks' stay at Hot Springs, Va.

John C. Daller, Sr., manager of the Clemens-Oskamp Co., spent last week in camp on the Miami River.

Mr. Conroy, buyer for the Geo. W. Meyer Jewelry Co., Chattanooga, Tenn., was here last week visiting friends.

E. J. Morris, manager for the Loring-Andrews Co., has been enjoying a Summer's outing at Clark's Lake, Mich.

Burton Fox, of Fox Bros. & Co., has had plans perfected for a handsome new house which he will soon erect in Avondale.

E. E. Elsbach, manager for Hahn & Oppenheimer, has returned to business, after suffering from an attack of typhoid fever.

Sam Wagner, with George Simper, is expected to return this week from Europe, where he made a tour among the principal cities.

Charles Sieglitz, Vevay, Ind., was here last week to accompany his son home. The latter has fully recovered from an operation for appendicitis.

The sympathy of his friends in the trade was extended, last week, to J. C. Holdersbach, Findlay St., whose son, the past week, died of heart trouble.

Cincinnati friends of L. W. Sturdevant, of Newark, O., received word, last week, that he had suffered serious injuries in a recent street car accident.

Jonas Wise, of Frohman & Co., has started on a western trip, and B. S. Newman

has returned from a pleasure tour in the east to make his southern business trip.

Fred G. Gruen, of D. Gruen, Sons & Co., and his bride are due in New York July 14 on the *Kaiserin Augusta Victoria*, on which they return from their honeymoon spent abroad.

Mr. and Mrs. Frank Maier, Bowling Green, Ky., were in town on business last week. E. R. Matters, Neosho, Mo., with his bride, also passed through here, en route to the east.

John A. Herschede, of the Herschede Hall Clock Co., is making a 10 days' stay at the furniture exhibition at Grand Rapids, where the company has an exhibit of clocks under the management of Walter Herschede.

Among the out-of-town buyers here, last week, purchasing stock, were: Philip Hoar, Aurora, Ind.; J. G. Irwin, Harriman, Tenn.; Mr. Metzger, Lexington, Ky.; G. F. Gallup, Catlettsburg, Ky.; Mr. Davis Jackson, O.; C. A. Gossard, Washington C. H., O.

Oscar Keck, of the Herman Keck Mfg. Co., sailed yesterday on the *Kaiser Wilhelm der Grosse* for Europe. Eugene Mahy, foreman of the diamond cutting factory of this company, with all the force of this department, July 30, enjoyed a banquet in the club house at Chester Park and also attended the opera in the evening.

Pacific Coast Notes.

H. W. Arnstine, Cleveland, O., was a recent visitor to the trade in New Mexico.

C. H. Wright, Eureka, Cal., is building a large new residence at the corner of H and 13th Sts.

B. Hartfield, Anaheim, Cal., is preparing to move into the building about to be vacated by Hussman Bros.

C. Reimer, Arcata, Cal., and Miss Laura Norton, of McKinleyville, were married last week, and are making a brief visit to Eureka.

O. G. Tullis, Santa Monica, Cal., will move his stock, about Aug. 1, from his present location to 233 3d St., the store formerly occupied by A. M. Montgomery. Mr. Tullis has taken a long lease and will remodel the front.

Minneapolis and St. Paul.

Mr. Noble has resigned his position with Morsman & Feagans, St. Paul.

The Gophir Diamond Co. has opened newly furnished offices at 391 Robert St. St. Paul.

A. O. Holmes has started in business on Plymouth Ave., North Minneapolis.

A new retail store is about to be opened for business on Lake St., near Hennepin Ave., Minneapolis.

T. A. Shirley, St. Paul, who was recently burned out in the Ryan annex, has resumed business at 307 Baltimore Block.

George W. Wooley and W. E. Mowrey watchmakers for the trade, have reopened in their old quarters at 404-6 Ryan annex St. Paul.

The Minneapolis School of Watchmaking and Engraving has completed its reorganization and will continue its business along the same lines as hitherto.

Arthur Anderson and Gus Anderson have left S. H. Clausin & Co., Minneapolis. Victor Sax and Carl York succeed them. A. A. Schaeppi is away on a vacation.

The Ryan annex building, St. Paul, which furnished office room for a number of jewelers, is to be rebuilt as soon as possible. Plans for the work have been prepared.

C. F. Yeager, manager of the Twin City Jewelry Mfg. Co., St. Paul, has reopened in the old quarters on the third floor of the Ryan annex, his apartments not having been damaged badly by the fire.

Kirchner & Renich, Minneapolis, have enlarged the space occupied by their manufacturing jewelry business and added three more men to their force: George Metzler, a trade watchmaker, Carl Swanson silversmith, and John Lewis, platinum worker.

Several cheap watches and some clothing were stolen recently from a second-hand store at 213 First Ave., S., Minneapolis, owned by Hans A. Cumfeld. The thieves had pushed in one of the front windows with their elbows or knees and through the aperture thus made had effected an entrance.

TRADE MARK.
